CENTRAL AMERICAN COMMON MARKET—CACM

Established in 1960 under the aegis of the Organization of Central American States (ODECA).

MEMBERS

Costa Rica Guatemala El Salvador Honduras Nicaragua

ORGANIZATION

CENTRAL AMERICAN ECONOMIC COUNCIL

(Consejo Económico Centroamericano—CEC)

Created by the General Treaty of Central American Economic Integration, the Council consists of the Ministers of Economy of the member states and meets as often as necessary or at the request of one of the contracting parties in one of the five capitals

EXECUTIVE COUNCIL

(Consejo Ejecutivo del Tratado General—GETG)

Consists of one government delegate and one alternate from each member state. Meetings are convened by the Permanent Secretariat or at the request of the contracting parties. Its function is to implement the measures necessary for the fulfilment of the terms of the General Treaty, which provides for the gradual realization of a Central American Customs Union.

PERMANENT SECRETARIAT

(Secretaría Permanente de Integración Económica Centroamericana—SIECA)

The Permanent Secretariat was set up as the administrative arm of the Economic Council and the Executive Council. It supervises the correct implementation of the legal instruments of economic integration and carries out relevant studies.

4a Avenida 10-25 Zona 14, Guatemala City, Guatemala

Secretary-General: Dr. CARLOS MANUEL CASTILLO (Costa Rica)

Banco Centroamericano de Integración Económica (BCIE)

(Central American Bank for Economic Integration) P.O. Box 772, Tegucigalpa, Honduras, f 1960, started operations 1961, capital \$40 million; available resources, including loans \$207.7 million, to finance public and private development projects, particularly relating to industrialization and infrastructure, to administer the newly established Central American Integration Fund for regional infrastructure projects, to which each CACM member is contributing \$2 million. Meeting of Board of Governors, January 1969, decided to increase capital subscription of Bank to \$60 million, to be contributed in equal parts by each member country. Pres. Dr. ENRIQUE ORTIZ C. (Honduras), Vice-Pres. RODOLFO SILVA (Costa Rica), Sec. ANTONIO MEMBREÑO M., publ. *Annual Report*.

Up to the end of January 1968 the BCIE had granted loans amounting to US \$112 million, which were allocated as follows:

Country	Percentage of Total
Guatemala	19.6
El Salvador	17.1
Honduras	20.3
Nicaragua	25.2
Costa Rica	17.8
	100.0

FUNCTIONS

The Central American Common Market was established under the Tratado Multilateral de Libre Comercio e Integración Económica Centroamericana and the Tratado de Integración Económica Centroamericana. It visualises the eventual elimination of all tariffs and barriers between members, and the establishment of a common external tariff for the rest of the world. So far practically all internal barriers have been removed and agreement has been reached on 98 per cent of the items in the regional customs

classification, uniform tariffs now apply to 87 per cent of these items and the others are to be equalized over a five-year period. Intra-regional trade has increased from \$34 million in 1960 to \$259.2 million in 1968.

It is expected that there will be a common customs administration by 1970 and further goals include a unified fiscal policy, a regional industrial policy and co-ordinated regional policies in public health, labour, education, transport and agriculture.

CENTRAL AMERICAN INTEGRATION

1952 Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua established the Central American Economic Co-operation Committee (CCE) to:

1. Establish a common market
2. Integrate industrial development.
3. Co-ordinate their agricultural economies

1954 Establishment of Central American Advanced School for Public Administration, San José, Costa Rica.

1956 Establishment of Central American Research Institute for Industry (ICAITI) in Guatemala City.

1958 Agreement on the Central American Agreement for Industrial Integration signed.

Multilateral treaty on Central American Free Trade and Economic Integration signed, providing free trade for products representing one-third of inter-Central American trade.

TREATIES AND AGREEMENTS

TREATIES

TRATADO MULTILATERAL DE LIBRE COMERCIO E INTEGRACIÓN ECONÓMICA CENTROAMERICANA

Signed in Tegucigalpa in 1958 by all members of ODECA, except Costa Rica who joined in 1962. For the equalisation of Customs duties between the members. All duties were removed from 237 groups of regionally produced commodities when the Treaty came into force and will be extended to include all regionally produced goods in the next ten years.

TRATADO DE INTEGRACIÓN ECONÓMICA CENTROAMERICANA

Signed in 1959 by all members of ODECA except Costa Rica who joined in 1962. In July 1962 the members signed agreements establishing uniform tariffs on more than 95 per cent of all products entering the area.

TRATADO DE ASOCIACIÓN ECONÓMICA

Signed in February 1960 by El Salvador, Guatemala and Honduras, and came into force in April 1960. Tariffs were then removed on 95 per cent of all goods traded between the members, and most remaining tariffs had been removed by June 1966. At a later stage restrictions on the movement of capital and labour will be removed.

TRATADO DE INTERCAMBIO PREFERENCIAL Y DE LIBRE COMERCIO

Signed by Costa Rica, Nicaragua and Panama in 1961 and ratified in 1962, to speed economic integration through tariff reductions between members.

OTHER AGREEMENTS

Convention on Integrated Industries: signed June 1958, provides that special monopoly status be given to an individual enterprise in each industry, to be established in one member country with a view to exporting to the rest. The operation of this convention has been limited and, to date, only two integration industries have been set up—a tyre factory in Guatemala and an insecticides plant in Nicaragua.

Special System of Promotion of Productive Industries: signed January 1963, this system uses tariff regulations to encourage projects requiring heavy investment, with the limitation that such projects must produce at least half the total of the regional demand.

Convention of Uniform Fiscal Incentives for Industrial Development: signed in July 1962, the Convention provides for a wide range of benefits to be applied to various categories of industries in Central America.

Agreement to establish the Central American Monetary Union: signed by the Governors of the Central Banks in 1964. The Monetary Union is not yet effective; it involves the alignment of foreign exchange and monetary policies and the operation of a common currency (Central American peso at par with the U.S. dollar).

Treaty on Telecommunications: signed in April 1966 in Nicaragua, El Salvador, Guatemala and Honduras.

CENTRAL COMMISSION FOR THE NAVIGATION OF THE RHINE

Palais du Rhin, Strasbourg, France

Set up by the Congress of Vienna in 1815 to ensure free movement of traffic and equal river facilities for vessels of all nations on the Rhine

MEMBERS

Belgium
France

German Federal Republic
Netherlands

Switzerland
United Kingdom

ORGANIZATION

COMMISSION

Chairman: YVES DEVADDER

General: The overall function of the Commission is to enable member Governments to co-ordinate inland waterway policy and to supervise the application of the Convention (*see below*). It meets twice a year (occasionally more often) in full session. Each member state provides between two and four commissioners with one or two substitutes. Decisions are taken by unanimous agreement.

ADMINISTRATIVE CENTRE FOR SOCIAL SECURITY

Set up to apply the 1950/1961 Agreement on social security of Rhine boatmen. Members: Belgium, France, German Federal Republic, Netherlands, Switzerland.

TRIPARTITE COMMISSION FOR LABOUR CONDITIONS

Set to apply the 1954/1963 Agreement on labour conditions of Rhine boatmen. Members: Belgium, France, German Federal Republic, Netherlands, Switzerland.

SECRETARIAT

Secretary-General: R. DOERFLINGER (France)

Chief Engineer: O. SCHOPPE (German Federal Republic)

FUNCTIONS

Navigational Security. The Commission draws up and executes rules for navigational signals and routes, for the construction and loading of boats, for minimum numbers of crew and for carrying of dangerous goods.

Customs. Customs regulations have been simplified and standardized.

Court of Appeal. A Chamber of Appeal judges for criminal and civil cases involving Rhine traffic.

Hydrology. The Commission gives navigational approval to plans of bridge and barrage construction, and assesses other hydro-technical projects.

Research. The Commission undertakes study voyages from time to time.

CENTRAL TREATY ORGANIZATION

PACT OF THE CENTRAL TREATY ORGANIZATION

(February 24th, 1955)

Article 1

Consistent with Article 51 of the United Nations Charter the High Contracting Parties will co-operate for their security and defence. Such measures as they agree to take to give effect to this co-operation may form the subject of special agreement with each other.

Article 2

In order to ensure the realization and effect application of the co-operation provided for in Article 1 above the competent authorities of the High Contracting Parties will determine the measures to be taken as soon as the present Pact enters into force. These measures will become operative as soon as they have been approved by the Governments of the High Contracting Parties.

Article 3

The High Contracting Parties undertake to refrain from any interference whatsoever in each other's internal affairs. They will settle any dispute between themselves in a peaceful way in accordance with the United Nations Charter.

Article 4

The High Contracting Parties declare that the dispositions of the present Pact are not in contradiction with any of the international obligations contracted by either of them with any third state or states. They do not derogate from, and cannot be interpreted as derogating from, the said international obligations. The High Contracting Parties undertake not to enter into any international obligation incompatible with the present Pact.

Article 5

This Pact shall be open for accession to any member state of the Arab League or any other state actively concerned

with the security and peace in this region which is fully recognized by both of the High Contracting Parties. Accession shall come into force from the date of which the instrument of accession of the state concerned is deposited with the Ministry of Foreign Affairs of Iraq.

Any acceding State Party to the present Pact, may conclude special agreements in accordance with Article 1, with one or more states Parties to the present Pact. The competent authority of any acceding State may determine measures in accordance with Article 2. These measures will become operative as soon as they have been approved by the Governments of the Parties concerned.

Article 6

A Permanent Council at Ministerial level will be set up to function within the framework of the purposes of this Pact when at least four Powers become parties to the Pact. The Council will draw up its own rules of procedure.

Article 7

This Pact remains in force for a period of five years renewable for other five year periods. Any Contracting Party may withdraw from the Pact by notifying the other parties in writing of its desire to do so, six months before the expiration of any of the above mentioned periods, in which case the Pact remains valid for the other Parties.

Article 8

This Pact shall be ratified by the Contracting Parties.

except in the case of doubt when the English text shall prevail.

By the supply of experts and the provision of technical training to students from South and South-East Asia and the supply of special equipment for training and research

From 1950 to December 1967, 52,329 students had received technical training and 10,793 experts and equipment to the value of \$342.8 million had been provided.

During 1967, 6,845 students received training, 1,262 experts were sent out, value of equipment supplied \$47.3

million, total value of co-operation activities from the inception of the Plan to December 1967 over \$990 million, of which 19 per cent was spent on trainees, 46 per cent on experts and advisers and 35 per cent on technical equipment.

Of the 6,845 training places provided in 1967, the United States is the major donor country, providing 3,491 places, i.e. 51 per cent of the total. The United Kingdom (801) is second with 12 per cent while Japan (745) is third

COLUMBIA RIVER TREATY

PROJECTS

Three storage reservoirs to be built and operated in Canada

Duncan: on Duncan River, completed July 31st, 1967, Storage 1.4 million acre feet

Arrow: on Columbia River, completed October 1968, Storage 7.1 million acre feet

Mica: on Colombia River, to be completed by April 1st, 1973, Storage 12 million acre feet, ultimate generating

capacity 2 million kilowatts, generating plants will also be built downstream from Mica at Downie, Revelstoke and Murphy, with a combined capacity of 1.9 million kilowatts

The U S A has exercised the option to build and operate one storage reservoir

Libby: on Kootenai River, to be completed by 1974, Storage 5 million acre feet, Capacity 840,000 kilowatts

FINANCE

The three Canadian dams are financed by revenue from the U S A, derived as follows

Canadian Entitlement Purchase Canada sold, for a period of thirty years from the completion of each project, her half-share of the additional downstream power produced by the treaty projects. The sum of \$253.9 million in U S funds received from the sale was transferred by Canada to the Government of British Columbia to be used for constructing the three dams

Flood Control Benefits As the storage reservoirs come into operation, U S A will pay Canada a total of \$64.4 million in U S funds for flood control benefits, and additional amounts if further flood control is required. By October 1968, \$63.2 million had been paid on account of Duncan and Arrow projects

CARIBBEAN FREE TRADE ASSOCIATION—CARIFTA

Georgetown, Guyana

The Caribbean Free Trade Association, established by Antigua, Barbados and Guyana in January 1967, aims at a gradual reduction of customs barriers and the free interchange of labour forces within the region.

MEMBERS

Antigua	Guyana	St. Lucia
Barbados	Jamaica	St. Vincent
Dominica	Montserrat	Trinidad and Tobago
Grenada	St. Christopher-Nevis-Anguilla	

ORGANIZATION

In August 1967, technical experts met in Georgetown, Guyana, to discuss the measures required to bring about regional economic integration in the Caribbean, and the governments of Antigua, Barbados and Guyana agreed to establish a Caribbean Free Trade Area. The meeting recommended that CARIFTA should form the basis of a wider free trade area and during 1968 a further eight members were admitted. It was decided that on July 1st, 1968, all import duties and quantitative restrictions should be removed on all products trade among Caribbean member countries.

The Agreement signed in May 1968 aims at promoting trade expansion and diversification within the area, as well as encouraging the economic development of member countries. To achieve these goals, it provides for the immediate removal of all tariffs on trade among members, with the exception of certain manufactured goods included in a special Reserve List. The more-developed member countries, Trinidad and Tobago, Barbados, Guyana and Jamaica, will remove duties on imports from CARIFTA of these products over a five-year period. The Agreement also provides for incentives for the establishment of industry within the region and for agricultural development through protection from external competition. The Agricultural Marketing Protocol lists 21 commodities which may not be imported from sources outside the free trade area until all internal supplies have been exhausted.

At the meeting held in May 1968 it was also decided to establish a Caribbean Development Bank (*see below*).

The summit conference held in Port-of-Spain in February 1969 reaffirmed the decision to site the Bank in

Barbados, in spite of Jamaica's opposition to the proposal.

Initial discussions on the establishment of a common external tariff also took place. Arrangements were made for the following studies to be carried out: rationalization of agriculture (CARIFTA Secretariat); establishment of industries on the smaller islands and regional policy of incentives (ECLA); foreign investment (University of the West Indies, Jamaica).

Secretary-General: F. L. CROZIER.

CARIBBEAN DEVELOPMENT BANK

The Bank, inaugurated in January 1970 in Nassau, will begin operations early in 1970 with an equity capital of \$50 million. Regional governments are to hold 60 per cent of the Bank's capital, and the remaining 40 per cent is to be provided by non-regional governments—Canada, and the United Kingdom. The regional members of the Bank include all CARIFTA member countries plus the Bahamas, British Honduras, the British Virgin Islands, the Cayman Islands and the Turks and Caicos Islands.

The aims of the Bank are to stimulate economic growth and development of the Caribbean region by assisting regional members in the co-ordination of their development programmes, mobilizing additional financial resources from within and outside the region, providing technical assistance, promoting public and private investment in development projects. A proposed \$20 million soft-loan fund will provide resources for approved infrastructure projects.

President: Sir ARTHUR LEWIS.

MIGRATION

Large-scale emigration from the United Kingdom is directed mainly towards the older countries of the Commonwealth, Canada, Australia and New Zealand. Immigration is mainly from the older Dominions, the West Indies, Cyprus, India, Pakistan and West Africa. In 1962 the end to free entry of Commonwealth citizens was brought about by the Commonwealth Immigrants Act, which restricts entry to those having evidence of employment prospects or means to support themselves, restrictions can also be imposed on medical or security grounds. There is no immigration control over travel from the non-Commonwealth country of Ireland.

Entry into Canada for United Kingdom citizens, has, since 1961, been restricted to those having assured jobs or satisfactory prospects of employment for other Commonwealth citizens each case is considered on its merits but coloured persons must have a sponsor. Australia allows unrestricted entry for United Kingdom citizens, no coloured person is permitted to take up permanent residence, New Zealand amended her legislation in 1961, so that all persons, including United Kingdom subjects, require an entry permit.

RECIPROCAL SOCIAL SECURITY

No overall scheme of Social Security exists covering the whole of the Commonwealth. The following reciprocal schemes are in operation:

United Kingdom-Australia and United Kingdom-New Zealand: old age widowhood, orphanage, sickness, hospitalisation, invalidity and unemployment benefits, family allowances.

United Kingdom-Canada: unemployment and retirement benefits, family allowances.

United Kingdom-Malta: old age, widowhood, orphanage, sickness, unemployment and industrial injuries benefits.

United Kingdom-Cyprus: old age, widowhood, orphanage, sickness, maternity, unemployment and death benefits.

ECONOMICS AND TRADE

Since 1959 official economic co-operation has been co-ordinated in the Commonwealth Economic Consultative Council. The Council generally meets at the level of Finance Ministers each year before the meetings of the International Monetary Fund and the International Bank for Reconstruction and Development. In 1966 there was also a meeting of the Council at the level of Commonwealth Trade Ministers, at which it was decided to instruct the Commonwealth Secretariat to explore the feasibility of a Commonwealth Market Development Fund to assist developing member countries in the technique of export promotion. A conference was accordingly held in Nairobi in May 1967 on co-operation in planning, Commonwealth assistance and trade promotion.

A Commonwealth conference on the problems facing the tourist industry in member countries was held in Valetta in November 1967.

COMMONWEALTH PREFERENCE

Commonwealth Preference is a system of tariff preferences operating between most of the Commonwealth territories. Preference is granted by levying a customs duty on all imports from foreign countries and a lower rate or none on imports from the Commonwealth.

The present system dates from the Imperial Economic Conference, Ottawa, 1932. By the 1947 UN General Agreement on Tariffs and Trade (GATT) existing imperial preferences were retained but no new ones were permitted. Commonwealth countries have also obtained certain exemptions from GATT tariffs.

In recent years the scope of Commonwealth Preference has been reduced by some countries, but it continues to be an important trade factor. In 1957 about four-fifths of manufactured goods imports from the Commonwealth to the United Kingdom enjoyed tariff preference, while in 1961 about half of United Kingdom exports to the Commonwealth were accorded preference.

COMMONWEALTH SUGAR AGREEMENT

An Agreement was concluded in 1951 between the British Government and Commonwealth sugar industries and exporters, providing for a UK commitment to buy specified quantities of sugar at prices negotiated as being reasonably remunerative to efficient producers, and for the orderly marketing in the UK, New Zealand and Canada of supplies in excess of the negotiated price quotas from the exporting countries.

Exporting countries at present adhering to the Agreement, which has been extended to the end of 1974, are Australia, British Honduras, East Africa, Fiji, India, Mauritius, Swaziland and the West Indies and Guyana. (The Rhodesian quota has been placed in suspense until the return of constitutional rule).

Talks on the future of the Agreement in the advent of Britain joining the European Common Market were held in 1967, and a new Agreement signed in December 1968.

LAW

English Common Law forms the basis of most of the judicial systems of the Commonwealth. Exceptions are the Canadian province of Quebec and the Island of Mauritius, where French law is the basis; Ceylon and Rhodesia, where Roman-Dutch law is the basis, and the Moslem countries of South Asia and Africa, where the legal code is in part based on Moslem civil law. There is a right of appeal to the Privy Council from some countries, including Australia and New Zealand

There have been three Commonwealth and Empire Law Conferences, in London (1955), in Ottawa (1960), in Sydney (1964). At the next Conference...

wealth, without exception, would have recourse.

At a meeting of Law Ministers of 20 Commonwealth countries in May 1966, agreement was reached on new laws to govern the extradition of fugitive offenders. At present, the Imperial Fugitive Offenders Act, 1881, lays down that political asylum may not be granted by an independent member of the Commonwealth to a citizen of another independent member. This Act has been applied in the United Kingdom in the cases of Chief Enahoro (Nigeria) in 1963, and of Kwesi Armah (Ghana) in 1966

THE CONSULTATIVE COMMITTEE

The Consultative Committee, consisting of representatives of member governments at Ministerial level, is the senior directing body of the Colombo Plan. It meets once a year, in different countries. Reports submitted by member countries are discussed and the Committee provides the central co-ordinating body for Capital Aid and Technical Co-operation Schemes. All members take part on equal terms and the meetings are attended by representatives of the Observers (above) and the Colombo Plan Bureau in an advisory capacity.

THE COUNCIL FOR TECHNICAL CO-OPERATION IN SOUTH AND SOUTH-EAST ASIA

President: H.E. MOHAMED SOPIEE (Malaysia).

The Colombo Plan Council for Technical Co-operation, which holds sessions in Colombo several times a year is a forum for consultation on the general principles within which Technical Co-operation operates, subject to the general direction of the Consultative Committee. It serves as a co-ordinating and receiving body. It has also been charged by the Consultative Committee with the responsibilities of carrying out information activities on the Colombo Plan as a whole. It is composed of representatives of Member Governments, who are generally their diplomatic representatives in Colombo, but at times from representatives sent for that purpose. The executive arm of the Council is the Colombo Plan Bureau.

THE COLOMBO PLAN BUREAU

Director: D. A. STRACHAN (United States).

Adviser on Intra-Regional Training: IRSHAD H. KHAN (Pakistan).

Information Officer: JOHN SENDUK (Indonesia).

Asst. Information Officer: L. P. GOONETILLEKE (Ceylon).

The functions of the Bureau are:

1. To assist the Council in overseeing the general operation of Technical Co-operation under the Plan.

2. To keep records of technical assistance given and received under bilateral agreements.
3. To keep member governments informed of the training facilities, experts and equipment available.
4. To promote fuller utilization of training facilities within the area at technician level.
5. To promote the supply of information about the Colombo Plan as a whole.
6. To issue progress reports and statistics.
7. To maintain a record of capital aid projects.

ORGANIZATION

Canada: *Canadian Entity:* c/o British Columbia Hydro and Power Authority, 970 Burrard St., Vancouver 1, British Columbia; responsible for the representation of Canadian interests in the implementation of the Treaty, and for the construction and operation of the three treaty projects; Chair. Hon. RAY WILLISTON.

U.S.A.: *United States Entity:* c/o Bonneville Power Administration, P.O.B. 3621, Portland, Oregon 97208; responsible for U.S. interests in the operation of the treaty provisions; Chair. HENRY R. RICHMOND.

Columbia Storage Power Exchange: P.O.B. 1709, East Wenatchee, Washington; a non-profit corporation organized in 1964 to act as the single purchaser of the Canadian Entitlement to downstream power benefits of the Columbia River scheme; represents over forty bodies in the northwest U.S.A.

Joint Bodies: *Permanent Engineering Board:* composed of four representatives, two from each country; keeps under surveillance progress of the treaty projects; reports on any deviation from operation plans; assists, if requested, in reconciling technical or operational differences that may arise between the Entities.

International Joint Commission: differences arising under the Columbia River Treaty which Canada and the United States of America cannot solve may be referred by either to the International Joint Commission for decision. This Commission, established under a Britain-United States treaty signed January 11th, 1909, and ratified by Canada in 1911, is composed of six members (three appointed by the President of the United States and three by the Government of Canada). The Commission reports to the Secretary of State for External Affairs of Canada and to the Secretary of State of the United States.

THE COLUMBIA RIVER BASIN

The Columbia River flows 498 miles from its source in British Columbia to the Canadian-U.S. border and a further 745 miles through northwestern U.S.A. to the Pacific. With its tributaries, of which the Snake and Kootenay rivers are the largest, it drains an area of 259,000 square miles. Of this total, 85 per cent is in the U.S.A. The basin's annual discharge of 180 million acre feet and the steep descent from the Rocky mountains to sea level, combine to create the greatest hydro-electric potential in North America. Eleven main stream dams have been built on the United States section of river, six by federal and five by non-federal U.S. agencies. Until the commencement of the Columbia Treaty projects no dams had been built on the Canadian section. The extreme seasonal variations of the flow had, therefore, consistently caused flooding during the period of maximum flow in late spring and early summer and a shortage of power during the period of minimum flow in autumn and winter. The Treaty provides for the construction of three storage dams in British Columbia to eliminate this flooding and improve the flow of the river, enabling the eleven downstream dams in the U.S.A. to produce an additional capacity of 2.8 million kilowatts as well as protecting life and property from annual flooding. The installed generating capacity of the Columbia basin within Canada after development will amount to 4.6 million kilowatts.

In 1944, the Governments of Canada and the U.S.A. requested the International Joint Commission to determine whether the development of the water resources of the Columbia River basin would be practical and advantageous to both countries. The International Joint Commission established the International Columbia River Engineering Board to undertake these investigations, and the Board submitted its report in 1959 indicating suitable sites for the construction of storage reservoirs. Also in 1959, the Commission submitted a special report recommending the principles for calculation and apportionment of benefits that would result from the co-operative development of the basin. During 1960 and 1961 direct negotiations were conducted between the Governments of Canada and the U.S.A. concerning the selection, construction and co-operative use of specific projects. These negotiations led to the signing of the Treaty in January 1961. Canada concluded agreements in 1963 and 1964 with British Columbia (the owner of the Canadian water resources) on the respective responsibilities of each government in the development of the Columbia River. International negotiations continued until January 1964, when Canada and the U.S.A. approved an important protocol, which modified the 1961 Treaty and in addition confirmed the sale for thirty years of the Canadian Entitlement to downstream power benefits.

THE COUNCIL OF EUROPE

COMMITTEE OF MINISTERS

Decides with binding effect all matters of international organization, makes recommendations to governments and may also conclude conventions and agreements. Usually meets in May and December

MINISTERS' DEPUTIES

Comprise senior diplomats accredited to the Council as permanent representatives of their governments, who deal with most of the routine work at monthly meetings. Any decision reached by the Deputies has the same force as one adopted by the Ministers

CONSULTATIVE ASSEMBLY

Members are elected by their national parliaments or appointed. Members are also members of their own parliaments, and political parties in each delegation follow the proportion of their strength in the national parliament. Members do not represent their governments: they are spokesmen for public opinion

The Assembly has 147 members

France, Federal Republic of Germany, Italy, United Kingdom	18 each
Turkey	10
Belgium, Greece, Netherlands	7 each
Austria, Sweden, Switzerland	6 each
Denmark, Norway	5 each
Ireland	4
Cyprus, Iceland, Luxembourg, Malta	3 each

The Assembly meets in ordinary session once a year for not more than a month. The session is usually divided into three parts held in January-February, April-May and September-October. The Assembly may submit recommendations to the Committee

of Ministers, pass resolutions, discuss reports and any matters of common European interest

COMMITTEES

Standing Committee Represents the Assembly when it is not in session. Consists of the President, Vice-Presidents, Chairmen of the Ordinary Committees and a number of ordinary members. Meets at least three times a year

Ordinary Committees politics, economics, social and health, legal, culture and education, science and technology, procedure, agriculture, regional planning and local authorities, European non-member countries, population and refugees, budget, parliamentary and public relations

THE COMMONWEALTH

CONSTITUTIONAL RELATIONS

The Commonwealth has no written constitution. The relationship between its members is to some extent defined by legislation, notably the Statute of Westminster, but for the most part rests on agreed constitutional conventions. The Commonwealth is not a federation, for there is no central government, nor are there any rigid contractual obligations such as bind the members of the United Nations. Membership is granted only by consent of all the members and the right of secession is implicit.

At the Imperial Conference of 1926, Commonwealth countries were described in what came to be known as the "Balfour formula" as "Autonomous communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or external affairs". This principle was legally formulated in the Statute of Westminster of 1931 which gave effect to this fully independent status of the Dominions in relation to Great Britain and, by implication, in relation to each other.

The citizens of the states of India, Pakistan, Ghana, Cyprus, Tanzania, Nigeria, Uganda, Zambia, Kenya, Singapore, Malawi, Botswana and Guyana, which are Republics with a President as Head of State, do not owe allegiance to the Crown, but accept the Queen as the symbol of the free association of the independent member nations of the Commonwealth and, as such, Head of the Commonwealth. Malaysia, Lesotho and Swaziland have their own monarchs but recognize the Queen as Head of the Commonwealth.

The other member countries of the Commonwealth owing allegiance to the Crown are administered by their own governments, in the name of the Crown, and the Queen is represented by Governors-General appointed by her on the advice of the Ministers of the country concerned. The Governor-General acts in accordance with the constitutional practice obtaining in the country to which he is appointed in regard to the exercise of the powers of the Crown, and is wholly independent of the Government of the United Kingdom. In all essential respects, he holds the same position in relation to the administration of public affairs in the country to which he is appointed as the Queen holds in the United Kingdom.

In 1967, the six islands of Antigua, St. Christopher-Nevis-Anguilla, Dominica, St. Lucia, St. Vincent and Grenada achieved the status of Associated States within the Commonwealth. The Queen remains the Head of State in these territories, represented in each country. There is a British Commissioner for the region to represent British

interests. Britain retains responsibility for defence and foreign relations, but each territory is wholly responsible for internal affairs, can amend its own constitution, and both Britain and the Associated States can terminate the association unilaterally.

On November 29th, 1968, Nauru (area 8½ sq. miles; population 6,056) became a "special" member of the Commonwealth. This means that Nauru, which became independent on January 31st, 1968, will have the right to participate in all functional activities of the Commonwealth but will not be represented at Meetings of Commonwealth Heads of Government. It may attend meetings at ministerial and official level in such fields as education, medical co-operation, finance, etc.

The following countries did not join the Commonwealth on becoming independent: Burma (1947), Eire (1949), Sudan (1956), British Somaliland (in 1960, when it formed the Somali Republic together with the former UN Trust Territory of Italian Somaliland), Southern Cameroons (in 1961, when it joined the French Cameroons to form the Federal Republic of Cameroon), the Maldives Islands (1963, on ceasing to become a protected state) and Aden (1967). The Union of South Africa became a republic in May 1961 and ceased to be a member of the Commonwealth after the Prime Ministers' Meeting of March 1961 which was largely concerned with the Union's racial policies.

Independent member countries of the Commonwealth make their own laws, decide their own policies, negotiate and sign their own treaties, decide for themselves the issues of peace and war, and maintain their own diplomatic representation in foreign countries, who in turn accredit representatives separately and independently. Governments of member countries are represented in other Commonwealth countries by High Commissioners who have a status equivalent to that of Ambassadors.

The Commonwealth is bound by a complex system of consultation and co-operation in political, economic, educational, scientific and cultural fields, operating through a multitude of Commonwealth organizations, through continuous personal contacts, and through the periodic Commonwealth Prime Ministers' Meetings. Until recently it has had no formal institutional expression but the Prime Ministers' Meeting in 1964 promoted the establishment of a Commonwealth Secretariat to foster closer and more informed understanding between their governments.

specialists in law, psychology, sociology and related sciences. It organizes every year a conference of Directors of Criminological Research Institutes.

The activities of the European Committee on Crime Problems have in recent years resulted in two Conventions on the Punishment of Road Traffic Offences and on the Supervision of Conditionally Sentenced and Conditionally Released Offenders. Work is in progress on draft Conventions on Repatriation of Minors, the International Validity of

of Ministers and concern the Mass Media and the Protection of Young People, the Status, Selection and Training of Prison Staff and the Setting-up of a Simplified Procedure to Deal with Minor Road Traffic Offences.

Various studies in penal law, penology and criminology are at present being carried out by seven Expert Committees.

EDUCATION AND CULTURE

The Council for Cultural Co-operation was founded in 1962 to draw up proposals for the cultural policy of the Council of Europe and to allocate the resources of the Cultural Fund, which finances the cultural programme of the Organization. It is assisted by three Permanent Committees: *Higher Education and Research*, *General and Technical Education* and *Out-of-School Education*. All member states of the Council of Europe are represented on these bodies, together with Spain and the Holy See. Finland sends observers.

The Educational and Cultural programme covers *Higher Education and Research*. The work is centred on structure and organization of higher education, curricula (content and methods), research co-operation. It is carried out in close co-operation with university authorities, who are represented with governments on the Committee.

General and Technical Education: Inter-governmental co-operation in tackling educational problems common to European countries has led to an emphasis on comparative studies (history, geography, civic education, school guidance, teacher training, etc.), as well as to the assembly of basic material on school systems and educational terminology. Particular projects include the training of teachers for Turkish teacher training establishments, a European Civics Campaign and a journal of educational research *Pedagogica Europaea*.

Out-of-School Education. The work is divided into three branches: youth, adult education, physical education and sport, in all of which educational aspects are uppermost. In the field of youth, priority is given to the training of youth leaders and an Experimental Youth Centre is in operation. In adult education the problems of organization and institutionalization of this branch of education, within a system of permanent education and questions of new technologies of out-of-school

education, are prominent. In physical education and sport, a long-term programme is carried out on the theme of "Sport for all". The aim is to promote sport as an instrument for the fitness and sociocultural development of the largest possible number. Leader training, activity programmes and low cost facilities are the major fields of action. Within the framework of technical assistance, a Five-Year Plan to organize "Sport for all" is being implemented in Malta.

Audio-visual Media. Great attention is paid in all three branches of education to the applications of educational technology, such as films, closed-circuit television, satellites, etc.

Modern Languages: A Major Project—Modern Languages, covering all three branches of education, is being actively pursued in co-operation with the International Association for the Development of Applied Linguistics, with the aim of improving and accelerating language teaching throughout Europe.

Cultural Activities. The programme has been regrouped under the two main headings: the protection and development of the European cultural heritage, and its adaptation to the needs of industrial civilization. A number of traditional projects are being continued: the European Art Exhibitions, which demonstrate the interdependence of national cultures, the Cultural Identity Card, which offers special facilities to research workers, etc.

Documentation and Publications. A Documentation Centre for Education in Europe was established in 1964. In 1967 it was linked with a new service for information on educational research. The main educational publications of the Council for Cultural Co-operation are published in the series *Education in Europe*. Other works, particularly on cultural questions, are also produced.

ENVIRONMENTAL QUESTIONS

The European Committee for the Conservation of Nature and Natural Resources (created in 1962) advises the Committee of Ministers on environmental questions. It prepares policy recommendations and promotes European co-operation in this field. Seven Diplomas have been awarded to protected landscapes, reserves and natural features of European interest. A European Water Charter was made public in Strasbourg in May 1968 when a European Information Campaign on Water Problems was launched. In 1967, a European Information Centre for Nature Conservation began operations at the Secretariat. 1970 has been proclaimed Nature Conservation Year by the Committee of Ministers. A European Conservation Conference will be held in Strasbourg in February 1970.

A Committee of Experts on Air Pollution was created in 1966 with tasks similar to those of the above-mentioned Committee. A Declaration of Principles of Air Pollution Control, prepared by this Committee, was approved by the Committee of Ministers in 1968.

MARLBOROUGH HOUSE

Marlborough House came into use as a Commonwealth centre in 1962, to serve as a centre for Commonwealth meetings in London. In addition to the Secretariat, it houses offices for Prime Ministers and their accompanying delegations and staffs, the Commonwealth Foundation, the Association of Commonwealth Universities and an Information Centre and Press Conference Room.

FOREIGN AND COMMONWEALTH OFFICE

Downing Street, London S.W.1, England

In August 1966 the Commonwealth Office was formed by the merging of the Colonial Office and the Commonwealth Relations Office, its functions being to advise the Secretary of State for Commonwealth Affairs on all aspects of Commonwealth relations, communicate on his behalf with other Commonwealth Governments and with the Commonwealth Secretariat, keep in touch with and advise other United Kingdom Government departments on Commonwealth policy, provide information to the British press and public about Commonwealth activities, and deal

generally with matters affecting members of the Commonwealth both as a group and as individuals.

In October 1968 the Foreign Office and Commonwealth Office were amalgamated into a single office, the Foreign Secretary becoming Secretary of State for Foreign and Commonwealth Affairs.

Secretary of State for Foreign and Commonwealth Affairs:
The Rt. Hon. MICHAEL STEWART.

NOTE: Canada alone in the Commonwealth is not a member of the Sterling Area. Rhodesia's membership was suspended in November 1965. Burma withdrew from membership in October 1966.

The Sterling Area consists of those countries whose currency exchange rates are fixed in relation to the pound sterling and who finance the bulk of their foreign trade in sterling. The United Kingdom dependencies have their currencies statutorily linked with sterling, and the other

independent members of the Sterling Area normally hold the bulk of their foreign exchange reserves and a proportion of their statutory reserves in sterling. Since December 1958 sterling has been freely transferable and convertible into dollars and in February 1961 it became fully convertible under the terms of Article 8 of the International Monetary Fund.

To a large extent the central banks of the member countries pool their gold and dollar earnings in London, forming a central reserve upon which they draw at need.

NATIONALITY AND CITIZENSHIP

In 1947 a Commonwealth Conference agreed on a general scheme for defining citizenship, whereby the citizens of the United Kingdom and Colonies would be treated as one, and every Commonwealth country would recognise as British subjects (or Commonwealth citizens) both its own citizens and the citizens of other Commonwealth countries. Naturalization of aliens would automatically confer the status of British Subject or Commonwealth citizen and be recognised throughout the Commonwealth. Not every country of the Commonwealth has enacted this clause and where action has been taken there have been differences in form.

There is considerable difference between countries in the practical effects of possessing common status. In the United Kingdom British subjects hold full franchise rights, are entitled to membership of both Houses of Parliament and the Privy Council and admission to professions closed to aliens. In other Commonwealth countries, the rights of a British subject not originally a citizen of that country are more limited. Only Canada, Australia (with certain exceptions) and New Zealand grant franchise rights. Admission to the professions is generally open to all British subjects, whether nationals of the country or not.

EXTERNAL RELATIONS

Agreements providing for co-operation and exchange of documents and observers have been concluded with the United Nations and its Agencies, and with most of the European inter-governmental organizations. Particularly close relations exist with the European Communities, OECD, EFTA and Western European Union. Members of the European

Parliament hold an annual joint meeting with members of the Consultative Assembly.

Israel is represented in the Consultative Assembly by observers, and certain European non-member countries have been invited to participate, through observers, in meetings of technical committees.

ECONOMIC AID

Intra-Commonwealth aid programmes in operation include the Special Commonwealth African Assistance Plan (SCAAP), Commonwealth Education Co-operation, Overseas Service Aid and similar schemes, the Colonial Development and Welfare programmes, Australian South Pacific Technical Assistance Programme and the Australian International Awards Scheme. The Commonwealth is associated with non-Commonwealth countries in the Colombo Plan, Caribbean Technical Assistance, Indus Basin Development Fund, British Council, the economic sector of SEATO and the Indian General Scholarship Scheme. In addition there are a number of other programmes related to specific countries. The flow of official aid in the Commonwealth in 1966 amounted to £226.1 million.

Official financial aid and technical assistance from the United Kingdom to developing countries of the Commonwealth is made through the following agencies:

Ministry of Overseas Development: Eland House, Stag Place, London, S.W.1; Established 1964 to promote the progress of the developing countries. Both members and non-members of the Commonwealth are assisted. *Minister of Overseas Development:* The Rt. Hon. JUDITH HART, M.P.

Commonwealth Development Corporation—CDC: 33 Hill Street, London, W1A 3AR. Established 1948 as the Colonial Development Corporation, to assist the British Colonies in the development of their economies (since expanded to cover developing countries anywhere in the world). *Chairman:* Lord HOWICK OF GLENDALE, G.C.M.G., K.C.V.O.

OBSERVERS

In accordance with Article X of the Charter, socialist countries of the world which are not members of CMEA may be invited to participate in the work of its organs in the capacity of observers.

In September 1964 a special agreement was reached, enabling Yugoslavia to participate on equal terms with member states of CMEA in the spheres of foreign trade, finance, currency and industry. The agreement also envisaged Yugoslavia attending sittings of the Council's organs in the capacity of observer.

ORGANIZATION

SESSION OF THE COUNCIL

Supreme organ of CMEA. Meets at least once yearly, in the capital of each member state in turn, all members being represented. Discusses proposals from members, from the Executive Committee, Permanent Commissions and Secretariat. Considers all fundamental questions concerning economic, scientific and technical collaboration. Lays down programme of action for CMEA.

EXECUTIVE COMMITTEE

Created at the 16th (Extraordinary) Session of the Council held in Moscow in June 1962 to take the place of the Conference of Members' Representatives and to form the chief executive organ of CMEA. Composed of the representatives of the member states at the level of Deputy Prime Minister, their deputies and advisers. TRADE BY COUNTRIES

BULGARIA

(Five-Year Plan 1961-65*)

Fifteen years ago agriculture dominated the Bulgarian economy, whereas now heavy and light industry have a sizeable share. Industries showing the greatest increase are: chemicals and engineering, rubber and metals, building and electricity.

Industrial production rose by 70 per cent between 1958 and 1962, and in the period 1958-67 by 202 per cent. Bulgaria receives considerable economic aid from the U S S R.

* Subsequently extended to 1980 as Twenty-Year Plan.

MONGOLIAN PEOPLE'S REPUBLIC

(Five-Year Plan 1966-70)

The fourth Five-Year Plan 1966-70 lays ever-increasing emphasis on industry, but is dependent on foreign aid. Emphasis is placed on developing industry, particularly setting up a reliable fuel and power basis, but there are

also a number of schemes to improve communications and the rural economy. Mongolia's trade is mainly with the Soviet Union and Eastern Europe.

POLAND

(Five-Year Plan 1966-70)

The Five-Year Plan 1966-70 aims to increase industrial production by more than 40 per cent by 1970, and to increase the flow of foodstuffs and consumer goods.

Emphasis is being placed on raising the standard of living, modernizing the country's economic structure, developing production capacity and securing employment for young people

The Plan envisages further expansion of foreign trade with non-socialist countries, but trade with other Communist countries continues to be of prime importance. Trade with the Soviet Union is likely to expand; some 70 per cent of Polish engineering products go to the Soviet Union.

CONSEIL DE L'ENTENTE

TRADE AND DEVELOPMENT

There is complete freedom of trade and a unified system of external tariffs and fiscal schedules. A single system of administration for ports and harbours, railways and road traffic and a unified quarantine organization will be set up.

FONDS DE GARANTIE

Central Guarantee Fund originally conceived as the Fonds de Solidarité to support development projects, transformed in June 1966 into a mutual aid and loan guaranty fund designed to encourage outside lenders to finance development projects in member countries. Total to be provided annually by member states equals 650 million C.F.A., of which 500 million will be contributed by Ivory Coast, 42 million each by Niger, Upper Volta and Dahomey, and 24 million by Togo.

FUNCTIONS

In August 1960 it was agreed that there should be:

1. An identical constitutional and electoral procedure in each State. Elections are to be held at the same time.
2. Each State shall have an identical organization of its Armed Forces.
3. Identical administrative organization.
4. Identical taxation and tariff policies.
5. Common Bank of Amortization.
6. A common Diplomatic Corps.

Commissions have been set up to study how these measures may be implemented.

AGREEMENTS WITH FRANCE

In April 1961 the member states signed agreements with France, covering defence, economic affairs, judicial matters, higher education, cultural relations, civil aviation and postal and telecommunications. Upper Volta did not sign the defence agreement.

SUMMARY OF CHARTER

(With amendments approved by the 16th and 17th Sessions of the Council)

The Governments of the People's Republic of Albania, the People's Republic of Bulgaria, the Czechoslovak Republic, the German Democratic Republic, the Hungarian People's Republic, the Polish People's Republic, the Romanian People's Republic and the Union of Soviet Socialist Republics,

Taking into account that economic co-operation, successfully effected between their countries, contributes to the most rational development of the national economy, the elevation of the living standards of the population, and the strengthening of the unity and cohesion of these countries,

Fully resolved to continue developing all-round economic co-operation on the basis of the consistent implementation of the international socialist division of labour in the interests of building socialism and communism in their countries and ensuring a lasting peace throughout the world,

Convinced that the development of economic co-operation between their countries promotes the achievement of the purposes expounded in the Charter of the United Nations,

Confirming their readiness to develop economic relations with all countries, irrespective of their social and state systems, on the principles of equality, mutual advantage, and non-interference in domestic affairs,

Recognizing the ever growing role of the Council for Mutual Economic Assistance in organizing economic co-operation between their countries,

Have agreed for these purposes to adopt the present Charter.

ARTICLE I

AIMS AND PRINCIPLES

1. The aim of the C.M.E.A. is to facilitate, by uniting and co-ordinating the efforts of the Council's member countries, the planned development of their national economies, the acceleration of their economic and technical progress, an increase in the level of industrialization in the less industrialized countries, the uninterrupted growth of labour productivity and the steady advance in the welfare of the peoples of the Council's member countries

2. The C.M.E.A. is based on the principles of sovereign equality of all its member countries

The policy of economic scientific and technical co-operation between the member countries shall be effected in accordance with the principles of full equality, respect for sovereignty and national interests, mutual advantage and mutual comradely assistance

ARTICLE II MEMBERSHIP

1. The founder members of the C.M.E.A. are the countries which sign and ratify the present Charter

2. Membership is open to any other countries which share the Council's aims and principles and agree to accept the obligations contained in the present Charter

3. Any member country may withdraw from the Council by notice to that effect given to the depositary of the present Charter. Such notice becomes effective six months after its receipt by the depositary. On receipt of such notice the depositary will inform the member countries of the Council

4. The member countries of the Council agree:

- to ensure the fulfilment of the recommendations of the Council organs adopted by them;
- to render the Council and its officials the necessary co-operation in the discharge of their functions under the present Charter;
- to submit to the Council materials and information necessary for carrying out the tasks assigned to it;
- to inform the Council about progress in fulfilling the recommendations adopted in the Council.

ARTICLE III FUNCTIONS AND POWERS

1. In conformity with the aims and principles laid down in Article I of the present Charter, the functions of the C.M.E.A. are as follows

- organize close economic scientific and technical co-operation between the Council's member countries in the most rational use of their natural resources and the acceleration of their productive forces;
- foster the improvement of the international socialist division of labour by co-ordinating national economies

ORGANIZATION

THE ANNUAL SESSION

President (1969-72) K ENDERL (Austria)
Vice-President: F DVORSKY (Czechoslovakia)
Secretary: D JOVIC (Yugoslavia)

Sessions are held once a year. A Session may adopt a resolution by a simple majority with a quorum of five, but important decisions require the attendance of the full Session. The President, Vice-President and Secretary are elected for three years by a simple majority. Resolutions are in the form of recommendations and are passed to member states for internal legislation. The Session appoints Expert Groups which meet between two Sessions as required.

SECRETARIAT AND SERVICES

The Secretariat has two sections: correspondence, publications and archives, and administration and management. In addition the Commission has four services departments: technology, navigation, hydro-meteorology, and planning and statistics. A separate department is responsible for accounts. Staff is drawn from all the member countries.

Director: L. J. KAPIKRAIAN (USSR)
Assistant Director (Secretariat): F. SVÁTEK (Czechoslovakia)
Assistant Director (Services): S. SIMEONOV (Bulgaria)
Assistant Director (Accounts): E. CHRIST (Austria)

tracting Party whose national is alleged to be a victim, a High Contracting Party which referred the case to the Commission, and a High Contracting Party against which the complaint has been lodged. In the event of dispute as to whether the Court has jurisdiction, the matter is settled by the decision of the Court. The judgement of the Court is final.

INTERGOVERNMENTAL WORK

In May 1968 the Committee of Ministers approved the third programme of work for the intergovernmental activities of the Council of Europe. The programme sets out current and future projects for co-operation between member governments in economic, legal, social, public health, environmental, and educational and scientific matters. A new chapter has provisionally been added dealing with matters of concern to local and regional authorities. Dates are set for the completion of each project. The programme, which is designed to streamline the activities of the organization, is to be revised each year.

SOCIAL AFFAIRS

The Council's objectives in the social sphere are: to establish equality of treatment in each member country between nationals and citizens of the other member states in such matters as social security and social and medical assistance; to pool skills and resources; to raise the living conditions of the populations; and to raise the level of workers' protection against accidents and professional diseases. The *European Social Charter*, signed on October 18th, 1961, and in force since February 26th, 1965, with regard at present to Cyprus, Denmark, German Federal Republic, Ireland, Italy, Norway, Sweden and the United Kingdom, lays down the rights and principles which are the basis of the Council's social policy, and guarantees a number of social and economic rights to the citizen. It thus complements the European Convention on Human Rights, which guarantees certain civil and political rights. A European Social Security Code has also been signed; it entered into force on March 17th, 1968.

Other international Conventions or Recommendations to member governments were also prepared or are under preparation in the social field. They concern, *inter alia*, the following matters: status of social workers, social aspects of regional development, old age policy, labour inspection, protection of young workers, social services for migrant workers, general family policy, adoption of children, economic and non-economic measures to help families.

HEALTH

The Council is working towards the pooling of medical techniques and equipment between member states. A programme of medical fellowships has been launched, designed to enable members of the medical profession and personnel of public health departments to become acquainted with new methods and techniques practised in other European countries and to participate in research of common European interest.

European Agreements provide for special facilities for the medical treatment of war cripples and other

injured, for a system of supply of blood and blood products through the channel of a network of 28 Blood Transfusion Centres in 15 member states, and for the duty-free importation on loan of medical and surgical equipment. Nine member countries have concluded Administrative Arrangements setting up an "excepted sanitary area" under the terms of Article 104 of the International Sanitary Regulations. They carry out activities towards harmonization of their legislation in several fields, such as the pharmaceutical field, the health control of foodstuffs and the use of pesticides. Eight countries are participating in the establishment of a European Pharmacopoeia.

POPULATION

The Council has been concerned with refugee problems since 1950, and in 1953 appointed M. Pierre Schneider its Special Representative for national refugees and over-population in Europe. M. Schneider's plan for a European Resettlement Fund to make loans to governments for the resettlements of refugees and helping them in solving the problems raised by over-population, was duly put into effect, nine countries contributing. The Fund has so far granted loans totalling over \$50 million. M. Schneider is now engaged on improving the material, legal and psychological situation of migrant workers. Furthermore, a major Conference on European Population was held by the Council in September 1966.

LEGAL CO-OPERATION

The importance of this branch of the Council's activities has been acknowledged by the creation in 1963 of a European Committee on Legal Co-operation, grouping delegations from all member states and from the Assembly. This committee has general responsibility for the preparation and implementation of the Council's inter-governmental activities in the legal field. It normally meets twice a year. Most of the specialized committees of legal experts work under its direction.

In addition, the Ministers of Justice of member states of the Council of Europe meet from time to time for the purpose of stimulating co-operation in the legal field. The Fifth Conference of Ministers of Justice took place in London in June 1968 and the Sixth Conference will be held in 1970 in The Hague.

Among the more important legal conventions concluded within the framework of the Council of Europe are those on Establishment, the Peaceful Settlement of Disputes, Patents (application, classification, unification of substantive law), Extradition, Commercial Arbitration, Compulsory Motor Insurance, Mutual Assistance in Criminal Matters, "Pirate" Broadcasts and Information on Foreign Law. A Convention on Multiple Nationality entered into force on March 28th, 1968.

CRIMINOLOGY

The European Committee on Crime Problems is the main body of the Council of Europe working on penal law, penology and criminology. It is assisted by a Criminological Scientific Council composed of

THE COUNCIL OF EUROPE

LOCAL AFFAIRS

The Council seeks to interest local authorities in the European idea by:

European Prize: Awarded annually to the municipality "which has done most to propagate the ideal of European unity".

European Conference of Local Authorities: The Conference meets every second year, and brings together mayors, aldermen and councillors from member countries, in the same numbers as they send parliamentary delegations to the Assembly.

Inter-Municipal Exchanges: A scheme for promoting exchange visits between local government officials. An *ad hoc* intergovernmental committee in regional and municipal matters has met twice and may now be given permanent status.

FRONTIER FORMALITIES

Since its earliest days the Council has sought to bring about the simplification of frontier formalities and the abolition of unnecessary restrictions in the way of freer travel within its area. All visas have been abolished between the member countries of the Council, the necessity of passports has been done away with by a considerable number of them, formalities for the temporary importation of motor vehicles have been reduced to a minimum and much has been done to speed up formalities at airports. At present, a new effort is being made with a view to the preparation of practical measures for adapting frontier formalities to the requirements of the present situation (excluding customs matters).

CONVENTIONS AND AGREEMENTS

In an effort to harmonize national laws, to put the citizens of member countries on an equal footing and to pool certain resources and facilities, the Council has concluded a large number of treaties covering particular aspects of European co-operation:

Convention for the Protection of Human Rights and Fundamental Freedoms.

European Convention on Social and Medical Assistance.

European Interim Agreement on Social Security other than Schemes for Old Age, Invalidity and Survivors.

European Interim Agreement on Social Security relating to Old Age, Invalidity and Survivors.

THE COUNCIL OF EUROPE

SUMMARY OF STATUTE

The Statute of the Council of Europe was signed in London on May 5th, 1949. It defines the aim of the Council, the conditions of membership and the composition and tasks of its institutions. (For an account of the latter, *see* the section on Organization above.)

The aim of the Council of Europe is stated by the Statute to be the achievement of "a greater unity between its members for the purpose of safeguarding and realizing the ideals and principles which are their common heritage and facilitating their economic and social progress". Collaboration with the United Nations and other international organizations are not to be affected by membership of the Council.

Every member state must "accept the principles of the rule of law and of the enjoyment by all persons within its jurisdiction of human rights and fundamental freedoms, and collaborate sincerely and effectively in the realization of the aims of the Council". It is further laid down that "any European state deemed able and willing to fulfil these provisions may be invited by the Committee of Ministers to become a member of the Council". This has later been modified by the Committee of Ministers, who now undertake to consult the Assembly before issuing an invitation to join.

1962	Moscow	Decision to set up an Executive Committee of CMEA (<i>see</i> above). Decided to form a number of new Permanent Commissions. CMEA Institute on Standardization established. Approved amendments to the Constitution to allow the admission of non-European countries. Mongolian People's Republic accepted as a member.			Agreement reached to increase the role of CMEA as an organization for co-operation between member states. Stressed the necessity for strengthening bonds between member states, particularly those of economic relations. Agreement reached on the necessity of creating an Investment Bank for member states and the need to improve the facilities of the International Bank for Economic Co-operation.
	Bucharest	Considered proposals to further the			

CMEA TRADE

Foreign trade is one of the most important forms of economic co-operation between member states of CMEA. Trade between member states was planned by yearly agreements until 1951 and thereafter by long-term bilateral and multilateral trade agreements linked to the development plans of the member countries. In 1956 the Permanent Commission for Foreign Trade was set up, and trade agreements were drawn up for the periods 1961-65 and 1966-70. Co-ordination has resulted in countries

specializing in the growth and manufacture of goods they are best fitted to produce and in an increase in inter-CMEA trade. Trade between member countries comprises more than 60 per cent of their total foreign trade which is wholly conducted through state monopolies. A long-term trade agreement was drawn up with Yugoslavia for the years 1966-70 with the result that the volume of trade between member countries and Yugoslavia has doubled in this period compared with the period 1961-65.

GERMAN DEMOCRATIC REPUBLIC

(Seven-Year Plan 1964-70)

The previous Seven-Year Plan 1959-65 was abandoned in 1963, certain difficulties having arisen in its fulfilment. nevertheless, between 1958 and 1962 industrial production creased by 37 per cent (the Plan provided for an increase of 80 per cent between 1958 and 1965). In the period 1960-65 gross industrial output increased by 33 per cent. At the same time foreign trade with other socialist countries increased by 32 per cent.

The new Seven-Year Plan aims to increase investment

from MDN 17,000 million to 28,000 million and to increase industrial output by 60 per cent. In 1967 investment reached its highest level ever, in relation to national income, with a total of 24,005 million marks, 9 per cent more than the previous year. Over one-third of investment has been devoted to industrial rationalization and particular attention has been paid to scientific and technological research.

HUNGARY

(Five-Year Plan 1966-70)

The third Five-Year Plan 1966-70 envisages an increased rate of development over the second Plan, and here will be concentrated development in those branches of engineering concerned with exports. A rise of 40-45 per cent in the output of the engineering industry as a whole and 50-55 per cent in engineering exports is aimed for. Particular emphasis is to be placed on transport equipment manufacturing, which should double, telecom-

munications engineering, instruments and machine tools; in 1965 these four branches produced 46.8 per cent of Hungary's engineering exports, but it is hoped to increase their share to 65 per cent by 1970. Development will be stressed in the foundry and forging industries.

There is a general trend for international co-operation in production, with component imports coming mainly from socialist countries.

ROMANIA

(Five-Year Plan 1966-70)

The Five-Year Plan (1966-70) envisages an annual industrial development rate of 10.5 per cent. Largest increases are in electric power, coalmining, fertilizers and motor vehicles.

By the end of 1967 industrial output had increased eight-fold since 1950 and the increase is continuing. Once primarily dependent on agriculture, Romania has been transformed into a largely industrial nation. In 1962 nearly 51 per cent of her national income accrued from industry.

In 1967 Romanian foreign trade increased by 22 per cent, although exchanges with CMEA countries expanded by only 6 per cent. The share of the CMEA countries in Romanian foreign trade dropped to 47 per cent from 54 per cent in 1966. Trade exchanges with the U.S.S.R., which in 1959 accounted for almost half the foreign trade total, amounted only to 28 per cent in 1967.

Chief imports: iron and steel, machinery, vehicles, chemicals. Chief exports: oil, farm produce, timber, paper, industrial products.

U. S. S. R.

(Five-Year Plan 1966-70)

The aim of the Plan is to increase industrial output by 47-50 per cent, agricultural output by 25 per cent and the National Income by 38-41 per cent. Production of electric power will be 64-68 per cent larger in 1970 than in 1965, production of instruments and automation equipment will rise by 72-77 per cent and that of chemical equipment by 100-110 per cent, and the increase in the engineering and metal-working industries will amount to 60-70 per cent.

The Plan provides for further development of the U.S.S.R.'s trade with socialist countries, extension of economic co-operation with developing countries and expansion of trade with other countries on the basis of mutual advantage.

During the five-year period trade turnover with socialist

countries will amount to 50,000 million roubles. Rational economic co-operation with CMEA countries is envisaged in industry, transport and trade, as well as in the spheres of credits, financial operations and foreign currency settlements. CMEA countries play an increasingly important role in Soviet international economic relations; in 1958 they accounted for slightly over 50 per cent of U.S.S.R. foreign trade, but in 1965 their share had risen to 58 per cent. The U.S.S.R. is vitally important to the countries of Eastern Europe as a supplier of raw materials, and as a market for industrial products and food. The U.S.S.R.'s main customers are German Democratic Republic (28 per cent), Czechoslovakia (21 per cent) and Poland (16 per cent).

COUNCIL FOR MUTUAL ECONOMIC ASSISTANCE

mic development plans, and the specialization and co-operation of production in the Council's member countries;

- (c) take measures to study economic, scientific and technical problems which are of interest to the Council's member countries;
- (d) assist the Council's member countries in elaborating and carrying out joint measures for:
 - the development of the industry and agriculture of the Council's member countries;
 - the development of transport with a view to ensuring first priority for increasing export, import and transit shipments of the Council's member countries;
 - the most efficient use of principal capital investments allocated by the Council's member countries for the development of the mining and manufacturing industries and for the construction of major projects which are of interest to two countries or more;
 - the development of trade and exchange of services between the Council's member countries and between them and other countries;
 - the exchange of scientific and technical achievements and advanced production experience;
- (e) take such other actions as may be required for the achievement of the aims of the Council.

2. The C.M.E.A., as represented by its organs, acting within the terms of their reference, is authorized to adopt recommendations and decisions in accordance with the present Charter.

ARTICLE IV

RECOMMENDATIONS AND DECISIONS

1. Recommendations shall be made on questions of economic, scientific and technical co-operation. Recommendations shall be submitted to member countries for consideration.

Member countries carry out the recommendations they receive by decisions of their Governments or other competent bodies in accordance with their legislative processes.

2. Decisions shall be adopted on organizational and procedural matters. Unless otherwise provided for therein, decisions come into force on the day on which the minutes of the meeting are signed by the appropriate organ of the Council.

3. All recommendations and decisions of the Council can be adopted only with the consent of interested member countries, and any country may declare an interest in any question under consideration by the Council.

Recommendations and decisions do not apply to members who have declared themselves as having no interest in the question concerned. Each of these countries, however, may subsequently join recommendations or decisions adopted by the other member countries of the Council.

ARTICLE V ORGANS

1. For the purpose of carrying out the functions and exercising the powers laid down in Article III of this Charter, the C.M.E.A. is divided into the following principal organs:

Session of the Council;
Executive Committee;
Permanent Commissions;
Secretariat.

2. Other organs, as may be necessary, may be constituted in accordance with the present Charter.

ARTICLE XVII CONCLUDING RESOLUTIONS

EUROPEAN BROADCASTING UNION

Radio: The activities of the Radio Programme Committee include the widespread exchange of EBU members' radio programmes and musical materials, the organization of international concerts, choral competitions, etc., joint productions, and the commissioning of dramatic works. The Committee and its permanent staff in Geneva also co-ordinate the planning and organization involved in the radio coverage of sports and news events, the commemoration of important anniversaries, etc.

Legal: The nature of broadcast programming concerns words, texts, music, singing, dancing, performance, recording, etc. All this involves legal and contracted rights (copyright, performers', phonographic and others) whose use is as a rule controlled internationally. This is exemplified in the Universal Copyright Convention, the Berne Convention, the Rome Convention, the international performers' federations, etc. It is the purpose of the EBU Legal Committee and its permanent secretariat, Study Groups and various negotiating delegations to look after the interests of the broadcaster in this complex situation. The Legal Committee seeks to advance development by co-operating at the international level with such bodies as BIRPI (United International Bureaux for the Protection of Intellectual Property) and Unesco in drafting model

legislation on copyright, and in individual situations expert advice is provided on request, such as the drafting of national copyright legislation, contracts, etc.

Technical: Eurovision, the technical co-ordination of which is carried out by the Technical Centre, is a well-known example of EBU collaboration, but the member-organizations co-operate in many other matters within the framework of the Technical Committee and its Working Parties, to contribute to the general development of broadcasting. Their work includes, *inter alia*, the study of satellite transmission, standardization (e.g. in colour television, stereophony, recording of sound and television programmes), the study of wave propagation, frequency planning and the quality and protection of broadcast transmissions. As in other spheres, the EBU Technical Committee and permanent staff in Brussels work closely with many other international organizations, including the International Telecommunication Union (ITU) and its consultative committees (CCIR and CCITT), its International Frequency Registration Board (IFRB), its conferences on frequency assignment, the International Electrotechnical Commission (IEC) and its International Special Committee on Radio Interference (CISPR), and the International Standards Organization (ISO).

DANUBE COMMISSION

ACTIVITIES

General Work Plans. Based on proposals of the Danubian States and the special river administrations. The Commission assesses total expenditure for any large plans and carries out the work if a single state cannot do so. It consults continually with member states and river administrations while work is proceeding.

A giant hydroelectric dam is being planned at Djerdap by Yugoslav and Romanian engineers. The dam will control the currents of the Iron Gates, where the river is only about 500 ft. wide but up to 280 ft. deep. The effect on navigation will be to raise the annual tonnage capacity to 90 million tons. At present, 12 million tons of shipping, one-third of which is Russian, pass annually through the Iron Gates.

Uniform Navigational System. Navigational rules have been unified and manuals of navigational procedure published. To secure observations of these rules a river inspection system has been set up, with functions laid down by the Commission.

Manuals for River Users. Publications include pilots' charts covering most of the Danube, sailing directions, mileage charts and lists of temporary winter quarters.

Co-ordination in Hydro-Meteorological Services. Liaison has been improved for the provision of hydro-meteoro-

logical information and water-level forecasts. Assessing water-levels is carried out by a uniform method.

Hydrotechnical Services. Steps are being taken to measure the minimum dimensions of locks and bridges and the minimum heights of high-tension cables and telephone lines. The Commission works out statistical surveys noting the appearance of sandbanks, and classifies the results. A similar analysis is being made of glacial activity.

Customs, Sanitary, Veterinary and Phytosanitary Regulations. The Commission has undertaken to formulate uniformly applicable rules.

Legal Problems. The Secretariat of the Commission studies the most important legal questions connected with shipping on the Danube and submits its proposals to the Commission.

International Co-operation. The Commission works closely with many international bodies, including the UN Economic Commission for Europe, the International Atomic Energy Agency, ITU and the World Health Organization. An agreement of collaboration and co-operation was signed with the World Meteorological Organization in 1962. In 1965 the Commission became a member of the Permanent International Association of Navigation Congresses.

BUDGET

1969: 5,431,810 forints.

Member countries pay an equal annual contribution to the costs of the Commission.

EAST AFRICAN COMMUNITY

EAST AFRICAN DEVELOPMENT BANK

Kampala, Uganda

Established 1967, the Bank's aims are as follows:

To provide financial and technical assistance to promote the industrial development of the member states; priority is given to industrial development in the relatively less developed countries and about 77 per cent of ordinary and special funds are to be invested in Tanzania and Uganda over consecutive five-year periods.

To further the aims of the East African Community by financing, wherever possible, projects designed to make the economies of the member states increasingly complementary in the industrial field.

To co-operate with national development agencies in

the three countries in financing operations, and also with other institutions, both national and international, that are interested in the industrial development of member states.

The Bank's members are the three governments together with such other non-governmental bodies, enterprises and institutions whose membership is approved by the governments. Total initial subscriptions by the governments totals Sh. 120 million and the total authorized capital is Sh. 400 million. The Bank is administered by a Board of Directors appointed by the members.

Director-General and Chairman: IDDI SIMBA.

Directors: CHARLES RUBIA, S. K. MUKASA, K. H. AMEIR.

COMMUNITY CORPORATIONS

The four Community Corporations are self-accounting, statutory bodies. The Railways, Harbours, and Telecommunications Corporations are each controlled by a Board of Directors consisting of a Chairman, three members (one from each member state) appointed by the East African Authority, and a Director-General. Board of Directors of the Airways Corporation is composed of a Chairman, Director-General, two members appointed by the Authority and two by each member state.

President of the Court: ROBERT LECOURT

Registrar: M. VAN HOUTE

First Chamber:

President: MERTENS DE WILMARS
Members: Prof. A. M. DONNER, M. MONACO
Advocate General: K. L. ROEMER

Second Chamber:

President: Prof. ALBERTO TRABUCCI
Ministers: M. STRAUSS, M. PESCATORE
Advocate-General: M. J. GAND.

The primary task of the Court of Justice is to ensure the observance of law and justice in the interpretation and application of the Treaties setting up the three Communities. The President of the Court is appointed by the Judges from among their members for a renewable term of three years. The Judges and Advocates-General are appointed for renewable six-year terms by the Governments of the member states. A partial renewal of the Court takes place every three years, affecting three and four Judges alternately as well as one of the two Advocates-General. The Court has full jurisdiction to settle all disputes within the Communities and to award penalties. It may review

the legal validity of acts (other than recommendations or opinions) of the executives and is competent to give judgment on appeals by a member state or the executives on grounds of incompetence, of errors of substantial form, of infringement of the Treaties or of any legal provision relating to their application, or of abuse of power. Any natural or legal person may, under the same conditions, appeal against a decision addressed to him or against a decision which, although in the form of a regulation or decision addressed to another person, is of direct and specific concern to him.

The Court is also empowered to hear cases concerning compensation for damage, disputes between the Communities and their employees, fulfilment by member states of the obligations arising under the Statute of the European Investment Bank, arbitration clauses contained in any contract concluded, under public or private law, by or on behalf of the Communities and disputes between member states in connection with the objects of the Treaties, where such disputes are submitted to it under the terms of a compromise. It also gives pre-judicial rulings at the request of national courts on the interpretation of the Treaties or of Community legislation.

EAST AFRICAN COMMUNITY

SUMMARY OF TREATY FOR EAST AFRICAN CO-OPERATION

Signed at Kampala, Uganda, on June 6th, 1967, by the Presidents of Kenya, Tanzania and Uganda.

PREAMBLE

Refers among other points to the fact that Tanzania, Uganda and Kenya have enjoyed close commercial, industrial and other ties for many years, and to the determination of the three Partner States to strengthen these ties and their common services, by the establishment of an East African Community, and a Common Market as an integral part of the Community.

CHAPTER I (Articles 1-4)

Aims and Institutions

General undertaking included that the three countries shall make every effort to plan and direct their policies with a view to creating conditions favourable for the development of the Common Market and the achievement of the aims of the Community.

CHAPTER 2 (Articles 5-8)

External Trade

Three countries to maintain a Common External Tariff.

Three countries will not enter into agreements whereby tariff concessions negotiated with any country outside the Community are not available to all three countries.

Three countries will take effective measures to counteract any deviation of trade, resulting from barter agreements, away from goods produced in East Africa to goods produced outside the Common Market.

CHAPTER 3 (Articles 9-16)

Inter-Territorial Trade

Guarantees freedom of transit across one State of goods destined for another country, subject to the normal customs and other rules.

Customs duty collected on goods imported into one of the three countries, but in transit to another, shall go to the second country.

Prohibits internal tariffs (except for the transfer tax; *see below*), and quantitative import restrictions upon goods produced in East Africa. Exceptions made in respect of goods covered by certain special obligations, certain agricultural goods, and for restrictions imposed for certain defined reasons (e.g. control of arms and munitions) or in defined circumstances (e.g. balance of payments difficulties).

One country must not engage in discriminatory practices against goods from either or both of the other countries.

CHAPTER 4 (Articles 17-18)

Excise Tariffs

Removal of present differences in the excise tariff which the Common Market Council determines to be undesirable

in the interests of the Common Market, and establishment of a generally common excise tariff.

Excise duty collected on goods produced in one country, but transferred to another country, to be transferred to the second country.

CHAPTER 5 (Articles 19-21)

Measure to Promote Balanced Industrial Development

1. Harmonization of fiscal incentives offered by each country towards industrial development.

2. The Transfer Tax System:

The Transfer Tax: States which are in deficit in their total trade in manufactured goods with the other two States may impose transfer taxes upon such goods originating from the other two countries, up to a value of goods equivalent in each case to its deficit with that country. A transfer tax can only be imposed if goods of a similar description to those taxed are being manufactured, or are reasonably expected to be manufactured within three months, in the tax-imposing country. The industry to be protected by the tax must have a productive capacity equivalent to at least 15 per cent of the total domestic consumption of such products in the tax-imposing country or to a value of 2 million shillings E.A., whichever is the less.

Rate of Transfer Tax: limited to 50 per cent of the equivalent external customs tariff imposed on such goods coming from outside East Africa.

Collection: Customs and Excise Department of East Africa responsible for collection, administration and management of all transfer taxes; costs to be borne by the country or countries which imposed transfer taxes.

Limitations: No transfer tax can be imposed for longer than eight years, and all such taxes are to be revoked fifteen years after the Treaty comes into force. There will be an examination of the effectiveness of the system five years after the first tax is imposed. If a significant deviation of trade takes place to goods produced outside the Common Market, as a result of the imposition of transfer taxes, measures shall be taken to counteract such a deviation. If a tax-protected industry is able to export 30 per cent of its annual production to the other two countries, the transfer tax must be revoked, and if its exports to all countries reach 30 per cent, the situation can be considered by the Common Market Council. A country which comes into 80 per cent balance in its total trade in manufactured goods inside East Africa loses the right to impose new transfer taxes, although existing taxes will continue in force.

Anti-Dumping Provisions: Prohibit the transfer of manufactured goods at a price lower than their true value, in such a way as to prejudice the production of similar goods in each Partner State, and prohibit export subsidies for such goods (other than tax incentives and refunds of a general and non-discriminatory kind).

3. Establishment of the East African Development Bank (*see above*).

THE EUROPEAN COMMUNITIES

Court may furthermore, on the petition of the Council of Ministers or of the Commission itself, provisionally suspend any member of the Commission from his duties

Until the entry into force of a Treaty establishing a single European Community, and for a maximum period of three years starting from the date on which its members are nominated, the Commission is composed of fourteen

members, who take over the responsibilities of the three former executive bodies. No more than three of these members may be of the same nationality

The functions of the High Authority of the European Coal and Steel Community and of the Commission of EURATOM were transferred to the merged Commission of the European Communities on July 1st, 1969

THE COMMUNITIES

EUROPEAN ECONOMIC COMMUNITY—EEC

(THE COMMON MARKET)

The creation of the European Economic Community was decided upon at a Conference of Foreign Ministers of six European Coal and Steel Community nations at Messina in June 1955

were signed in Rome on March 25th, 1957. These treaties were ratified by the parliaments of the member states during the summer and autumn of 1957 and came into force on January 1st, 1958.

The aim of the European Economic Community is, by establishing a Common Market and progressively approximating the economic policies of the member states, to promote harmonious development of economic activities, a continuous and balanced expansion, an increased stability, an accelerated raising of the standard of living of the peoples of the member states and closer relations between them.

This aim is to be achieved by various measures, of which the following are the most significant:

- (a) the elimination of import and export duties and restrictions,
- (b) the establishment of a common tariff and common commercial policy;
- (c) the establishment of free movement of persons, services and capital,
- (d) the inauguration of common agricultural and transport policies,
- (e) the establishment of a system of fair competition;
- (f) measures to co-ordinate economic policy and adjust balances of payments,
- (g) the approximation of municipal law in the member states,
- (h) the creation of a Social Fund and a European Investment Bank, and
- (i) the association of overseas countries and territories related to certain member states.

ORGANIZATION

Economic and Social Committee

3 Boulevard de l'Empereur, Brussels

President: MATHIAS BERNIS.

Vice-Presidents: JEAN DE PRECIGOUT, OTTO BRENNER

Members: 101 persons representing economic and social fields, 12 each from Belgium and the Netherlands, 24 each from France, Federal Germany and Italy and 5 from Luxembourg. One-third represent each side of industry and one-third the general economic interest. Appointed for a renewable term of four years by the

unanimous vote of the Council of Ministers of the European Communities (Euratom is also represented in this Committee). Members are appointed in their personal capacity and are not bound by any mandatory instructions

The Committee is advisory and is consulted by the Council of Ministers or by the Commission of the European Communities, particularly with regard to agriculture and transport

EAST AFRICAN COMMUNITY

CHAPTER 22 (Articles 83-86)

Decentralization

Location of headquarters and the new East African Tax Board.

CHAPTER 23 Auditor-General

Provides for audit and the functions of the Community Auditor-General.

CHAPTER 24 (Article 88) Transitional Provisions

CHAPTER 25 (Articles 89-96)

General Provisions

Treaty to come into force on 1st December 1967; parts of Treaty dealing with Common Market to remain in force for fifteen years and then to be reviewed; other countries may negotiate for association with the Community or for participation in its activities; modification of the Treaty by common agreement; implementation measures by way of national legislation in the three countries; abrogation of the EACSO Agreements and past agreements on the Common Market.

European Development Fund

Under the association agreement concluded at the same time as the Rome Treaty (see below) a Development Fund for Associated Overseas Countries and Territories was set up for the purpose of promoting the social and economic development of these countries and territories, in particular the development of health, educational, research and professional activities of their populations, and economic investments of general interest directly connected with the implementation of a programme including productive and specific development projects.

The Fund (EDF I) began operations in 1959 and was endowed with a total of \$581 million contributed by the member countries. After many of the territories concerned had become independent in 1960-62, a new Convention of

Association, signed in Yaoundé, Cameroon, came into effect on June 1st, 1964. It provided for the continued operation of the Development Fund (EDF II) and the spending over a five-year period of a total sum of \$730 million, plus \$70 million from the European Investment Bank in loans on the same lines as before and also for promoting the diversification of the economies of the Associated States and of the French Overseas Territories. The second Yaoundé Convention, signed in July 1966, provides development aid of \$748 million in grants, \$80 million in special loans at low interest rates and \$90 million in European Investment Bank loans, another \$82 million was allocated for overseas dependencies of the Six, making \$1,000 million in all (EDF III).

EUROPEAN ATOMIC ENERGY COMMUNITY— EURATOM

The idea of the European Atomic Energy Community was born at the Messina Conference in 1955, together with that of EEC. The Treaty setting up the Community came into force on the same date as the EEC Treaty, January 1st, 1958.

EURATOM's role is to create 'the conditions necessary for the speedy establishment and growth of nuclear industries in the Community' by stimulating and co-ordinating public and private research in atomic energy, by ensuring the free flow of information, and by encouraging the building of power reactors. EURATOM also has various responsibilities of a regulatory character, establishing common laws and rules in the atomic field throughout the Community. A common market in nuclear materials was introduced on January 1st, 1959, which eliminates internal import and export duties on nuclear products, a common tariff is applied to third countries, assistance is granted to the free movement of specialized labour, and a common insurance scheme against nuclear risks has been established.

Nuclear materials intended for military purposes are not subject to the control of EURATOM, which has no responsibilities in the field of armaments, and new military plant need not be notified to the Commission nor is it subject to inspection. However, the

intended use of *all* nuclear materials has to be declared, so the scope of production for military purposes comes to the knowledge of the Commission.

The supply of nuclear fuel is supervised or negotiated by an Agency, financially independent and with an option on the purchase of materials within the Community. Contracts with third countries are the exclusive right of the Agency EURATOM is also the exclusive owner of special fissile materials.

research activities. In December 1969 the Six agreed to maintain the research centre fully staffed but to diversify research activities into non-nuclear fields and to reorganize the centre in order that it might undertake research and development work for outside industry.

The Commission and Council of Ministers of EURATOM were merged with the corresponding executive bodies of the European Economic Community and the European Coal and Steel Community on July 1st, 1967. EURATOM also shares with the other two Communities the following common organs. European Parliament and Court of Justice. The Economic and Social Committee is common to the EEC and to EURATOM.

ACTIVITIES AND ACHIEVEMENTS

Research: EURATOM's nuclear research assignment is to undertake research at its own Joint Research Centre or under various types of contracts with bodies in the member countries. Ispra is the largest of the four establishments of the Centre. A second is in operation (the Central Nuclear Measurements Bureau) at Mol, Belgium; a third is at Karlsruhe (the European Transuranium Elements Institute); the Dutch Petten Centre is the fourth under an agreement which came into force in 1962. Roughly half EURATOM research is undertaken under contract with public or private concerns in member countries and several hundred contracts are in course. Some of these are long-term "association contracts" in which EURATOM and the concern contribute finance and personnel, one is for the operation of the Belgian BR2 materials' testing reactor at Mol; others concern, *inter alia*, fast breeder and high temperature gas reactors, nuclear ship propulsion, fusion, agricultural and medical aspects of nuclear energy.

Co-operation with other countries and organizations: An important section of EURATOM's research work falls under agreements for joint research with other countries and international organizations. In November 1958 an agreement was signed between EURATOM and the USA for a joint power and research and development programme. Three large-scale American-designed and con-

structed atomic reactors have been installed or are under construction. One atomic power station is in operation in Italy, one plant at Chooz on the Franco-Belgian border and one at Gundremmingen in Bavaria. The latter two are EURATOM joint undertakings, and so benefit from certain fiscal exemptions and other investment aids. Sixty million dollars have so far been devoted to joint research and development.

Under the agreements with the U.K. and Canada, signed 1959, joint discussions and exchanges of information are taking place in many fields of common interest, such as fast breeder reactors and the economics of nuclear power (with the U.K.) and heavy-water moderated reactors (with Canada). Other agreements have been signed with Brazil and Argentina.

EURATOM is participating in the research projects of the European Nuclear Energy Agency of the OECD. EURATOM is participating, in the place of its member countries, and in partnership with the U.K., in the building and operation of the high-temperature gas-cooled DRAGON reactor at Winfrith Heath, along with other ENEA countries.

Industry and the Common Market: About 4,200 MWe of nuclear capacity had been installed in the Community by the beginning of 1970.

Director: H. HAHR (Sweden).

Head, Television Programme Section and Television Programme Committee Secretariat: M. VILCEK (Yugoslavia).

Head, Sound Broadcasting Section and Radio Programme Committee Secretariat: A. M. DEAN (U.K.).

DEPARTMENT OF LEGAL AFFAIRS

Legal assistance to member broadcasting organizations and permanent secretariat of the Legal Committee.

Director: G. STRASCHNOV (France).

TECHNICAL CENTRE

Comprises the Technical Directorate, the International Television Co-ordination Centre (Eurovision), the Receiving and Measuring Centre, and the Technical Committee Secretariat.

Director: G. HANSEN (Belgium).

ACTIVITIES

Television: Examples of the work of the EBU Television Programme Committee and its permanent staff in Geneva may be found in the planning and organization involved in transmitting major world sporting events and the American Apollo series space projects. Detailed preparations have been made for coverage of the 1970 World Football Championships in Mexico. An important daily operation is the multilateral exchange of news between television services via the Eurovision network. This sometimes includes satellite transmissions to and from North America and the Far East. The Committee and its Study Groups also assist systematic co-operation among EBU members. This includes co-production and exchange of programmes, and the study of specialized material, e.g. education by television, agricultural programmes and programmes for children and young people. The Committee organizes staff training courses, and programme screening sessions. It also supports approved international festivals.

Eurovision: At the end of 1969 the Eurovision network linked 26 television services in 23 countries in the European Broadcasting Area. Interest in indirect participation (by the despatch of recordings) or direct participation (by means of satellites) is constantly increasing among associate members outside the Area. The relay of Eurovision programmes and news transmissions by Intervision (OIRT) member organizations, and vice versa, is a regular operation. In 1968, 636 Eurovision programmes (617 in 1967 and 563 in 1966), totalling 898 hours (812 and 813 in 1967 and 1966 respectively) were broadcast on the network. Each of these programmes was relayed by an average of 918 organizations, giving a total of 6,240 relays (3,387 and 3,700). A total of 2,419 filmed news items were distributed (2,150 in 1967) at an average of 6.6 per day (6). A total of 24,514 relays was reached (22,600). The news film agencies provided 40 per cent of the items distributed.

THE EUROPEAN COMMUNITIES

THE EUROPEAN ECONOMIC COMMUNITY—EEC

(The Common Market)

THE EUROPEAN COAL AND STEEL COMMUNITY—ECSC

THE EUROPEAN ATOMIC ENERGY COMMUNITY—EURATOM

The three European Communities are legally separate but share a common European Parliament and Court of Justice. There are common legal, statistical and information services. A treaty merging the Councils of Ministers of the three Communities into a single Council and the Commissions into a single Commission was signed in April 1965; the merger took place in July 1967.

of importation, exportation or transit which are justified on grounds of public morality, health or safety, the protection of human or animal life or health, the preservation of plant life, the protection of national treasures of artistic, historic or archaeological value or the protection of industrial and commercial property. Such prohibitions or restrictions shall not, however, constitute either a means of arbitrary discrimination or a disguised restriction on trade between member states. Member states shall progressively adjust any state monopolies of a commercial character in such a manner as will ensure the exclusion, at the end of the transitional period, of all discrimination between the nationals of member states in regard to conditions of supply and marketing of goods. These provisions shall apply to any body by means of which a member state shall *de jure* or *de facto* either directly or indirectly, control or appreciably influence importation or exportation between member states, and also to monopolies assigned by the state. In the case of a commercial monopoly which is accompanied by regulations designed to facilitate the marketing or the valorisation of agricultural products, it should be ensured that in the application of these provisions equivalent guarantees are provided in respect of the employment and standard of living of the producers concerned.

The obligations incumbent on member states shall be binding only to such extent as they are compatible with existing international agreements.

AGRICULTURE

The Common Market shall extend to agriculture and trade in agricultural products. The common agricultural policy shall have as its objectives

- (a) the increase of agricultural productivity by developing technical progress and by ensuring the rational development of agricultural production and the optimum utilisation of the factors of production, particularly labour,
- (b) the assurance thereby of a fair standard of living for the agricultural population,
- (c) the stabilisation of markets,
- (d) regular supplies,
- (e) reasonable prices in supplies to consumers.

Due account must be taken of the particular character of agricultural activities, arising from the social structure of agriculture and from structural and natural disparities between the various agricultural regions; of the need to make the appropriate adjustments gradually; and of the fact that in member states agriculture constitutes a sector which is closely linked with the economy as a whole. With a view to developing a common agricultural policy during the transitional period and the establishment of it not later than at the end of the period, a common organisation of agricultural markets shall be effected.

FREE MOVEMENT OF PERSONS, SERVICES AND CAPITAL

Workers: The free movement of workers shall be ensured within the Community not later than at the date of the expiry of the transitional period, involving the abolition of any discrimination based on nationality between workers of the member states as regards employment, remuneration

and other working conditions. This shall include the right to accept offers of employment actually made, to move about freely for this purpose within the territory of the member states, to stay in any member state in order to carry on an employment in conformity with the legislative and administrative provisions governing the employment of the workers of that state, and to live, on conditions which shall be the subject of implementing regulations laid down by the Commission, in the territory of a member state after having been employed there. (These provisions do not apply to employment in the public administration).

In the field of social security, the Council shall adopt the measures necessary to effect the free movement of workers, in particular, by introducing a system which permits an assurance to be given to migrant workers and their beneficiaries that, for the purposes of qualifying for and retaining the rights to benefits and of the calculation of these benefits, all periods taken into consideration by the respective municipal law of the countries concerned shall be added together, and that these benefits will be paid to persons resident in the territories of the member states.

Right of Establishment: Restrictions on the freedom of establishment of nationals of a member state in the territory of another member state shall be progressively abolished during the transitional period, nor may any new restrictions of a similar character be introduced. Such progressive abolition shall also extend to restrictions on the setting up of agencies, branches or subsidiaries. Freedom of establishment shall include the right to engage in and carry on non-wage-earning activities, and also to set up and manage enterprises and companies under the conditions laid down by the law of the country of establishment for its own nationals, subject to the provisions of this Treaty relating to capital.

Services: Restrictions on the free supply of services within the Community shall be progressively abolished in the course of the transitional period in respect of nationals of member states who are established in a state of the Community other than that of the person to whom the services are supplied, no new restrictions of a similar character may be introduced. The Council, acting by a unanimous vote on a proposal of the Commission, may extend the benefit of these provisions to cover services supplied by nationals of any third country who are established within the Community.

Particular services involved are activities of an industrial or artisan character and those of the liberal professions.

Capital: Member states shall during the transitional period progressively abolish between themselves restrictions on the movement of capital belonging to persons resident in the member states, and also any discriminatory treatment based on the nationality or place of residence of the parties or on the place in which such capital is invested. Current payments connected with movements of capital between member states shall be freed from all restrictions not later than at the end of the first stage of the transitional period.

Member states shall endeavour to avoid introducing within the Community any new exchange restrictions which affect the movement of capital and current payments connected with such movements, and making existing rules more restrictive.

the Common Market. The European Parliament and the Economic and Social Committee shall be consulted concerning any directives whose implementation in one or more of the member states would involve amendment of legislative provisions

ECONOMIC POLICY

Balance of Payments: Member states are charged to co-ordinate their economic policies in order that each may ensure the equilibrium of their overall balances of payments and maintain confidence in their currency, together with a high level of employment and stability of prices. In order to promote this co-ordination a Monetary Committee is established (*see* section on Organization, above)

Each member state engages itself to treat its policy with regard to exchange rates as a matter of common interest. Where a member state is in difficulties or seriously threatened with difficulties as regards its balance of payments as a result either of overall disequilibrium of the balance of payments or of the kinds of currency at its disposal, and where such difficulties are likely, in particular, to prejudice the functioning of the Common Market or the progressive establishment of the common commercial policy, the Commission shall examine the situation and indicate the measures which it recommends to the state concerned to adopt, if this action proves insufficient to overcome the difficulties, the Commission shall, after consulting the Monetary Committee, recommend to the Council of Ministers the granting of mutual assistance. This mutual assistance may take the form of

- (a) concerted action in regard to any other international organization to which the member states may have recourse;
- (b) any measures necessary to avoid diversions of commercial traffic where the state in difficulty maintains or re-establishes quantitative restrictions with regard to third countries,
- (c) the granting of limited credits by other member states, subject to their agreement.

Furthermore, during the transitional period, mutual assistance may also take the form of special reductions in customs duties or enlargements of quotas. If the mutual assistance recommended by the Commission is not granted by the Council, or if the mutual assistance granted and the measures taken prove insufficient, the Commission shall authorise the state in difficulties to take measures of safeguard, of which the Commission shall determine the conditions and particulars. In the case of a sudden balance-of-payments crisis, any member state may take immediate provisional measures of safeguard, which must be submitted to the consideration of the Commission as soon as possible. On the basis of an opinion of the Commission and after consulting the Monetary Committee, the Council may decide that the state concerned shall amend, suspend or abolish such measures.

Commercial Policy: Member states shall co-ordinate their commercial relations with third countries in such a way as to bring about, not later than at the expiry of the transitional period, the conditions necessary to the implementation of a common policy in the matter of external trade. After the expiry of the transitional period, the common commercial policy shall be based on uniform principles,

particularly in regard to tariff amendments, the conclusion of tariff or trade agreements, the alignment of measures of liberalisation, export policy and protective commercial measures, including measures to be taken in cases of dumping or subsidies. The Commission will be authorised to conduct negotiations with third countries. As from the end of the transitional period, member states shall, in respect of all matters of particular interest in regard to the Common Market, within the framework of any international organizations of an economic character, only proceed by way of common action. The Commission shall for this purpose submit to the Council of Ministers proposals concerning the scope and implementation of such common action. During the transitional period, member states shall consult with each other with a view to concerting their action and, as far as possible, adopting a uniform attitude.

SOCIAL POLICY

Social Provisions: Without prejudice to the other provisions of the Treaty and in conformity with its general objectives, it shall be the aim of the Commission to promote close collaboration between member states in the social field, particularly in matters relating to employment, labour legislation and working conditions, occupational and continuation training, social security, protection against occupational accidents and diseases, industrial hygiene, the law as to trade unions and collective bargaining between employers and workers.

Each member state shall in the course of the first stage of the transitional period ensure and subsequently maintain the application of the principle of equal pay for men and women.

The European Social Fund: *See* the section on Organization above.

The European Investment Bank: *See* the section on Organization above.

PART IV OVERSEAS COUNTRIES AND TERRITORIES

The member states agree to bring into association with the Community the non-European countries and territories which have special relations with Belgium, France, Italy and the Netherlands in order to promote the economic and social development of these countries and territories and to establish close economic relations between them and the Community as a whole.

Member states shall, in their commercial exchanges with the countries and territories, apply the same rules which they apply among themselves pursuant to the Treaty. Each country or territory shall apply to its commercial exchanges with member states and with the other countries and territories the same rules which it applied in respect of the European state with which it has special relations. Member states shall contribute to the investments required by the progressive development of these countries and territories.

Customs duties on trade between member states and the countries and territories are to be progressively abolished according to the same timetable as for trade between the member states themselves. The countries and territories may, however, levy customs duties which correspond to the needs of their development and to the requirements of

THE EUROPEAN COMMUNITIES

Council of Ministers of the European Communities

2 rue Ravenstein, Brussels

Secretary-General: CHRISTIAN CALMES (Luxembourg).

The Council of Ministers has the double responsibility of ensuring the co-ordination of the general economic policies of the member states and of taking the decisions necessary for carrying out the Treaties.

The Council is composed of representatives of the member states, each Government delegating to it one of its members. The office of President is exercised for a term of six months by each member of the Council in rotation according to the alphabetical order of the member states. Meetings of the Council are called by the President acting on his own initiative or at the request of a member or of the Commission.

The conclusions of the Council can usually be taken by a majority vote; where conclusions require a qualified majority, the votes of its members are weighted as follows: Belgium and the Netherlands 2, the German Federal Republic, France and Italy 4, and Luxembourg 1. Majorities are required for the adoption of any conclusions as follows: twelve votes in cases where the Treaty requires a

previous proposal of the Commission, or twelve votes including a favourable vote by at least four members in all other cases. This system of voting has applied for most decisions on internal Community affairs since January 1st, 1966. Abstentions by members either present or represented do not prevent the adoption by the Council of conclusions requiring unanimity. When the Council acts on a proposal of the Commission, it must, where the amendment of such a proposal is involved, act only by means of a unanimous vote; as long as the Council has not so acted, the Commission may amend its original proposal, particularly in cases where the European Parliament has been consulted. The Council may request the Commission to undertake any studies which the Council considers desirable for the achievement of the common objectives, and to submit to it any appropriate proposals.

The functions of the Council of Ministers of the European Coal and Steel Community and of the Council of Ministers of EURATOM were transferred to the merged Council of Ministers of the European Communities on July 1st, 1967.

The Commission works on the principle of collegiate responsibility but with each member having responsibility for a particular sector.

The functions of the Commission are fourfold: to ensure the application of the provisions of the Treaties and of the

provisions enacted by the institutions of the Communities in pursuance thereof; to formulate recommendations or opinions in matters which are the subject of the Treaties, where the latter expressly so provides or where the Commission considers it necessary; to dispose, under the conditions laid down in the Treaties of a power of decision of its own and to participate in the preparation of acts of the Council of Ministers and of the European Parliament; and to exercise the competence conferred on it by the Council of Ministers for the implementation of the rules laid down by the latter.

The Commission is bound to publish an Annual General Report on the activities of the Community, not later than one month before the opening of the session of the European Parliament.

The Commission may not include more than two members having the nationality of the same state; the number of members of the Commission may be amended by a unanimous vote of the Council of Ministers. In the performance of their duties, the members of the Commission are forbidden to seek or accept instructions from any Government or other body, or to engage in any other paid or unpaid professional activity.

The members of the Commission are appointed by the Governments of the member states acting in common agreement for a renewable term of four years; the President and Vice-Presidents are similarly appointed for renewable terms of two years. Any member of the Commission, if he no longer fulfils the conditions required for the performance of his duties, or if he commits a serious offence, may be declared removed from office by the Court of Justice. The

In the course of the transitional period, where there are serious difficulties which are likely to persist in any sector of economic activity or difficulties which may seriously impair the economic situation in any region, any member state may ask for authorisation to take measures of safeguard in order to restore the situation and adapt the sector concerned to the Common Market economy.

The provisions of the Treaty shall not affect those of the Treaty establishing the European Coal and Steel Community, nor those of the Treaty establishing the European Atomic Energy Community, nor shall they be an obstacle to the existence or completion of regional unions between Belgium and Luxembourg, and between Belgium, Luxem-

bourg and the Netherlands, in so far as the objectives of these regional unions are not achieved by the application of this Treaty.

The government of any member state of the Commission may submit to the Council proposals for the revision of the Treaty.

Any European state may apply to become a member of the Community.

The Community may conclude with a third country, a union of states or an international organisation agreements creating an association embodying reciprocal rights and obligations, joint actions and special procedures.

The Treaty is concluded for an unlimited period

FINANCING THE EUROPEAN COMMUNITY

Under Article 200 of the Rome Treaty the budget of the EEC is contributed by the member states according to a fixed key. France, Germany and Italy 28 per cent each, Belgium and the Netherlands 7.9 per cent each, and Luxembourg 0.2 per cent. The European Social Fund is financed in a similar fashion but with different proportions. The Euratom and ECSC Treaties lay down the means of financing those two Communities.

With the establishment of the common agricultural policy, variations on this basic EEC key were introduced for the years 1962-67 for agricultural expenditure. From July 1st, 1967, to December 31st, 1969, the budget of the European Agricultural Guidance and Guarantee Fund was financed in part by the payment to the Community of 90 per cent of the product of the levies imposed on imports into the Community of foodstuffs subject to the common agricultural policy. The remaining revenue was raised by direct contributions by the member states in the following proportions: France 32 per cent; Germany 31.2 per cent, Italy 20.3 per cent, Netherlands 8.2 per cent, Belgium 8.1 per cent, Luxembourg 0.2 per cent. These proportions represent the gross contributions to the Fund. The effect of the payments from the Fund to support Community agriculture (particularly to make export refunds) has been to make France and the Netherlands net recipients from the Fund, with the other member states making net contributions.

Under Article 201 of the Rome Treaty the Commission is empowered to propose what means of financing the Community be adopted after the completion of the common external tariff (which took place on July 1st, 1968), in particular whether the direct state contributions shall be replaced by the revenue from the common tariff. In the summer of 1969 the Commission published proposals for giving the Community its own direct revenues, and these formed the basis of the agreement reached between the six governments on December 22nd, 1969.

Direct revenue financing system: The essential elements of this agreement were that from January 1st, 1975, onwards, the three Communities' activities would be financed from three main sources: (a) the levies imposed on imports from non-member countries of products subject to the common agricultural policy (less 10 per cent for administrative expenses); (b) duties imposed under the common external tariff (less 10 per cent for administrative expenses); (c) the product of up to a 1 per cent rate of the

value-added tax. In 1975-77 inclusive certain restrictions would prevent any one member country's annual contribution being more than 2 per cent greater or less than its contribution in the previous year. The agreement is subject to final agreement on certain details and the ratification, expected in the course of 1970, by the six national parliaments. The system will be phased in over the years 1970-74.

In 1970 alone the overall expenditure by the Agricultural Fund is being financed in the following proportions: Germany 31.7 per cent, France 28 per cent, Italy 21.5 per cent, Netherlands 10.35 per cent, Belgium 8.25 per cent, Luxembourg 0.2 per cent. Non-agricultural expenditure is being financed according to the keys in the three Treaties.

On January 1st, 1971, will begin the phasing in of the tripartite financing system outlined above for all forms of expenditure. From that day all import levies will be paid over to the Community together with an annually increasing proportion of customs duties which will be determined according to a reference amount based upon the total value of the levies and duties raised by each state. For example, in 1971 each state will pay in all its levies plus the value of customs duties sufficient to make up an amount equal to 50 per cent of the combined value of levies and duties. In 1972 the reference amount is 62.5 per cent, in 1973, 75 per cent, in 1974, 87 per cent, in 1975, 100 per cent. Any further revenue required by the Community will be covered by direct contributions from the national exchequers in the following proportions: Germany 32.9 per cent, France 32.6 per cent, Italy 20.2 per cent, Netherlands 7.3 per cent, Belgium 6.8 per cent, Luxembourg 0.2 per cent. This scale is based partly on the relative values of the GNP's of the member countries. In 1971-74 inclusive the annual contribution of any member state shall not vary by more than 1½ per cent downwards from the amount contributed in the previous year.

Parliamentary control: At the Council meeting of December 22nd, 1969, the six governments agreed on a draft resolution on the powers of budgetary control to be granted to the European Parliament after 1975. The draft resolution provided for four stages in adopting the budget: (1) The Council draws up an estimate of the expenditure and of revenue, the latter including the rate of value-added tax to be apportioned to the Community's budget; (2) This draft budget may be amended by the European Parliament by a majority vote of its members, though any

Specialized Bodies

Monetary Committee. Advises the Commission and Council of Ministers on monetary matters, promotes the co-ordination of national monetary policies and reviews the monetary and financial situation of member countries and the general payments system. Consists of two members nominated by each of the Six and two from the Commission.

Short-term Economic Policy Committee. Assists member countries in co-ordinating their day-to-day economic policies and in maintaining a steady rate of economic expansion. Composed of representatives of national governments and of the Commission.

Medium-term Economic Policy Committee. During 1965 and 1966 prepared a draft five-year programme setting out foreseeable trends in the Community economy and making general policy recommendations. The programme, adopted by the Council in February 1967, will be brought up to date and expanded each year, and will provide a framework for co-ordination of national economic policies and for the various common policies to be worked out at Community

level. Comprises representatives of national governments and of the Commission.

Budgetary Policy Committee. Composed of leading officials responsible for drawing up the budgets of member governments, and of Commission representatives.

Committee of Central Bank Governors. Meets to discuss credit, money-market and exchange matters, with a member of the Commission attending.

Transport Committee. Consists of national officials and experts. A Common Transport Policy, to come into effect by 1973, was agreed in June 1965. The first stage deals with international transport and the second will include national transport. Common transport prices are to be established before the end of the second stage.

Administrative Commission for the Social Security of Migrant Workers. Protects the interests of Community citizens working in a member country other than their own. Comprises national officials and representatives of the Commission.

European Social Fund

The European Social Fund was established by the Treaty in order to improve opportunities of employment of workers in the Common Market and thus contribute to raising the standard of living. Its task is to promote within the Community employment facilities and the geographical and occupational mobility of workers. The Fund is administered by the Commission, assisted by a Committee presided over by the member of the Commission specially concerned with Social Affairs and composed of representatives of governments, trade unions and employers associations.

At the request of a member state, the Fund may cover 50 per cent of expenses incurred by that state or by a body under public law for the purposes of ensuring productive re-employment of workers by means of occupational re-

training and resettlement allowances, and of granting aids for the benefit of workers whose employment is temporarily reduced, or wholly or partly suspended, as the result of the conversion of their enterprise to other productions, in order that they may maintain the same wage-level pending their full re-employment, subject to certain detailed conditions. The rules of the Social Fund were adopted by the Council of Ministers in May 1960. Total aid 1960-68: \$80.26 million. A total of 959,258 workers have been assisted during this period.

In June 1969 the Commission proposed that the Social Fund's powers and financial resources be greatly extended in order to retrain and redeploy workers in industries and jobs threatened with redundancy but not yet unemployed.

European Investment Bank

2 Place de Metz, Luxembourg

Board of Governors: Generally the Finance Ministers of the six member States.

Board of Directors: FRANCO BOBBA, SJOERD BOOMSTRA, HANS RANNOU, RAYMOND DENUCE, ROBERTO DUCCI, UGO MOSCA, HERBERT MARTINI, ALFRED MUELLER-ARMACK, MAURICE PÉROUSE, GIUSEPPE DI NARDI, JEAN SALTES, STEFANO SIGLIANTI.

Management Committee:

President: PARIDE FORMENTINI (Italy).

Vice-Presidents: YVES LE PORTZ (France), ULRICH MEYER-CORDING (German Federal Republic).

Director General: HENRI LENAERT (Belgium).

Members: The six Governments of the Community.

The task of the European Investment Bank is to contribute, by calling on the capital markets and its own resources, to the balanced and smooth development of the Common Market in the interest of the Community. For this

purpose, the Bank is to grant loans and guarantees on a non-profit-making basis to facilitate the financing of projects for developing less-developed regions, for modernizing or converting enterprises or for creating new activities which are called for by the progressive establishment of the Common Market where such projects by their size or nature cannot be entirely financed by the various means available in each of the member states, and projects of common interest to several member states which similarly cannot be entirely financed by each of the member states.

The members of the Bank are the Governments of the six member states of the Community. Its capital is 1,000 million European Monetary Agreement Accounting Units, to be subscribed by the member states as follows: France and the Federal German Republic 300 million each; Italy 240 million; Belgium 86.5 million; the Netherlands 71.5 million; Luxembourg 2 million. One-quarter of these totals has been paid up. The Bank raises most of its working capital on the open international capital markets.

The High Authority is obliged to encourage technical and economic research concerning the production and the development of consumption of coal and steel, as well as workers' safety in these industries. If the introduction of technical processes or new equipment, within the framework of the general objectives laid down by the High Authority, should lead to an exceptionally large reduction in labour requirements in the coal or steel industries, making it especially difficult in one or more areas to re-employ the workers discharged, the High Authority, on the request of the interested governments, may facilitate the financing of such programmes as it may approve for the creation, either in the industries subject to its jurisdiction or, with the agreement of the Council, in any other industry, of new and economically sound activities capable of assuring productive employment to the workers thus discharged, and shall grant non-repayable assistance as a contribution to payment of compensation, granting of re-settlement allowances and the financing of technical retraining of workers.

Production: The High Authority is to give preference to the indirect means of action at its disposal, such as co-operation with governments to stabilise or influence general consumption, particularly that of public services, and intervention on prices and commercial policy.

If, in the case of a decline in demand, it considers that the Community is faced with a manifest crisis, it must, after consulting the Consultative Committee and with the agreement of the Council, establish a system of production quotas. Failing this, any member state may bring the matter to the attention of the Council, which, by unanimous vote, may oblige the High Authority to establish a quota system. The High Authority may in particular regulate the rate of operation of enterprises by appropriate levies on tonnages exceeding a reference level defined by a general decision. The sums thus obtained will be earmarked for the support of those enterprises whose rate of production has fallen below the reference level.

If the Community is faced with a serious shortage of coal or steel, the High Authority, after consulting the Consultative Committee and with the agreement of the Council, may, by unanimous vote, contrary to unanimous vote. On the basis of these proposals, the Council must establish consumption priorities and determine the allocation of the coal and steel resources of the Community among the industries subject to its jurisdiction, exports and other consumption. On the basis of the consumption priorities thus established, the High Authority is empowered, after consulting the enterprises concerned, to draw up production programmes which the enterprises are obliged to carry out.

Prices: Pricing practices contrary to the provision of Title I are prohibited and in particular unfair competitive practices, especially purely temporary or local price reductions, the purpose of which is to acquire a monopoly within the common market and discriminatory practices involving within the common market the application by a seller of unequal conditions to comparable transactions, especially according to the nationality of the buyer. In certain cases, the High Authority may fix maximum and/or minimum prices for one or more products subject to its jurisdiction, both within the common market and with regard to export.

Agreements and Concentrations: All agreements among enterprises, all decisions of associations of enterprises,

particular those tending to fix or determine prices, to restrict or control production, technical development or investments, or to allocate markets, products, customers or sources of supply. However, the High Authority may authorise agreements to specialise in the production of, or to engage in the joint buying or selling of specified products, if it finds that this will contribute to a substantial improvement in production or distribution, or that the agreement in question is essential to achieve these results and is not more restrictive than is necessary, or that it is not capable of giving the interested enterprises any discriminatory powers or advantages. Similar regulations apply to concentrations.

Impairment of the Conditions of Competition: If any action of any member state is liable to provoke a serious disequilibrium by substantially increasing differences in costs of production otherwise than through variations in productivity, the High Authority, after consulting the Consultative Committee and the Council, may take the following steps.

If the action of the state produces harmful effects for coal or steel enterprises falling under the jurisdiction of the said state, the High Authority may authorise that state to grant assistance to such enterprises, the amount, conditions and duration of which shall be determined in agreement with the High Authority. The same provisions are to apply in the case of a variation in wages and in working conditions which would have the same effects, even if such variation is not the result of an action by that state.

If the action of that state produces harmful effects for coal and steel enterprises subject to the jurisdiction of other member states, the High Authority may address a recommendation to the said state with a view to remedying these effects by such measures as that state may consider most compatible with its own economic equilibrium.

If the action of the said state reduces differences in costs of production by granting a special advantage to, or by imposing special burdens on, coal or steel enterprises falling under its jurisdiction in comparison with the other industries in the same country, the High Authority is empowered to address the necessary recommendations to the state in question, after consulting the Consultative Committee and the Council.

Wages and Movement of Labour: The methods of fixing wages and social benefits in force in the various member states are not affected by the Treaty, subject to certain provisions.

If the High Authority finds that any wage levels are abnormally low, whether these levels are fixed by enterprises or by government decisions, it may address recommendations to the enterprises concerned or government interested. Similar action may be taken when a lowering of wages entails a drop in the standard of living of the labour force and at the same time is being used as a means of permanent economic adjustment by enterprises or as a means of competition between enterprises. This provision does not apply to

THE EUROPEAN COMMUNITIES

ASSOCIATION AGREEMENTS

APPLICATIONS FOR MEMBERSHIP OF OR ASSOCIATION WITH THE EEC

The following countries have applied for membership of the EEC: United Kingdom* (August 1961 and May 1967), Denmark* (August 1961 and May 1967), Ireland (August 1961 and May 1967), Norway (April 1962 and July 1967).

The following countries have applied for association, or some form of trade agreement with the EEC: Austria* (December 1961 and July 1967), Switzerland (December 1961), Sweden (December 1961), Spain* (February 1962), Portugal (May 1962), Cyprus (December 1962), Nigeria† (September 1963), Tunisia** (October 1963), Kenya, Tan-

zania and Uganda‡ (November 1963), Morocco** (December 1963), Israel* (October 1966), Malta* (September 1967), Algeria (January 1968), Yugoslavia* (May 1968).

Trade Agreements have been signed with Iran (signed October 1963), Israel (signed July 1964) and Lebanon (signed March 1965).

* Negotiations or talks have taken place, but are not yet completed.

† Signed July 1966 but not ratified.

‡ Signed July 1968 and renewed in September 1969.

** Signed in March 1969.

Organs of Association

Association agreements have been signed by the members of the EEC and Greece (came into force November 1962); Turkey (came into force December 1964): the eighteen signatory states in Africa and Madagascar of the Yaoundé Convention (first Yaoundé Convention 1964-69, second Yaoundé Convention signed July 1969, will terminate on January 31st, 1975); Kenya, Tanzania and Uganda (signed July 1968, renewed September 1969). Each agreement establishes a separate institutional framework. Since the Greek military coup of April 1967 the agreement with Greece has been in suspense.

Association Agreements with Greece and Turkey. An *Association Council*, comprising representatives of the Community governments and of the Commission on the one hand, and of the associated country on the other, supervises the implementation of the agreements. *Parliamentary Committees*, comprising members of the European Parliament and of the parliaments of the associated

country, meet regularly to debate the progress of the Associations and other matters of common interest.

Yaoundé Convention. The *Association Council* consists of one minister from each of the associated states and from each of the Community members, and of the members of the Commission. The *Association Committee* conducts the day-to-day business of the Association and consists of representatives from the twenty-four signatory countries. The *Parliamentary Conference* meets annually and comprises 108 members of parliament, half of them from the eighteen associated states and half from the European Parliament. An *Arbitration Court*, with a president and two European and two African judges, can be appointed to settle any disputes which may arise.

Arusha Agreement. A *Parliamentary Committee* meets once a year and an *Association Council* administers the agreement.

EUROPEAN COAL AND STEEL COMMUNITY—ECSC

The European Coal and Steel Community is the eldest of the three "sisters" of the European Community. It arose from a declaration made by M. Robert Schuman on May 9th, 1950, urging the necessity of a united Europe. This union could not be achieved all at once, or according to a single, general plan; concrete achievements, stage by stage, and above all the elimination of hostility and suspicion between France and Germany, were the solution. Accordingly he proposed, as a first step, the placing of the coal and steel industries of France and Germany under a common "High Authority", within the framework of an organization open to the participation of the other countries of Europe. Direct political action towards European federation would, at this stage, be doomed to failure, but economic co-operation could be achieved and once gained, would provide a firm foundation for the political federation to come.

The ECSC Treaty was signed in Paris on April 18th, 1951. The Treaty was ratified by substantial majori-

ties in the parliaments of The Six and came into force on July 25th, 1952. The High Authority began its work on August 10th, 1952. The functions of the High Authority and the Council of Ministers as laid down in the ECSC Treaty (*see below*) were transferred on July 1st, 1967, to the merged Commission and Council of the European Communities respectively. The Consultative Committee now exercises its functions in relation to the Commission.

The *ECSC Consultative Committee* is attached to the Commission, and consists of not less than thirty and not more than fifty-one members, including an equal number of producers, workers and consumers and dealers. They are appointed by the Council of Ministers for a period of two years, and are not bound by any mandate or instructions.

The Commission may consult the Committee on all matters it deems proper, and is required to do so under certain provisions of the Treaty, particularly with regard to economic and social provisions.

SUMMARY OF EURATOM TREATY

The preamble to the Treaty states that the signatory powers

"Realising that nuclear energy constitutes the essential resource for ensuring the expansion and invigoration of production and for effecting progress in peaceful achievement,

"Convinced that only a common effort undertaken without delay can lead to achievements commensurate with the creative capacities of their countries,

"Resolved to create the conditions required for the development of a powerful nuclear industry which will provide extensive supplies of energy, lead to the modernization of technical processes and in addition have many other applications contributing to the well-being of their peoples,

"Anxious to establish conditions of safety which will eliminate danger to the life and health of the people,

"Desirous of associating with international organizations concerned with the peaceful development of atomic energy,

"Have decided to establish a European Atomic Energy Community (EURATOM) "

AIMS OF THE COMMUNITY

ARTICLE 1 It shall be the aim of the Community to contribute to the raising of the standard of living in member states and to the development of commercial exchanges with other countries by the creation of conditions necessary for the speedy establishment and growth of nuclear industries

ARTICLE 2 For the attainment of its aims the Community shall

- (a) develop research and ensure the dissemination of technical knowledge,
- (b) establish, and ensure the application of, uniform safety standards to protect the health of workers and of the general public,
- (c) facilitate investment and ensure, particularly by encouraging business enterprise, the construction of the basic facilities required for the development of nuclear energy within the Community,
- (d) ensure a regular and equitable supply of ores and nuclear fuels to all users in the Community,
- (e) guarantee, by appropriate measures of control, that nuclear materials are not diverted for purposes other than those for which they are intended;
- (f) exercise the property rights conferred upon it in respect of special fissionable materials,
- (g) ensure extensive markets and access to the best technical means by the creation of a common market for specialized materials and equipment, by the free movement of capital for nuclear investment, and by freedom of employment for specialists within the Community;
- (h) establish with other countries and with international organizations any contacts likely to promote progress in the peaceful uses of nuclear energy

ARTICLE 3. The achievement of the tasks entrusted to the Community shall be ensured by

- an Assembly
- a Council
- a Commission
- a Court of Justice

The Council and the Commission shall be assisted by an Economic and Social Committee acting in a consultative capacity

PROVISIONS FOR NUCLEAR ENERGY

Articles 4-11 deal with development of research

Article 8 provides for the establishment of a Joint Nuclear Research Centre

Articles 12-29 the dissemination of information, including (Articles 24-27) provisions concerning security

Articles 30-39 health protection

Articles 40-44 investment

Article 41 enacts that certain investment projects must be communicated to the Commission

Articles 45-51: joint enterprises

Article 46 enacts that any project for the establishment of a joint enterprise, whether originating from the Commission, a member state, or any other source, shall be the subject of an enquiry by the Commission

Articles 52-76 supplies

Article 52 provides for the establishment of a Supply Agency

Articles 77-85. safety control

Articles 86-91 property rights

Articles 92-100 the nuclear common market.

Article 93 enacts the abolition after one year of all import and export duties and all quantitative restrictions on imports and exports in respect of certain nuclear materials and equipment listed in Annex IV to the Treaty

Articles 101-106 external relations

These articles lay down the conditions for agreements with third countries or international organizations

PROVISIONS RELATING TO INSTITUTIONS

Articles 107-160 the Institutions of the Community

Articles 107-114 the Assembly,

Articles 115-123. the Council

Articles 124-135 the Commission

Article 134. Scientific and Technical Committee attached to the Commission.

Articles 136-160. the Court of Justice.

Articles 161-164 provisions common to several institutions

Articles 165-170. the Economic and Social Committee

THE EUROPEAN COMMUNITIES

EURATOM expects power reactors on which construction could now start to be competitive when they come into operation in 1968-70; from then onwards nuclear electricity will be required on a large scale. It is estimated that between 1960 and 1980 Community electricity consumption will virtually quadruple, rising from an estimated 264 billion kWh in 1960 to 950 billion kWh in 1980 and that consumption per head will rise to 5,000 kW. in 1980 (from the 1,350 kW. or so in 1960). It is estimated that the

Community's installed nuclear capacity will be 60,000 MW. in 1980 to satisfy electricity needs, over 20 per cent of total electricity production capacity. By the year 2000 the capacity is expected to be 370,000 MW., producing some two-thirds of the Community's electricity.

EURATOM is not, however, responsible for the construction of power reactors in the Community. Its role is to facilitate and encourage investment by private or public authorities in member countries.

THE EUROPEAN COMMUNITIES

TREATIES OF THE COMMUNITIES

SUMMARY OF EEC TREATY (TREATY OF ROME)

PART I. PRINCIPLES

The aim of the Community is, by establishing a Common Market and progressively approximating the economic policies of the member states, to promote throughout the Community a harmonious development of economic activities, a continuous and balanced expansion, an increased stability, an accelerated raising of the standard of living and closer relations between its member states. With these aims in view, the activities of the Community will include:

- (a) the elimination between member states of customs duties and of quantitative restrictions in regard to the importation and exportation of goods, as well as of all other measures with equivalent effect;
- (b) the establishment of a common customs tariff and a common commercial policy towards third countries;
- (c) the abolition between member states of the obstacles to the free movement of persons, services and capital;
- (d) the inauguration of a common agricultural policy;
- (e) the inauguration of a common transport policy;
- (f) the establishment of a system ensuring that competition shall not be distorted in the Common Market;
- (g) the application of procedures that will make it possible to co-ordinate the economic policies of member states and to remedy disequilibria in their balance of payments;
- (h) the approximation of their respective municipal law to the extent necessary for the functioning of the Common Market;
- (i) the creation of a European Social Fund in order to improve the possibilities of employment for workers and to contribute to the raising of their standard of living;
- (j) the establishment of a European Investment Bank intended to facilitate the economic expansion of the Community through the creation of new resources; and
- (k) the association of overseas countries and territories with the Community with a view to increasing trade and to pursuing jointly their effort toward economic and social development.

Member states, acting in close collaboration with the institutions of the Community, shall co-ordinate their respective economic policies to the extent that is necessary to attain the objectives of the Treaty; the institutions of the Community shall take care not to prejudice the internal and external financial stability of the member states. Within the field of application of the Treaty and without prejudice to certain special provisions which it contains, any discrimination on the grounds of nationality shall be hereby prohibited.

The Common Market shall be progressively established in the course of a transitional period of twelve years. This transitional period shall be divided into three stages of four

years each; the length of each stage may be modified in accordance with the provisions set out below.

Transition from the first to the second stage shall be conditional upon a confirmatory statement to the effect that the essence of the objectives laid down in the Treaty for the first stage has been in fact achieved, and that all obligations have been observed. Failing a unanimous vote by the Council of Ministers at the end of the fourth year, the first stage shall be automatically extended for a period of one year. A similar procedure may be followed at the end of the sixth year if the first stage has in fact been extended. If at the end of the seventh year a unanimous vote is not forthcoming to proceed to the second stage, the Council of Ministers shall appoint an Arbitration Board whose decision shall bind both member states and Community institutions. The second and third stages may not be extended or curtailed except by a decision of the Council acting by means of a unanimous vote on a proposal of the Commission. These provisions shall not have the effect of extending the transitional period beyond a total duration of fifteen years after the date of entry into force of the Treaty.

PART II. BASES OF THE COMMUNITY

FREE MOVEMENT OF GOODS

Member states shall refrain from introducing between themselves any new import or export customs duties, or charges with equivalent effect, and from increasing such duties or charges as they apply in their commercial relations with each other. Member states shall progressively abolish between themselves all import and export customs duties, charges with an equivalent effect, and also customs duties of a fiscal nature. Independently of these provisions, any member state may, in the course of the transitional period, suspend in whole or in part the collection of import duties applied by it to products imported from other member states, or may carry out the foreseen reductions more rapidly than laid down in the Treaty if its general economic situation and the situation of the sector so concerned permit.

A common customs tariff shall be established, which, subject to certain conditions (especially with regard to the Italian tariff), shall be at the level of the arithmetical average of the duties applied in the four customs territories (i.e. France, Germany, Italy and Benelux) covered by the Community. This customs tariff shall be applied in its entirety not later than at the date of the expiry of the transitional period. Member states may follow an independent accelerating process similar to that allowed for reduction of inter-Community customs duties.

Member states shall refrain from introducing between themselves any new quantitative restrictions or measures with equivalent effect, and existing restrictions and measures shall be abolished not later than at the end of the first stage of the transitional period. These provisions shall not be an obstacle to prohibitions or restrictions in respect

THE EUROPEAN COMMUNITIES

TRANSPORT

With a view to establishing a common transport policy, the Council of Ministers shall, acting on a proposal of the Commission and after consulting the Economic and Social Committee and the European Parliament, lay down common rules applicable to international transport effected from or to the territory of a member state or crossing the territory of one or more member states, conditions for the admission of non-resident carriers to national transport services within a member state and any other appropriate provisions. Until these have been enacted and unless the Council of Ministers gives its unanimous consent, no member state shall apply the various provisions governing this subject at the date of the entry into force of this Treaty in such a way as to make them less favourable, in their direct or indirect effect, for carriers of other member states by comparison with its own national carriers.

Any discrimination which consists in the application by a carrier, in respect of the same goods conveyed in the same circumstances, of transport rates and conditions which differ on the ground of the country of origin or destination of the goods carried, shall be abolished in the traffic of the Community not later than at the end of the second stage of the transitional period.

A Committee with consultative status, composed of experts appointed by the governments of the member states, shall be established and attached to the Commission, without prejudice to the competence of the transport section of the Economic and Social Committee.

PART III. POLICY OF THE COMMUNITY

COMMON RULES

Enterprises: The following practices by enterprises are prohibited: the direct or indirect fixing of purchase or selling prices or of any other trading conditions; the limitation or control of production, markets, technical development of investment; market-sharing or the sharing of sources of supply; the application to parties to transactions of unequal terms in respect of equivalent supplies, thereby placing them at a competitive disadvantage; the subjection of the conclusion of a contract to the acceptance by a party of additional supplies which, either by their nature or according to commercial usage, have no connection with the subject of such contract. The provisions may be declared inapplicable if the agreements neither impose on the enterprises concerned any restrictions not indispensable to the attainment of improved production, distribution or technical progress, nor enable enterprises to eliminate competition in respect of a substantial proportion of the goods concerned.

Dumping: If, in the course of the transitional period, the Commission, at the request of a member state or of any other interested party, finds that dumping practices exist within the Common Market, it shall issue recommendations to the originator of such practices with a view to bringing them to an end. Where such practices continue, the Commission shall authorise the member state injured to take protective measures of which the Commission shall determine the conditions and particulars.

Re-importation within the Community shall be free of all customs duties, quantitative restrictions or measures with equivalent effect.

Aid granted by States: Any aid granted by a member state or granted by means of state resources which is contrary to the purposes of the treaty is forbidden. The following shall be deemed to be compatible with the Common Market:

- (a) aids of a social character granted without discrimination to individual consumers;
- (b) aids intended to remedy damage caused by natural calamities or other extraordinary events;
- (c) aids granted to the economy of certain regions of the Federal German Republic affected by the division of Germany, to the extent that they are necessary to compensate for the economic disadvantages caused by the division.

The following may be deemed to be compatible with the Common Market:

- (a) aids intended to promote the economic development of regions where the standard of living is abnormally low or where there exists serious under-employment;
- (b) aids intended to promote the execution of important projects of common European interest or to remedy a serious economic disturbance of the economy of a member state;
- (c) aids intended to facilitate the development of certain activities or of certain economic regions, provided that such aids do not change trading conditions to such a degree as would be contrary to the common interest;
- (d) such other categories of aids as may be specified by a decision of the Council of Ministers acting on a proposal of the Commission.

The Commission is charged to examine constantly all systems of aids existing in the member states, and may require any member state to abolish or modify any aid which it finds to be in conflict with the principles of the Common Market.

Fiscal Provisions: A member state shall not impose, directly or indirectly, on the products of other member states, any internal charges of any kind in excess of those applied directly or indirectly to like domestic products. Furthermore, a member state shall not impose on the product of other member states any internal charges of such a nature as to afford indirect protection to other productions. Member states shall, not later than at the beginning of the second stage of the transitional period, abolish or amend any provisions existing at the date of the entry into force of the Treaty which are contrary to these rules. Products exported to any member state may not benefit from any drawback on internal charges in excess of those charges imposed directly or indirectly on them. Subject to these conditions, any member states which levy a turnover tax calculated by a cumulative multi-stage system may, in the case of internal charges imposed by them on imported products or of drawbacks granted by them on exported products, establish average rates for specific products or groups of products.

Approximation of Laws: The Council, acting by means of a unanimous vote on a proposal of the Commission, shall issue directives for the approximation of such legislative and administrative provisions of the member states as have a direct incidence on the establishment or functioning of

their industrialisation or which, being of a fiscal nature, have the object of contributing to their budgets.

(The Convention implementing these provisions is concluded for a period of five years only from the date of entry into force of the Treaty.)

PART V. INSTITUTIONS OF THE COMMUNITY PROVISIONS GOVERNING INSTITUTIONS

For accounts of the European Parliament, the Council of Ministers, the Commission, the Economic and Social Committee, the Monetary Committee, the European Investment Bank, the European Social Fund and the Development Fund, see the section on Organization above.

For the achievement of their aims and under the conditions provided for in the Treaty, the Council and the Commission shall adopt regulations and directives, make decisions and formulate recommendations or opinions. Regulations shall have a general application and shall be binding in every respect and directly applicable in each member state. Directives shall bind any member state to which they are addressed, as to the result to be achieved, while leaving to domestic agencies a competence as to form and means. Decisions shall be binding in every respect for the addressees named therein. Recommendations and opinions shall have no binding force.

FINANCIAL PROVISIONS

Estimates shall be drawn up for each financial year for all revenues and expenditures of the Community, including those relating to the European Social Fund, and shall be shown in the budget.

The revenues of the budget shall comprise (apart from those contributions which are intended to meet the expenses of the European Social Fund, and apart from any other revenues) the financial contributions of member states fixed according to the following scale:

	%
Belgium	7.9
France	28.0
Italy	28.0
German Federal Republic	28.0
Luxembourg	0.2
Netherlands	7.9

The financial contributions of the member states which are intended to meet the expenses of the European Social Fund shall be fixed according to the following scale:

	%
Belgium	8.8
France	32.0
Italy	20.0
German Federal Republic	32.0
Luxembourg	0.2
Netherlands	7.0

The Commission shall implement the budget on its own responsibility and within the limits of the appropriations made. The Council of Ministers shall:

- (a) lay down the financial regulations specifying, in particular, the procedure to be adopted for establishing and implementing the budget, and for rendering and auditing accounts;

- (b) determine the methods and procedure whereby the contributions by member states shall be made available to the Commission; and
- (c) establish rules concerning the responsibility of pay-commissioners and accountants and arrange for the relevant supervision.

PART VI. GENERAL AND FINAL PROVISIONS

Member states shall, in so far as is necessary, engage in negotiations with each other with a view to ensuring for the benefit of their nationals:

- (a) the protection of persons as well as the enjoyment and protections of rights under the conditions granted by each state to its own nationals;
- (b) the elimination of double taxation within the Community;
- (c) the mutual recognition of companies, the maintenance of their legal personality in cases where the registered office is transferred from one country to another, and the possibility for companies subject to the municipal law of different member states to form mergers; and
- (d) the simplification of the formalities governing the reciprocal recognition and execution of judicial decisions and arbitral awards.

Within a period of three years after the date of the entry into force of the Treaty, member states shall treat nationals of other member states in the same manner, as regards financial participation by such nationals in the capital of companies, as they treat their own nationals, without prejudice to the application of the other provisions of the Treaty.

The Treaty shall in no way prejudice the system existing in member states in respect of property.

The provisions of the Treaty shall not detract from the following rules:

- (a) no member state shall be obliged to supply information the disclosure of which it considers contrary to the essential interests of its security;
- (b) any member state may take the measures which it considers necessary for the protection of the essential interests of its security, and which are connected with the production of or the trade in arms, ammunition and war material; such measures shall not, however, prejudice conditions of competition in the Common Market in respect of products not intended for specifically military purposes.

The list of products to which (b) applies shall be determined by the Council in the course of the first year after the date of entry into force of the Treaty. The list may be subsequently amended by the unanimous vote of the Council on a proposal of the Commission.

Member states shall consult one another for the purpose of enacting in common the necessary provisions to prevent the functioning of the Common Market from being affected by measures which a member state may be called upon to take in case of serious internal disturbances affecting public order, in case of war or serious international tension constituting a threat of war or in order to carry out undertakings into which it has entered for the purpose of maintaining peace and international security.

SUMMARY OF ECSC TREATY

THE EUROPEAN COAL AND STEEL COMMUNITY

The European Coal and Steel Community is based on a common market, common objectives and common institutions. The aims of the Community are to contribute to the expansion of the economy, the development of employment and the improvement of the standard of living in the participating countries through the creation, in harmony with the general economy of the member states, of a common market. With these aims in view, the institutions of the Community are to ensure that the common market is regularly supplied, while taking into account the needs of third countries; to assure to all consumers in comparable positions within the common market equal access to the sources of production; to seek the establishment of the lowest possible prices without involving any corresponding rise either in the prices charged by the same enterprise in other transactions or in the price-level as a whole in another period, while at the same time permitting necessary amortisation and providing the possibility of normal returns on invested capital; to ensure that conditions are maintained which will encourage enterprises to expand and improve their ability to produce and to promote a policy of rational development of natural resources, while avoiding undue exhaustion of such resources; to promote the improvement of the living and working conditions of the labour force in each of the industries under its jurisdiction so as to harmonise those conditions in an upward direction; to foster the development of international trade and ensure that equitable limits are observed in prices charged in foreign markets; and to promote the regular expansion and the modernisation of production as well as the improvement of quality, under conditions which preclude any protection against competing industries except where justified by illegitimate action on the part of such industries or in their favour.

The following are considered incompatible with the common market and are therefore abolished and prohibited:

- (a) import and export duties, or taxes with an equivalent effect, and quantitative restrictions upon the movement of coal and steel;
- (b) measures or practices discriminating among producers, buyers or consumers, especially as concerns prices, delivery terms and transport rates, as well as practices or measures which hamper the buyer in the free choice of his supplier;
- (c) subsidies or state assistance, or special charges imposed by the state, in any form whatsoever;
- (d) restrictive practices tending towards the division or the exploitation of the market.

The Community binds itself to assist the interested parties to take action by collecting information, organising consultations and defining general objectives; to place financial means at the disposal of enterprises for their

investments and participate in the expenses of readaptation; to assure the establishment, the maintenance and the observance of the normal conditions of competition, and take direct action with respect to production and the co-operation of the market only when circumstances make it absolutely necessary; and to publish the reasons for its action and take the necessary measures to ensure observance of the rules set forth in the Treaty.

THE INSTITUTIONS OF THE COMMUNITY

See section on Organisation, above.

ECONOMIC AND SOCIAL PROVISIONS

The High Authority is empowered to consult governments and various interested parties such as enterprises, workers, consumers and dealers and their associations, as well as experts, and to gather such information as may be necessary to the accomplishment of its mission. It is not permitted to divulge information which by its nature is considered a trade secret, and in particular information pertaining to the commercial relations or the breakdown of the costs of production of enterprises. With this reservation, it must publish such data as may be useful to governments or to any other interested parties.

The High Authority may impose fines and daily penalty payments upon enterprises which evade their obligations under this title.

Financial Provisions: The High Authority is empowered to procure its funds by imposing a levy on the production of coal and steel, by borrowing, and by receiving grants. The levies are intended to cover administrative expenses, non-repayable assistance relating to readaptation, investments and financial assistance and expenditure devoted to encouraging technical and economic research. Funds obtained by borrowing may only be used to grant loans.

Investments and Financial Assistance: The High Authority may facilitate the carrying out of investment programmes by granting loans to enterprises or by giving its guarantee to other loans which they obtain. With the unanimous agreement of the Council, the High Authority may by the same means assist the financing of works and installations which contribute directly or mainly to an increase of production, to lower production costs, or which facilitate the marketing of products subject to its jurisdiction. The High Authority may require enterprises to submit individual projects in advance, and, having given the interested parties an opportunity to express their views, issue a reasoned opinion on any such projects. If the High Authority finds that the financing of a project or the operation of any proposed installation would require subsidies, assistance, protection or discrimination contrary to the present Treaty, it may issue a binding prohibition to the enterprise in question, forbidding it to use resources other than its own funds to carry out such a project.

THE EUROPEAN COMMUNITIES

- (a) overall measures taken by a member state to re-establish its external equilibrium, without prejudice to the possible application of the provisions dealing with the impairment of the conditions of competition;
- (b) wage decreases resulting from the application of a sliding scale established by law or by contract;
- (c) wage decreases resulting from a decrease in the cost of living;
- (d) wage decreases intended to correct abnormal increases previously granted under exceptional circumstances which no longer apply.

With the exception of (a) and (b) above, any wage decrease affecting the whole labour force of an enterprise or a sizeable proportion thereof must be notified to the High Authority.

The member states bind themselves to renounce any restriction, based on nationality, on the employment in the coal and steel industries of workers of recognised qualifications, subject to limitations imposed by the fundamental needs of health and public order. In the case of other (non-qualified) workers and where the expansion of production in the coal and steel industries might be hampered by a shortage of suitable labour, the member states agree to adapt their immigration regulations, and in particular, to facilitate the re-employment of workers from the coal and steel industries of other member states. Any discrimination in payment and working conditions as between national and foreign workers, without prejudice to special measures concerning frontier workers, are prohibited. Social security measures are not to impede the movement of labour.

Transport: In order to implement the application of such transport rates for coal and steel as will make possible comparable price conditions to consumers in comparable positions, discriminations in transport rates and conditions of any kind, which are based on the country of origin or of destination of the products in question are forbidden.

Commercial Policy: Unless otherwise provided in the Treaty, the responsibilities of the governments of the member states for commercial policy are not affected by its application. Minimum rates, below which the member states bind themselves not to lower their customs duties on coal and steel with regard to third countries, and maximum rates, above which they bind themselves not to raise such duties, may be fixed by unanimous decision of the Council upon the proposal of the High Authority, which may act on its own initiative or at the request of a member state. Between these limits, each government is to set its tariffs according to its own national procedure, upon the modification of which the High Authority may issue opinions. The High Authority is empowered to supervise the administration of import and export licences with regard to third countries in the cases of coal and steel. The member states bind themselves to keep the High Authority informed of proposed commercial agreements or similar arrangements as far as they relate to coal, steel or the importation of the other raw materials and of specialised equipment necessary for the production of coal and steel in the member states.

GENERAL PROVISIONS

Among the numerous provisions of this title, the following are significant:

The establishment of the Community does not in any way prejudice the system of ownership of the enterprises subject to the provisions of this Treaty.

As far as they are competent to do so, the member states shall take any appropriate measures to guarantee the settling of international accounts arising out of trade in coal and steel within the common market; they will lend each other assistance to facilitate such settlements.

If the High Authority considers that a state has failed in any of the obligations incumbent upon it by virtue of the Treaty, it shall, after permitting the state in question to present its views, take note of the failure in a reasoned decision accompanied by a justification. It shall allow the state in question a period of time within which to provide for the execution of its obligation. Such a state may appeal to the Court's general jurisdiction within a period of two months from the notification of the decision. If the state has not taken steps to fulfil its obligations within the period fixed by the High Authority, or if its appeal has been rejected, the High Authority may, with the agreement of the Council acting by a two-thirds majority:

- (a) suspend the payment of sums which the High Authority may owe to the state in question under the Treaty;
- (b) adopt measures or authorise the other member states to adopt measures which would otherwise be contrary to certain provisions of Title I, so as to correct the effects of the failure in question.

An appeal to the Court's general jurisdiction may be lodged against these decisions within two months following their notification. Should these measures prove ineffective, the High Authority shall refer the matter to the Council.

The decisions of the High Authority imposing financial obligations on enterprises shall have executive force.

After the period of transition, the government of any member state and the High Authority may propose amendments to the Treaty. Such proposals shall be submitted to the Council. If the Council, acting by a two-thirds majority, approves a conference of the representatives of the governments of the member states, such a conference shall be immediately called by the President of the Council, with a view to agreeing on any modifications to be made to the provisions of the Treaty. Such amendments shall come into force after ratification by all the member states.

The Treaty is concluded for a period of fifty years from the date of its entry into force.

Any European state may request to accede to this Treaty. It shall address its request to the Council, which shall act by unanimous vote after obtaining the opinion of the High Authority. Also by unanimous vote, the Council shall fix the terms of accession, which shall become effective on the day the instrument of accession is received by the government acting as depositary of the Treaty.

EUROPEAN FREE TRADE ASSOCIATION

OTHER EFTA ACTIVITIES

In recent years EFTA's work has been increasingly devoted to the problems of non-tariff barriers to trade. Part of this work has been based explicitly on particular articles in the Convention, especially those relating to the conditions of competition, as mentioned below.

Work is also being done on non-tariff barriers which are not specifically mentioned in the Convention. On these EFTA's aim is to contribute to international agreements covering a wider area than that of the Association and in the meantime to seek in EFTA solutions to non-tariff barrier problems which will facilitate trade without limiting possibilities of finding wider agreements. Examples of the barriers being dealt with are differences in compulsory technical requirements for electrical and other products, and in rules for obtaining patent protection for new products.

CONVENTION

EFTA's objectives are:

- to promote in the Area of the Association and in each Member State a sustained expansion of economic activity, full employment, increased productivity and the rational use of resources, financial stability and continuous improvement in living standards;
- to secure that trade between Member States takes place in conditions of fair competition;
- to avoid significant disparity between Member States in the conditions of supply of raw materials produced within the Area of the Association; and
- to contribute to the harmonious development and expansion of world trade and to the progressive removal of barriers to it.

The main provisions of the Convention are:

Tariffs. Elimination of tariffs on industrial goods was originally to be achieved at the latest by January 1970, but this date was brought forward to December 31st, 1966.

Quotas. The Convention provides for the progressive reduction of quantitative restrictions on all imports from Member States and their complete elimination by January 1st, 1970. This date also was brought forward to December 31st, 1966.

Origin Rules. Member States do not have a common external tariff in relation to countries outside the area.

"Origin" rules have therefore been worked out to identify the products of member countries to which the tariff reductions will apply.

Safeguards. Member countries will be free to take action which they consider necessary for the protection of their essential security interests and, consistently with their other international obligations, their balance of payments. In certain circumstances a Member State may also take special safeguarding action where the application of the Convention leads to serious difficulties in a particular sector of industry.

Competition. The Convention contains provisions to ensure that the benefits which are expected from the removal of tariffs and quotas are not nullified through the use of other measures by Governments, public undertakings or private industries. These include provisions about subsidies, restrictive business practices and discriminatory restrictions against nationals of Member States wishing to establish business anywhere in the area.

Agriculture and Fish. Special arrangements have been made for agricultural goods and fish and other marine products. The objective is to facilitate reasonable reciprocity to those member states whose economies depend to a great extent on agricultural or fish exports. Arrangements have also been concluded between several member countries in respect of trade in agricultural goods.

FINANCIAL PROVISIONS

Articles 171-183.

Article 171 provides for an operational budget and a research and investment budget. The former covers administrative expenses and safety control and health protection. Under Article 172 the scale of contributions to the operational budget is fixed as follows:

	%
Belgium	7.9
Germany	28.0
France	28.0
Italy	28.0
Luxembourg	0.2
Netherlands	7.9

The scale of contributions to the research and investment budget is as follows:

	%
Belgium	9.9
Germany	30.0
France	30.0
Italy	23.0
Luxembourg	0.2
Netherlands	6.9

GENERAL PROVISIONS

Articles 184-208: cover certain legal aspects of the Community's status and define certain technical terms.

Article 205 allows for the application of any European state to membership of the Community.

Article 208 states that the Treaty is concluded for an unlimited period.

EUROPEAN ORGANIZATION FOR NUCLEAR RESEARCH—CERN

1211 Geneva 23, Switzerland

Telephone (002) 41 98 11.

The Conseil Européen pour la Recherche Nucléaire (CERN) was established in 1952 following intergovernmental meetings called by UNESCO. It was formally superseded by the Organization in 1954. The essential aim was to establish at Geneva a fundamental research laboratory centred on two particle accelerators with which European scientists could continue their studies into the structure of matter at the nuclear and sub-nuclear levels. Work of a military nature is excluded, and the results of experimental and theoretical work are published, principally in the traditional scientific literature.

ACTIVITIES

The Convention defining the objectives of CERN provided "for collaboration among European States in nuclear research" and the "organization and sponsoring of international co-operation, including co-operation outside the laboratory". Of the two accelerators foreseen in the beginning, the 600 MeV Synchro-Cyclotron began operation in August 1957 and the 25-28 GeV Proton Synchrotron in November 1959. The second machine was not only the largest in the world at the time but the first to use the now established strong-focusing principle.

Both machines have been continually improved as regards performance and utilization. The current programme involves an increase by a factor 10 in the beam

current of the cyclotron and a rise in output of the synchrotron of approximately 10 times. In 1965 the Council of CERN authorized the construction of Intersecting Storage Rings to be built alongside the synchrotron for research on colliding beams. Protons accelerated in the synchrotron will be fed into the two intersecting rings in opposite senses and stored for up to a day. The beams can be made to collide in the intersecting sections. Construction, which is proceeding according to schedule as regards both time and budget, is due for completion in 1971.

The ISR as well as additional experimental and computing facilities are being built on 103 acres of land in France, the rest of CERN occupying 107 adjacent acres in

ACTIVITIES

1 At the end of December 1969, the Organization had three satellites in orbit

IRIS (formerly *ESRO-I*), designed to carry out solar astronomy and cosmic rays studies, was successfully launched in May 1968 from the Western Test Range (California) by a Scout rocket. After six months in orbit, all on-board systems were operating satisfactorily, and the seven scientific experiments were transmitting valuable data. Prime contractor was Hawker Siddeley Dynamics (U K) with Engins Matra (France) as major co-operant.

AURORA-I (formerly *ESRO-I*), an 80 kg satellite designed for the study of auroral and associated ionospheric phenomena, was successfully launched in October 1968 from the Western Test Range by a Scout rocket. The eight scientific experiments on board are operating satisfactorily and some valuable data have already been recorded. Prime contractor was the Laboratoire Central de Télécommunications (France). Major co-operants were Contraves (Switzerland) and Bell Telephone Manufacturing Company (Belgium).

HEOS A1, a Highly Eccentric Orbit Satellite weighing 108 kg, and carrying eight experiments designed for the study of interplanetary physics and cosmic rays, was launched in December 1968 from the Eastern Test Range, by a Delta rocket. Prime contractor was Junkers Flugzeug- und Motorenwerke (Germany). Major co-operants were Sncema (France), BAC (U K), and ECTA (Belgium).

ESRO-Ib, designed to study ionospheric phenomena and aurorae, was launched on October 1st, 1969, and renamed *BOREAS*. It is the second flight model of the

ESRO-I project and was put into an almost circular orbit, carrying eight experiments designed to complement the results obtained by *ESRO-I*.

2 *TD-1*, which is under development, is a special project financed by nine of the ten member countries. Weighing about 450 kg, it will carry seven experiments to investigate various regions of the celestial electromagnetic spectrum, solar X-rays and the primary cosmic ray composition. Launch is tentatively scheduled for early 1972. The payload composition for a second *HEOS*-type satellite, to be known as *HEOS A2*, has also been approved and a final development contract proposal is under preparation.

3 *ESRO* carries out an important programme of research by means of sounding rockets, launched mainly from *ESRANGE* and the Italian national range in Sardinia.

Up to the end of October 1968, nearly 100 scientific groups had submitted proposals for experiments to be launched as part of the sounding rocket programme. By the same date 73 rockets had been launched, representing 37 different payloads, the general principle being to launch each payload twice. Several experiments have been included in more than one payload, and the total number of experiments launched, including all multiple launchings, is 167. Of the 73 launchings to date, 24 have taken place from *ESRANGE* and 30 from Sardinia. For special purposes, use has also been made of ranges in Norway and Greece.

4 The Organization provides scientific agencies of the member countries with the necessary technical facilities for the carrying out of space experiments ranging from the study of the near-terrestrial environment to that of stellar astronomy.

The Council is empowered to make decisions about a wide range of issues, including tariffs. Each country has one vote, and decisions must be unanimous where new obligations are involved, though on many issues a majority suffices.

EUROPEAN SPACE VEHICLE LAUNCHER DEVELOPMENT ORGANISATION—ELDO

USERS

The intention to use ELDO launchers upon completion of the development programme has been expressed by ESRO (European Space Research Organisation) for the launching of its own scientific satellites and of European application satellites. The French and German governments have a firm requirement for their joint programme of development of the "Symphonie" telecommunications satellite.

BUDGET

A ceiling of 626 million monetary units (1 MU = 1 U.S. \$) was agreed in 1966 for the total cost to completion of the Organisation's programmes.

Restrictions were eliminated by December 31st, 1961.

FINLAND-EFTA ASSOCIATION AGREEMENT

Entered into force June 1961. First tariff reductions and relaxation of quotas took place on July 1st, 1961. The main principle of the Agreement is to establish a new free trade area where Finland will have the same rights and obligations towards EFTA members as they have among themselves.

AFRICAN FINANCIAL COMMUNITY (COMMUNAUTÉ FINANCIÈRE AFRICAINE—CFA)

The CFA comprises twelve former French territories in West and Equatorial Africa plus Cameroon and the Malagasy Republic. These full members of the Franc Zone are still grouped within the currency areas that existed before independence, each group having its own currency issued by a central Bank.

West African Monetary Union (*Union Monétaire Ouest-Africaine*): Dahomey, Ivory Coast, Mauritania, Niger, Senegal, Togo, Upper Volta (the countries of the former French West Africa, plus Togo who joined the Union in 1963, Mali is to return to membership of the Union). Established by Treaty of May 1962, agreements on Co-operation were signed with France in 1963, two-thirds of the members of the Board of Directors of its central issuing Bank are provided by the member States and one-third by the French Government.

Monetary Union of Equatorial Africa and Cameroon

torial Africa, plus Cameroon). Agreements on Co-operation were signed with France in 1962, the French Government provides half of the members of the Board of Directors of its central issuing Bank, the other half being provided by the member States.

Malagasy Republic: Agreements on Co-operation were signed with France in 1960 and 1962, a national issuing Bank replaced the former Bank of Madagascar in 1962; the French Government provides half of the members of the issuing Bank's Board of Directors.

ORGANIZATION

The CFA and Malagasy francs are freely convertible into French francs at a fixed rate, through "Operations Accounts" established by agreements concluded between the French Treasury and the individual issuing Banks. The notes are backed fully by the resources of the French Treasury, which also provides the Banks with overdraft facilities.

The monetary reserves of the CFA countries are held in French francs in the French treasury. Exchange is effected on the Paris market and foreign assets earned by member countries are pooled in a "Fonds de Stabilisation des Changes" (Exchange Stabilization Fund) which is managed by the Bank of France. Part of the reserves earned by richer members can be used to offset the deficits incurred by poorer countries. Member countries negotiate each year their import programme with the French authorities

and they receive a quota of non-franc foreign exchange to cover approved imports from outside the area.

New regulations drawn up in July 1967 provided for the free convertibility of currency with that of countries outside the Franc Zone. Restrictions are to be removed on the import and export of CFA and Malagasy banknotes, although some capital transfers will still be subject to approval by the governments concerned.

When the French Government instituted exchange control to protect the French franc following the May 1968 crisis, other Franc Zone countries were obliged to take similar action in order to maintain free convertibility within the Franc Zone. The CFA and Malagasy francs were devalued following devaluation of the French franc in September 1969.

INDUS WATERS TREATY

A Treaty governing the use of the Indus Basin waters, signed September 1960

SIGNATORIES

India

Pakistan

International Bank for Reconstruction and Development (World Bank)

THE INDUS BASIN

Some 50 million people depend for their livelihood upon the six rivers of the Indus Basin flowing from the Himalayas to Pakistan and the Arabian Sea. These rivers are the Indus itself, the Jhelum, the Chenab, the Ravi, the Sutlej and the Beas. Before 1947, the rivers fed the irrigation canals of the Punjab in undivided India. At the transfer of power in 1947, most of the irrigated area became part of Pakistan although some canals and head-works went to India. Since 1951 the World Bank has been trying to settle differences between India and Pakistan over the division of river water and these attempts came to fruition in the Indus Waters Treaty 1960. Under the Treaty the waters of the three eastern rivers, the Ravi, Beas and Sutlej will be allocated to India and the waters of the three western rivers, the Indus, the Jhelum and the Chenab to Pakistan. Storage and irrigation works to the value of over U.S. \$1,000 million will be constructed

INDUS COMMISSION

Indian Commissioner: P R AHUJA

Pakistani Commissioner: MIAN KHALIL-UR-RAHMAN.

The two-man Commission is responsible for establishing and maintaining co-operative arrangements for the implementation of the Indus Water Treaty, and for promoting co-operation between the parties in the development of the waters of the rivers. The Commission reports at least once a year to Member Governments. First Meeting May 1961.

DEVELOPMENT FUNDS

Simultaneously with the signing of the Treaty, an international financial agreement was executed by the Governments of Australia, Canada, Federal Republic of Germany, New Zealand, Pakistan, United Kingdom, United States and by the IBRD. This agreement created the Indus Basin Development Fund to finance the construction of irrigation and other works in Pakistan.

In April 1964 a Supplemental Agreement came into force, providing for a further \$315 million in foreign exchange. The aggregate resources of the Fund in foreign exchange and in Pakistani rupees amount to the equivalent of \$1,200 million.

The Indus Basin Development Fund also financed a study, completed in 1967, of the water and power resources of West Pakistan to provide the Pakistan Government with a basis for development planning.

In May 1968, an agreement was executed by the Governments of Canada, France, Italy, Pakistan, the United Kingdom, the United States and the IBRD creating the Tarbela Development Fund to finance the construction of a dam on the Indus River at Tarbela.

ADMINISTRATION

The Indus Basin and Tarbela Development Funds are administered by the IBRD.

INDUS BASIN DEVELOPMENT FUND

SYSTEM OF WORKS

The following major operations are to be undertaken by Pakistan and financed from the Indus Basin Development Fund.

- 1 Construction of the Mangla Dam on the Jhelum River. This Dam was inaugurated in November 1967
- 2 Development of 3 million kW of hydroelectric potential in West Pakistan.
- 3 Construction of three new barrages.
- 4 Construction or re-modelling of eight link canals. The first link canal system, joining the Chenab and Sutlej Rivers, was completed in March 1965.

The Indus Basin Development Fund Agreement, as supplemented in 1964, provides for the following contributions.

GRANTS

Australia	£A11,634,643
Canada	Canadian \$38,910,794
German Federal Republic	DM206,400,000
India	£62,060,000
New Zealand	£NZ1,503,434
United Kingdom	£34,838,571
United States of America	U.S. \$295,590,000

LOANS

IBRD (World Bank)	U.S. \$ 80,000,000
IDA (International Development Association)	U.S. \$ 58,540,000
United States	U.S. \$121,220,000

The United States has also contributed U.S. \$235,000,000 in Pakistan rupees. Pakistan is providing £440,000 and the remainder of the local currency required.

EUROPEAN ORGANIZATION FOR NUCLEAR RESEARCH—CERN

the Commune of Meyrin in Switzerland. The seat of the Organization is officially in Switzerland whilst the laboratory physically straddles the frontier.

At the December 1969 meeting of the Council the President was able to announce that good progress had been made towards establishing a new European laboratory to be centred on an accelerator capable of accelerating protons to 300 GeV. The necessary amendments to the original Convention had been ratified by seven states and the others were expected to ratify shortly. Six states—Austria, Belgium, France, Federal Republic of Germany, Italy and Switzerland—had announced their intention to participate and a first stage programme had been agreed. In order to facilitate the choice of a suitable location from the five eligible (Switzerland had not proposed a site) a meeting at ministerial level is to be held at the beginning of 1970. Once the site has been agreed all necessary procedure will then be ready for the project to go ahead rapidly.

The majority of the research undertaken at CERN is carried out by mixed teams of physicists principally from the Universities and Research Centres of Europe. The scientists may be attached to CERN for a period of weeks only, or become temporary members of the staff for a year or so. Only a small proportion remain as permanent staff members. The majority of the CERN complement are concerned with machine design, development and operation.

To cater for a wide range of potential users the techniques of beam sharing have become highly developed. Major detection installations include a 2 m and an 87 cm liquid hydrogen bubble chamber and an 1,180 litre heavy

liquid bubble chamber. Two other chambers are under construction: Gargamelle, a 12,000 litre heavy liquid bubble chamber being supplied by France and, under a tripartite agreement between CERN, the Commissariat à l'Energie Atomique of France, and the German Government, a 3.7 m liquid hydrogen bubble chamber incorporating a superconducting magnet. A very large spark chamber within a superconducting magnet is also under construction.

To provide the large computing capacity needed for the analysis of bubble chamber film and electronics experiments data, as well as scientific computation, CERN has built up an extensive network of computers, a number of which are working on-line. In the central facility the two main machines are a CDC 6600 and a CDC 6500.

Close collaboration has always been sought with the high energy physics laboratories of non-member States, and relations with comparable centres in the U.S. have from the beginning been very close. A system of exchange of scientists with the Joint Nuclear Research Centre of Dubna (U.S.S.R.) was initiated in 1960. This exchange has been developed and an agreement was signed with the U.S.S.R. State Committee for the Application of Atomic Energy in July 1967 for collaboration in research on the 70 GeV accelerator at Serpukhov, which began operation in November of the same year.

Under this agreement CERN will supply certain equipment for beam extraction and separation while the Soviet authorities are making it possible for joint electronics experiments to be conducted on their machine and will make available bubble chamber pictures for analysis by CERN scientists.

INTER-AMERICAN DEVELOPMENT BANK

In 1969, the Bank entered into an agreement to administer the *Populorum Progressio Fund* being established by the Holy See with an initial contribution of \$1 million to provide low-income sectors in Latin America, especially in the field of land reform

EUROPEAN ORGANIZATION FOR THE SAFETY OF AIR NAVIGATION—EUROCONTROL

72 rue de la Loi, Brussels 4, Belgium

Telephone: 13 83 00

Established 1963 to strengthen co-operation among member states in matters of air navigation and in particular to provide for the common organization of air traffic services in the upper airspace.

MEMBERS

Belgium
France

Federal Republic of Germany
Ireland
Luxembourg

Netherlands
United Kingdom

ORGANIZATION

PERMANENT COMMISSION

The governing body of EUROCONTROL; consists of two representatives from each member state, who are the Ministers responsible for respectively civil and military aviation.

President: B. LENIHAN (Ireland).

Vice-President: H. BÖRNER (Federal Republic of Germany).

AIR TRAFFIC SERVICES AGENCY

Administered by a Committee of Management and a Director-General.

COMMITTEE OF MANAGEMENT

Composed of two representatives of each National Administration exercising in their own country responsibilities in matters of respectively civil and military air navigation.

President: M. G. GLUNZ (Federal Republic of Germany).

DIRECTOR-GENERAL

Heads the General Directorate with four Directorates (*Operations, Engineering, Administration and Finance, General Secretariat*) and the EUROCONTROL External Services.

Director-General: R. BULIN (France).

EUROCONTROL EXTERNAL SERVICES

Eurocontrol Experimental Centre: Aérodrome de Brétigny, 91 Brétigny-sur-Orge, France; provides the planning staff at headquarters with technical operational aid of a practical nature, in particular by undertaking experiments to improve or to develop control methods and procedures and to evaluate air traffic control and air navigation equipment and systems.

Eurocontrol Institute for Air Navigation Services: Luxembourg; a school for the advanced training of ATC personnel (controllers, programmers and engineers) and an air navigation documentation centre.

Central Route Charges Office: Brussels; implements the policy of the member states for the introduction of charges for the use of route facilities and services.

Upper Area Control Centre, Brussels: Brussels National Airport.

The following services are concerned with co-ordination with National Air Traffic Services of member states:

Regional Service—France: Aéroport d'Orly 94, Orly, France.

Regional Service—Ireland/United Kingdom: Heathrow House, Bath Road, Cranford, Middlesex, England.

AIMS

To strengthen the co-operation between member states in matters of air navigation and in particular to provide for the common organization of the air traffic services in the upper airspace, including:

Standardization on national regulations governing air traffic and standardization of the operation of the services responsible for ensuring the safety and regulation of air traffic, on the basis of the Standards and Recommended Practices of ICAO and having regard to the requirements of national defence.

Promotion of a common policy to be followed in

respect of radio aids, telecommunications and corresponding airborne equipment.

Promotion and co-ordination of studies relating to air navigation services and installations in order to take account of technical developments.

Determination of the configuration of the airspace in respect of which the air traffic services are entrusted to the Agency.

Determination of policy in respect of remuneration for services rendered to users.

INTERGOVERNMENTAL COMMITTEE FOR EUROPEAN MIGRATION—ICEM

9 rue du Valais, Geneva, Switzerland

ICEM was established in 1951 to achieve the orderly international assistance and to help resettler
World membership 5

ORGANIZATION

COUNCIL

In the Council each member country has one representative and one vote. Meetings are normally held twice a year at Geneva. Membership is open to any country subscribing to the principle of free movement of peoples and prepared to contribute to the Committee's administrative budget. The Council determines policy, reviews the activities of the Executive Committee, and approves the budget. A chairman is elected at each session.

EXECUTIVE COMMITTEE

Composed of representatives of nine member governments, elected annually, and eligible for re-election. The Committee meets regularly before Council sessions, but special sessions may be called.

SECRETARIAT

Director: JOHN F. THOMAS (U.S.A.)

Deputy-Director: W. M. BESTERMAN (U.S.A.)

Assistant Director for Operations: G. MASELLI (Italy)

Assistant Director for Administration: TH. BAKKERS (Netherlands)

ACTIVITIES

ICEM's objectives are threefold: to effect the movement of refugees to countries offering final resettlement, to meet the specific needs of overseas countries by providing migration from Europe, and to promote, through selective migration, the socio-economic advancement of Latin American countries as a vital form of development aid.

The tasks of ICEM range from helping an individual refugee or a national migrant to assisting member governments in the development of their migration programmes.

ICEM helps to select migrants and refugees for emigration to receiving countries, such as Australia, Latin America, South Africa and the United States of America. Upon request from member governments, ICEM also provides essential services, such as counselling, orientation, medical examination, vocational and language training, placement and the organization of adaptation courses. Furthermore, ICEM arranges transport at a moderate cost, finances the movement of those refugees and migrants who are unable to meet their own expenses.

The movement of European refugees to countries offering them opportunity and security is a major function

of ICEM. To assure the efficient resettlement of 40,000 to 45,000 uprooted people each year, ICEM closely coordinates its refugee activities with the United Nations High Commissioner for Refugees, the United States Refugee Program and with other governmental and non-governmental organizations. ICEM has implemented the processing and movement of 756,698 refugees.

ICEM's programmes for Latin America aim at making a contribution to the solution of development problems through investment in human capital.

Immigrants with experience and professional knowledge of modern techniques form an important stepping-stone in the process of speeding up economic and social development. Through its selective migration programme ICEM is transferring qualified Europeans to vital sectors of industry, agriculture and education for which no manpower can be found on the national labour markets. Training centres and demonstration projects have been established to teach local labourers and farmers improved methods.

ORGANIZATION

COUNCIL

Chairman: Prof. H. C. VAN HULST (Netherlands).

Vice-Chairmen: Dr. R. LÜST (German Federal Republic),
M. STIERNSTEDT (Sweden).

Lays down scientific and technical policy and takes major financial and administrative decisions. Consists of two delegates from each member state. Meets at least twice a year. It is assisted by two committees:

Scientific and Technical Committee: Assisted by the *Launching Programmes Advisory Committee* and six groups of experts concerned with particular aspects of research.

Administrative and Finance Committee.

DIRECTOR-GENERAL

The Director-General is advised by a Directorate, and assisted by a Secretariat staffed from member countries.

Director-General: Prof. H. BONDI (United Kingdom).

Director of Programmes and Planning: J. DINKESPIER (France).

Director of Administration: M. DEPASSE (Belgium).

Director of the European Space Research and Space Technology Centre (Noordwijk): Prof. W. KLEEN (German Federal Republic).

Director of European Space Operations (Darmstadt): UMBERTO MONTALENTI (Italy).

ESTABLISHMENTS

European Space Research and Technology Centre (ESTEC): Noordwijk, Netherlands. Responsible for studying and developing spacecraft and payloads for sounding rockets, for liaison with scientific groups and for applied research work on space technology. It comprises the following Departments:

Satellites and Sounding Rockets

Space Science (formerly ESLAB)

Development and Technology (formerly Applied Research)

Administration and Facilities

European Space Operations Centre (ESOC): Darmstadt, Federal Republic of Germany. Responsible for the provision of launching facilities, tracking, data acquisition and procession. It comprises the following Departments:

ESRANGE: Kiruna, Sweden (*see below*)

Satellite Data Acquisition (formerly Control Centre and ESTRACK)

Information Handling (formerly ESDAC)

Computer Service

It also includes the Divisions of Ground Equipment Engineering and Administration, and two smaller groups (Programme Review and Operations, and Mission Support) under the immediate authority of the Director.

European Sounding-Rocket Launching Range (ESRANGE): Kiruna, Sweden. Operations at the range, which was first used in December 1966, are under the control of the Director, ESOC. Facilities are available for the launching of Centaure, Skylark and Arcas rockets.

European Space Research Institute (ESRIN): Frascati, Italy. Carries out theoretical and experimental basic research (plasma physics).

INTERNATIONAL AIR TRANSPORT ASSOCIATION— IATA

Offices: 1155 Mansfield St., Montreal 113, Canada, and P.O.B. 315, 1215 Geneva 15 Airport, Switzerland

Telephones (Montreal) 866-1011, (Geneva) 34-60-21

Founded 1945 to promote safe, regular and economical air transport, to foster air commerce and to provide a means of international air transport collaboration. Membership 90 international airlines (active members), 14 domestic airlines (associate members)

ORGANIZATION

ANNUAL GENERAL MEETING

The basic source of IATA authority. All active members have an equal vote and decisions are by majority. The A.G.M. elects the President and the Executive Committee. It designates committees to be organized by the Executive Committee.

President (1969-70) Dr G. VAN DER WAL (KLM)

President Elect (1970-71) Lt-Gen ALI M. KHAMEDI (Iranair)

EXECUTIVE COMMITTEE

Consists of eighteen elected members. Carries out policy between Annual General Meetings, and is assisted by Financial, Legal, Technical, Traffic Advisory and Medical Committees.

Members: Sheikh NAJEEB ALANUDDIN (MEA), Dr WALTER BERCHTOLD (Swissair), ERIK DE CARVALHO (Varig), Cheikh FAL (Air Afrique), GEORGES GALICHON (Air France), J. C. GILMER (CP-Air), KEITH GRANVILLE (BOAC), F. D. HALL (EAL), Prof G. HOLTJE (DLH), JOHN C. LESLIE (PAV), KARL NILSSON (SAS), J. R. D. TATA (Air India), CHARLES C. TILLINGHAST (TWA), BENIGNO P. TODA JR. (PAL), BRUNO VELANI (Alitalia), Dr G. VAN DER WAL (KLM), Sir ROLAND WILSON (Quantas), Dr OSCAR MACHADO ZULOAGA (VIASA).

TRAFFIC CONFERENCES

Negotiation of fares and rates is carried out through the IATA Traffic Conferences, with separate meetings considering passenger and cargo matters. Decisions are unanimous and cannot become effective without the approval of interested governments. The conferences are held in various world cities at two year intervals, in the

autumn for passenger operations and the following spring for matters involving cargo. The three IATA Traffic Conferences have their office in Geneva, with two Traffic Service Offices located in New York and Singapore.

SECRETARIAT

Carries out the day-to-day administration of IATA.

Director-General: KNUT HAMMARSKJÖLD (Geneva/Montreal)

Assistant Director-General (Technical): Dr R. R. SHAW (Montreal)

Assistant Director-General (Traffic): H. DON REYNOLDS (New York/Geneva/Montreal)

ORGANIZATION

COUNCIL

President (1970): Gén. R. AUBINIÈRE (France).

Vice-Presidents (1970): B. GAEDKE (German Federal Republic), J. BOUHA (Belgium).

Approves research, development and construction programmes and decides on their distribution between members. Composed of two representatives from each member country. Assisted by a Scientific and Technical Committee and a Finance Committee.

SECRETARIAT

Responsible for formulation and execution of programmes, administration, finance and external relations.

Secretary-General: R. DI CARROBIO (Italy).

Deputy Secretary-General and Director of Future Activities: J. P. CAUSSE (France).

Assistant Secretary-General and Administrative Director: H. L. COSTA (German Federal Republic).

Technical Director: Gén. P. GIRARDIN (France).

PROGRAMME

The *Initial Programme* covers the development and construction of a European three-stage satellite-launching vehicle, "Europa I", of overall length 32 metres, launch weight 111 tons, and capable of placing a payload of one ton into low circular orbit. Member countries have the following responsibilities:

Australia:	Firing-range facilities.
Belgium:	Down-range guiding station.
France:	Second stage ("Coralie").
Germany:	Third stage.
Italy:	Satellite test vehicle.
Netherlands:	Long-range telemetry.
United Kingdom:	First stage ("Blue Streak").

The programme of test firings is summarized below:

Phase I: F1, June 1964; F2, October 1964; F3, March 1965; first stage (Blue Streak) alone; all carried out successfully.

Phase II: F4, first stage with inert upper stages and satellite test vehicle (STV), May 1966; F5, first stage with inert upper stages and STV and test of separation system of first and second stages, November 1966; F6/1, first stage with live second stage, inert third stage and STV, August 1967 (second stage engines did not ignite); F6/2, December 1967 (second stage sequencer failed to start up).

Phase III: F7, "Europa I", successfully launched from the Woomera range in November 1968, with live upper stages and an STV with a 250 kg payload. Flight (including separation) of first and second stages, jettisoning of fairings and separation of second and third stages correct. Third stage engines ignited correctly but the third stage powered flight was ended prematurely; F8, firing of complete live vehicle carried out in June 1969; flight (including separation) of first and second stages, jettisoning of fairings and separation of second and third stages correct, but powered flight of the third stage was not achieved. F9, with complete live vehicle, will be carried out during 1970.

Supplementary Programme (under CETS, the European Conference on Satellite Communications): development of "Europa II", improved launcher, with the addition to "Europa I" of a perigee stage. By incorporating into the satellite an apogee-motor—both to be supplied by the user—"Europa II" will be capable of injecting into geostationary orbit payloads of 170–190 kg suitable for telecommunications. Other possible applications are meteorology, aerial navigation control and other practical purposes. The Supplementary Programme includes development of a system of inertial guidance and the installation of an operational equatorial launching base at Kourou (French Guiana).

INTERNATIONAL ASSOCIATION OF UNIVERSITIES—IAU

1 rue Miollis, Paris 15^e, France

Founded 1950 to promote practical academic co-operation and to assist university institutions throughout the world. Members: 512 universities and institutions of higher learning in 96 countries, 8 associate members (international university organizations)

ORGANIZATION

GENERAL CONFERENCE

Composed of the full and associate members and meets at least once every five years. Determines general policy and elects the President and members of the Administrative Board.

MEETINGS

Nice	1950
Istanbul	1955
Mexico City	1960
Tokyo	1965

Fifth General Conference to meet in Montreal, 1970

ADMINISTRATIVE BOARD

Composed of the President and fourteen other members, including the Vice President. Meets annually. Gives effect

to decisions of the General Conference and directs the work of the secretariat.

President: CONSTANTINE K. ZURAYK (American University of Beirut, Lebanon)

Vice-President: JEAN ROCHE (University of Paris, France)

INTERNATIONAL UNIVERSITIES BUREAU

The permanent secretariat of the Association carries out day-to-day administration between meetings of the Administrative Board and General Conference.

Secretary-General: H. M. R. KEYES (U.K.).

PRINCIPAL ACTIVITIES

Documentation and Information. The secretariat is a source of information on higher education throughout the world. Its reference library of published and unpublished material in many languages is probably unique of its kind. An extensive network of contacts with national and international bodies, academic and governmental, facilitates the international exchange of information.

Research and Studies. These activities are most closely related to the themes of the General Conferences in an attempt to contribute in an international setting to the classification and resolution of major problems of higher educational policy. Since 1960 special efforts in this field have been concentrated in the Joint UNESCO-IAU Research Programme in Higher Education. This is carried out with the support of major private foundations and includes systematic studies of urgent problems connected with the rôle of universities in the modern world.

Publications Programme. A quarterly Bulletin provides a chronicle of university affairs in all parts of the world. A series of reference works published at regular intervals gives detailed information about university institutions and organizations concerned with higher education. Special reports and issues in the series of "Papers" of the Association are devoted to selected research themes and studies.

BUDGET

Annual expenditure amounts to approximately \$200,000, excluding expenditure from special grants for the Joint UNESCO-IAU research programme.

SELECTED PUBLICATIONS

Bulletin of the International Association of Universities (English and French, quarterly)

International Handbook of Universities (English, every three years—4th edition, 1968)

World List—universities, other institutions of higher education, university organisations (English and French, every two years—9th edition, 1969).

THE FRANC ZONE

The Franc Zone embraces all those countries and groups of countries whose currencies are linked with the French franc at a fixed rate of exchange and who agree to hold their reserves in the form of French francs and to effect their exchange on the Paris market. Each of these countries or groups of countries has its own central issuing Bank and its currency is freely convertible into French francs. This monetary union is based on individual agreements concluded between France and the various States who, after attaining independence, opted for independent sovereignty either within or outside the French Community.

The Maghreb members have much more independent monetary and economic policies than the thirteen sub-Saharan Franc Zone countries, due largely to the relatively more developed state of their economies, and the Tunisian and Moroccan currencies are no longer directly tied to the French franc. They hold part of their foreign reserves in French francs and the transaction of most of their international payments is made through the Paris exchange market; however, each country has created its own currency and their issuing banks are entirely autonomous.

Because of balance-of-payment stringencies, these countries restrict payments to other Franc Zone countries, in contrast with the free convertibility among the sub-Saharan members. The currencies of the Maghreb countries do not enjoy the unlimited backing of the French Treasury.

Mali withdrew from the Franc Zone in 1962, setting up her own currency, the Malian franc, and her own issuing Bank. However, in May 1967 she ratified a currency agreement with France covering her gradual return to the West African monetary zone, and France's guarantee of the convertibility of the Mali franc. Under the terms of the agreement, Mali was to reorganize her economy, and in May 1967 she devalued her franc by 50 per cent. The Mali franc returned to full convertibility with the French franc in March 1968, and agreement was reached on the establishment of a central issuing bank, to be jointly administered by France and Mali.

Guinea left the Franc Zone when she opted for independence outside the French Community in 1958. Togo joined in 1963.

MEMBERS

French Republic (Metropolitan France and the Overseas Departments and Territories, except French Somaliland).

Cameroon, Central African Republic, Chad, Congo (Brazzaville), Dahomey, Gabon, Ivory Coast, Madagascar, Mali, Mauritania, Niger, Senegal, Togo, Upper Volta (full members).

Algeria, Tunisia and Morocco retain national control over financial transfers.

CURRENCY

French franc: used in Metropolitan France and the Overseas Departments of Guadeloupe, French Guiana and Martinique.

1 CPF (Communauté Financière du Pacifique) franc = 0.055 fr. Used in New Caledonia, French Polynesia, and Wallis and Futuna Islands.

1 CFA (Communauté Financière Africaine) franc = 0.02 fr. Used in the monetary areas of West Africa, Equatorial Africa and Cameroon, and also in the Overseas Department

of Réunion and the Overseas Territories of the Comoro Islands and St. Pierre et Miquelon.

1 franc malgache = 0.02 fr. Used in the Malagasy Republic, where it replaced the CFA franc in 1963.

1 Algerian dinar = 1 fr. Replaced the Algerian franc in 1964.

The Tunisian dinar and the Moroccan dirham, created in 1958 and 1959 respectively, are not attached to the French franc.

THE FRANC ZONE

ECONOMIC AID

France's ties with the African Franc Zone countries involve not only monetary arrangements, but also include comprehensive French assistance in the forms of budget support, foreign aid, technical assistance and subsidies on commodity exports.

Official French financial aid and technical assistance to developing countries is administered by the following agencies:

Fonds d'Aide et de Co-opération—FAC, 20 rue Monsieur, Paris 7e. In 1959 FAC took over from FIDES (Fonds d'Investissement pour le Développement Economique et Social) the administration of subsidies and loans

from the French Government to the former French African States and Madagascar. FAC is administered by the Secretariat of State for Co-operation, which allocates budgetary funds to it.

Caisse Centrale de Co-opération Economique—CCCE, 233 Boulevard Saint-Germain, Paris 7e. Founded in 1941, and given present name in 1958. French Development Bank which executes the financial operations of FAC. Lends money to member States of the Franc Zone. Dir.-Gen. ANDRÉ POSTEL-VINAY.

Bureau de Liaison des Agents de Co-opération Technique, 66 rue St.-Didier, Paris 16e.

FRENCH COMMUNITY

The Community was created by the 1958 Constitution, adopted by referendum by the countries of French West Africa (with the exception of Guinea, which opted for total and immediate independence), French Equatorial Africa and Madagascar, which all chose to become Member States of the Community. The field of the Community's competence included foreign policy, defence, currency, economic and financial policy, strategic materials and higher education. Between October and December 1958 all the States of the Community were granted internal autonomy.

A Constitutional Act of June 1960 introduced the possibility of concluding agreements whereby a Member State could become independent without ceasing to belong to the Community. Six States—Central African Republic, Chad, Congo (Brazzaville), Gabon, Madagascar and Senegal—decided to become independent within the Community which was then called the "renewed Community", while all the other States preferred total indepen-

dence. France has concluded co-operation agreements in international law with all these States (including Togo and Cameroon which had been territories entrusted to France by international mandate and therefore could not be Members of the Community).

The Articles of the Constitution dealing with the Community have not been expressly abolished but are no longer applied today and the various organs of the Community have fallen into abeyance. The two main organizations now responsible for liaison between France and African and Madagascan States are:

Secretariat-General for the Community and African and Madagascan Affairs, 138 rue de Grenelle, Paris 7e; Sec.-Gen. DANIEL PEPY.

Secretariat of State for Foreign Affairs in Charge of Co-operation, 20 rue Monsieur, Paris 7e; Sec.-Gen. YVON BOURGES.

CUSTOMS UNIONS

Under the terms of the first Yaoundé Convention, July 1963, all CFA countries and Madagascar became associate members of the European Economic Community. This Convention of Association stipulates the gradual abolition of tariff and quota restrictions for the whole Common Market, and therefore the guaranteed markets and prices for African produce in France are now being phased out.

The following regional common markets within the Franc Zone have been formed:

West Africa: Union Douanière des Etats de l'Afrique de l'Ouest (UDEAO) (see chapter).

Central Africa: Union Douanière Economique de l'Afrique Centrale (UDEAC) (see chapter).

Organisation Commune Africaine et Malgache (OCAM): a common market in sugar has been established (see chapter).

INDUS WATERS TREATY

TARBELA DEVELOPMENT FUND

The construction of the Tarbela Dam is to be undertaken by Pakistan and financed by the Tarbela Development Fund which will receive the balance of the Indus Basin Development Fund available after the other works have been completed and the following contributions by the parties to the Tarbela Development Fund Agreement:

Canada	Canadian \$5,000,000
France	150,000,000 francs

Italy	25,000,000,000 Lire
United Kingdom	£10,000,000
United States	U.S. \$50,000,000
IBRD	U.S. \$25,000,000

Pakistan will provide the Tarbela Development Fund with rupees for the required local expenditure. The Canadian, U.K. and U.S. contributions can be used only for expenditures in those countries. The contributions of the U.S. and the IBRD are residual.

INDUS WATERS TREATY

1. The Preamble recognizes the need to fix and de-limit the rights and obligations of the Governments of India and of Pakistan concerning the use of the waters of the Indus river system.
2. Allots the waters of the three eastern rivers to India with certain minor exceptions. The transition period will be 10 years, which may be extended.
3. The waters of the three western rivers are allotted to Pakistan with certain stated exceptions.
4. Pakistan undertakes to construct a system of works.
5. India is to contribute to the Indus Basin Development Fund £62.06 million in 10 equal yearly instalments.
6. Both countries recognize their "Common interest in the optimum development of the rivers, and, to that end, they declare their intention to co-operate, by mutual agreement, to the fullest possible extent".
7. The Treaty sets up a permanent Indus Commission consisting of two persons, one appointed by each of the two Governments. The functions of the Commission will be "to establish and maintain co-operative arrangements between the parties in the development of the waters of the rivers".
8. Where differences cannot be settled by agreement between the Commissioners the Treaty establishes machinery for resort to a neutral expert (who is to be a highly qualified engineer) for a final decision on technical questions.
9. Differences which cannot be settled by the neutral expert will be treated as disputes, and failing resolution by agreement between the two Governments will be referred to a Court of Arbitration.
10. The Treaty has eight annexures. The principal matters covered in these annexures are:
 - (a) Agricultural use by Pakistan of water from the tributaries of the Ravi river.
 - (b) Agricultural use by India of water from the western rivers.
 - (c) The use of the water of the western rivers by India for the generation of hydroelectric power.
 - (d) The storage of water by India on the western rivers.
 - (e) The questions which may be referred to a neutral expert.
 - (f) The appointment and procedure of a court of arbitration.
 - (g) Transitional arrangements relating to the supply of water to Pakistan during the transition period.
11. The Treaty came into force on January 12th, 1961, on the exchange of ratification.

Executive Vice-President: T. GRAYDON UPTON (U.S.A.).

Executive Directors: LEMPIRA BONILLA (Honduras), HENRY J. COSTANZO (U.S.A.), DANIEL FERNÁNDEZ (Argentina), ILDEGAR PÉREZ SEGNINI (Venezuela), CARLOS SANGUINETTI (Uruguay), JOSÉ JUAN DE OLLOQUI (Mexico), RAÚL BARBOSA (Brazil).

BOARD OF GOVERNORS

All the powers of the Bank are vested in a Board of Governors, consisting of one Governor and one alternate appointed by each member country.

EXECUTIVE BOARD

Consists of seven Directors responsible for the conduct of operations and answerable to the Board of Governors. Six are elected by Latin American countries and one is designated by the U.S.A.

FINANCIAL STRUCTURE

ORDINARY CAPITAL RESOURCES

Loans are made to governments, and to public and private bodies for specific economic projects. They are repayable in the currencies lent and their terms range from 10 to 25 years.

Authorized Capital \$3,150 million, of which \$475 million is paid-in and \$2,675 million is callable. The callable portion constitutes, in effect, a guarantee of the securities which the Bank issues in the capital markets in order to increase its resources available for lending.

FUND FOR SPECIAL OPERATIONS

The Fund enables the Bank to make loans for economic and social projects where circumstances call for special treatment, such as lower interest rates and longer repayment terms than those applied to loans from the ordinary resources, and possibility of repayments in whole or in part in local currency.

Authorized subscribed resources: \$2,321,850,000.

SOCIAL PROGRESS TRUST FUND

The Social Progress Trust was set up in 1961 by the United States to promote social development in Latin America under the Alliance for Progress programme. It has

a total capital of \$525,000,000 and is administered by IDB under an agreement with the United States. Resources have been used to grant loans in four fields: housing for low income groups; water supply and sanitation installations; land settlement and rural development; and higher education and training related to economic development.

The Fund is now totally committed and its fields of action transferred to the Fund for Special Operations.

OTHER FUNDS

The Bank in 1964 began administering a Canadian Fund created by the Government of Canada within its external aid programme to finance economic, technical and educational assistance projects in Latin America. The Fund currently amounts to 50 million Canadian dollars.

Through a 1961 agreement, supplemented by protocols, the Government of Federal Germany placed under Bank administration a fund which currently amounts to 32,920,000 Deutschmarks, specifically to finance the rehabilitation of Bolivia's national tin mines.

In 1966, the Government of the United Kingdom established under Bank administration a fund of £4,142,800 for development projects in Latin America.

In 1966, the Government of Sweden placed a similar fund under Bank administration totalling \$5 million.

TECHNICAL ASSISTANCE

The Bank provides technical assistance for Latin American development, often together with its loans and frequently independently of them. This assistance is given for the preparation, financing and execution of development plans and projects, the formulation of loan proposals and the development and advanced training, through seminars and other forms of instruction, of personnel specializing in the formulation and implementation of development plans and projects.

A total of \$123.9 million has been authorized up to September 1969 for technical assistance, of which \$97.1 million is on a reimbursable and \$26.8 million on a non-reimbursable basis. The greatest part of the reimbursable assistance—\$39.4 million—consists of loans for the creation of pre-investment funds in various national development institutions to help identify and formulate development projects.

INSTITUTE FOR LATIN AMERICAN INTEGRATION—INSTITUTO PARA LA INTEGRACIÓN DE AMÉRICA LATINA (INTAL)

Cerrito 264, 2° piso (Casilla de Correo 39, Sucursal 1), Buenos Aires, Argentina

The Institute was established in 1965 as a permanent department of the Inter-American Development Bank. Its functions are: to study the regional integration process; carry out research into problems which the integration movement poses for individual countries; organize training courses and seminars; conduct, at the request of member countries, preliminary studies on joint development schemes and on economic integration alternatives available to individual countries; to provide advisory services to the Bank and to other public and private institutions; to disseminate knowledge about the various economic,

political, social, institutional, legal, scientific and technological aspects of regional integration.

RELATIONS WITH THE UNITED NATIONS

The International Organisation of Employers is one of the ten international non-governmental organizations having category "A" consultative status with the Economic and Social Council of UN and consultative status with the International Labour Organisation in Geneva.

SUMMARY OF THE STATUTES

CONSTITUTION AND OBJECTIVE

ARTICLES 1 and 2 The IOE is an international organization of national central employers' federations. It is to maintain contact between members, to keep them informed of developments in social questions and to promote common discussion of these questions and their repercussions.

MEMBERSHIP AND ADMINISTRATION

ARTICLES 3–5 Any central employers' federation with the aims given above may become a member, provided that it does not include any workers' organization, that it defends the principles of free enterprise, and that it is a free and independent voluntary organization outside governmental or other control. All applications are considered by the General Council. If there is no such central federation, individual federations may be admitted with the permission of the General Council. The administration is to consist of the General Council, the Executive Committee and the Secretary-General.

GENERAL COUNCIL

ARTICLES 6–13 The General Council shall be composed of two delegates from each central federation, accompanied by any technical advisers. Other members are represented according to the conditions of their admission. The General Council shall elect a President and two Vice-Presidents. The President shall serve for one year, to be succeeded in turn by the senior and junior Vice-Presidents. The General Council shall pass the annual budget and completed accounts at its annual meeting. Special meetings may be held. Voting shall only be held on administrative questions, and shall be done by a simple majority. Each delegation shall have two votes.

EXECUTIVE COMMITTEE

ARTICLES 14–18 The Executive Committee shall be elected at the annual meeting of the General Council, and the General Council shall fix the number of members. The Executive Committee shall appoint the Secretary-General and decide on proposals made by the Secretariat. The Committee shall hold regular meetings.

INTERNATIONAL AIR TRANSPORT ASSOCIATION

PRINCIPAL ACTIVITIES

Finance: Member airlines may settle their international accounts through the IATA Clearing House in Geneva, enabling a single cash settlement of all debts in dollars or convertible sterling.

Technical Problems. There is a full and free exchange of experience and information between airlines, and experts study such problems as minimum noise procedures for take-off and landing, linking of airline telecommunications systems and the application of production planning and control techniques to maintenance. Other groups are concerned with problems of navigation aids, turbine fuels, helicopter operations and supersonic transport.

Air Traffic: Subject to the approval of governments, agreements are reached on international fares and rates through the Traffic Conferences. IATA also furthers the standardization of documentation and all phases of passenger, baggage and cargo handling.

International Law: IATA formulates and represents airlines' views on international conventions affecting the legal position of air carriers in various fields including liability and armed aggression. Standardized Conditions of

Contract governing carriage of passengers and cargo have been drawn up, and Conditions of Carriage for all aspects of transport are in preparation.

Information and Documentation: IATA acts as a documentation centre, collecting and issuing statistics, internal manuals, technical surveys, reports and publicity material.

International Co-operation: IATA works closely with the International Civil Aviation Organization (ICAO) and also co-operates with other bodies such as the International Telecommunication Union (ITU), The World Meteorological Organization (WMO) and the International Standards Organization.

BUDGET

Financed from dues paid by member airlines in proportion to the amount of international air traffic carried.

PUBLICATIONS

IATA Bulletin (annual, English, French, and Spanish).

IATA News Review (eight times a year, in English).

ACTIVITIES

Standardization: ICC brings together national representatives and invites them to agree on standard rules for commercial transactions.

Economic Problems: Policy statements and analyses of conventions, regulations and agreements are submitted to governments for their consideration.

Settlement of Business Disputes. The good offices of ICC are available in international business disputes. Should conciliation fail, the differences can be settled by the Court of Arbitration in the form required by law, so that the decision can be enforced by the courts if necessary.

Industry and Finance. ICC has recommended greater protection for trade-marks and patents, fair treatment of foreign private investments, a multilateral guarantee system and the abolition of double taxation. It has also urged the simplification of governmental regulations and formalities and the standardization of sales contracts.

Transport and Banking. ICC sponsors consultations between carriers and users on transport of goods and promotes a joint policy for all branches of commercial transport. Its standard practices for commercial credits are used by banks all over the world, and it has recommended international rules for payment and transfer orders.

Distribution and Advertising. New methods to increase efficient distribution are publicized by ICC, which also

compiles statistics for traders. It promotes fair standards of advertising, standardization of advertising contracts and research into press, cinema, outdoor and television media.

Information Exchange. A Centre for the Exchange of Information on Distribution has been established. Training courses are organized for staff of Chambers of Commerce in the developing countries and the International Bureau of Chambers of Commerce makes available information on a wide range of commercial subjects.

Co-operation. ICC co-operates with a large number of international organizations, both governmental and non-governmental. Liaison offices with the United Nations are maintained in Bangkok, Geneva and New York.

BUDGET

The International Chamber of Commerce is a private organization financed entirely by members' contributions.

Chairmen of the Budget Commission: RUDOLF BRINCKMANN (German Federal Republic), Sir JEREMY RAISMAN (United Kingdom).

PUBLICATION

THE INTERNATIONAL RED CROSS

ORGANIZATION

BOARD OF GOVERNORS

Chairman: JOSÉ BARROSO CHÁVEZ (Mexico)

The Board is the highest authority of the League and meets every two years. It is composed of representatives from all National Societies Members of the League.

Meetings	1961	Prague	1963	Geneva
	1965	Vienna	1967	The Hague
	1969	Istanbul		

EXECUTIVE COMMITTEE

Meets every two years, alternately with the Board of Governors. It is composed of representatives from the Societies to which the Chairman and nine Vice Chairmen of the Board of Governors belong and from nineteen other Societies appointed by the Board of Governors for a four-year term. It directs the League between sessions of the Board of Governors.

ADVISORY COMMITTEES AND STANDING FINANCE COMMISSION

Development Programme Advisory Committee
Disaster Relief Advisory Committee
Health and Social Service Advisory Committee

Junior Red Cross Advisory Committee
Nursing Advisory Committee
Standing Finance Commission

These Committees meet, in principle, once every two years. Members are elected by the Board of Governors and number between 10 and 16 except the Standing Finance Commission which numbers 14.

SECRETARIAT

Secretary-General: HENRIK BEER (Sweden).

Deputy Secretary-General: NEDİM ABUT (Turkey)

Under Secretary-General: WILLIAM H. DABNEY (U.S.A.)

Treasurer-General: BAYON VAN ZEELAND (Belgium)

The Secretariat has a staff of 100 from some 22 countries. Its work falls into two main categories, *relief in times of natural disaster and development of National Societies*. The League is recognized by the United Nations as the main co-ordinating agency in emergency stages of international disaster relief, and launches an appeal if requested by the National Society, or the government, of the country concerned. In the field of development, three sections—Training, Planning and Regional Service, in consultation and close co-operation with the technical bureaux—provide assistance on request to National Societies in process of formation or development by means of regional, field and technical delegates, regional seminars, training institutes and conferences, and help established National Societies develop and extend existing services and set up new ones if and when the need arises.

TECHNICAL BUREAUX

Health and Social Service, promoting and co-ordinating National Societies' activities in first aid, preventive medicine, organization of blood transfusion services and donor recruitment and social welfare activities.

Nursing, which reinforces the efforts of National Societies to improve recruitment and training of nursing personnel for their own health programmes and state needs, provides documentation for basic and post-basic nursing schools, training of auxiliary nursing personnel and development of "Health in the Home" instruction.

Junior Red Cross, which co-ordinates youth programme of three points—protection of life and health, service and international understanding—designed to encourage young people to contribute actively to the promotion of good health in their families, schools, communities and the world. There are junior or youth sections in over 93 countries with membership of over 83,000,000 ranging between ages 5 to 25.

Information, which provides National Societies with publications, photographs, films, tape recordings and other audio-visual materials, maintains constant contact with international information media; is responsible for all League publications, in particular the review *Panorama*, published eight times a year. All periodicals appear in English, French and Spanish.

International Relations and Research Service, which is entrusted with co-ordinating and strengthening the relations of the League with all governmental and non-governmental international organizations, which might influence League policy. In the field of research, this service will endeavour to study the resources of the Secretariat with the aim of improving the long range planning of its activities, to make a survey on new trends in the Red Cross world and to offer guidance.

The League maintains close relations with many inter-governmental organizations, in particular the World Health Organization, the United Nations High Commissioner for Refugees and UNESCO, and non-governmental organizations.

INTERNATIONAL CONFEDERATION OF FREE TRADE UNIONS

SUMMARY OF THE CONSTITUTION

(As revised in 1959)

PREAMBLE AND AIMS

The International Confederation of Free Trade Unions exists to unite the workers organised in the free and democratic trade unions of the world and to afford a means of consultation and collaboration between them in furtherance of the aims here set out. (Statement of ICFTU's Aims follows.)

ARTICLE 1. Membership: All bona fide national trade union centres accepting the aims and Constitution of the Confederation shall be eligible for membership.

ARTICLES 2-3. Congress: The supreme authority. (Convened at least once every three years. Composed of delegates of the affiliated organisations.)

ARTICLES 9-10. Officers: President, the Vice-Presidents and the General Secretary.

ARTICLES 13-18. Executive Board: Elected by Congress. 27 members nominated by: Africa 3, Asia 4, Middle East 2, Australia and New Zealand 1, Britain 2, Continent of Europe 6, Latin America 3, North America 5, West Indies 1.

ARTICLE 19. Regional Organisations: Organic parts of the Confederation.

ARTICLES 20-22. Finance: Income derived from regular affiliation fees, special levies and voluntary contributions.

ARTICLES 23-24. Co-operation with International Trade Secretariats; Headquarters.

ARTICLES 25-26. President and Vice-Presidents: Elected by the Executive Board.

ARTICLES 27-28. General Secretary: Elected by Congress.

INTERNATIONAL TELECOMMUNICATIONS SATELLITE CONSORTIUM—INTELSAT

Headquarters: 950 L'Enfant Plaza South, S.W., Washington, D.C. 20024, U.S.A.

Founded in August 1964 by agreements which provide interim arrangements for the establishment of a global commercial communications satellite system

MEMBERSHIP

Membership of INTELSAT is available to all states which are members of the International Telecommunication Union, and as of November 15th 1969 comprised 70 states

ORGANIZATION

INTERIM COMMUNICATIONS SATELLITE COMMITTEE

Responsible for the design, development, construction, establishment, maintenance and operation of the "space segment" of the global system (the "space segment" comprises the communications satellites and the tracking, control, command and related facilities and equipment required to support the operation of the communications satellites). Members of INTELSAT are represented on the Interim Committee on an investment quota basis, as at November 15th, 1969 there were 18 committee members, representing 48 states

MANAGEMENT

Under the interim arrangements, the Communications Satellite Corporation (COMSAT), a private corporation set up by Act of U.S. Congress, acts as the Manager in the design, development, construction, establishment, operation and maintenance of the space segment

AGREEMENTS

The interim arrangements envisage a global communications satellite system, available to all countries on a non-discriminatory basis, whether or not they have contributed

capital to the system. States may invest in the system, with consequent participation in the design, development, construction (including the provision of equipment) establishment, maintenance, operation and ownership of the system

Three Agreements have been signed

- (a) An *Intergovernmental Agreement* establishing interim arrangements for a global commercial communications satellite system, which came into force in August 1964
- (b) A *Special Agreement* concluded between governments or their designated communications entities, which came into force in August 1964
- (c) A *Supplementary Agreement on Arbitration* providing for the settlement of legal disputes, which came into force in November 1966

These Agreements are to remain in force until they are superseded by definitive arrangements. The latter have been under negotiation since February 1969 in the framework of an intergovernmental conference known as the INTELSAT Conference. The next plenary session is scheduled to open in February 1970

INTERNATIONAL CO-OPERATIVE ALLIANCE

ECONOMIC RESEARCH AND STATISTICAL SECTION

The Section follows developments important to the Co-operative Movement, and pays special attention to trusts and monopolies, restrictive practices, world commodity markets and the protection of consumers' interests. It also collates returns from the National Organizations and issues the results in an annual summary.

REGIONAL OFFICE

43 Friends' Colony (East), Mathura Rd.,
New Delhi, India

Founded 1960 to develop ICA activity in South-East Asia, to act as a link with affiliated national movements,

and to represent ICA at international organizations in the region.

The Regional Office includes the Education Centre, which facilitates the interchange of knowledge and experience between Co-operative organizations in the region. It arranges courses, seminars and conferences, undertakes surveys, and supports and supplements the educational activities of national Co-operative Movements.

Regional Officer: P. E. WEERAMAN.

OFFICE FOR EAST AND CENTRAL AFRICA

P.O.B. 788, Moshi, Tanzania

The Office of the ICA for East and Central Africa was founded in 1968 to develop ICA activity in Africa.

Officer in Charge: ARNE HOLMBERG.

FINANCE

The ICA works on an annual budget of slightly over £100,000. Its income is obtained almost entirely from the annual subscriptions paid by its members. Costs of about £80,000 per annum for the work of the Education Centre in South East Asia are borne by the members of the Swedish co-operatives, supplemented by grants from the Swedish Government. Technical Assistance expenditure is met from the ICA Development Fund to which contributions are made by member organizations on a voluntary basis.

INTER-PARLIAMENTARY COUNCIL

The directing organ of the Union. Composed of two members from each affiliated National Group. The Council convenes Inter-Parliamentary Conferences, fixes their agenda, approves the annual budget of the Union and appoints the Secretary General.

President: ANDRÉ CHANDERAGOR (France)

EXECUTIVE COMMITTEE

The administrative organ of the Union. It supervises the work of the Inter-Parliamentary Bureau. The President of the Council is *ex officio* a member and President of the Committee.

Vice-President: A. MATINE-DAFTARY (Iran)

Members: M. DE ARANEGUI (Spain), R. CARPIO-CASTILLO (Venezuela), E. Q. DADDARIO (U.S.A.), J. HALL (U.K.), M. MARIGOH MBOUA (Cameroon), M. DE NIET (Netherlands), N. S. REDDY (India), J. VIROLAINEN (Finland), J. K. WENDE (Poland)

INTER-PARLIAMENTARY BUREAU

The Secretariat of the Union. It maintains contacts with the National Inter-Parliamentary Groups, organizes meetings held under the auspices of the Union, carries out study programmes and issues publications.

Secretary General: ANDRÉ DE BLONAY (Switzerland)

Assistant Secretary General: JAMES DOUGLAS (Great Britain)

AIMS AND ACTIVITIES

The Union promotes personal contacts among members of all Parliaments constituted into National Groups with a view to establishing and developing firm democratic institutions and to advance international peace and co-operation.

The Union organizes conferences bringing together parliamentarians of different nationalities and ideologies to study objectively political, economic, social and cultural problems of international significance.

The Union has consultative status, Category A, with the

Economic and Social Council of the United Nations (ECOSOC). It has entered into consultative arrangements with UNLSOC and also maintains regular contacts with other UN specialized agencies. Co-operation also exists with the Inter-Parliamentary Union of the Nordic Countries (Denmark, Finland, Iceland, Norway and Sweden), the Consultative Inter-Parliamentary Council of Benelux (Belgium, Netherlands, Luxembourg), the Latin American Parliament, and the Arab Parliamentary Union set up by representatives from the Parliaments of Jordan, Kuwait and the United Arab Republic in 1965.

BUDGET

Contributions from National Groups are the main source of revenue. These are paid annually on a scale fixed by the Council. The Union's budget is about 700,000 Swiss francs yearly.

JOINT INSTITUTE FOR NUCLEAR RESEARCH

LABORATORY OF THEORETICAL PHYSICS

Director: Prof. D. I. BLOKHINTSEV.

This Laboratory works on the problems of field theory, the theory of elementary particles, nucleon structure, the phenomenological theory of scattering, and the use of superconductivity methods to the atomic nucleus

LABORATORY OF NEUTRON PHYSICS

Director: Prof. I. M. FRANK

An experimental fast neutron pulse reactor came into operation in 1960. It is being used for research in low-energy physics and neutron spectrometry, and for studying the structure of matter. Nuclear reactions induced by light nuclei are studied with the aid of the laboratory electrostatic generator

LABORATORY OF NUCLEAR REACTIONS

Director: Prof. G. N. FLEROV

In 1960 a cyclotron of multiple-charged ions came into operation. It is used to produce powerful beams of various ions up to the light-charged 320 MeV ion Ar. In 1962 a new type of nuclear radioactivity—proton radioactivity was discovered, in 1963 a new isotope of the 102 element with a mass number of 256 was synthesized, in 1964 the 104 element was synthesized. The chemical properties of transuranium elements are studied at the laboratory.

LABORATORY OF COMPUTING AND AUTOMATION

Director: Prof. M. G. MESCHERYAKOV.

This Laboratory was founded in 1966, its purpose being the centralization of computing and data handling facilities at JINR.

The main directions of the laboratory activities are the creation and operation of systems for analysis of data collected on film, development of automatic flying spot devices for scanning and measuring chamber films, organization of measuring centres at other Laboratories of the Institute and development of mathematical methods and programmes for data processing as supplied to problems of elementary particle physics

HISTORY

In 1946 work was begun on the 680 MeV synchrocyclotron at Dubna. In 1949, when it was put into operation, the Institute of Nuclear Problems of the U.S.S.R. Academy of Sciences was set up. In 1957 the 10 GeV synchrophastron of the Electrophysical Laboratory of the U.S.S.R. Academy of Sciences was completed and the two installations formed the centre of a new town named Dubna, 80 miles from Moscow. In 1956 these two large research institutes were handed over to the Joint Institute for Nuclear Research and Dubna became an international centre. During the following years the Joint Institute for Nuclear Research founded four new Laboratories: the Laboratory of Theoretical Physics, the Laboratory of Nuclear Problems, the Laboratory of Neutron Physics and the Laboratory of Computing and Automation.

There are over 3,000 staff at the Institute. Scientists of other member states make liaison visits and work at the Joint Institute for Nuclear Research laboratories for short and long periods of time.

INTERNATIONAL PRESS INSTITUTE—IPI

Münstergasse 9, 8001 Zürich, Switzerland

Telephone: (051) 34 48 38.

ounded in 1951. A non-governmental association of editors, publishers and news broadcasters independent of governments who support the principles of a free and responsible Press. Membership: 1,600 (publishers and journalists of press, radio and TV systems) from 60 countries spread over five continents.

ORGANIZATION

ANNUAL ASSEMBLY

Composed of delegates from all member countries. The assembly elects the Executive Board, appoints the rector and lays down Institute policy.

EXECUTIVE BOARD

The governing body of the Institute. The Board consists of editors from 20 countries, who are elected by the annual Assembly. It meets when necessary, but must do so at least once a year.

Chairman (until May 1970): HANS KLUTHE (Federal Republic of Germany).

Vice-Chairmen (until May 1970): AW SIAM (Hong Kong), L. K. JAKANDE (Nigeria).

NATIONAL COMMITTEES

Established in every country where the press is free. Composed of the leading editors of these countries, the Committees recruit the membership, report to the Secretariat on developments affecting the press and conduct the business of the Institute in their countries.

MEMBERSHIP

Comprises two categories: full members and associate members.

Full membership is open to persons who have responsibility for the editorial and news policies of newspapers, weekly and monthly journals or news agencies, and who are dedicated to the principles of freedom of the press.

Associate membership is open to persons whose work is associated with journalism in its editorial aspects but who cannot qualify for full membership because they are not executives of newspapers or agencies; for example newspaper correspondents and commentators, members of journalism faculties and the like.

SECRETARIAT

Director: ERNEST MEYER (France).

AIMS

The International Press Institute was founded in 1951 by 34 newspaper publishers and editors from North America, Western Europe, Latin America and Asia, who met in New York to study the role of the press in the post-war world. They believed that if journalists from different countries and different parts of the world were brought together to discuss current problems and the improvement of professional journalism, they would at the same time learn to understand each other's individual problems better. Free access to information and free transmission and dissemination of news are the guarantee for a truthful picture given of the problems of other people.

The Preamble of the Constitution of the International Press Institute, defining the essential aims of the Institute, states:

"World peace depends upon understanding between

people and peoples. If peoples are to understand one another, it is essential that they have good information. Therefore, a fundamental step towards understanding among peoples is to bring about understanding among the journalists of the world. In accordance with this belief there is established an organization to work toward the following objectives:

1. The furtherance and safeguarding of freedom of the press, by which is meant: free access to the news, free transmission of news, free publication of newspapers, free expression of views.

2. The achievement of understanding among journalists and so among peoples.

3. The promotion of the free exchange of accurate and balanced news among nations.

4. The improvement of the practices of journalism."

LATIN AMERICAN FREE TRADE ASSOCIATION

The *Common List* includes those products on which complete exemption from all duties and charges shall obtain within the Free Trade Zone. The products represented on this list shall represent at least 25 per cent of the total trade of the area during the first three years, 50 per cent during the second three year period, 75 per cent during the third three year period, and the greater part of the *inter-alia* trade during the final three year period.

The first Common List was agreed in 1964 and negotiations for the second were begun in December 1967.

The Treaty includes provisions for *Special Lists* for more favourable terms for less developed countries. Paraguay has already obtained benefits under this clause, which also covers Ecuador, Bolivia and to some extent, Uruguay.

Subregional Agreements. The Association approves in

principle the drawing up of subregional agreements between its members, in accordance with the Declaration of the Presidents of America, signed at Punta del Este in April 1967, as being a means of encouraging the realization of a Latin American Common Market.

The Andean group of countries (Bolivia, Colombia, Chile, Ecuador and Peru) signed the *Cartagena Agreement* in May 1969 and in July 1969 the Permanent Executive Committee of LAFTA unanimously approved the establishment of an Andean Common Market.

A *River Plate Basin Treaty* (*Tratado de la Cuenca del Plata*) was signed in Brasilia in April 1969, by Argentina, Bolivia, Brazil, Paraguay and Uruguay, to co-operate in joint development schemes in the area drained by the rivers which flow into the Plate estuary.

ACTIVITIES

Trade Liberalization Programme. The annual rounds of negotiations have given rise to approximately 11 000 tariff reductions incorporated in the National Lists. More than 7 000 preferential tariff reductions in favour of less developed member countries have been included in Special Lists. These concessions cover almost 90 per cent of trade between countries of the region.

Negotiations for a second Common List were begun in December 1967 and continued July–November 1968, but no agreement was reached. In October 1969, when negotiations for the Common List were resumed, the Contracting Parties adopted a protocol, drawn up in June 1969 by the Permanent Executive Committee, modifying the Treaty of Montevideo. The amendments provide for prolongation of the strict time limits set for the introduction of free trade in the area, and the transition period is to terminate in 1980 instead of in 1973.

Growth of Trade. While from 1955 to 1961 the volume of intraregional trade decreased from \$1,087 million to \$659 million, since the Treaty of Montevideo came into effect it has increased by 144 per cent, to a total of \$1,604 million in 1968. In the same period, 1961–68, trade of the Contracting Parties with countries outside the region grew by 27 per cent.

Application of the Treaty has also encouraged diversification of exports of member countries. The volume of trade in manufactured and semi-manufactured goods during the period 1962–67 was \$1,538 million (primary products \$1,811 million).

Co-operation and Development. A number of industrial agreements have been completed in relation to certain sectors and the Permanent Executive Committee agreed in September 1969 on proposals for a regional policy for

industrial development, integration of industry by sector, widening of markets, investment policy, and measures to be taken to assist the less developed countries of the region.

LAFTA has established a *System of Payments and Credits* to facilitate commercial operations between member countries. The system functions by means of a network of credit agreements between central banks, and a procedure of multilateral compensation, which is administered by the Central Reserve Bank of Peru. Operations channelled through this system have increased from \$100 million in 1966, the first year of functioning, to almost \$400 million in 1968, the latter figure represents 87 per cent of intra-regional trade of the countries which signed credit agreements.

LAFTA has adopted a policy of co-ordination and harmonization of legislation, principally through special intergovernmental agreements, such as the Agreement on Transport by Water, the Protocol on Transit of Persons, and the Protocol on the Settlement of Disputes. A number of studies have been carried out on matters relating to integration, such as industrial property, harmonization of fiscal laws, customs legislation and the adoption by Contracting Parties of common positions with regard to third parties.

LAFTA-CACM Co-ordinating Commission (*Comisión Coordinadora ALALC-MCCA*). The Commission was created in September 1967 by LAFTA and CACM (Central American Common Market) to devise methods for the formation of a Latin American Common Market. Also included in the Commission are Latin American countries which do not belong to either LAFTA or CACM. The first meeting of the Commission was held in Port of Spain, Trinidad and Tobago, in October 1968.

INTERNATIONAL RADIO AND TELEVISION ORGANIZATION

INTERVISION

The Intervision network was set up in 1960 under OIRT to link the television services of Czechoslovakia, the German Democratic Republic, Hungary and Poland. Links were extended to the U.S.S.R. in 1961 (the Soviet Central Television and TV services of the Ukraine, Estonia and Latvia). Bulgaria and Romania joined in 1962. In 1965 Finnish Television joined and also the TV services of Byelorussia and Lithuania.

Intervision is controlled by the OIRT Administrative Council and decisions about programmes are made by the Intervision Council. Programme details are settled by the Intervision International Programme Centre.

There is a regular exchange with the Eurovision network.

THE INTERNATIONAL RED CROSS

ORGANIZATION

INTERNATIONAL COMMITTEE

President: MARCEL NAVILLE.

Vice-Presidents: JACQUES FREYMOND, HANS BACHMANN.

Members: JACQUES CHENEVIÈRE, MARTIN BODMER, PAUL RUEGGER, RODOLFO OLGATI, HARALD HUBER, ROGER GALLOPIN, DIETRICH SCHINDLER, HANS MEULI, MARJORIE DUVILLARD, MAX PETITPIERRE, ADOLPHE GRAEDEL, DENISE BINDSCHEDLER ROBERT, JEAN PICTET, JACQUES F. DE ROUGEMONT, FRÉDÉRIC SIORDET, GUILLAUME BORDIER, WALDEMAR JUCKER.

Secretary-General: JEAN-LOUIS LE FORT.

The ICRC is an independent institution of a private character, neutral as regards politics, ideology and religion. It is exclusively composed of Swiss nationals. Members are co-opted, and their total number may not exceed 25. The international character of the ICRC is based on its mission and not on its composition.

PRESIDENTIAL COUNCIL

Consists of the President and at least three other members of the Committee. Executes current work between sessions of the International Committee.

DIRECTORATE

A reorganization of the Directorate became effective on January 1st, 1970, and the ICRC's mission will now be undertaken by several departments: Legal, International Law Promotion and Development, Planning, Relief Supplies Procurement, Transport and Distribution, Field Delegation Servicing, Central Tracing Agency, International Tracing Service (Arolsen, Germany), Personnel, Administration and Finance, and Information and Press.

Five regional operations divisions will be under a head of operations and each will be concerned with geographic areas where the ICRC is in action: Africa, Latin America, Europe, Asia, Middle East.

Director-General (a.i.): RAYMOND COURVOISIER.

Chairman of the Legal Commission: JEAN PICTET.

Director, General Affairs: CLAUDE PILLOUD.

FINANCE

The ICRC's work is financed by a voluntary annual grant from governments parties to the Geneva Conventions, and similar grants from National Red Cross Societies and the Swiss public.

PUBLICATIONS

The International Committee of the Red Cross—What it is—What it does.

Topical Red Cross News (information bulletin, about 20 times annually).

THE LEAGUE OF RED CROSS SOCIETIES— LORCS

17 Chemin des Crets, Petit-Saconnex, 1211 Geneva 19, Switzerland

Founded in 1919, by the American, British, French, Italian and Japanese Red Cross Societies to be a permanent organ of liaison between national societies.

MEMBERS

National Red Cross, Red Crescent, Red Lion and Sun Societies in 112 countries at the end of 1969, with an aggregate junior and adult membership of over 220 million.

FUNCTIONS

1. To facilitate, as the International Federation of the National Societies, their humanitarian action at all times and carry out the responsibilities devolving on it in this capacity, being a permanent organ of liaison, co-ordination and study among the various National Societies, and having the duty of assisting them in organizing and carrying out their work on both national and international level.

2. To promote the establishment and development of an independent and duly authorized National Society in each country.

3. To be the official representative of the Member Societies in the international field.

4. To accept the mandates entrusted to it by the International Conference of the Red Cross and the Board of Governors.

FINANCE

The League of Red Cross Societies is financed by the contributions of Member Societies on a pro-rata basis. Each relief action is financed by contributions specified for that action and the development programme is also financed on a voluntary basis by National Societies.

STATUTES

Signed at Tunis, October 1st, 1964, by the Economic Ministers of the four member states.

Article 1. The Permanent Consultative Committee is an organism in which representatives of the four countries of the Maghreb are brought together. It is composed of a President and eight members, of whom four are titular representatives and four are deputies

Article 2. The President of the Permanent Consultative Committee must have the rank of Minister The Presidency is entrusted to each of the member states in turn for the duration of one year.

Article 3. The President may arrange to be assisted by a Vice-President who will be the titular representative of the country which is holding the Presidency.

Article 4. The Government of each of the countries of the Maghreb will appoint a deputy titular member with the rank of Director of Central Administration

The representatives of each country will be able to command the help of these experts in case of need

Article 5. The Permanent Consultative Committee is provided with a Permanent Secretariat headed by an Administrative Secretary appointed by the President

The location of the Secretariat will vary according to the location of the Presidency.

Article 6. The Permanent Consultative Committee will have correspondents in each member state appointed by

the government concerned These correspondents must establish a Central Administration, and preferably some organizations and services with the object of planning economic programmes

Article 7. Meetings of the Permanent Consultative Committee will be held at least once every three months when called by the President At the same time as the President calls members of the Committee to meetings, he will present them with a programme embodying the proposals which he has received from the member countries

Article 8. The proceedings of every session of the Permanent Consultative Committee must be recorded in Minutes drawn up by the President in office. These minutes must receive the unanimous approbation of the members of the Committee.

Article 9. The President will supply each of the members of the Committee with a copy of all documents brought to his attention, as well as any document likely to be of value to the Committee

Article 10. The President will submit the budget planned to cover the expenses of the Permanent Consultative Committee for the approbation of the Maghreb Council of Economic Ministers.

INTERNATIONAL SECRETARIAT FOR VOLUNTEER SERVICE—ISVS

12 Chemin de Surville, Petit Lancy, 1213 Geneva, Switzerland

Established 1962 to support and assist national volunteer service programmes. Members: 52 governments.

ORGANIZATION

ASSEMBLY

Composed of governments of countries attending the 1962 International Conference on Middle Level Manpower and of those governments which have since been voted into membership. It is the ultimate authority on policies and scope of the organization. Membership is open to all countries which are members of UN or its Specialized Agencies.

COUNCIL

Composed of 15 governments which contribute support to ISVS, either in the form of cash or in the assignment of personnel, or both. It determines questions of policy, programme and budget.

SECRETARIAT

Responsible for the executive functions of the organization.

Secretary-General: MICHAEL U. R. VON SCHENCK (Switzerland).

REGIONAL OFFICES

Asia: ISVS Asian Office, c/o PACD, 1817 España St., Manila, Philippines.

Latin America: Secretaría Internacional para el Servicio Voluntario, Oficina de Latinoamérica, Calle Defensa 120, 6mo Piso, Oficina 47, Buenos Aires, Argentina.

North America: 1424 16th Street, N.W., Washington, D.C., U.S.A.

AIMS

1. To support and assist national volunteer programmes by serving as an information and experience exchange clearing house.
2. To encourage the formation of new national volunteer service programmes.
3. To provide technical assistance where requested in the setting up and support of national volunteer service

organizations, both those for service overseas and those within their own borders.

4. To co-operate with other organizations, international, governmental and private in working to increase and improve volunteer service, and to increase the supply of skilled manpower in the developing countries.

ACTIVITIES

1. Circulation of volunteer information, documentation and statistics, films, language and other training materials for volunteers.
2. Sponsorship of international and regional conferences and seminars about volunteer service and related subjects.

3. Technical assistance for the establishment of national volunteer organizations.
4. Aid to international co-ordination of volunteer service.

FINANCE

The Secretariat is financed by contributions of member governments, principally those of the Council.

feasibility investigation of mainstream projects at Pa Mong, Sambor and Tonle Sap.

Three tributary projects, Nam Pung and Nam Pong in Thailand, Lower Se Done in Laos, are in operation, and four projects (Nam Ngum in Laos, Prek Thnot in Cambodia, Lam Dom Noi and Nam Phrom in Thailand) are under construction. Construction of the Nam Dong project in Laos is expected to begin in 1970. Feasibility reports have been completed for a further seven projects. In addition, two bridges across the mainstream Mekong are planned at My Thuan in the Viet-Nam Delta and between Laos and Thailand in the Vientiane-Nong Khai area.

Navigation Improvement

Hydrographic surveys of important reaches of the Mekong river have been in progress for several years. Rock-blasting, channel marking and dredging operations have been organized, as well as provision for improvement in cargo-handling facilities and craft construction.

Other Projects

Experimental farms, mineral surveys, fisheries and forestry development, power market surveys, power market and electro-processing industry studies, and training of administrative and technical personnel from the four riparian states.

INTERNATIONAL TELECOMMUNICATIONS SATELLITE CONSORTIUM

ACTIVITIES

Five satellites, in synchronous orbit, are in service and cover more than 90 per cent of the earth's inhabited area. Two of these satellites are over the Atlantic, two over the Pacific, and one over the Indian Ocean. Together they provide a total capacity of more than 4,000 telephone circuits, and also permit global distribution of television programmes. At the end of 1969 there were approximately 2,000 telephone circuits in full-time use. More than 800 hours of television programmes were carried in 1969.

1965 INTELSAT I (*Early Bird*) was launched on April 6th, and began commercial service on June 28th. Provides 240 voice circuits or a television service, and is still operational as a standby.

1966 (An INTELSAT II was launched on October 26th but failed to achieve synchronous orbit.)

1967 A second INTELSAT II (*Pacific I*) was launched over the Pacific on January 11th, and opened for commercial usage on January 27th.

A third INTELSAT II (*Atlantic II*) was launched on March 22nd to provide additional service across the Atlantic.

A fourth INTELSAT II (*Pacific II*) was launched on September 27th to provide additional service across the Pacific, and began commercial service on November 4th.

The INTELSAT II satellites are capable of providing 360 voice circuits and are expected to have a lifetime of three years.

In early 1966 an INTELSAT III programme was established for satellites in synchronous orbit providing global coverage in 1968. These were to have a capacity of 1,200 voice circuits and an estimated lifetime of five years, but of the five satellites launched, only one (over the Indian Ocean) is fully operational, and one other (over the Pacific) is working at half capacity. The original programme was based on the possible failure of one in four launchings.

1968 The first INTELSAT III satellite was launched in September 1968, but was destroyed when the faulty launch vehicle had to be destroyed shortly after launch. Its replacement was launched in December 1968, to cover the Atlantic. After working perfectly for six months it ceased transmission, possibly due to the overheating of a bearing.

1969 In February and May, third and fourth INTELSAT III satellites were launched over the Pacific. One of these was later moved to the Indian Ocean. The fifth INTELSAT III satellite was launched from Cape Kennedy in August 1969 but failed to achieve synchronous orbit.

A new and more advanced series of satellites, INTELSAT IV, will be launched, beginning in early 1971. Each

of these will have a capacity of from 5,000 to 9,000 telephone circuits, depending upon antenna arrangements selected, and a design life of seven years. They will also have television transmission capability. Four such satellites—two over the Atlantic and one each over the Pacific and Indian oceans—will be capable of accommodating the calculated growth of traffic by 1974-75.

EARTH STATIONS

As at the end of 1969 there was a total of 40 standard earth stations working with the INTELSAT system. These are distributed as follows:

Africa (1): Morocco.

Asia (9): Republic of China, Japan (2), Philippines, Thailand (2), Hong Kong, Indonesia, Iran.

Australia and Oceania (4): Australia (3), Guam.

Central and South America (6): Argentina, Brazil, Chile, Mexico, Panama, Peru.

Europe and the Middle East (11): France (2), German Federal Republic (2), Italy, Lebanon, Spain, U.K. (2), Bahrain, Kuwait.

North America and Hawaii (9): Canada (2), U.S.A. (9).

It is expected that by the end of 1970 this total will increase to approximately 55, and to 70 by the end of 1971. Stations are at present under construction, to be available for service in 1970, in Nigeria, East Africa, Korea, Vietnam, India, Malaysia, Philippines, Singapore, New Zealand, Colombia, Venezuela, Greece, Jordan, Italy, Spain and Alaska.

FINANCE

The contributions of the signatories to the Special Agreement towards the cost of the design, development, construction and establishment of the space segment during the interim arrangements are based upon an estimate of U.S. \$200,000,000.

Each signatory to the Special Agreement is responsible for its proportionate quota of costs in accordance with the provisions of that Agreement. The space segment is owned in proportion to the respective contributions. COMSAT at present owns 53 per cent of the space segment, while 18 European members own 26.5 per cent (of which the U.K. owns 7.3 per cent).

The Interim Committee approves utilization of the space segment by earth stations, taking into account the recommended standards of the International Telecommunication Union.

The Interim Committee establishes the rate of charge per unit of satellite utilization to cover amortization of the capital cost of the space segment and to cover estimated operating, maintenance and administration costs of the space segment.

The Council meets annually in one of the Nordic capitals. At each session a Presidium is elected to take charge of the Council's work until the next session. Each delegation elects its own President, the Council President being the one from the country which is host that year. The other four are Vice-Presidents.

The Council consists of 78 delegates elected annually from the Parliament of each country (see Statute below, amended Articles 1, 2 and 3) and of Government Representatives. Resolutions are passed in the form of suggestions sent to the Governments. Governments must submit progress reports to the Council annually.

ACTIVITIES

ECONOMIC CO-OPERATION

In 1957 a Scandinavian Co-operation Committee advocated a Scandinavian Common Market but in 1959 the plan was abandoned in favour of joining EFTA (The Seven). A Permanent Committee of Ministers for Economic Co-operation (see below), and a committee of officials to assist them, has been set up to direct Scandinavian co-operation in production and investment, trade and economic policy, statistics and customs administration and to co-ordinate investigations in the present European market situation. The Council has given special consideration to joint assistance schemes for the developing countries.

During the final phase 1966-67 of the Kennedy Round talks within the framework of GATT, the member countries of the Nordic Council acted through a single chief negotiator.

At the meeting of Prime Ministers from Denmark, Finland, Norway and Sweden, held in Copenhagen in April 1968, closer economic arrangements between these countries were proposed.

In June 1968 a Nordic Committee of Government Officials was appointed with instructions to produce a preliminary report on their investigations into the possibility of expanded Nordic co-operation. The preliminary report was considered at meetings of the Nordic Prime Ministers in January and February 1969, at a meeting between Prime Ministers and the Presidium of the Nordic Council and the Economic Committee in February 1969, and also at the Nordic Council's session in March 1969.

In July 1969 officials from Denmark, Finland, Norway and Sweden drew up a draft treaty establishing the *Organization for Nordic Economic Co-operation*. The draft treaty envisages an economic

ORGANIZATION

COMMITTEE OF GOVERNMENT PLENIPOTENTIARIES

The Committee is the supreme authority of the Joint Institute. It is composed of the chairmen or heads of the atomic energy authorities of member countries. The Committee meets about once a year, and makes decisions about future policy, and finance.

SCIENTIFIC COUNCIL

Chairman: Academician N. N. BOGOLUBOV (U.S.S.R.).

Plans the programme of work. Composed of senior scientists from the member countries.

MANAGEMENT

Director: Academician N. N. BOGOLUBOV (U.S.S.R.).

Vice-Directors: Academician KH. KHRISTOV (Bulgaria),
Prof. N. SODNOM (Mongolian People's Republic).

Administrative Manager: V. L. KARPOVSKY.

Broad executive powers are vested in the Director. The Management carries out all practical work of the Institute between meetings of the Committee. The Director and Vice-Directors are elected by the Committee.

RESEARCH LABORATORIES

LABORATORY OF NUCLEAR PROBLEMS

Director: Prof. V. P. DZHELEPOV.

This laboratory has a synchrocyclotron that accelerates protons to 680 MeV, deuterons to 420 MeV, and alpha-particles to 840 MeV and is a powerful source of 600 MeV neutrons and charged and neutral mesons. This accelerator started operating in 1949. The main directions of research at this laboratory are the investigation of nucleon-nucleon scattering, the processes of pion production and their interaction with nucleons, the investigation of μ -meson properties and weak interaction processes, and the interaction of nucleons and mesons with complex nuclei.

The Laboratory also has a Radio-chemical Laboratory.

LABORATORY OF HIGH ENERGIES

Director: Prof. A. M. BALDIN.

The Laboratory has a 10 BeV synchrophasotron that has been operating since 1957.

Experimental investigations are carried out with protons and secondary particles. The experiments are devoted to the study of nucleon structure problems, strong interactions of strange particles and weak interaction processes. In 1960 the laboratory discovered the anti-sigma minus hyperon.

NORDIC CO-OPERATION

Outside the Nordic Council, there are hundreds of Nordic or Scandinavian societies, enterprises and committees, governmental, private and commercial. The following are some of the most important:

MINISTERIAL MEETINGS

The Prime Ministers of the Nordic Countries meet the Presidium of the Nordic Council once a year.

The Foreign Ministers of the Nordic Countries hold regular informatory meetings twice a year.

Ministers of Education and Ministers of Justice meet several times a year.

Ministers of Finance, of Social Affairs, of Labour, of Communications, of Fisheries, of Defence, of Health and Agriculture meet at least once a year.

MINISTERIAL COMMITTEES

Permanent Committee of Ministers for Economic Co-operation and Trade, aims to co-ordinate trading policy further.

Permanent Committee of Ministers for Co-ordination of Assistance to Developing Countries f 1963

Nordic Committee for Economic Co-operation: assists the Permanent Committee of Ministers. Officials from each country sit on the Committee.

Permanent Nordic Committee for Agriculture: f 1961, four members nominated by each government, discusses common problems of agricultural production and sales.

Permanent Nordic Committee for Fishery Problems f 1963, four members nominated by each government, discusses common problems of fisheries and sales of fishery products.

Nordic Cultural Commission: f. 1946, advises governments on cultural matters. Each government appoints a maximum of nine members to cover these three fields: academic and scientific, education, adult education and arts.

Officers Co-ordinating for Legislative Co-operation: f 1959, committee of the chief officials from the

Ministries of Justice. Annual Ministerial meetings co-ordinate work in Nordic legislation.

Nordic Social Policy Committee f 1946, consists of two high officials from the Ministry of Social Welfare in each country. It submits proposals for new joint projects, organises Ministerial meetings and implements their decisions, and generally co-ordinates policy. Social Insurance Congresses are also held at three-year intervals.

Permanent Labour Market Committee, f 1955, meets at least once a year to co-ordinate work regarding the Nordic labour market.

Nordic Contact Committee for Atomic Energy f 1957, meets twice a year to exchange information about atomic energy problems.

Nordic Institute for Theoretical Atomic Physics (Nordita) f 1957, promotes scientific research in theoretical atomic physics and trains physicists.

PRIVATE SOCIETIES, ENTERPRISES

Nordic Council for Applied Research (*Nordforsk*) f. 1947, aims to exchange information about research, to arrange symposia and to help towards the exchange of scientists among the Scandinavian countries, publishes a Scandinavian Research Guide.

Scandinavian Tourist Committee f 1926; the joint secretariat of the national travel organisations. It organises festivals and co-ordinates publicity.

Foreningen Norden (*Norden Associations*) f. 1919, 120,000 members, aims to increase co-operation generally, activities include information work, lecturing, courses, revision of textbooks and exchange between towns.

Nordic Council of the Fine Arts: f 1945; arranges exhibitions, etc.

Nordisk Andelsforbund (*Scandinavian Co-operative Wholesale Society*)

Scandinavian Airlines System (SAS) f 1946, Bromma Airport, Bromma 10, Stockholm; consortium: Norwegian, Danish and Swedish airlines.

Scanair: Copenhagen, f 1961; charter company. SAS holds 45 per cent of the share capital.

ORGANIZATION

COUNCIL OF MINISTERS

Established in 1965 as the supreme organ of LAFTA, the Council is composed of the Foreign Ministers of all member countries. It meets regularly and makes important policy decisions relating to regional integration.

CONFERENCE OF CONTRACTING PARTIES

The Conference of Contracting Parties is composed of delegations from each member country and makes decisions on matters that require a joint resolution of the Contracting Parties. Its functions are to take steps towards the implementation of the Treaty, to approve the annual Budget, to fix contributions, to elect a President and two Vice-Presidents and to appoint the Executive Secretary of the Permanent Executive Committee. It meets in ordinary session once a year, when trade negotiations are carried out, and in extraordinary session when convened by the Permanent Executive Committee.

PERMANENT EXECUTIVE COMMITTEE

The Committee, consisting of one representative of each contracting party, is the Permanent body of the Association and is responsible for supervising the implementation of the provisions of the Treaty. Among its regular duties are the convoking of the Conference of Contracting Parties,

to submit to the Conference an annual progress report and budget, to represent the Association, to carry out studies, suggest measures and submit recommendations to the Conference and to apply for technical assistance and collaboration. The Committee operates at the headquarters of the Association in Montevideo.

President (1969): ALFONSO PATIÑO ROSSELLI (Colombia).

SECRETARIAT

The technical and administrative functions of LAFTA are carried out by the Secretariat, which is directed by an Executive Secretary elected by the Conference for a term of three years. The appointment is renewable. The Executive Secretary participates in the work of the Council of Ministers, the Conference and the Committee.

The Secretariat is composed of the Departments of Trade Policy, Industrial Affairs, Economic Affairs, Agricultural Affairs, and Administration, and a number of specialized services.

Executive Secretary: GUSTAVO MAGARIÑOS (Uruguay), elected June 1967.

Deputy Executive Secretaries: CÉSAR A. VENEGAS C. (Peru), JUAN PASCAL MARTÍNEZ (Argentina).

FUNCTIONS

The Latin American Free Trade Association is an inter-governmental organization, created by the Treaty of Montevideo in February 1960 with the object of increasing trade between the Contracting Parties and of promoting regional integration, thus contributing to the economic and social development of the member countries.

System of Tariff Reductions. The Treaty of Montevideo provides for the gradual establishment of a free trade area, which would form the basis for a Latin American Common Market. Reduction of tariff and other trade barriers is to be carried out gradually over twelve years by two means, the National Lists and a Common List.

The National Lists form the basis for reductions of tariff and trade barriers between the member countries. Each country shall present annually a list of those commodities on which it is prepared to concede reductions and agreement between the members shall be reached by negotiation. These reductions shall be made at an annual rate of 8 per cent. When the Treaty came into force only seven countries had reached agreement on their National Lists, but in January 1962 Colombia presented her list and Ecuador joined the negotiations in August 1962. Venezuela joined the negotiations during the Sixth Conference and Bolivia joined them during the Seventh Conference.

THE NORDIC COUNCIL

AGREEMENT OF CO-OPERATION BETWEEN THE NORDIC COUNTRIES

Signed in Helsinki, March 23, 1962

The Governments of Denmark, Finland, Iceland, Norway and Sweden

Desirous of furthering the close connections between the Nordic nations in culture and juridical and social conceptions and of developing co-operation between the Nordic countries,

Endeavouring to create uniform rules in the Nordic countries in as many respects as possible,

Hoping to achieve in all fields where prerequisites exist an appropriate division of labour between these countries,

Desirous of continuing the co-operation, important to these countries, in the Nordic Council and other agencies of co operation;

Have agreed upon the following provisions

ARTICLE 1 The Contracting Parties shall endeavour to maintain and further develop co-operation between the countries in the juridical, cultural, social and economic fields and in questions of communications

ANDEAN DEVELOPMENT CORPORATION

(CORPORACIÓN ANDINA DE FOMENTO)

c/o Dirección de Intregación, Ministerio de Relaciones Exteriores del Perú, Lima, Peru.

In August 1966, representatives from Chile, Colombia, Ecuador, Peru and Venezuela met in Bogotá and signed a pact calling for accelerated regional integration measures to facilitate the establishment of a Latin American Common Market. In June 1967, at the close of the fifth Inter-American ECOSOC conference at Viña del Mar, the *Andean Dcvelopment Corporation* was founded, and a Mixed Commission of ten delegates from the five countries was formed.

In July 1967 the Mixed Commission held its second meeting in Quito to draw up a sub-regional planning agreement. This agreement covers co-operation on development projects, particularly in the petrochemical, iron and steel, automotive and electronics industries, and also includes provisions for the eventual establishment of a common external tariff for the region and plans for co-

ordinating national economic policies. The text of the agreement was approved by the Council of LAFTA Foreign Ministers in September 1967.

In July 1968, at a meeting at Cartagena, Colombia, the Mixed Commission agreed that the first integration measures should take effect in 1970 and that elimination of internal tariffs and the adoption of a common external tariff should be achieved by 1980.

In May 1969 the Mixed Commission, including a delegate from Bolivia, met in Cartagena, Colombia, to sign an *Andean Regional Agreement (Acuerdo Regional Andino)*. Bolivia, Chile, Colombia, Ecuador and Peru signed the pact, which calls for rapid reductions in tariff barriers, leading to the establishment by 1980 of a free trade area, and for integration of industry in the region.

RECORD OF EVENTS

1964

October

Routine meeting of the Economic Ministers of the four Maghreb countries, Tangier. Two bodies to be set up: the permanent consultative committee, which would implement decisions on economic co-ordination; and an institute of industrial studies, which would harmonise joint industrial planning. The four countries should work towards the establishment of a tariff union and towards joint negotiation with outside institutions and organizations.

1965

March

First meeting of the Permanent Consultative Committee, Algiers. Inner organization and operation of the Committee: three commissions appointed: one to draw up a schedule of the economies of the four countries, in order to be able eventually to establish relations with the important economic communities; a foreign trade commission to consider means of co-ordinating the export of citrus fruits, wines, esparto and olive oil, and to study the problems of duty-free trade within the Maghreb; and a commission to study the co-ordination of industry and energy, and to seek markets for Maghrebi industrial products. Meeting of the Maghreb Economic Ministers, Tripoli. Plans agreed for the co-ordination of

May

exports of citrus fruits, wines, esparto and olive oil. An esparto bureau established in Algiers to handle the exports of all four countries. Special commissions set up for statistics, accounting, and the steel industry, and it was agreed to study improvement of telecommunication links. Secretariat for the Consultative Committee established.

December

Meeting of Consultative Committee, Algiers. Studied reports on co-ordination of transport and tourism in the Maghreb, and on industry and postal and telecommunications agreements.

1966

February

Fourth annual meeting of the Maghreb Economic Ministers, Algiers. Plans agreed for establishment of a permanent secretariat in Tunis, under direction of MOHAMED CHERKAOUI, with budgetary and administrative responsibilities to aid the Consultative Committee; MOHAMED CHERKAOUI appointed Director of Consultative Committee; agreement on co-ordination of commercial statistics in Maghreb; budget approved for 1966.

July

Meeting of Commission on Trading Relations, Tunis. Discussion of liberalisation of Maghreb reciprocal trade relations.

analysis of the economic and financial capabilities of member countries and military requirements. This analysis is carried out every year in NATO and is known as the Defence Planning Annual Review. Governments made firm commitments, as regards force goals

ADMINISTRATION

CO-ORDINATION COMMITTEE

Committee for Co-ordination of Investigations of the Lower Mekong Basin: c/o ECAFE, Sala Santitham, Bangkok, Thailand; founded in 1957 to administer the overall Mekong Project; meets three or more times annually, chairmanship rotating between the four member (riparian) states (Chair. 1969, Viet-Nam); Mems.: PHLEK CHHAT (Cambodia), OUKEO SOUVANNAVONG (Laos), H.E. Dr. BOONROD BINSON (Thailand), H.E. Dr. PHAM HUU VINH (Republic of Viet-Nam); publ. *Annual Report* (issued Jan.-Feb.).

ADVISORY BOARD

Composed of nine members of outstanding international

reputation to advise the Committee on technical, financial, economic and other matters; Mems.: EUGENE BLACK, P. BOURRIÈRES, A. GAITSKELL, Sir ROBERT JACKSON, P. S. N. PRASAD, F. RODRIGUEZ, KANWAR SAIN, GENGO SUZUKI, Dr. V. H. UMBRIGHT, Lt.-Gen. R. A. WHEELER (Retd.).

EXECUTIVE AGENT

Responsible for day-to-day management and co-ordination between sessions of the Committee. Assisted by a staff provided by the riparian member countries and the United Nations (ECAFE and UNDP).

Executive Agent: C. HART SCHAAF.

THE LOWER MEKONG BASIN

The 2,620 mile long Mekong is the tenth largest river in the world. The Lower Mekong, which extends from the Burma-Laos border to the South China Sea, has a drainage area of some 236,000 square miles, i.e. as large as France and twice as large as Japan. Some 28 million people live in this area, which lies within Cambodia, Laos, Thailand and the Republic of Viet-Nam. Investigations of the river's potential were carried out in 1951, 1956 and 1957 with a view to developing hydroelectric power, navigation, irrigation and flood control; and in 1958 a UN Survey

Mission under Lt. Gen. Raymond Wheeler reported favourable prospects for comprehensive development. In 1959, an FAO Mission, organized at the request of the Committee, completed a report which amplified the recommendations of the Wheeler Mission in the fields of agriculture, forestry and fisheries. In 1961, similarly at the request of the Committee, the Ford Foundation financed a team of experts headed by Professor Gilbert White to examine the social, economic and administrative implications of the Mekong Development Project.

NORTH ATLANTIC TREATY ORGANIZATION

ARTICLE 13

After the Treaty has been in force for twenty years, any Party may cease to be a party one year after its notice of denunciation has been given to the Government of the United States of America, which will inform the Governments of the other Parties of the deposit of each notice of denunciation.

ARTICLE 14

This Treaty, of which the English and French texts are equally authentic, shall be deposited in the archives of the Government of the United States of America. Duly certified copies will be transmitted by that Government to the Governments of the other signatories.

The will of ALFRED NOBEL bequeathed the whole of his fortune (more than 30 million kronor) to a fund, the interest of which would be paid out annually to those who during the preceding year "have conferred the greatest benefit on mankind". The interest is divided into five equal parts, to be allotted as follows: "One part to the person who shall have made the most important discovery or invention within the field of physics; one part to the person who shall have made the most important chemical discovery or improvement; one part to the person who shall have made the most important discovery within the domain of physiology or medicine; one part to the person who shall have produced in the field of literature the most outstanding work of an idealistic tendency; and one part to the person who shall have done the most or the best work for

fraternity between nations, for the abolition or reduction of standing armies, and for the holding and promotion of peace congresses".

Prizes have been distributed annually on the festival day of the Foundation, December 10th, since 1901 (except during the two world wars).

OBJECTIVES

(as stated by Baron Pierre de Coubertin)

1. To bring to the attention of the world the fact that a national programme of physical training and competitive sport will not only develop stronger and healthier boys and girls but also, and perhaps more important, will make better and happier citizens through the character building that follows participation in properly administered amateur sport.
2. To demonstrate the principles of fair play and good sportsmanship, which could be adopted with great advantage in many other spheres of activity.
3. To stimulate interest in the fine arts through exhibitions and demonstrations, and thus contribute to a broader and more well rounded life.
4. To teach that sport is play for fun and enjoyment and not to make money and that with devotion to the task at hand, the reward will take care of itself—the philosophy of the amateur as contrasted to that of materialism.

5. To create international amity and good will, thus leading to a happier and more peaceful world.

FLAG, MOTTO AND FLAME

Flag White, with five interlaced rings in the centre. The rings are blue, yellow, black, green and red, with the blue ring high on the left nearest the flag pole. These rings represent the five continents joined in the Olympic Movement.

Motto The Olympic motto is *Citius, Altius, Fortius*, which means *Faster, Higher, Braver*.

Flame In ancient Greece, during the Olympic Games, a sacred flame burned at the Altar of Zeus, in whose honour the Games were held. At the opening ceremony of the modern Olympic Games, the Olympic Flame is lighted. It burns in a conspicuous place in the main stadium throughout the Games. The Torch to light the Flame is lit by the sun at Olympia and carried by runners from a distant point to the Olympic Stadium.

THE NORDIC COUNCIL

union with a common external tariff on about 90 per cent of imports, a Nordic Agricultural Fund, a Nordic Fisheries Fund, a General Fund and a Nordic Investment Bank. It also provides for the establishment of a Council of Ministers, a Committee of Experts, an Arbitration Tribunal and a Permanent Secretariat. The draft treaty reserves Iceland the right of membership of the Union, should she wish to join.

The Committee of Government Officials emphasized the importance of co-operation under the Treaty taking place in collaboration with the Nordic Council.

In February 1970 basic agreement was reached by the Committee on the establishment of the Scandinavian customs union (*Nordek*) by January 1st, 1972.

CULTURAL CO-OPERATION

The Council has recommended that Scandinavia should be an educational unit, with interchangeable scholarships. Most university examinations are recognised throughout Scandinavia. The Council has also encouraged the teaching of all the Nordic languages, especially in teachers' training colleges and elementary schools.

At the Council's recommendation a joint Scandinavian college for the training of journalists was set up, intended for persons who had already received a basic journalistic training.

Other institutions created on the recommendation of the Council: Nordic Institute of Theoretical Nuclear Physics (Copenhagen); Institute of Maritime Law (Oslo); Institute of African Studies (Uppsala); Institute of Asiatic Studies (Copenhagen); Institute for Social Planning (Stockholm).

The Council has fostered co-operation between the national broadcasting and television administrations (*NORDVISION*).

In 1967, on the recommendation of the Council, the governments of the Nordic countries established a Nordic Cultural Foundation with an annual budget of 3.25 million Danish crowns. The Fund, financed by the four member countries, is directed by a common board with supra-national authority.

LEGAL CO-OPERATION

The Council works towards securing uniformity of legislation and interpretation of the law. A large proportion of private law is already uniform throughout the Nordic countries. The Nordic Council has recommended an Inter-Nordic patent convention, and visualises one joint Scandinavian patent institution. There are also joint or common laws on marriage, divorce, property, copyright and trade marks.

There are special extradition facilities between the Nordic countries, but the Council would like to see police and courts having wider authority to examine

suspected persons or to hear witnesses at the request of another country.

The Council has arranged for citizens working in other Nordic countries to be given the legal status of nationals in many respects, and recommended relaxation of the rules whereby foreigners may not join the boards of directors or corporations for a certain time. New rules are in preparation to make it easier to change citizenship of Nordic countries.

SOCIAL CO-OPERATION

At the Council's recommendation, a Convention came into force in 1954 abolishing working permits for wage earners in all the Nordic countries except Iceland, and creating a common labour market. A free labour market exists for certain professions e.g. physicians, dentists and nurses, and the Council is working to this goal in other branches of the medical profession.

Reciprocity in social security legislation was largely achieved before the Nordic Council was set up, but the Council has arranged for the 16 existing agreements to be consolidated into a single Convention, which came into force in 1956.

Joint research is now taking place in all branches of health care and medicine, as well as in environmental protection. The Scandinavian Institute of Public Health has been established at Gothenburg.

TRANSPORT AND COMMUNICATIONS

The "Sound Bridge". In 1953 the Council recommended that a bridge be built between either Malmö or Helsingborg in Sweden and either Copenhagen or Elsinore in Denmark. A report recommending that construction start was published in December 1962 and in 1965 the Council recommended that the bridge be built between Copenhagen and Malmö. A final government report was published in November 1967.

Traffic Regulations. These are gradually being unified, and there is increasing common planning about communications between Scandinavia and the continent.

North Calott. The Council has made several recommendations for the improvement of communications in this area, the northern regions of Finland, Norway and Sweden.

Postal and Telegraphic Communications. Several recommendations have been executed to improve and cheapen facilities.

Passports. These were abolished for nationals in 1952, and for non-nationals in 1958, within the Nordic area. Customs formalities and baggage control have been substantially reduced, with the aim of making Scandinavia one unit for travel and tourist purposes.

AIMS

Harmonization of Customs regulations.
Setting up an African Common Market
Agreement on Double Taxation.
Regularization of insurance and other costs on trade exchanges

Stabilization Funds in support of steady prices
Harmonization of investment codes.
Suppression of subversion in African states

AFRO—MALAGASY CO-OPERATION

Accord Africain et Malgache du Sucre (*Common Sugar Market*) Secretariat Fort-Lamy, Chad. An agreement, signed in June 1966, came into force in October 1966 and established a common market in sugar between members of OCAM. Both the sugar-producing countries (Congo Republic and Madagascar) and the consumer countries benefit from this agreement, which provides for the fixing each year of a guaranteed price for sugar in OCAM countries. A levy is imposed on sugar imported from non-member countries, though preference is given to European sugar (mainly from Belgium and France). This levy is placed in a common fund, Exec. Dir. ANTOINE ESSOMÉ.

Similar agreements covering groundnuts, cotton and other raw materials, have been proposed.

Union Africaine et Malgache des Postes et Télécommunications (UAMPT): B.P. 44, Brazzaville, Congo, f. 1961, the UAMPT is a Committee of Ministers of Posts and Telecommunications set up to study problems of common interest and to promote the co-ordination of postal and telecommunications services in member countries. Last meeting November 1967, Gen. Dir. JOACHIM BALIMA; *Publ. Revue UAMPT, Compte rendu des conférences et des réunions*.

Comité des Ministres des Transports: Dakar, Senegal; f. 1962 to study transport problems within the former Union Africaine et Malgache (UAM); Sec.-Gen. CHEIKH FAL (Senegal).

Other Ministerial Meetings: Education Ministers of OCAM countries meet annually, and Ministers of Finance and Economics met in March 1966; Labour Ministers met in March 1967; Ministers of Information met in August 1967.

Office Africain et Malgache de la Propriété Industrielle (OAMPI) (*Afro-Malagasy Industrial Property Office*): B.P. 887, Yaoundé, Cameroon; f. 1962 at Libreville on signature of an agreement by all OCAM states except Rwanda and the Democratic Republic of the Congo; entered into force January 1964; administers the common national legislation on industrial designs, patents, and trade marks, Pres. KONAN BEDIÉ (Ivory Coast); Dir.-Gen. DENIS EKANI.

Air Afrique: B.P. 21.017, Abidjan, Ivory Coast; provides international air services between member states and other countries; Pres. and Dir.-Gen. CHEIKH FAL (Senegal).

Organisation Africaine et Malgache du Café (OAMCAF): Paris, France. The eight coffee producing countries of OCAM, including Togo, Dahomey and Ivory Coast, have formed themselves into the African and Malagasy Coffee Organization, which is treated as one unit for purposes of operation of the International Coffee Agreement. These countries receive a block quota under that Agreement and distribute it among themselves through their own consultative machinery.

Mouvement d'Etudiants de l'Organisation Commune Africaine et Malgache (MEOCAM): f. 1967, student movement of the Afro-Malagasy Common Organization, headquarters to be established at either Dakar, Abidjan or Yaoundé, Pres. KACK KACK (Cameroon).

Organisation pour le Développement du Tourisme en Afrique—ODTA: 6 rue Mesnil, Paris 8e, France, Sec.-Gen. JULIEN KONAN.

Other Co-operation. There are plans to establish two multi-national insurance companies, a joint shipping company and to provide for mutual consultation on Planning. The Scientific, Technical Research Committee aims to co-ordinate national research programmes. A Permanent African Committee on Higher Education has been established, with an office in each state.

During a conference of the UAM at Tananarive in September 1961, the following agreements were drawn up, and remain in force between the members of OCAM.

Convention Générale Relative à la Représentation Diplomatique: foresees common diplomatic missions and meetings of heads of missions accredited to France and the United Nations to harmonise their policies.

Convention Générale de Coopération en Matière de Justice: the courts of each country are open to nationals of any other member country without discrimination. Aims to simplify and unify existing national judicial systems.

Convention Générale relative à la Situation des Personnes et aux Conditions d'Etablissement: provides for free movement of persons between member states.

THE NORDIC COUNCIL

STATUTE OF THE NORDIC COUNCIL

(effective from January 1958; amended January 1970)

ARTICLE 1. The Nordic Council is a body formed for the purpose of consultation among the Folketing of Denmark, the Eduskunta-Riksdag of Finland, the Alting of Iceland, the Storting of Norway and the Riksdag of Sweden (legislatures), as well as the Governments of these countries, in matters involving joint action by any or all of these countries.

The Lagting (legislature) and the Landsstyre (executive) of the Faroe Islands as well as the Landsting (county council) and the Landskapsstyrelse (county board) of Åland participate in the work of the Council.

ARTICLE 2. The members of the Council are 78 elected members, Government representatives and representatives of the Landsstyre and the Landskapsstyrelse.

The Folketing of Denmark elects 16 members, the Eduskunta-Riksdag of Finland elects 17 members, the Alting of Iceland elects 6 members and the Storting of Norway and the Riksdag of Sweden both elect 18 members to the Council. The Lagting of the Faroe Islands elects 2 members and the Landsting of Åland 1 member to the Council. Furthermore, the necessary number of deputies are elected. Elections are made among the members of each legislature and in such a way that different political opinions are represented. In other respects elections are made at the time and in the manner decided by each legislature.

Each Government appoints from among its members as many Government representatives as it desires. The Landsstyre and the Landskapsstyrelse both appoint one representative from among their members.

The members elected by the Folketing and the Lagting as well as the representatives appointed by the Danish Government and the Landsstyre jointly constitute the delegation of Denmark. The members elected by the Eduskunta-Riksdag of Finland and the Landsting of Åland as well as the representatives appointed by the Government of Finland and the Landskapsstyrelse jointly constitute the delegation of Finland. The delegation of Iceland consists of the members elected by the Alting and the representatives of the Icelandic Government. The delegation of Norway consists of the members elected by the Storting and the representatives of the members elected by the Riksdag and the representatives of the Swedish Government.

ARTICLE 3. The representatives of the Governments, the Landsstyre and the Landskapsstyrelse have no vote in the Council.

ARTICLE 4. The Council shall meet once a year on such date as it may decide (Ordinary session). Furthermore,

special meetings may be held, if the Council so decides, or if a meeting is requested by not less than two Governments or not less than 25 elected delegates (Extraordinary session). Ordinary sessions shall be held in the capital of one of the countries, as decided by the Council.

ARTICLE 5. For each ordinary session and for the period until the next ordinary session, the Council from among its elected delegates shall elect a President and four Vice-Presidents who, together, shall constitute the Presidium of the Council.

ARTICLE 6. The deliberations of the Council shall be open to the public, unless, in view of the special nature of a matter, the Council decides otherwise.

ARTICLE 7. During each ordinary session the elected delegates shall form standing committees to undertake preparatory work in connection with matters before the Council. By decision of the Presidium, the standing committees may meet also during inter-sessionary periods in special cases.

Special committees may be set up during inter-sessionary periods to prepare special matters.

ARTICLE 8. The delegation of each country shall appoint a Secretary and other staff members. The activities and collaboration of the secretariats shall be supervised by the Presidium.

ARTICLE 9. All governments and delegates are entitled to submit a matter to the Council by written application to the Presidium. The Presidium shall cause such investigations to be made as it may deem necessary and shall send out the documentation to the Governments and delegates well ahead of the session.

ARTICLE 10. The Council shall discuss questions of common interest to the countries and may adopt recommendations to the Governments. Recommendations shall be accompanied by information as to how each delegate has voted.

In questions which concern only certain of the countries, only the delegates from those countries may vote.

ARTICLE 11. At each ordinary session, the Governments should inform the Council of any action taken on the recommendation of the Council.

ARTICLE 12. The Council shall adopt its own rules of procedure.

ARTICLE 13. Each country shall defray the expenses involved by its membership in the Council. The Council shall decide how common expenses shall be apportioned.

Vice-Chairmen: M. THERON (France), R. P. FENTON (United Kingdom).

Members: A. MADRONERO (Spain), A. VERNUCCI (Italy), H. JOERGES, R. MIKKELSEN, P. C. TIMMERMAN.

The Board of Management, which is responsible for the supervision of the execution of the EMA, consists of financial experts nominated by member countries and appointed by the OECD Council. It exercises powers delegated to it by the Council, to which it makes periodic reports and members make recommendations on all payments matters in their capacity as financial experts, rather than as government delegates. Its decisions are taken by a majority, including not less than four of its members

EUROPEAN FUND

The European Fund, provided for by EMA, has a capital of \$607 million. It provides aid to members to help them withstand temporary difficulties in their overall balance of payments. Credits are granted after agreement has been reached on the measures required to restore internal and external equilibrium. The country concerned undertakes to carry out these measures and to reinforce them, as necessary, in consultation with OECD.

MULTILATERAL SYSTEM OF SETTLEMENTS

The principal role of the Multilateral System of Settlements is to give each member's central bank the assurance of obtaining settlement in dollars, at an exchange rate known in advance, of any balance in

The European Nuclear Agency aims to foster the development of the production and uses of nuclear energy for peaceful purposes. Its functions include the promotion of joint undertakings and common services; co-ordination of nuclear research (especially through international scientific committees), development of uniform legislation on health and safety, liability and insurance; assessments of nuclear fuel resources and the contribution of nuclear power towards meeting Europe's future energy requirements. ENEA has also established a system for co-ordinating and communicating to member countries national reports of environmental radioactivity measurements, and operates a security control system to prevent the use of joint undertakings for military purposes.

NORTH ATLANTIC TREATY ORGANIZATION

NORTH ATLANTIC TREATY

(April 1949)

The Parties to this Treaty reaffirm their faith in the purposes and principles of the Charter of the United Nations and their desire to live in peace with all peoples and all Governments.

They are determined to safeguard the freedom, common heritage and civilization of their peoples, founded on the principles of democracy, individual liberty and the rule of law.

They seek to promote stability and well-being in the North Atlantic area.

They are resolved to unite their efforts for collective defence and for the preservation of peace and security.

They therefore agree to this North Atlantic Treaty:

ARTICLE 1

The Parties undertake, as set forth in the Charter of the United Nations, to settle any international dispute in which they may be involved by peaceful means in such a manner that international peace and security and justice are not endangered, and to refrain in their international relations from the threat or use of force in any manner inconsistent with the purposes of the United Nations.

ARTICLE 2

The Parties will contribute toward the further development of peaceful and friendly international relations by strengthening their free institutions, by bringing about a better understanding of the principles upon which these institutions are founded, and by promoting conditions of stability and well-being. They will seek to eliminate conflict in their international economic policies and will encourage economic collaboration between any or all of them.

ARTICLE 3

In order more effectively to achieve the objectives of this Treaty, the Parties, separately and jointly, by means of continuous and effective self-help and mutual aid, will maintain and develop their individual and collective capacity to resist armed attack.

ARTICLE 4

The Parties will consult together whenever, in the opinion of any of them, the territorial integrity, political independence or security of any of the Parties is threatened.

ARTICLE 5

The Parties agree that an armed attack against one or more of them in Europe or North America shall be considered an attack against them all; and consequently they agree that, if such an armed attack occurs, each of them, in exercise of the right of individual or collective self-defence recognised by Article 51 of the Charter of the United Nations, will assist the Party or Parties so attacked by taking forthwith, individually and in concert with the other Parties, such action as it deems necessary, including the use of armed force, to restore and maintain the security of the North Atlantic area.

Any such armed attack and all measures taken as a result thereof shall immediately be reported to the Security Council. Such measures shall be terminated when the Security Council has taken the measures necessary to restore and maintain international peace and security.

ARTICLE 6

For the purpose of Article 5 an armed attack on one or more of the Parties is deemed to include an armed attack on the territory of any of the Parties in Europe or North

America, on the Algerian Departments of France (*inapplicable since July 1962*), on the occupation forces of any Party in Europe, on the islands under the jurisdiction of any Party in the North Atlantic area north of the Tropic of Cancer or on the vessels or aircraft in this area of any of the Parties. (*Amended on the accession of Greece and Turkey.*)

ARTICLE 7

This Treaty does not affect, and shall not be interpreted as affecting, in any way the rights and obligations under the Charter of the Parties which are members of the United Nations, or the primary responsibility of the Security Council for the maintenance of international peace and security.

ARTICLE 8

Each Party declares that none of the international engagements now in force between it and any other of the Parties or any third State is in conflict with the provisions of this Treaty, and undertakes not to enter into any international engagement in conflict with this Treaty.

ARTICLE 9

The Parties hereby establish a council, on which each of them shall be represented, to consider matters concerning the implementation of this Treaty. The Council shall be so organized as to be able to meet promptly at any time. The Council shall set up such subsidiary bodies as may be necessary; in particular it shall establish immediately a defence committee which shall recommend measures for the implementation of Articles 3 and 5.

ARTICLE 10

The Parties may, by unanimous agreement, invite any other European State in a position to further the principles of this Treaty and to contribute to the security of the North Atlantic area to accede to this Treaty. Any State so invited may become a party to the Treaty by depositing its instrument of accession with the Government of the United States of America. The Government of the United States of America will inform each of the Parties of the deposit of each such instrument of accession.

ARTICLE 11

This Treaty shall be ratified and its provisions carried out by the Parties in accordance with their respective constitutional processes. The instruments of ratification shall be deposited as soon as possible with the Government of the United States of America, which will notify all the other signatories of each deposit. The Treaty shall enter into force between the States which have ratified it as soon as the ratifications of the majority of the signatories, including the ratifications of Belgium, Canada, France, Luxembourg, the Netherlands, the United Kingdom and the United States, have been deposited and shall come into effect with respect to other States on the date of the deposit of their ratifications.

ARTICLE 12

After the Treaty has been in force for ten years, or at any time thereafter, the Parties shall, if any of them so requests, consult together for the purpose of reviewing the Treaty, having regard for the factors then affecting peace and security in the North Atlantic area, including the development of universal as well as regional arrangements under the Charter of the United Nations for the maintenance of international peace and security.

nationally planned and controlled disposal operations were carried out deep in the Atlantic Ocean in 1967 and 1969

Third Party Liability. The 1960 OECD (Paris) *Convention on Third Party Liability in the Field of Nuclear Energy*, signed by most of ENEA member countries, came into force in April 1968. The Convention is the basis of almost all European legislation in this field. The subsequent Supplementary Convention to the Paris Convention, signed in Brussels in January 1963, extends the maximum limit of compensation but maintains the principles of the Paris Convention. A World Convention on Civil Liability for Nuclear Damage, elaborated under the aegis of IAEA and adopted in May 1963, also depends on the same basic principles of the Paris Convention although it contains a number of minor differences. Additional Protocols to both Paris and Brussels Conventions, signed in January 1964, are designed to resolve these differences.

The Paris Convention and its Additional Protocol have now been ratified by six countries (Belgium, France, Spain, Sweden, Turkey and the United Kingdom) preparations are under way in a number of other countries for ratification in the near future.

Security Control. The ENEA Convention on Security Control, which came into force in 1959, is based on a system of inspection and control of the movement and use of fissile materials to ensure that these are not diverted to

any military purpose. The ENEA Control Bureau, established under the Convention, has adopted detailed rules for research and experimental reactors which apply to the HALDEN and DRAGON Projects, and inspections take place. Rules applicable to facilities using nuclear materials recovered or obtained in an ENEA joint undertaking have also been adopted; these cover materials from all ENEA joint undertakings but have particular importance in connection with the EUROCHEMIC plant because following the re-processing of spent fuel, recovered materials may be despatched to various countries and continued control of these materials must be ensured.

Budget. The ENEA budget forms part of the OECD budget, and for 1969 was some \$900,000 for the Central Secretariat with a further \$660,000 for the Common Services at Saclay and Ispra which are financed under the Secretariat budget. The EUROCHEMIC, HALDEN and DRAGON Projects are financed separately, and represent a total investment of well over \$100 million.

Publications: Annual activity reports of ENEA, EUROCHEMIC, HALDEN and DRAGON. There are also specialized series publications (e.g. *Nuclear Law Bulletin*, *Radioisotope Generator Newsletter*, *Food Irradiation Information Bulletin*), reports on nuclear fuel resources, production and utilization and *Proceedings of Agency-sponsored conferences and symposia*.

FUNCTIONS

1. *Economic and Social Matters* Regional projects have been established relating to economic development and its social aspects, international trade, basic products, transportation and travel, social welfare, co-operatives, social insurance, immigration and colonisation, labour, housing and urban development, and technical co-operation. The Inter-American Economic and Social Council, one of the three organs of OAS Council, has established close working relationships at all levels. In September 1960 all members, except Cuba, signed the Charter of Punta del Este, establishing the Alliance for Progress (For details see separate section)

2. *Juridical Matters.* The Inter-American Council of Jurists, one of the three organs of the OAS Council, is responsible for drawing up inter-American treaties and conventions, promoting the codification of international law, and for establishing uniformity in legislation

3. *Cultural Matters.* The Council of OAS and the Inter-American Cultural Council carry out a broad cultural programme. Activities cover education, philosophy and letters, music, art, science, and libraries. Co-operation is maintained with UNESCO projects.

4. *Agriculture.* An OAS special agency, the Inter-American Institute of Agricultural Sciences (IAIAS), is helping to improve plant strains, crop yields, and breeds of cattle,

and to conserve the natural resources of forest, water, soil and wild life. It also conducts research and initiates training schemes for post-graduates

5. *Public Health.* The OAS Pan American Health Organisation also acts as the Regional Organization of the UN World Health Organisation. It plans joint action against communicable diseases, strengthens the health services, and expands the education and training facilities for health workers

6. *Statistics.* The four main objectives of the Inter-American Statistical Institute (IASI) are to stimulate better methods in the collection, tabulation, analysis and publication of statistics, to provide a medium for professional collaboration among statisticians, to co-operate with national and international organizations in advancing the science and administration of statistics. Plans have been devised for co-ordinating national censuses and for conducting agricultural censuses. Canada is a member of the Institute.

7. *Geography and History.* The Pan American Institute of Geography and History (PAIGH) encourages and co-ordinates these studies. It works through commissions on cartography, geography and history, and committees on oceanography, vulcanology, and other subjects. It also administers the Pan American Training Centre for evaluation of Natural Resources in Rio de Janeiro

another member's currency acquired by it. This exchange guarantees results from the undertaking by each member to keep the fluctuations of its currency within moderate and stable margins and, for this purpose, to declare buying and selling rates designed as limits to the market quotations for its currency;

and each country undertakes, if it should change its rates, to settle any outstanding balance in its currency at the previous lower limit. Thus the necessary framework and guarantees are created for the effective development of the foreign exchange markets in a climate of confidence.

CONVENTION OF OECD

ARTICLE 1

The aims of the Organisation for Economic Co-operation and Development shall be to promote policies designed:

To achieve the highest sustainable economic growth and employment and a rising standard of living in member countries, while maintaining financial stability, and thus to contribute to the development of the world economy.

To contribute to sound economic expansion in member as well as non-member countries in the process of economic development.

To contribute to the expansion of world trade on a multilateral, non-discriminatory basis in accordance with international obligations.

ARTICLE 2

In the pursuit of these aims, the members agree that they will:

Promote the efficient use of their economic resources.

Promote the development of their scientific and technological resources, encourage research and promote vocational training.

Pursue policies to achieve economic growth and financial stability.

Pursue their efforts to reduce or abolish obstacles to the exchange of goods and services and current payments and maintain and extend the liberalisation of capital movements.

Contribute to the economic development of member and non-member countries.

ARTICLE 3

Members agree that they will:

Furnish each other with information.

Consult together, carry out studies and participate in agreed projects.

Co-operate closely and where appropriate take co-ordinated action.

ARTICLE 4

The Contracting Parties to this Convention shall be members of the Organisation.

ARTICLE 5

The Organisation may:

Take decisions binding on all the members.

Make recommendations.

Enter into agreements with members, non-members and international organisations.

ARTICLE 6

Decisions shall be taken and recommendations shall be made by mutual agreement.

Each member shall have one vote. If a member abstains from voting such abstention shall not invalidate the decision, which shall be applicable to the other members but not to the abstaining member.

No decision shall be binding on any member until it has complied with the requirements of its own constitutional procedures. The other members may agree that such a decision shall apply provisionally to them.

ARTICLE 7

A Council composed of all the members shall be the body from which all acts of the Organisation derive.

ARTICLE 8

The Council shall designate each year a Chairman, who shall preside at its ministerial sessions, and two Vice-Chairmen.

ARTICLE 9

The Council may establish an Executive Committee and such subsidiary bodies as may be required.

ARTICLE 10

A Secretary-General responsible to the Council shall be appointed by the Council for a term of five years. He shall be assisted by one or more Deputy Secretaries-General or Assistant Secretaries-General appointed by the Council.

The Secretary-General shall serve as Chairman of the Council meeting at sessions of Permanent Representatives.

ARTICLE 11

The Secretary-General shall appoint such staff as the Organisation may require. Staff regulations shall be subject to approval by the Council.

The Secretary-General and staff shall neither seek nor receive instructions from any of the members or from any government or authority external to the Organisation.

ARTICLE 12

The Organisation may:

Address communications to non-member states or organisations.

Establish relations with non-member states or organisations.

Invite non-member governments or organisations to participate in activities of the Organisation.

INTER-AMERICAN COUNCIL OF JURISTS

Pan American Union, Washington 6, D.C., U.S.A.

Founded 1948 as an organ of the Council of the Organization of American States

MEMBERS

The 24 members of OAS

ORGANIZATION

INTER-AMERICAN COUNCIL OF JURISTS

Consists of one jurist appointed by each member state. The Secretary-General of OAS and the Director of the Department of Legal Affairs of the Pan American Union participate without voting. The Council meets at least once every two years.

Chairman: MIGUEL RAFAEL URQUÍA (El Salvador)

INTER-AMERICAN JURIDICAL COMMITTEE

Rio de Janeiro, Brazil

The Permanent Committee of the Council consisting of nine members selected by the Council. According to the Protocol of Amendment of the OAS Charter, 1967, the Council of Jurists will cease to exist and the Inter-American Juridical Committee will be the principal juridical organ of the OAS and will consist of eleven members elected by the General Assembly.

Chairman: VICENTE RAO (Brazil)

SECRETARIAT

The Department of Legal Affairs of the Pan American Union is the Secretariat of the Council and the Director of that Department is *ex-officio* Executive Secretary.

FUNCTIONS

To serve as an advisory body on juridical matters and to promote the development and codification of public and private international law. It also studies the possibilities of attaining uniformity of legislation within the Member States. It has technical autonomy in the exercise of the functions laid down.

The Council shall seek the co-operation of national committees for the codification of international law or of legal institutes or any other specialized bodies.

The Council shall advise the Council of OAS on juridical matters.

BUDGET

The Budget of the Inter-American Council of Jurists is part of the Pan American Union Budget.

INTER-AMERICAN CULTURAL COUNCIL

Pan American Union, Washington 6, D.C., U.S.A.

Created in 1948 as an organ of the Council of the Organization of American States

MEMBERS

The 24 members of OAS.

ORGANIZATION

THE INTER-AMERICAN CULTURAL COUNCIL

Consists of the Minister of Education of each member state. The Secretary-General of OAS and the Executive Secretary of the Council participate without voting rights. The Council meets once a year, with special meetings when necessary.

EXECUTIVE COMMITTEE OF THE INTER-AMERICAN CULTURAL COUNCIL

A permanent body consisting of a chairman and seven additional members elected by the Inter-American Cultural Council, for the purpose of promoting the Regional Educational Development Program, the Regional Scientific and Technological Program and the Regional Cultural Development Program.

Acting Chairman: JUAN RAFAEL LLERENA AMADEO (Argentina)

INTER-AMERICAN COMMITTEE ON EDUCATION

A permanent body composed of seven members, two of whom are elected by the Executive Committee from among its members and the remaining five by the Inter-American Cultural Council. The primary function of this committee is to formulate and conduct the Regional Educational Development Program and to facilitate its execution and evaluation.

Chairman: ALFONSO OCAMPO LONDOÑO (Colombia)

INTER-AMERICAN COMMITTEE ON SCIENCE AND TECHNOLOGY

A permanent body composed of seven members, elected in the same way as for the Inter-American Committee on Education. The primary function of the committee is to formulate and conduct the Regional Scientific and Technological Development Program and to facilitate its execution and evaluation.

Chairman: BERNARDO A. HOUSSEY (Argentina).

ACTIVITIES

EUROCHEMIC (European Company for Chemical Processing of Irradiated Fuels). EUROCHEMIC is a \$38 million international shareholding company set up in 1957 to treat used uranium fuel from reactors in participating countries. Present shareholders are governments, public authorities and industrial organisations in Austria, Belgium, Denmark, France, the German Federal Republic, Italy, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and Turkey. Work on the company's plant at Mol, Belgium, began in 1960, and the completed plant entered into service in July 1966. In October 1969 the formation of Société de Fluoration de l'Uranium (S.F.U.) was announced, to build and operate at Mol an installation for converting uranyl nitrate from the main reprocessing plant into uranium tetrafluoride, a stage in the production of hexafluoride for feeding to enrichment plants.

HALDEN Project. The Experimental 20 MWt. Boiling Heavy Water Reactor at Halden, Norway, first became an ENEA joint undertaking under an Agreement signed in 1958 between the Norwegian Institutt for Atomenergi (owner of the reactor), Austria, the Danish Atomic Energy Commission, EURATOM, AB Atomenergi of Sweden, Switzerland, and the U.K. Atomic Energy Authority. The original three-year duration of this Project was twice extended by eighteen months. Under a separate Agreement with the Norwegian Institutt, the Finnish Atomic Energy Commission also took part in the Project.

In 1964 a new Agreement was reached between a number of the original participants (the Norwegian Institutt, the Danish and Finnish Commissions, Reactor Centrum Nederland, AB Atomenergi, Switzerland and the U.K. Atomic Energy Authority) for a further three-year joint programme to include tests of prototype fuel elements and certain other specialised research and development work. This new programme was subsequently joined by the U.S. Atomic Energy Commission, the Italian National Nuclear Energy Committee, and a German industrial group. In 1966 it was prolonged for a further three years until the end of 1969, and again in 1969 for the three years 1970-72. By the end of this period total expenditure by the Project since its inception is expected to be some \$14.5 million.

DRAGON Project. The Dragon (U.K.) Experimental High-Temperature Reactor project was set up under a 1959 Agreement signed by the U.K. Atomic Energy Authority, Austria, the Danish A.E.C., EURATOM, the Norwegian Institutt for Atomenergi, AB Atomenergi of Sweden and Switzerland. Supporting research is being done in many European countries. In November 1962, the original five-year period of the Project was extended to eight years, and the original budget of £13.6 million was increased to £25 million. Construction of the Dragon Reactor was completed early in 1964, first criticality was achieved in August, and its full design power of 20 MWt. in April 1966. At the end of 1966 the Project was further extended to March 31st, 1970, and subsequently to March 31st, 1973, these extensions bringing the overall budget to £38 million over the 14 years. Modified objectives were

adopted in 1969 to enable maximum assistance to be given to industry in participating countries for the commercial exploitation of the Dragon system.

Common Services. In June 1964, agreements were concluded with EURATOM and the French Commissariat à l'Energie Atomique for the establishment of an ENEA Computer Programme Library at the EURATOM Joint Research Establishment at Ispra (Italy), and an ENEA Neutron Data Compilation Centre at the Saclay Centre d'Etudes Nucléaires (France). Both these Common Services operate in close co-operation with equivalent services in the U.S.A.

Scientific Committees. The European-American Nuclear Data Committee (EANDC) was set up in 1959 to review and co-ordinate research programmes for data measurements. An analogous committee for reactor physics research, the European-American Committee on Reactor Physics (EACRP) was established in 1962. The work of both Committees includes detailed examinations of experimental work under way and proposed in their respective fields, in order to assess relative priorities and suggest the most appropriate division of such work between laboratories equipped to carry it out. In 1965 an International Committee on Reactor Safety Technology (CREST) was created to survey current work on reactor safety and to promote international co-operation for its improvement.

Special Studies. A study of possible uses in Europe for radioisotopic power generators, and of European industrial potential for their production, was begun in 1965. In June 1966 an Isotopic Generator Information Centre was established at the French Centre d'Etudes Nucléaires at Saclay, and in June 1967 Austria, Denmark, France, the German Federal Republic, Portugal, Spain, Sweden and Switzerland launched a collaborative programme for the development of "radioisotopic batteries".

A second study, begun at the end of 1964, concerns the long-term rôle of nuclear energy in Western Europe. This is an attempt to evaluate the probable nuclear contribution to Europe's overall long-term energy requirements, examining the characteristics of the different power reactor systems which are envisaged and estimating corresponding requirements for fuel production, enrichment, fabrication and reprocessing capacities. A number of specialized reports have been published.

Health and Safety. ENEA's Health and Safety Committee, in close liaison with IAEA, has prepared international protection norms against ionizing radiations. These norms are revised from time to time to take account of advances in scientific knowledge. Recommendations have been finalized by the Committee, also in collaboration with IAEA, to govern the use of luminous paint in the watch-making industry, while health and safety questions in relation to radio-isotopic power generators, particle accelerators, and radioactive materials in goods available waste disposal in the sea are being examined, and inter-

ORGANIZATION

COMMISSION

The Commission is made up of one delegate from each of the member states, and the Secretary-General of OAS (who may speak but not vote). Regular meetings are held every two years.

The Chairman and Vice-Chairman are elected by and from the members and hold office until the next regular meeting.

COMMITTEES

The Commission may set up such working committees as it considers necessary. The committees elect their own Chairman and Rapporteur from among their members.

SECRETARIAT

Executive-Secretary: Dr. JESSE D PERKINSON.

The Secretary-General of OAS appoints all IANEC Secretariat staff, who form a part of the Pan American Union.

ACTIVITIES

IANEC was set up to help the American Republics to develop and co-ordinate research and training in nuclear energy. It also distributes information and recommends public health measures.

Since 1959 the Commission has undertaken a survey of facilities available in Latin American universities and has established an Advisory Committee to make recommendations on scientific and engineering training. In 1963 studies were undertaken on nuclear power in Latin America and on Civil Liability in the field of nuclear energy.

In December 1960 an agreement for co-operation was signed between IANEC and the International Atomic Energy Agency in Vienna and in 1963 a memorandum was exchanged between the secretariats of IANEC and EURATOM establishing co-operation. Several meetings, workshops and symposia have been co-sponsored by IANEC and IAEA.

Programmes are financed through the OAS Budget and through voluntary contributions of the member states.
1968 expenditure \$106,638
1969 expenditure \$102,912.

ORGANIZATION

ASSEMBLY OF HEADS OF STATE

The Assembly of Heads of State and Government meets annually to co-ordinate policies of African States. Resolutions are passed by a two-thirds majority, procedural matters by a simple majority. Last meeting September 1969. Next meeting September 1970.

Chairman (1969): AHMADU AHIDJO (Cameroon).

COUNCIL OF MINISTERS

Consists of Foreign and/or other Ministers and meets twice a year, with provision for extraordinary sessions. Prepares meetings of, and is responsible to, the Assembly of Heads of State. By March 1969 twelve Ordinary Meetings and six Extraordinary Sessions had been held.

Chairman: KETEMA YIFRU (Ethiopia).

ARBITRATION COMMISSION

Commission of Mediation, Conciliation and Arbitration: Addis Ababa; f. 1964; consists of 21 members elected by the Assembly of Heads of State for a five-year term; no state may have more than one member; has a Bureau consisting of a President and two Vice-

Presidents, who shall not be eligible for re-election; to hear and settle disputes between member states by peaceful means; Pres. M. A. ODESANYA (Nigeria).

SPECIALIZED COMMISSIONS

The Assembly of Heads of State and Government at its third ordinary session at Addis Ababa in November 1966 ratified the recommendations for the regrouping of the Six Specialized Commissions into the following three:

Economic and Social Commission (also in charge of Transport and Communications).

Educational, Cultural, Scientific and Health Commission.

Defence Commission.

DECOLONIZATION COMMITTEE

Co-ordinating Committee for Liberation Movements in Africa: Dar es Salaam, Tanzania; f. 1963; to provide financial and military aid to nationalist movements in dependent countries; mems.: Algeria, Congo (Democratic Republic), Ethiopia, Guinea, Nigeria, Senegal, Somalia, Tanzania, United Arab Republic.

ORGANIZATION OF AMERICAN STATES

President of IDB and the Executive Secretary of ECLA. To date, the following experts have been elected to the Panel

GERMÁNICO SALGADO (Ecuador)
ALDO FERRER (Argentina)
JOÃO PAULO DE ALMEIDA MAGALHÃES
BERNAL JIMÉNEZ MONGE (Costa Rica)

The main functions of the Panel are the following: to evaluate or re-evaluate national development plans through *ad hoc* committees, to participate in the continued

evaluation made by CIAP through the country reviews, to carry on specific tasks requested by CIAP or its Chairman, including participation in working groups, special missions to advise the countries or similar studies, as well as studies undertaken on their own initiative

SECRETARIAT

The General Secretariat of OAS provides the personnel required by CIAP, the Panel of Experts and *ad hoc* committees

ACTIVITIES

National Development By September 1968, the governments of Bolivia, Chile, Colombia, Ecuador, Mexico, Panama, Peru, Venezuela, Paraguay and Uruguay, and the five Central American countries, had presented national development plans and the corresponding evaluations were prepared by the Panel of Experts and submitted to the governments. Also, a regional report to the five Central American Republics was prepared by the Panel. In October 1962 a new Venezuelan development plan was evaluated and submitted to the government.

Technical Co-operation OAS operates seven programmes in the field of technical co-operation, including a Special Training Programme in connection with development plans. OAS trains nearly 3,000 persons annually.

Private Enterprise The Secretary General of OAS has established a 23-member Business Advisory Council aimed at reinforcing the role of the business sector in Latin America's development efforts. National business liaison committees are expected to be created in each OAS member state.

Labour Affairs The OAS Secretariat extends technical assistance to Latin American ministries of labour and to the trade union movement. Two committees, one composed of labour ministry experts (Permanent Committee on Labour Matters) and another of trade union leaders (Trade Union Technical Advisory Council) assist in the formulation and implementation of recommendations. It has also promoted, with the Inter-American Development Bank, the establishment of workers' banks in various countries.

Export Promotion An Inter-American Export Promotion Centre was established in 1968 at Bogotá. The Centre will help to place more Latin American products in international markets. A publication in Spanish, *Nuevos Mercados*, gives information on export markets and marketing techniques.

Population Development (1969) The Secretariat continued its activities aimed at creating an awareness in the member countries of the importance of the population variable in their development efforts and to spur them to establish policies and programmes in this field. CIAP examined the social sectors of a number of countries from a demographic standpoint. As part of a new series of meetings two inter-American seminars were held, one on

social security and population, in Mexico City, attended by officials of institutions all over the Western Hemisphere, and the other on the teaching of demography in schools of economics and sociology, in Bogotá, for teaching and research personnel. Assistance with the 1970 population censuses was begun. The Advisory Committee on Population and Development and the Inter-Agency Committee on Population and Development, a co-ordinating mechanism, continued to meet. Of various technical publications prepared and distributed, the most important was *Datos Básicos de Población en América Latina*, a compendium of demographic and related statistics.

Tax Reform Since it began five years ago, the Joint OAS/IDB Tax Programme has sent 14 technical assistance missions to member states to work in the areas of tax policy and tax administration, has sponsored two inter-American conferences on tax matters, and has published numerous studies on tax and fiscal policy. The Joint Tax Programme is currently collaborating with the Technical Co-operation Department in the establishment of an Inter-American Centre for Tax Studies.

Integration At their meeting in April 1967, the Presidents of America agreed to create progressively, beginning in 1970, the Latin American Common Market, and to have it substantially in operation by 1985.

The role of OAS, which was carrying out programmes in support of the two operational integration organisms, LAFTA and CACM, was expanded when it received instructions to assist in carrying out the presidential agreements. With OAS assistance a series of three meetings were held on the financial implications of integration: the first, of governmental representatives, in Rio de Janeiro, and the other two, of governmental experts, in Mexico and Washington, D.C. In the near future OAS will carry out studies which the LAFTA-CACM Co-ordinating Commission has programmed in its efforts to bring about the eventual convergence of these two systems.

In 1968 the Caribbean Free Trade Association (CARIFTA), another movement of integration, began functioning, three member states of the OAS belong to it: Barbados, Jamaica and Trinidad and Tobago. In 1969 the Subregional Andean Group was established comprising five members of LAFTA, which are ready to promote integration at a faster pace.

Broad surveys, including information and liaison work.

Research on problems by small highly specialised staffs operating over wide areas.

Research on problems which affect many countries but which should be investigated initially in one limited area.

higher education, to strengthen basic research and to provide the competent personnel.

8 To increase life expectancy at birth by a minimum of five years by improving individual and public health. To attain this goal to provide potable water and drainage to 70 per cent of the urban and 50 per cent of the rural population, to reduce the mortality rate of children under five by half, to control serious transmissible diseases, to eradicate illnesses for which effective cures are known, to improve nutrition, to train medical and health personnel, to improve basic health services, to intensify scientific research.

9 To increase the construction of low-cost housing and to provide necessary public services.

10 To maintain stable price levels.

11 To strengthen existing agreements with a view to the ultimate fulfilment of a Latin American Common Market.

12 To develop co-operative programmes designed to prevent the harmful effects of excessive fluctuations in foreign exchange earnings and to adopt measures to facilitate exports to international markets.

ECONOMIC AND SOCIAL DEVELOPMENT

Basic Requirements for Economic and Social Development

1 That comprehensive and well-conceived national programmes of economic and social development be carried out.

2 That national programmes of economic and social development be based on the principles of self-help.

3 That women should be placed on an equal footing with men.

4 That Latin American countries should obtain sufficient external financial assistance and that capital from all external sources of at least 20,000,000,000 dollars be made available to the Latin American countries during the coming ten years.

5 That institutions in both the public and private sectors be strengthened and improved, and that the necessary social reforms be effected to permit a fair distribution of the fruits of economic and social progress.

National Development Programmes

1 Participating Latin American countries agree to introduce or strengthen systems for the preparation, execution and periodic revision of national programmes for economic and social development. The countries should formulate long-term development programmes.

Immediate and Short-Term Action Measures

1. Recognises that a number of Latin American countries may require emergency financial assistance, the United States will provide funds.

2 Participating Latin American countries should immediately increase their efforts to accelerate development.

3 The United States will assist in the realization of these short-term measures by the provision of more than 1,000,000,000 dollars in the year ending March 1962.

External Assistance in Support of National Development Programmes

1. The economic and social development of Latin America will require a large amount of financial assistance from capital-exporting countries. The Act of Bogota and the Charter provide the framework within which this assistance can be provided.

2. The United States will assist those countries whose development programmes establish self-help measures, adequate to realise the goals envisaged. The participating countries will request the support of other capital-exporting countries and appropriate institutions.

3 The United States will help in the financing of technical assistance projects.

4 The participating Latin American countries recognise that each has a capacity to assist fellow republics by providing external technical and financial assistance.

Organization and Procedures

1 In order to provide technical assistance for the formulation of development programmes the OAS, ECLA Inter-American Development Bank will strengthen their agreements for co-ordination in this field.

2 The Inter-American Economic and Social Council will appoint a panel of nine experts, attached to the Council but enjoying complete autonomy in the performance of their duties.

3 Each government may present its programme for economic and social development for consideration by an *ad hoc* Committee.

4 The Committee will study the development programme, exchange opinions with the Interested Government and report its conclusions to the Inter-American Development Bank and other governments and institutions prepared to extend assistance.

5 In considering a programme the *ad hoc* Committee will examine the consistency of the programme with the principles of the Act of Bogota and this Charter.

6 The General Secretariat of OAS will provide the personnel needed by the experts.

7 A government whose programme has been recommended by the *ad hoc* Committee may submit the programme to the Inter-American Development Bank to

portance in determining the distribution of public funds under the Alliance. The participating governments will use their good offices that these recommendations be accepted.

8 The Inter-American Economic and Social Council will review annually the progress achieved and will submit to the Council of the OAS such recommendations as it deems pertinent.

ECONOMIC INTEGRATION OF LATIN AMERICA

The American Republics recognise that

1 The Montevideo Treaty and the Central American Treaty on Economic Integration are appropriate instruments for the attainment of these objectives.

2. The integration process can be intensified and accelerated through the use of the agreements for complementary production within economic sections provided for by the Montevideo Treaty.

3. To ensure balanced and complementary economic expansion, integration should take into account the condition of less-developed countries.

4 To facilitate economic integration it is advisable to establish effective relationships between LAFTA and the Central American Economic Integration Treaty countries and other countries.

5 The Latin American countries should co-ordinate their actions to meet unfavourable treatment accorded to their trade in world markets.

6 In application of resources under the Alliance, special attention should be given to investment for multi-national projects and expansion of trade in industrial products.

7 To facilitate the participation of countries at a relatively lower stage of economic development in multi-national programmes special attention should be given to these countries.

ORGANIZATION OF AMERICAN STATES—OAS

Pan American Union, Washington, D.C. 20006, U.S.A.

ORGANIZATION OF CENTRAL AMERICAN STATES —ODECA

(ORGANIZACIÓN DE ESTADOS CENTRO AMERICANOS—ODECA)

Oficina Centroamericana, San Salvador, El Salvador

Founded in 1951 by the Charter of San Salvador, ODECA seeks to re-establish the unity of Central America. A new Charter became effective in 1965.

MEMBERS

Costa Rica

El Salvador

Guatemala

Honduras

Nicaragua

AIMS

- 1 To strengthen the bonds which unite the states of Central America
- 2 To establish mutual consultation in order to guarantee and maintain fraternal relations
- 3 To forestall and prevent misunderstandings and to ensure the peaceful settlement of disputes
- 4 To offer mutual assistance and to seek common solutions to common problems
- 5 To promote economic, social and cultural development through joint action

ORGANIZATION

THE MEETING OF HEADS OF GOVERNMENT

The Heads of Government of the five member states in conference form the supreme organ of the Organization of Central American States.

THE CONFERENCE OF FOREIGN MINISTERS

The Conference of Foreign Ministers is the principal organ of the Organization. Meetings, at which each member state has one vote, normally take place every year; extraordinary meetings may be held at the request of not less than three members. Its function is to initiate proposals, to consider recommendations and proposals made by the Economic Council and to elect the Secretary-General. It may also convene meetings of other Ministers to discuss particular problems which call for collective study and planning.

THE EXECUTIVE COUNCIL

The Executive Council is composed of the Foreign Ministers of the five republics or their appointed representatives. Its function is to direct and co-ordinate the policy of the Organization, and to elect the Secretary-General. It is a permanent body, meeting at least once a week. The President is elected annually.

THE LEGISLATIVE COUNCIL

The Legislative Council is composed of three members of each of the Legislative Assemblies of the member states. Its function is to advise on legislative matters, it is also to study the possibilities of uniform legislation in the Central American Republics. Meetings are held once a year, extra-

ordinary meetings may be convened by the Executive Council at the request of at least two member states.

CENTRAL AMERICAN COURT OF JUSTICE

Composed of the Presidents of the Supreme Courts of each member state. Meetings are held whenever necessary, or when convened by the Executive Council.

THE ECONOMIC COUNCIL

The Economic Council is composed of the Ministers of Economy of the member countries and meets at least once a year. Its functions are the planning, co-ordination and execution of Central American economic integration. All Central American integration organizations will form part of the Council.

CULTURAL AND EDUCATIONAL COUNCIL

Formed by the Ministers of Education of the member states or their representatives.

THE DEFENCE COUNCIL

Composed of the Ministers of Defence of member states. Advises on regional defence and joint security of members.

THE CENTRAL AMERICAN BUREAU

The General Secretariat has its seat in San Salvador. Its functions are to co-ordinate the work of the organs of ODECA, to assist them and to prepare and distribute information. The Secretary-General is elected for a non-renewable period of four years by the Executive Council.

ORGANIZATION OF AMERICAN STATES

8. *Status of Women*. The Inter-American Commission of Women (IACW), has campaigned for thirty years to raise the political status of women.

9. *Child Welfare*. Founded in Montevideo in 1927, the Inter-American Child Institute (IACI) serves as a centre of social action, documentation, study, advice, and information on childhood and the family.

10. *Indian Affairs*. The Inter-American Indian Institute (IAII) serves as the permanent committee of the Inter-American Indian Conferences. Projects of research and field work on the conditions of Indian women have been completed in Mexico and in Central and South America. Legislation is being prepared.

11. *Defence*. The Inter-American Defense Board, Washington, D.C., works towards the co-ordination of common defence measures and the establishment of the broadest possible basis for inter-American military co-operation. The Inter-American Defense College, Washington, D.C., a teaching institution for high-ranking officers

of the Latin American armed forces, was established in 1962.

12. *Nuclear Energy*. The Inter-American Nuclear Energy Commission, set up in 1959, facilitates co-operation among the member States in matters relating to the peaceful applications of nuclear energy. In 1960 an agreement for co-operation was signed with the International Atomic Energy Agency.

13. *Human Rights*. The Inter-American Commission on Human Rights studies problems in this field.

14. *Peace*. The Inter-American Peace Committee was set up in 1940 to keep a constant watch on disputes between members and to find means of resolving them.

15. *Alliance for Progress*. For details see separate chapter.

16. *Special Consultative Committee on Security*. Established in March 1962 to help members guard against communism.

- (c) Reduction of telephone rates
- (d) Establishment of P T T offices in border areas.
- (e) Feasibility of providing services such as direct dialling between the countries of the region and telecommunication, etc

11. It is agreed that the postal and telegraph rates among Iran, Pakistan and Turkey be reduced to the levels of internal rates within the respective countries. The implementation of this decision is entrusted to the P T T authorities of the three countries

12. The construction of roads from the western and central parts of Iran to Zahidan and from Karachi to

Trade

13. Economic collaboration should provide for effective measures to build up and promote trade since expansion of inter-regional trade, apart from being highly desirable, in itself tends further to promote regional economic growth and amity

14. A Committee on trade is established to study, report and recommend *inter alia* on the following measures on which agreement in principle has been reached

- (a) Free or freer movement of goods among the countries of the region through practicable means such as the conclusion of trade agreements, etc
- (b) transit trade arrangements,
- (c) establishment of closer collaboration between existing chambers of commerce and establishment of a joint chamber of commerce,
- (d) establishment of halls and showrooms, provision of special customs facilities for exhibitions and increased participation in each other's fairs,
- (e) dissemination of information on a large scale of the export and import potential of the three countries and investigation of the possibilities of joint publicity and joint marketing policy outside the region for similar exportable products

Petroleum

15. A Committee on petroleum is established to consider measures for co-operation among the three countries in the field of petroleum and natural gas and for their exploration drilling, exploration, refining, transportation, distribution, etc. Collaboration in this field could be developed to mutual advantage

Petrochemicals

16. A Committee on petrochemical industries is established for development of these industries in the region

Tourism

17. A Tourist Agreement will be signed at an early date among the countries of the region with a view to promoting tourist traffic among themselves and to increase the flow of tourists from other countries. A Committee on tourism should be established immediately to prepare an agreement on tourism which should *inter alia* cover co-operation in publicity, group or package tourist arrangements. Promotion of inter-regional travel, substitutes of passports by documents valid for travelling in the three countries. Efforts with the aim of exchanging and training of tourist personnel, technicians, tourist investments, tourist propaganda and utilization of the services and facilities of their tourist organizations, travel bureaux and other agencies in their countries and abroad. As economic collaboration grows, inter-regional travel should increase considerably;

it does however need a special effort if it is to be developed to a substantial degree in the immediate future

Abolition of Visas

18. The abolition of visas for travel purposes by their nationals in the three countries is accepted in principle, the procedure for the implementation of this decision should be worked out by the Committee on tourism

Banking and Insurance

19. A Committee on Banking and Insurance is established for collaboration in these fields

Technical Co-operation

20. The countries of the region should provide technical assistance to each other in the form of exports and training facilities. Such a programme will, apart from intrinsic utility, promote regional understanding and harmony. The Planning Council will be directly responsible for progress in this matter

Joint Purpose Enterprises

21. The Committee carries out feasibility studies in regard to the development of some industries on a joint purpose basis

Cultural Co-operation

22. Iran, Pakistan and Turkey are bound to one another by historical and cultural ties, they share a common heritage. Their cultural ties go far back in history and their national cultures owe much to continuous exchanges which have gone on for centuries. In the modern world they must integrate their traditional cultures with the new scientific outlook

23. Co-operation in the field of education, science and culture is necessary to develop consciousness of the common cultural heritage and to promote social and economic development and political collaboration

24. During the last few years a certain measure of progress has been achieved in cultural relations through bilateral programmes. However, there is considerable scope for further action. At the same time there is strong need for a joint sponsorship of many cultural activities under a regional programme

Cultural Relations

25. The programme of cultural relations should be particularly oriented towards the following aims: (a) creating mass consciousness of the common cultural heritage

carefully reviewed to eliminate misleading interpretations of history and to promote greater understanding of their common interests, (b) disseminating information about history, civilization and culture of the people of the region. To this end each country should consider: (i) establishment of chairs for the study of its language, history, civilization and culture in universities of the other countries; (2) increasing substantially the number of scholarships for the students of other countries to enable

for the propagation of information and ideas aimed at a closer understanding of the people of the region

26. Cultural co-operation may also be extended through: (a) exchanges in the field of fine arts; (b) exchanges of visits

ORGANIZATION OF AMERICAN STATES

PAN AMERICAN HIGHWAY CONGRESSES

Pan American Union, Washington 6, D.C., U.S.A.

Inaugurated 1925 to promote the construction of a highway to link the U.S.A. with South and Central America.

MEMBERS

The 22 members of the Organization of American States.

ORGANIZATION

PAN AMERICAN HIGHWAY CONGRESS

Held every three years to promote road building and inform member governments, the Organization of American States and the Inter-American Economic and Social Council on matters relating to Highway planning and construction and maintenance. Made up of representatives of member states (who may speak and vote), the Permanent Executive Committee, Chairmen of the Technical Committees and the Secretary-General of OAS (who have no vote), and observers and special observers (who may neither speak nor vote).

The Chairman is elected by the delegates.

Next meeting: 1970.

PERMANENT EXECUTIVE COMMITTEE

Attached to the Inter-American Economic and Social Council. Composed of specialists representing nine of the member countries, seven elected by Congress. Functions are to implement the resolutions of Congress. It meets at least once a year.

TECHNICAL COMMITTEES OF EXPERTS

Set up by Congress, as necessary. There are five permanent Committees: Development of Government Highway Agencies, Planning, Finance, Terminology, and Traffic and Safety, and seven subcommittees as follows:

Darien Subcommittee: Created in 1954 to promote interest in the construction of a road to connect the existing highway systems of North and South America through the Darien region of Panama and adjacent area of Columbia. This Committee administers the work of the survey teams now working on the project.

Subcommittee on the Pan American Transversal Highway in South America: Created in 1963 to promote the construction of a highway to connect Paranaguá, Brazil, with Asunción, La Paz and Lima.

Subcommittee on the Bolivarian Forest Edge Highway

(*Carretera Bolivariana Marginal de la Selva*): Created in 1965 to encourage the construction of a continuous highway along the lower eastern edge of the Andes in Venezuela, Colombia, Ecuador, Peru, Bolivia and Paraguay. This will extend and interconnect penetration roads leading from the Andean highlands to points in Brazil and Argentina.

Co-ordinating and Study Group on the Caribbean Circuit:

Established to determine the possibility of constructing a highway which, by crossing the Aratro River, would connect a point on the Panama-Colombian border with points along the coast to Venezuela as part of the Caribbean Circuit.

Lima-Brasília Highway, via Pucallpa, Peru:

Brazil-Peru Subcommittee established for a highway to link Lima with the Brazilian capital, now including a spur to La Paz and Bolivia.

Pan-Amazonic Subcommittee:

Subcommittee created 1965 for the construction of a highway to establish a connection between the Pacific Ocean and the Amazon basin, so as to take advantage of river transportation throughout the length of the Amazon River and its principal tributaries. First meeting of Subcommittee held in Bogotá in March 1967.

International Bridge over the Uruguay River:

This bridge will link Puerto Unzué, Argentina, to Fray Bentos, Uruguay, and is considered to be a high priority project in the highway system of both countries.

PERMANENT SECRETARIAT

The services are provided by the Pan American Union, Washington D.C.

THE HIGHWAY

The total mileage of the Pan American Highway System, including alternative routes, is 44,018 miles of which 25,833 are paved.

Mexico. The Highway has four sections converging on Mexico City. The eastern road enters at Laredo, Texas, with branches to Brownsville and McAllen, Texas; the Central Highway runs from El Paso, Texas; the Pacific Highway is along the west coast from Nogales, Arizona; and the Constitution Highway begins at Piedras Negras.

Guatemala The Highway through Guatemala is not

completed up to standard width throughout. An additional road from the Talisman Bridge to the border with El Salvador has been added.

El Salvador. Paved throughout. An alternative route from La Hachadura on the Guatemalan border to Fray Bentos, Uruguay, and is considered to be a high priority project in the highway system of both countries.

Honduras. Paved. A 57-mile branch road leads to Tegucigalpa, the capital.

ST. LAWRENCE SEAWAY

Opened 1959 to allow ocean-going ships to enter the Great Lakes of North America

THE SEAWAY

MILEAGE AND LOCKS

The Seaway was built by the joint efforts of the St. Lawrence Seaway Authority and the Saint Lawrence Seaway Development Corporation. Work started in 1954 and the Montreal-Lake Ontario section of the waterway, consisting of seven locks, was opened to navigation in 1959. In 1963 a \$180 million modernization project for the Welland Canal was approved by the Canadian Government, this included the replacement of the single-lock system by twin locks. However traffic congestion occurred early in 1964 and the twinning project was deferred pending study of more extensive rebuilding of the Welland, while a major programme to improve existing facilities was initiated. The construction of a wider channel on an improved alignment near the city of Welland was begun in June 1967 and is expected to be completed in 1972. This new alignment 8.6 miles in length and 350 ft in width, is expected to cost \$110 million. The possibility of constructing additional locks in the Welland is at present being studied.

The Seaway extends 360 miles from Montreal Harbour to Lake Erie and includes the Welland Canal, built 1913-32 between Lakes Ontario and Erie. There are 15 locks on the Seaway, 7 between Montreal and Lake Ontario, total lift about 225 ft, 8 on the Welland Canal, total lift 326 ft.

Shipping Channel Minimum depth 27 ft., width 200-600 ft

Welland Canal. Minimum depth 27 ft., length 27 miles

Locks built and maintained by Canada:

St. Lambert 13-20 ft lift, Montreal Harbour to Laprairie Basin.

Côte Ste. Catherine 33-35 ft lift, Laprairie Basin to Lake St. Louis by-passing Lachine rapids

Lower Beauharnois 38-42 ft. lift, by passing Beauharnois Power Station

Upper Beauharnois 36-40 ft lift to Lake St. Francis

Iroquois 0.5-6.0 ft lift, by-passing Iroquois Control Dam

Welland 1 46 ft lift, St. Catharines

Welland 2 46.5 ft lift, St. Catharines

Welland 3 46.5 ft lift; St. Catharines

Welland 4, 5, 6 Flight locks, 139.5 ft lift, Thorold.

Welland 7 46.5 ft lift; Thorold

Welland 8 2-11 ft lift; Port Colborne

Locks built and maintained by the U.S.A.:

Snell 45 ft. lift to Wiley-Dondero Canal

Eisenhower 38 ft lift to Lake St. Lawrence.

HYDRO ELECTRIC POWER

The St. Lawrence Power project was undertaken jointly by the Hydro-Electric Power Commission of Ontario and the Power Authority of the State of New York, to develop 2.2 million horse power of electricity in the International Rapids section of the St. Lawrence

COST OF SEAWAY

The total cost of the Seaway was \$458 million, of which Canada contributed \$330 million and the U.S.A. \$128 million. The power scheme cost \$600 million, equally divided between the two countries.

Revenue to defray the cost of construction and maintenance comes from tolls. Tolls for the Welland Canal were suspended in July 1962, but in 1967 a new lockage fee was instituted for the Canal.

ORGANIZATION

INTER-AMERICAN ECONOMIC AND SOCIAL COUNCIL (IA-ECOSOC)

Meets annually at Ministerial and Expert Levels to review progress on the basis of reports and proposals submitted by CIAP and member governments; makes recommendations on general policy and measures to promote economic and social development; recommends to the Council of OAS for final approval the budget of the Pan American Union in economical, social and statistical fields; approves the Special Development Assistance Fund.

INTER-AMERICAN COMMITTEE ON THE ALLIANCE FOR PROGRESS (CIAP)

Created in November 1963, at the Second Annual Meeting of IA-ECOSOC in São Paulo, Brazil. Consists of a Chairman elected for a three-year term, and ten members elected for a two-year term. The representatives of the countries are appointed by the Inter-American Economic and Social Council for a two-year period, on the basis of the same distribution agreed upon for electing the Executive Directors of the Inter-American Development Bank (IDB) at the election immediately prior to each period. Such distribution does not apply to the five countries of Central America which, as a group, propose one representative.

CIAP is the permanent Executive Committee of IA-ECOSOC and the multilateral representative body of the Alliance for Progress. It co-ordinates Alliance action as established by the Charter of Punta del Este and carries out the mandates it receives from IA-ECOSOC.

Its principal objectives and functions are to evaluate the internal development efforts of each member country in order to estimate the needs and availabilities of external financing; to act on behalf of recipient countries in obtaining financing, and to promote the co-ordination of development assistance among lending agencies.

CIAP's activities are carried out through its own plenary meetings, usually held four times a year, and the meetings of 21 subcommittees in charge of the annual country reviews. A delegation from the respective country participates in the review process, together with representatives of the international financial community, of several United Nations organs, and of non-member countries that might assist in financing development programmes. At the end of each review, a set of specific conclusions and recommendations pertaining to the entire breadth of the development effort is worked out, including quantitative targets for internal and external resource mobilization.

FINANCE

It was estimated that financial assistance from external sources totalling at least \$20,000,000,000 would be required during the first ten years.

During the first seven years of operation of the Alliance, a total of almost \$115 billion had been committed for Latin

American development. Of this sum, the U.S.A. had provided about \$7.7 billion, and the Latin American countries themselves about \$100 billion.

Other external sources, including private investment, accounted for the balance.

CHARTER OF PUNTA DEL ESTE

Signed at Punta del Este, Uruguay, on August 17th, 1961, to co-ordinate Inter-American development and set up the Alliance for Progress.

SUMMARY

OBJECTIVES

1. To achieve a substantial and sustained growth of per capita incomes at a rate designed to attain levels of income capable of assuring self-sustaining development. In order to reach these objectives within a reasonable time, the rate of economic growth in any country of Latin America should not be less than 2.5 per cent per capita per year.

2. To make the benefits of economic progress available to all through a more equitable distribution of national income.

3. To achieve balanced diversification in national economic structures, while attaining stability in the prices of exports or in income derived from exports.

4. To accelerate the process of rational industrialisation so as to increase the productivity of the economy as a whole. Special attention should be given to the establishment and development of capital-goods industries.

5. To raise greatly the level of agricultural productivity and output and to improve storage, transport and marketing services.

6. To encourage programmes of comprehensive agrarian reform.

7. To eliminate adult illiteracy and by 1970 to assure access to six years primary education for each school-age child; to modernise and expand vocational, secondary and

THE SOUTH-EAST ASIA COLLECTIVE DEFENCE TREATY

MANILA PACT—Signed 8 September, 1954

The Parties to this Treaty,

Recognizing the sovereign equality of all the Parties,

Reiterating their faith in the purposes and principles set forth in the Charter of the United Nations and their desire to live in peace with all peoples and all governments,

Recognizing that, in accordance with the Charter of the United Nations, the Parties have the right to self-determination and to the free development of their political, economic, social and cultural life,

its responsibilities,

Desiring to strengthen the fabric of peace and freedom and to uphold the principles of democracy, individual liberty and the rule of law, and to promote the economic well-being and development of all peoples in the Treaty Area,

Intending to declare publicly and formally their sense of unity, so that any potential aggressor will appreciate that the Parties stand together in the peace and security of the Treaty Area,

Article 1

The Parties undertake, as set forth in the Charter of the United Nations, to settle any international dispute in which they may be involved by peaceful means in such a manner that international peace and security and justice are not endangered, and to refrain in their international relations from the threat or use of force in any manner inconsistent with the purposes of the United Nations

Article 2

In order more effectively to achieve the objectives of this Treaty, the Parties, separately and jointly, by means of continuous and effective self-help and mutual aid will maintain and develop their individual and collective capacity to resist armed attack and to prevent and counter subversive activities directed from without against their territorial integrity and political stability

Article 3

The Parties undertake to strengthen their free institutions and to co-operate with one another in the further development of economic measures, including technical assistance, designed both to promote economic progress and social well-being and to further the individual and collective efforts of governments towards these ends

Article 4

1 Each Party recognizes that aggression by means of armed attack in the Treaty Area against any of the Parties or against any State or territory which the Parties by unanimous agreement may hereafter designate would endanger its own peace and safety, and agrees that it will in that event act to meet the common danger in accordance with its constitutional processes. Measures taken under this paragraph shall be immediately reported to the Security Council of the United Nations

2 If, in the opinion of any of the Parties, the inviolability or the integrity of the territory or the sovereignty or political independence of any Party in the Treaty Area or of any other State or territory to which the provisions of paragraph 1 of this Article from time to time apply is

threatened in any way other than by armed attack or is affected or threatened by any fact or situation which might endanger the peace of the area, the Parties shall consult immediately in order to agree on the measures which should be taken for the common defence

3 It is understood that no action on the territory of any State designated by unanimous agreement under paragraph 1 of this Article or on any territory so designated shall be taken except at the invitation or with the consent of the government concerned

Article 5

The Parties hereby establish a Council, on which each of them shall be represented, to consider matters concerning the implementation of this Treaty. The Council shall provide for consultation with regard to military and any other planning as the situation obtaining in the Treaty Area may from time to time require. The Council shall be so organized as to be able to meet at any time

Article 6

Each Party declares that none of the international engagements now in force between it and any other of the Parties or any third party is in conflict with the provisions of this Treaty, and undertakes not to enter into any international engagement in conflict with this Treaty

Article 7

Any other State in a position to further the objectives of the Treaty and to contribute to the security of the area may, by unanimous agreement of the Parties, be invited to accede to this Treaty. Any State so invited may become a Party to the Treaty by depositing its instrument of accession with the Government of the Republic of the Philippines. The Government of the Republic of the Philippines shall inform each of the Parties of the deposit of each such instrument of accession

Article 8

As used in this Treaty, the "Treaty Area" is the general area of South-East Asia and includes the territories of the following States:

Article 9

1 This Treaty shall be deposited in the archives of the Government of the Republic of the Philippines. Duly certified copies thereof shall be transmitted by that Government to the other signatories

2 The Treaty shall be ratified and its provisions carried out by the Parties in accordance with their respective constitutional processes. The instruments of ratification shall be deposited with the Government of the Republic of the Philippines

ORGANIZATION OF AMERICAN STATES

8. Economic integration implies a need for additional investment and funds provided under the Alliance should cover these needs.

9. Latin American countries having their own institutions for financing economic integration should channel financing through them. The co-operation of the Inter-American Development Bank should be sought for inter-regional contributions.

10. To approach the International Monetary Fund and other sources for solving temporary balance-of-payments problems.

11. The promotion and co-ordination of transportation and communications systems, and encourage multinational enterprises.

12. To achieve co-ordination of national plans.

13. To promote the development of national Latin American enterprise.

14. The active participation of the private sector.

15. Countries still under Colonial rule should be invited to participate on achieving independence.

BASIC EXPORT COMMODITIES

National Measures

National measures affecting primary products should be directed and applied to: Avoid undue obstacles to expansion of trade; avoid market instability; improve efficiency of international plans and mechanisms for stabilization; increase markets.

Therefore: Importing members should reduce restrictions and discriminatory practises affecting consumption and importation of primary products. Support stabilization programmes for primary products.

Industrialized countries should give special attention to hastening economic development in less-developed countries.

Producing countries should formulate plans for production and export and try to avoid increasing uneconomic production of goods.

Adopt measures to direct technological studies towards finding new uses and by-products of primary commodities.

Try to reduce export subsidies and other measures which cause instability.

International Co-operation Measures

1. Members should make co-ordinated efforts designed to:

Eliminate undue protection of primary products.
Eliminate taxes and reduce excessive domestic prices.
Seek to end preferential agreements.
Adopt consultation mechanisms.

2. Industrialized countries should give maximum co-operation to less-developed countries.

3. Members should suggest to international organizations when considering loans, that they should take account the effect on the production of surplus products.

4. Support the national commodity study groups and the Commission on International Commodity Trade.

5. The Secretary-General of OAS shall convene a group of experts appointed by their respective governments to meet and report not later than March 31st, 1962, on measures to provide means of offsetting the effects of fluctuations in volume and prices of exports of basic products.

6. Support efforts to improve and strengthen international commodity agreements.

7. Should request other countries to co-operate in stabilization programmes.

8. Recognise that the disposal of accumulated reserves can achieve the goals.

RESOLUTIONS

The member countries also passed resolutions recommending means whereby the goals set forth in the Charter might be achieved. These resolutions covered two Ten-Year Programmes for Education and Health, Tax Reform, Planning and the setting up of bodies to deal with specific problems.

AMENDMENTS

Amendments to the OAS Charter, approved in March 1967 and at present pending ratification, provide for the following:

The supreme organ of the OAS will be the General Assembly, which will meet annually.

The Permanent Council will supervise the day-to-day business of the Organization.

IA-ECOSOC will deal with economic and social matters, while the IA-CESC will concentrate on educational, scientific and cultural affairs.

The Inter-American Juridical Committee will devote itself to legal matters, and the Inter-American Commission on Human Rights will concern itself with eventual violations of such rights.

The Secretary-General and Assistant Secretary-General of OAS will be elected by the Assembly for a five-year term, with the possibility of one re-election.

Meets at least once a year to determine general policy, the supreme organ of the Union. Acting Pres ALBERT BERNARD BONGO (Gabon)

EXECUTIVE COMMITTEE

Permanent deliberative body of the Union, comprises the Finance Ministers and Ministers concerned with economic development from each of the participating countries

GENERAL SECRETARIAT

In charge of the executive functions of the Union, composed of a Customs, Statistics and Fiscal division and a division of Development and Industrialization, asso-

ciated with the Inter-State Accounts Agency, from January 1966 the Secretariat of the Conference des Chefs d'Etat de l'Afrique Equatoriale was merged with that of UDEAC. Sec-Gen CHARLES OVANA AWANA (Cameroon).

AGENCE TRANSEQUATORIALE DES COMMUNICATIONS—ATEC

President, Administrative Committee: NTOUTOUME OBANG,
Minister of Public Works, Gabon

FUNCTIONS

The ATEC administers and develops common means of transport between the countries, including the ports of Pointe-Noire, Brazzaville and Bangui, the Chemin de Fer Congo Ocean, navigable waterways and certain trunk roads

FUNCTIONS

The main provisions of the Union, embodied in the Treaty of Brazzaville, aim to rationalize and harmonize the tariff and tax systems of the five member states, and include

Customs Union The group of five states constitutes a free trade area, in which the circulation of persons, merchandise, services and capital is free. A common external tariff, additional to previous duties and fiscal charges, is levied on all imports entering the region, except on goods from members of the European Economic Community and of the former Union Africaine et Malgache. A common investment code has been established

Solidarity Fund: Compensates the land-locked countries—Chad and the Central African Republic—for the loss of customs revenue on imports cleared in coastal member states but then re-exported to the inland countries 1,900 million C.F.A. have been donated to this fund.

Repartition of Industrial Projects: Harmonization of Development Plans and Transport Policies: The Union stimulates the rational development and diversification of the economies of member states, in order to multiply

inter-state exchanges and to improve the standard of living of the population. The Executive Council decides on measures to harmonize development plans and transport policies. An oil refinery at Port Gentil, Gabon, is being constructed as a joint enterprise

Uniform Tax System: The many internal revenue raising taxes on industrial production have now been replaced by a single tax regime, fixed by the Executive Committee. The Council of Heads of State adopted an act regulating this matter in 1965

Free Circulation of Persons and the Right of Establishment: Regulated by the convention signed in 1961 by UAM (see Chapter OCAM).

Secretary-General: M. TAMBOURA (Upper Volta).

FUNCTIONS

The Convention signed in March 1966 includes the following provisions

Common external tariff on imports entering the region, with the exception of goods from countries of the Franc Zone and the European Economic Community, which are accorded preferential treatment

An internal fiscal charge on goods originating in the

UDEAO at the rate of 50 per cent of the duty levied on similar imported goods, a member state can be authorized to raise the rate of this fiscal charge to 70 per cent to protect its own industry if the latter is threatened by competition

Free circulation of goods, individual member states may, however, be authorized to institute temporary quota restrictions on imports from other members, in order to redress balance of payments deficits

REGIONAL CO-OPERATION FOR DEVELOPMENT

Shipping Services started operating on intra-regional routes and from US ports to Turkey and Pakistan in 1966. Operator trunk dialling system has been introduced between Teheran, Ankara and Karachi. Postage, telephone and telegraphic rates have been reduced within the region.

Technical Assistance: A Regional Technical Assistance Programme was launched in 1965. Between 1965 and 1968, 1,353 students and trainees and 105 experts were exchanged under the programme and 25 seminars had been organized on subjects such as financing of development programmes, management research, status of women, family planning, control and eradication of quarantineable diseases, water resource development, Islamic architecture, etc. Two joint courses on public administration were held in 1967 and 1968, and a third course was held in December 1969.

Tourism: Visas were abolished for nationals of member countries in 1964.

Cultural Co-operation: The Regional Cultural Institute is engaged in systematic research into the common historical and cultural heritage of the RCD countries. It has published a number of translations, in various languages of the region, of classics and well-known works of the member countries.

The RCD Annual Cultural Exchange Programme includes exchange of professors, writers and artists and the holding of art and cultural exhibitions.

Information: Collaboration is encouraged between national news agencies. A joint documentary film on general aspects of RCD emphasizing cultural and social developments in the region is being planned. RCD countries are to participate jointly in Expo 1970 at Osaka.

AIMS OF REGIONAL CO-OPERATION FOR DEVELOPMENT

Enunciated in Istanbul, July 23rd, 1964, by the Foreign Ministers of the Member States

1. The emergence of regional economic groupings enjoying a community of interest is an outstanding feature of our time for accelerating the pace of economic growth. Efforts directed towards regional economic collaboration have gained international acceptance and the present move to promote collaboration amongst countries of the region is directed towards the same aim, viz., the strengthening of their development efforts through active and sustained collaboration on a regional basis. This is particularly true in the case of Iran, Pakistan and Turkey since the desire and basis for such a close collaboration and co-operation exist amongst them and will continue in view of the cultural and historic ties of friendship amongst the peoples of the three countries, and further because increasing regional economic co-operation has become a necessity. Economic and cultural collaboration amongst them is therefore most desirable, and should be raised to the highest possible level. There are great possibilities for such collaboration to the mutual benefit of the three countries which should be achieved expeditiously.

Measures

2. The measures for economic collaboration suggested in the following paragraphs may be broadly divided into two categories—(a) Those which can be worked out and implemented forthwith and (b) Those which will require detailed study and scrutiny by Regional Planning Council.

3. A Regional Planning Council composed of the Heads of the Planning Organizations is established. It will be assisted by advisers and could meet in any of the regional countries, preferably by rotation.

4. The Council will study the development plans and production potential of countries of the region with a view *inter alia* to making recommendations on joint purpose projects and long-term purchase agreements. Joint purpose projects will feed the requirements of the three countries. There are several projects for which none of these countries can provide a sufficient domestic market yet they can be valuable projects if the total requirements of the three countries are taken into consideration.

5. The Council may also make proposals regarding the harmonization of the national development plans in the wide interest of accelerated regional development.

6. The Council will submit its reports to the Ministerial meetings. The first report is to be submitted to the next such meeting.

7. Efficient and effective means of communication and transport are essential for the promotion of the regional economic and cultural collaboration. The preparation of recommendations in this field and their implementation should be given the highest priority.

Air Transportation

8. A Committee on air transportation is set up to study measures required to—(a) improve the transport services in the region so that quick and frequent movement of passengers and freight within the region be possible; (b) establish a strong and competitive international airline among the three countries; (c) foster co-operation among the civil and commercial aviation authorities of the three countries.

The report of the Committee should be available for the next Ministerial meeting.

Shipping

9. Collaboration among the countries of the region in shipping is highly desirable. A Committee on shipping is set up to investigate the possibility of securing a close co-operation in this field including the establishment of a joint maritime line.

Roads and Railways

10. Committees on road, railways and telecommunications are established immediately. The Committee will *inter alia* study and report on the following:

- (a) The measures which should be taken to complete expeditiously the rail and road links among the countries of the region.
- (b) Whether any additional rail and road links are considered necessary.

REGIONAL CO-OPERATION FOR DEVELOPMENT

by teachers, scientists, educational administrators, writers, artists, journalists, etc.; (c) exchanges of information on educational techniques, experiences, and programmes; (d) collaboration in regard to programmes for radio, films and television; (e) elimination of obstacles in the way of free exchange of books, films and other printed materials of an educational and cultural character; (f) organization of regional tournaments; (g) co-operation in the field of joint production of films.

Organization

27. The organizational arrangements for planning and promoting economic and cultural collaboration amongst Iran, Pakistan and Turkey should be simple and effective. As the scope of co-operation widens these arrangements could be modified as required.

28. The highest decision-making body for regional co-operation shall be a Council of Ministers consisting of the Ministers nominated by each of the three countries concerned. It shall consider and decide upon measures for regional economic and cultural co-operation. It will also follow the programmes in the implementation of its decisions. The Council shall meet once in four months and more frequently if necessary. The Chairman of the Council

shall be the Head of State or Head of Government of the host country.

29. The Council will be assisted by a Regional Planning Council composed of the Heads of the three Planning Organizations. They will deal with work relating to regional collaboration including detailed preparatory negotiations and preparation of recommendations for submission to the Council. The Committee will be assisted by Sub-committees which will report to it. If necessary the Committee may engage expert consultants to examine particular subjects for regional co-operation.

30. The host country will for the time being provide secretarial facilities (including office accommodation, etc.). The officials of the countries deputed by their Governments to serve on the Secretariat will draw their emoluments and allowances from their own Governments.

31. After 12 months the Council of Ministers will review the position and decide upon the setting up of a permanent Secretariat.

NOTE: The Secretariat of the organization was established in Teheran for a three-year period in 1964. This period has been extended until 1971.

ECONOMIC CO-OPERATION

COUNTRIES

Australia: continues its £2½ million special SEATO aid programme to Asian members.

France: provides economic, technical, educational and cultural aid.

New Zealand: provides technical and economic assistance through bilateral agreements and participation in SEATO programmes.

United Kingdom: assistance continues in the form of capital aid and technical assistance under bilateral arrangements, concentrating on the provision of training facilities, technical experts and equipment.

U.S.A.: assistance takes the form of loans, grants, technical assistance, foodstuffs and other agricultural produce.

ACTIVITIES

Cultural and Economic Affairs Office: administers the SEATO Cultural Relations Programme, which provides undergraduate and postgraduate scholarships, research fellowships and exchange professorships and assistance to national cultural projects. SEATO has commissioned experts to examine the equivalence of university degrees, and to survey language studies. As a result a three-nation convention on equivalences was signed. Collects and analyses information and prepares background studies and reports on current economic problems and developments in the Treaty Area. This office also provides a means of liaison between SEATO Headquarters and the non-military SEATO projects. Publishes a quarterly bulletin on recent economic trends in the area.

Medical Research: The Medical Research Laboratory (f. 1959) and the Clinical Research Centre (f. 1963) in Bangkok are centres for research on tropical diseases, including malaria and intestinal infections. A Cholera Research Laboratory was established at Dacca, East Pakistan, in 1960.

Vehicle Rebuild Workshop: A \$2 million Australian-Thai vehicle re-build workshop came into operation in 1965 at Rangsit, near Bangkok.

Telecommunications Project: introduces an improved telecommunications system for gathering and transmitting meteorological and aeronautical information between the Asian member countries. United States equipment has been installed in Thailand and the Philippines and technicians from both countries have been trained in the U.S.A.

Hill Tribes Research: A research and training centre now operates at Chiangmai, northern Thailand. Australia, the United Kingdom and the United States have contributed the services of anthropologists to the centre, and have given it various forms of material support.

Community Development: A Rural Development Centre has been established at Ubol, in north-east Thailand.

Skilled Labour Programme: Twenty vocational schools providing three-year courses of study have been established in major provincial towns of Thailand (1967 enrolment over 7,000). A Teacher Development Centre was set up in Bangkok in 1959 and a Military Technical Training School, also in Bangkok, in 1960. In Pakistan, Technical Training Centres have been set up at Karachi and Dacca. A Textile Workers Training Centre, Apprentice Training Programme and a Labour Market Information and Statistics Service Project have been established in the Philippines.

Agricultural Research Project: located at Dacca and designed to identify, strengthen and encourage the effective use of agricultural research in the Asian member countries. A co-ordinator has been appointed and he will be assisted by a short term consultant.

Countering Communist Subversion: An expert staff carries out counter-subversion work and co-ordinates national efforts in this field.

COLLEGE

Asian Institute of Technology: Henri Dunant St., P.O.B. 2754, Bangkok, Thailand; established 1967 as an independent institution, formerly the SEATO Graduate School of Engineering, founded in 1959; advanced courses in hydraulics, structural and highway engineering, public health and soil engineering; Students (1969-70): 190.

SOUTH-EAST ASIA TREATY ORGANIZATION

3. The Treaty shall enter into force between the States which have ratified it as soon as the instruments of ratification of a majority of the signatories shall have been deposited, and shall come into effect with respect to each other State on the date of deposit of its instrument of ratification.

Article 10

This Treaty shall remain in force indefinitely, but any Party may cease to be a Party one year after its notice of denunciation has been given to the Government of the Republic of the Philippines, which shall inform the Governments of the other Parties of the deposit of each notice of denunciation.

Article 11

The English text of this Treaty is binding on the Parties, but when the Parties have agreed to the French text thereof and have so notified the Government of the Republic of the Philippines, the French text shall be equally authentic and binding on the Parties.

UNDERSTANDING OF THE UNITED STATES OF AMERICA

The United States of America in executing the present Treaty does so with the understanding that its recognition of the effect of aggression and armed attack and its agreement with reference thereto in Article 6, paragraph 1, apply only to Communist aggression but affirms that in the event of other aggression or armed attack it will consult under the provisions of Article 4, paragraph 2.

PROTOCOL TO THE TREATY

Designation of states and territory as to which provisions of Article 4 and Article 3 are to be applicable:

The Parties to the South-East Asia Collective Defence Treaty unanimously designate for the purpose of Article 4 of the Treaty the States of Cambodia and Laos and the free territory under the jurisdiction of the State of Viet-Nam.

The Parties further agree that the above-mentioned states and territory shall be eligible in respect of the economic measures contemplated by Article 3.

This Protocol shall enter into force simultaneously with the coming into force of the Treaty.

THE PACIFIC CHARTER

The delegates of Australia, France, New Zealand, Pakistan, the Republic of the Philippines, the Kingdom of Thailand, the United Kingdom of Great Britain and Northern Ireland, the United States of America:

Desiring to establish a firm basis for common action to maintain peace and security in South-East Asia and the South-West Pacific;

Convinced that common action to this end in order to be worthy and effective, must be inspired by the highest principles of justice and liberty;

Do hereby proclaim:

First, in accordance with the provisions of the United Nations Charter, they uphold the principle of equal rights and self-determination of peoples and they will earnestly strive by every peaceful means to promote self-government

and to secure the independence of all countries whose peoples desire it and are able to undertake its responsibilities;

Second, they are each prepared to continue taking effective practical measures to ensure conditions favourable to the orderly achievement of the foregoing purposes in accordance with their constitutional procedures;

Third, they will continue to co-operate in the economic, social and cultural fields in order to promote higher living standards, economic progress and social well-being in this region;

Fourth, as declared in the South-East Asia Collective Defence Treaty, they are determined to prevent or counter by appropriate means any attempt in the Treaty Area to subvert their freedom or to destroy their sovereignty or territorial integrity.

WESTERN EUROPEAN UNION

Several proposals were put forward at Council Meetings held during 1968 for closer political and defence consultations within the framework of WEU and, specifically, for discussions relating to Britain's role in Europe.

At a ministerial meeting in Luxembourg in February 1969 the United Kingdom's proposal for a meeting to discuss the Middle East situation was approved by all members except France. This meeting, organized

by the WEU Secretariat in London later in the month, was boycotted by France, who declared that she would not attend ministerial meetings until further notice, because the convening of the present meeting without the unanimous approval of WEU members was a breach of treaty.

A ministerial meeting held in Brussels in January 1970 was also boycotted by France.

THE BRUSSELS TREATY

(as amended by Protocol No. 1, signed in 1954, modifying and completing the Treaty)

ARTICLE I

Convinced of the close community of their interests and of the necessity of uniting in order to promote the economic recovery of Europe, the High Contracting Parties will so organise and co-ordinate their economic activities as to produce the best possible results, by the elimination of conflict in their economic policies, the co-ordination of

other economic organisations in which the High Contracting Parties are or may be represented but shall on the contrary assist the work of those organisations.

ARTICLE II

The High Contracting Parties will make every effort in common, both by direct consultation and in specialised agencies, to promote the attainment of a higher standard of living by their peoples and to develop on corresponding lines the social and other related services of their countries.

The High Contracting Parties will consult with the object of achieving the earliest possible application of recommendations of immediate practical interest, relating to social matters, adopted with their approval in the specialised agencies.

They will endeavour to conclude as soon as possible conventions with each other in the sphere of social security.

SOUTH PACIFIC COMMISSION

- Education Supervisors, on Teaching English as a Second Language, on Tropical Pastures and Beef Production, on Administration of Health Services at Territorial Level, and a Symposium on Land Tenure in relation to Economic Development.

4. Assistance to the Third South Pacific Games (Port Moresby, August 1969) and a Committee to plan the organization of a South Pacific Arts Festival.

5. Surveying of the potential development of Reef and Lagoon Fisheries, with UNDP support and the continuation, for another three-year period from the end of 1969, of the Rhinoceros Beetle Control Project.

6. The future establishment of a Review Committee to consider the future of the SPC and the development of the Commission's role and activities.

HISTORY AND AIMS

Following the Canberra Agreement of 1947, the Commission was set up in 1948 and moved to its present headquarters in 1949. In 1951 Guam and the Trust Territory of the Pacific Islands were brought within the scope of the Commission. Western Samoa, which attained independence in 1962, was accepted as a member Government in 1965 and formally acceded to the Agreement in July 1965. Nauru became a member of the Commission in July 1969. In 1962 the Netherlands, one of the original

members, withdrew when it ceased to be responsible for a territory in the area.

Each territory has its own programme of economic and social development administered by one of the six participating governments in the Commission. The Commission assists these programmes by bringing people together for discussion and study, by research into some of the problems common to the region, by providing expert advice and assistance and by disseminating technical information.

ACTIVITIES

The Commission organizes conferences of technical experts, seminars and training. It finances study tours by technical officers, promotes research and collects, prepares and distributes information. The work of the Commission falls within three fields:

Health: Public health, health education, maternal and child health, nutrition, epidemiology, environmental sanitation, parasitology, mental health and preventive psychiatry, dental health, training and research.

Social Development: Literature promotion, education including aptitude testing, language-teaching, community education, urbanization problems, youth work, applied research and training, labour, housing, social welfare, visual aids, home economics, population studies.

Economic Development: Improvement in plant and animal production, plant and animal protection, quarantine, extension of agriculture, fisheries, economic affairs, business methods, research and training, land tenure, co-operatives, forestry and rodent control.

Projects recently recommended for action by the 1968 Conference and approved by the 1968 Session include the study of tourism and inter-territorial transport development and of local tuna fisheries; training for territorial forest rangers; the co-ordination of economic development planning in the South Pacific; a multi-disciplinary seminar on health, social planning and urbanization; proposals for the training of surveyors and the establishment of units to demonstrate the advantages of grazing cattle on coconut plantations.

SUMMARY OF PROTOCOLS

PROTOCOL No. I

This Protocol is incorporated in the text of the revised Treaty as printed above.

PROTOCOL No. II

This Protocol sets upper limits on the size of the land and air forces which the members of WEU maintain on the continent of Europe in peace-time and place under the

one regimental combat team, while for the United Kingdom it is four divisions and the Second Tactical Air Force. The level of naval forces are determined annually by NATO. These limits are not to be increased except by unanimous agreement, and the level of internal defence and police forces are also to be established by internal agreement. Finally, the United Kingdom agreed not to withdraw or diminish her forces in Europe against the wishes of the majority of her partners, except in the event of an acute overseas emergency

PROTOCOL No. III

Under the third Protocol, the Federal Republic of Germany undertook not to manufacture atomic, chemical or biological weapons, or certain other weapons on a list

PROTOCOL No. IV

This Protocol provided for the setting up of the Agency for the Control of Armaments, which has the task of ensuring that the commitments contained in the third Protocol are observed. A Resolution was also passed setting up the Standing Armaments Committee. (See *Organisation* above.)

AIMS

UFI has defined the conditions to be fulfilled to qualify as an "International Fair". It has drafted, in co-operation with the International Chamber of Commerce, a series of criteria applicable to international specialized displays. It seeks to discourage inferior displays.

Questions studied by UFI include:

1. Establishment of bonded warehouses within fair premises.
2. Facilitating customs formalities.

3. Authorization of temporary imports.
4. Granting of special quotas for the sale of foreign goods exhibited at fairs.
5. Reduction of transport rates for visitors and for goods on display.
6. Granting of visas free of charge for users of fairs.
7. Allotment of foreign exchange quotas for exhibitors.
8. Protection of inventions on display.

SUMMARY OF THE CONSTITUTION

Adopted by the World Trade Union Conference, October 3rd, 1945, modified by the amendments adopted by the 2nd and 4th World Trade Union Congress (1949 and 1957), and by the 16th Session of the General Council mandated by the 6th World Trade Union Congress (1966), and by the 7th World Trade Union Congress (1969)

The World Federation of Trade Unions exists to improve the living and working conditions of the people of all lands and to unite them in pursuit of the objectives sought by all freedom-loving peoples as set forth in the Declarations of the London World Trade Union Conference in February 1945, and the resolutions and decisions of principle adopted by the First World Trade Union Congress in Paris in October 1945. The WFTU works for a world system where social injustices and every form of exploitation of man by man will be banished. While retaining its independence of political parties and governments, the WFTU accepts co-operation with all progressive forces in the world which are fighting against imperialism, colonialism and neo-colonialism, for social progress, national independence and peace. (Followed by a proclamation of the prime purposes of WFTU and its working principles.)

ARTICLES 1-2 Composition Bona fide union organizations. As a general rule, affiliation shall be confined to a single national trade union centre from each country. The Executive Bureau shall make decisions about admission, subject to ratification by the General Council and the Congress.

THE WARSAW PACT

THE WARSAW TREATY

ARTICLE ONE

The contracting parties pledge themselves in conformity with the Charter of the UN to refrain in their international relations from a threat or use of force, and to resolve their international disputes by peaceful means in such a way so as not to threaten international peace and security.

ARTICLE TWO

The contracting parties declare that they are ready to participate in the spirit of sincere co-operation in all international actions aimed at safeguarding international peace and security and will fully dedicate their efforts to the realization of these aims. The contracting parties will strive for the adoption by agreement with other States desiring to collaborate in this matter of effective measures for the general reduction of armaments and the prohibition of atomic, hydrogen and other weapons of mass destruction.

ARTICLE THREE

The contracting parties shall consult each other on all important international questions affecting their common interests, being guided by the requirements of strengthening international peace and security. They shall consult with each other without delay at any time when in the opinion of any one of them a threat arises of armed attack on one or several States signatory to the Treaty, in the interests of ensuring joint defence and the maintenance of peace and security.

ARTICLE FOUR

In case of armed attack in Europe on one or several States signatory to the Treaty, by any State or group of States, each State signatory to the Treaty, by way of exercising the right to individual or collective defence, in conformity with Article 51 of the UN Charter, shall render the State or States subjected to such attack immediate aid individually and by agreement with other States signatory to the Treaty, with all the means which it shall deem necessary, including the use of armed force. The States signatory to the Treaty shall immediately consult each other as to the joint measures which must be taken to secure and maintain international peace and security. The measures adopted on the basis of this Article will be reported to the Security Council in conformity with the Articles of the UN Charter. These measures will be terminated as soon as the Security Council launches measures necessary for the restoration and maintenance of international peace and security.

ARTICLE FIVE

The contracting parties have agreed to set up a Joint Command of their armed forces to be placed, by agreement between the Powers, at the disposal of this Command acting on the basis of jointly established principles. They shall also take other co-ordinated measures necessary for the strengthening of their defensive capacity in order to protect the peaceful labour of their peoples, guarantee the integrity of their frontiers and territories and ensure defence against possible aggression.

ARTICLE SIX

With the object of carrying out consultations provided

by the present Treaty between the States participating in the Treaty and for the examination of questions arising in connection with the realization of this Treaty, a Political Consultative Committee is being set up in which each State participating in the Treaty will be represented by a member of its Government or another specially appointed representative. The Committee may set up any auxiliary organs it considers necessary.

ARTICLE SEVEN

The contracting parties pledge themselves to refrain from taking part in coalitions or alliances of any kind and from concluding any agreements the aims of which conflict with the aims of this Treaty. The contracting parties declare that their commitments under existing international Treaties are in no way contradictory to the provisions of this Treaty.

ARTICLE EIGHT

The contracting parties declare that they will act in the spirit of friendship and co-operation with the aim of further developing and strengthening economic and cultural relations between them, following the principles of mutual respect for their independence and sovereignty and non-interference in domestic affairs.

ARTICLE NINE

The Treaty is open for accession to other States, irrespective of their social and State systems which may express their readiness by means of participating in this Treaty to promote the unification of the efforts of the peace-loving countries for the purpose of ensuring peace and the security of the peoples. Accession to the Treaty shall enter into force by agreement with the States participating in the Treaty after the document of accession has been deposited with the Government of the Polish People's Republic.

ARTICLE TEN

The present Treaty is subject to ratification, and the ratification instruments shall be deposited with the Government of the Polish People's Republic. The Treaty shall enter into force on the day when the last ratification instrument has been deposited. The Government of the Polish People's Republic shall inform the other States signatory to the Treaty of the depositing of each ratification instrument.

ARTICLE ELEVEN

The present Treaty shall remain in force for 20 years. For the contracting parties who do not hand to the Government of the Polish People's Republic a declaration denouncing the Treaty one year before the expiration of this term it shall remain in force for the following 10 years. Should a system of collective security be set up in Europe and an all-European treaty of collective security concluded for this purpose, towards which the contracting Powers will continue to aspire, the present Treaty is to lose its validity on the day on which an all-European treaty comes into force.

The Assembly of Western European Union consists of the delegates of the member countries to the Consultative Assembly of the Council of Europe

and meets twice a year in Paris. The Assembly considers defence policy in Western Europe, besides other matters concerning Member States in common, and may make recommendations or transmit opinions to the Council, to national parliaments, governments and international organisations. An annual report, with special reference to the Agency for the Control of Armaments, is presented to the Assembly by the Council.

PERMANENT COMMITTEES OF THE ASSEMBLY

Defence Questions and Armaments: Chairman: R. EDWARDS (United Kingdom).

General Affairs: Chairman: E. BLUMENFELD (Federal Republic of Germany).

Space Questions: Chairman: P. BOURGOIN (France).

Budgetary Affairs and Administration: A. BERTHET (Italy).

Rules of Procedure and Privileges: H. CRAVATTE (Luxembourg).

HISTORY

Western European Union is a development of the Brussels Treaty signed by Belgium, France, Luxembourg, the Netherlands and the United Kingdom in 1948. That Treaty provided for collective self-defence, mutual automatic military assistance in the event of repetition of hostilities and for collaboration in economic, social and cultural matters between these five states. At the time of its signature, the Treaty was a unique instrument, creating the most closely knit international co-operative association ever known. Furthermore, it contributed directly to the creation of larger similarly combined efforts: on the military side NATO, and on the civil side the Council of Europe.

As a sequel to the collapse in 1954 of the plans for creating a European Defence Community, a nine-power conference was convened in London in order to attempt to reach a new agreement. In particular some means had to be found of associating the defence effort of the Federal Republic of Germany with NATO. The conference was attended by Ministers representing Belgium, Canada, France, the Federal Republic of Germany, Italy, Luxembourg, the Netherlands, the United Kingdom and the United States of America. A document was drawn up stating that the occupation régime in Germany would be ended and that Germany would join NATO; the former Brussels Treaty would be strengthened and extended, and Germany and Italy would be invited to accede to it.

These decisions were embodied in a series of agreements, signed in 1954, which form the substance of the seven-power Western European Union, the seven powers being Belgium, France, the Federal Republic of Germany, Italy, Luxembourg, the Netherlands and the United Kingdom. The ratification of these agree-

ments was completed by May 6th, 1955, on which date Western European Union came into being.

On the ratification of the agreements, Western European Union was also charged with the specific task of settling the future of the Saar. Under a Franco-German agreement, the Saar was to have a European Statute within the framework of WEU, provided that this Statute was approved by a referendum. A Commission was set up in May 1955 to supervise the referendum, which was held on October 23rd, 1955. The result showed that the Saar majority had voted against the adoption of the European Statute and had furthermore expressed a wish to be incorporated in the Federal Republic of Germany. The Saar then became a *Land* of the Federal Republic of Germany, but remained linked economically to France. The final incorporation of the territory, now re-named Saarland, took place on July 5th, 1959.

The activities of the four main social and cultural committees were transferred to the Council of Europe in June 1960.

The Council of WEU has formally approved certain relaxations of the restrictions on German arms production imposed by Protocol III of the revised Brussels Treaty. They concern specified long-range and guided missiles, influence mines, and the construction of certain ships and submarines.

In July 1963, following the suspension of negotiations for Britain's entry into the Common Market, it was agreed that the WEU Council would meet at quarterly intervals and that the economic situation in Europe would be an item regularly on its agenda. The Commission of the EEC would be invited to be represented during the discussion of this point. These meetings have continued since October 1963.

WESTERN EUROPEAN UNION

ARTICLE III

The High Contracting Parties will make every effort in common to lead their peoples towards a better understanding of the principles which form the basis of their common civilisation and to promote cultural exchanges by conventions between themselves or by other means.

ARTICLE IV

In the execution of the Treaty the High Contracting Parties and any organs established by them under the Treaty shall work in close co-operation with the North Atlantic Treaty Organisation.

Recognising the undesirability of duplicating the military staffs of NATO, the Council and its Agency will rely on the appropriate military authorities of NATO for information and advice on military matters.

ARTICLE V

If any of the High Contracting Parties should be the object of an armed attack in Europe, the other High Contracting Parties will, in accordance with the provisions of Article 51 of the Charter of the United Nations, afford the Party so attacked all the military and other aid and assistance in their power.

ARTICLE VI

All measures taken as a result of the preceding Article shall be immediately reported to the Security Council. They shall be terminated as soon as the Security Council has taken the measures necessary to maintain or restore international peace and security.

The present Treaty does not prejudice in any way the obligations of the High Contracting Parties under the provisions of the Charter of the United Nations. It shall not be interpreted as affecting in any way the authority and responsibility of the Security Council under the Charter to take at any time such action as it deems necessary in order to maintain or restore international peace and security.

ARTICLE VII

The High Contracting Parties declare, each so far as he is concerned, that none of the international engagements now in force between him and any of the High Contracting Parties or any third State is in conflict with the provisions of the present Treaty.

None of the High Contracting Parties will conclude any alliance or participate in any coalition directed against any other of the High Contracting Parties.

ARTICLE VIII

1. For the purposes of strengthening peace and security and of promoting unity and of encouraging the progressive integration of Europe and closer co-operation between them and with other European organisations, the High Contracting Parties to the Brussels Treaty shall create a Council to consider matters concerning the execution of this Treaty and of its Protocols and their Annexes.

2. This Council shall be known as the "Council of Western European Union"; it shall be so organised as to be able to exercise its functions continuously; it shall set up such subsidiary bodies as may be considered necessary; in particular it shall establish immediately an Agency for the Control of Armaments, whose functions are defined in Protocol No. IV.

At the request of any of the High Contracting Parties the Council shall be immediately convened in order to permit them to consult with regard to any situation which may constitute a threat to peace, in whatever area this threat should arise, or a danger to economic stability.

The Council shall decide by unanimous vote questions for which no other voting procedure has been or may be agreed. In the cases provided for in Protocols II, III and IV it will follow the various voting procedures, unanimity, two-thirds majority, simple majority, laid down therein. It will decide by simple majority questions submitted to it by the Agency for the Control of Armaments.

ARTICLE IX

The Council of Western European Union shall make an annual report on its activities and, in particular, concerning the control of armaments to an Assembly composed of representatives of the Brussels Treaty Powers to the Consultative Assembly of the Council of Europe.

ARTICLE X

In pursuance of their determination to settle disputes only by peaceful means, the High Contracting Parties will apply to disputes between themselves the following provisions:

The High Contracting Parties will, while the present Treaty remains in force, settle all disputes falling within the scope of Article 36, paragraph 2, of the Statute of the International Court of Justice by referring them to the Court, subject only, in the case of each of them, to any reservation already made by that Party when accepting this clause for compulsory jurisdiction, to the extent that that Party may maintain the reservation.

In addition, the High Contracting Parties will submit to conciliation all disputes outside the scope of Article 36, paragraph 2, of the Statute of the International Court of Justice.

In the case of a mixed dispute involving both questions for which conciliation is appropriate and other questions for which judicial settlement is appropriate, any Party to the dispute shall have the right to insist that the judicial settlement of the legal questions shall precede conciliation.

The preceding provisions of this Article in no way affect the application of relevant provisions or agreements prescribing some other method of pacific settlement.

ARTICLE XI

The High Contracting Parties may, by agreement, invite any other State to accede to the present Treaty on conditions to be agreed between them and the State so invited.

Any State so invited may become a Party to the Treaty by depositing an instrument of accession with the Belgian Government.

The Belgian Government will inform each of the High Contracting Parties of the deposit of each instrument of accession.

ARTICLE XII

The present Treaty shall be ratified and the instruments of ratification shall be deposited as soon as possible with the Belgian Government.

It shall enter into force on the date of the deposit of the last instrument of ratification and shall thereafter remain in force for fifty years.

After the expiry of the period of fifty years, each of the High Contracting Parties shall have the right to cease to be a party thereto provided that he shall have previously given one year's notice of denunciation to the Belgian Government.

The Belgian Government shall inform the Governments of the other High Contracting Parties of the deposit of each instrument of ratification and of each notice of denunciation.

WORLD CONFEDERATION OF LABOUR

SUMMARY OF THE CONSTITUTION

Preamble: Declaration of Principles (Luxembourg Congress, October 1968).

The World Confederation of Labour (WCL) is an international movement of workers' trade union organizations.

The WCL is convinced that men's fulfilment, as also the development of nations—whether it be in the technical, economic, political, social or cultural fields—has a spiritual as well as material content. This is particularly true of the view men form of the purpose of life. The WCL's statement of its principles and definition of its objectives and methods of action are consistent with either a spiritual concept based on the conviction that man and the universe are created by God, or other concepts that lead together with it to a common effort to build a human community united in freedom, dignity, justice and brotherhood.

The WCL, which originated in the Christian-inspired trade union movement, now addresses its message in the present Declaration of Principles to all workers everywhere in the world who are willing to subscribe to it, whatever may be their creed, concept of life, race or sex.

ARTICLE 1. The WCL devotes its action to studying, promoting, representing and defending the material, moral and spiritual interests of the workers. It takes full responsibility for its action, deciding this independently of any outside authority, whatever its kind, political, religious or other.

WORLD COUNCIL OF CHURCHES

International Affairs. The Commission of the Churches on International Affairs represents the Council at conferences of international bodies such as the United Nations, and works for peace, justice and freedom.

Mission and Evangelism. The Council's Commission on World Mission and Evangelism (formerly the International Missionary Council) serves the Churches in the maintenance of missionary work and promotes co-operation in the common task of evangelism.

Youth Activities. The Council promotes world youth projects and ecumenical work camps as well as providing opportunities for voluntary service by young people.

General. A committee of six representatives of the Roman Catholic Church and eight of the WCC was established in May 1965, under the auspices of the Faith and Order Commission, to examine the present relationships between the two bodies and to explore the possibilities of collaboration. In July 1965 the Ecumenical Centre, headquarters of the WCC and ten other international church bodies, was dedicated at Geneva.

In 1968 a new Office of Education was set up jointly with the World Council of Christian Education. The integration of the WCC and WCCE is proposed.

There have been several study courses on the various specialized agencies of the United Nations. The Federation enjoys Consultative Status I with the United Nations Economic and Social Council and Consultative and Associate Status A with UNESCO. It also has consultative relations with the World Health Organization, the International Labour Organisation, UNICEF, the World Meteorological Organization, the Food and Agriculture Organization and the International Atomic Energy Agency. These relations enable the Federation to present the suggestions and views of its members to the specialized agencies.

BUDGET

Annual dues paid by Member Associations in proportion to the contributions paid by their governments to the United Nations are the main source of revenue. The balance is provided by donations from Foundations and private individuals, and special projects are financed by UNESCO.

International Council of Tanners (*Conseil International des Tanneurs*), 9 St. Thomas Street, London, S.E.1, England; f. 1926, to study all questions relating to the leather industry and maintain contact with national

resources, and Albania now refines her own oil. Important items in production include naphtha, copper and iron, agricultural raw materials, machinery and equipment, chemical materials, fertilizers, building materials and textiles. Albania's principal exports now include crude oil and coal, copper, iron, chrome, tobacco and agricultural produce. Industrial products account for about 80 per cent of Albania's exports. Whereas in 1938 industrial production accounted for 8 per cent of total production in the country, in 1968 it accounted for 61.5 per cent. Agricultural production has increased threefold since before the Second World War, and the area of cultivable land has doubled. During the post-war years there has been an extensive socialist transformation of the countryside: land reclamation, mechanization of agriculture, collectivization, utilization of chemicals, etc. Wool, skins, fruit, vegetables, nuts and wine are Albania's chief agricultural export items.

Albania's breach with the Soviet Union in the years 1960-61 damaged the Albanian economy. The Soviet Union withdrew all aid, left many projects only half-completed, ceased supplies of industrial equipment and cancelled economic agreements. The economic blockade imposed on Albania by the USSR left her virtually in total European isolation. In recent years trade and contacts with China have increased considerably and the Albanian economy has overcome the setbacks of 1960-61. Particular progress has been made in the spheres of copper, chromium, nickel and coal production and electric power generation. Crop yields have increased considerably, particularly wheat and maize. Almost 45 per cent of Albania's foreign trade is now with China. A joint Sino-Albanian shipping company has been formed, and in June 1965 an agreement was signed which, with subsequent trade protocols, provides Albania with financial, technical and material aid. The hydroelectric stations "J. V. Stalin" (22,500 kW), and "Bistrica No. 2" (5,000 kW), which are planned to provide the country with full electrification by 1971, were financed and equipped by the Chinese, so too was Radio Tirana, set up in 1966. In 1969 a special protocol was signed in Peking which allowed for Chinese participation in many new Albanian export industries.

Some 95 per cent of Albania's foreign trade is with the socialist countries, although trade with non-communist countries is growing annually. Albania is currently trading with 40 countries of the world. For 1970 Albania has signed trade protocols with Cuba, Yugoslavia, Romania, Czechoslovakia, U.A.R., Algeria, Turkey, France, Austria, Italy, China and Greece among others, while Albania's foreign trade firms have ties with many more countries.

Transport and Communications

There are some 215 kilometres of railway track in Albania linking the main cities (including branch lines). Rail transport accounts for 24 per cent of all land transportation and 4,019,000 passengers travelled by rail in 1967. Roads now link the remotest regions of the country although, despite progress in the sphere of road building the lesser roads, particularly in the highlands, are mostly unsuitable for motor transport. 55,934,000 passengers travelled by road in 1967. There is a marked absence of motor vehicles in Albania—there are no private automobiles and very few official cars, even in the capital. The most common forms of transport are the bicycle and the mule. Albania has a developing sea transport; over

104,000 tons of goods were transported by sea in Albanian ships in 1967. Ships use the main ports of Durrës, Vlorë and Sarandë. There is a new airport at Rinas but there is no regular air service.

Social Welfare

In Albania all medical services are free of charge. There are now hospitals, clinics and maternity homes throughout the country which provide free treatment for the entire population. In 1968 there were 194 hospitals (including sanatoria and maternity homes) and 1,255 physicians. The 1968 health budget amounted to 208,911,000 leks, 5.5 per cent of the state budget. Kindergartens and nursery schools receive subsidies of up to 75 per cent. There is a non-contributory state social insurance system for all workers, and a pension system for the old and disabled. Income tax has been abolished for all workers, employees and co-operative members. Personal taxation is negligible. *Government expenditure being met by surpluses earned by state enterprises*. Albania is thus one of the first communist countries in Europe to be free of direct taxation for her people. A new state social insurance law came into force on January 1st, 1967, which provides many social benefits for the population in addition to free medical attention.

Education

By 1956, illiteracy had been almost wiped out below middle age, and it is now claimed that illiteracy has been wiped out altogether. About 20 per cent of children in the age group of three to seven years attend nursery school (*hopshtie*), children between the ages of seven and eleven years attend elementary school (*shkollat fillore*). Seven-year schools (*shkollat 7-vjeçare*) take children between the ages of seven and fourteen years and about half the number educated at the elementary school go on to the seven-year school. Secondary schools in Albania may be divided into three main categories, i.e. eleven-year schools (*shkollat 11-vjeçare*) giving four-year courses which complete the seven-year school, secondary technical-professional schools (*shkollat e mesme tekniko-profesionale*) which combine vocational training with a general education, and lower vocational schools (*shkollat e ulët profesionale*) which train workers in the fields of agriculture and industry, etc. The school-year in the secondary schools lasts six and a half months. All pupils must do two and a half months' agricultural work in the year. Pupils also spend one month in military training. In 1968 there were 17,200 students enrolled at 8 higher education institutes in Albania, 7,000 of these being enrolled at Tirana University, Albania's only university. Students at higher education institutes spend seven months of every year at the institute, two months in military training and one month in physical work.

Tourism

All aspects of tourism in Albania are handled by *Albturist*, the official state tourist department. The development of tourism began in 1956 but has only seriously been encouraged by the state over the last four or five years. There are few recognized resorts apart from Durrës, although great potential exists in the beauty spots on the coast and in the scenery of the interior. Visas are essential for foreign visitors. A very favourable exchange

International Tin Council, Haymarket House, 28 Haymarket, London, S.W.1; f. July 1956; now operates the Third International Tin Agreement, which is intended to regulate the international tin market by the prevention of excessive fluctuation in prices, the alleviation of difficulties arising from maladjustment between demand and supply and the ensuring of an adequate supply of tin at reasonable prices at all times. Maximum and minimum prices are laid down and all producing countries must contribute to a buffer stock of tin, which is controlled by a manager in accordance with the provisions of the agreement. The council meets at least four times a year. JUDICIAL SYSTEM

Justice is administered under the Constitution by the Supreme Court, by District Courts, and by Military Tribunals. Courts of Justice are independent in the exercise of their functions, and are separated from the administration.

Until March 1966 the judicial system was supervised by a Minister of Justice and his officials. This department now no longer exists and its principle responsibilities belong to the Attorney-General. Codes in operation are probably drawn from Soviet and French models, the current Penal Code came into force in September 1952. Trials are normally held in public. The accused is assured the right of defence. Presumption of innocence of the accused is not specified. Law enforcement agencies consist of two police forces, the *militia* which is locally administered, and the *security service* which is primarily concerned with frontier control, state security and political offences.

Judges of the Supreme Court are elected by the People's Assembly. Those of the District Courts are elected by the citizens in a secret ballot. Verdicts can be altered by a higher court which has the right to control a lower court. Judges can be removed from office by the people.

THE SUPREME COURT

The Supreme Court is the highest judicial court of the Republic. It is elected for a four year term by the People's Assembly. The Military Supreme Court was merged with the Supreme Court in June 1951.

President: SHUAIP PANARIT

THE ATTORNEY-GENERAL

The Attorney-General and his deputies are appointed by the People's Assembly. Public Attorneys are appointed by the Attorney-General and are responsible only to him.

Attorney-General: ARANIT ÇELA

THE TRIBUNALS

The Tribunals are elected by a secret ballot of all voting citizens. They are independent of all administrative power. Decisions of the Tribunals may only be altered, within the law, by a higher tribunal. Judges may be recalled by the people.

RELIGION

Although religion has been officially abolished in Albania the social traditions of religion (predominantly Muslim) still survive and provision is still made to a limited extent for those who wish to worship. Most of the old mosques have now been shut down and are preserved as centres of cultural interest. Formerly the population was approximately 70 per cent Muslim, 15 per cent Roman Catholic (in the north) and 15 per cent Greek Orthodox (in the south).

TRADE UNIONS

Trade unions were established for the first time in 1945. Until 1958 there was a separate trade union for every principal industry. Now all the trade unions have been merged into a single organization with officials designated to deal with the problems which arise in particular industries. The trade union movement employs some 150 full-time officials. Elected leadership at all levels is a feature of the Albanian trade union organization. Local and district committees meet monthly, and every four years a national conference elects a general council. Trade union membership is now approximately 170,000.

AUSTRIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Austria lies in Central Europe, between Switzerland, Germany, Czechoslovakia, Hungary, Yugoslavia and Italy. The climate varies sharply owing to great differences in elevation. The mean annual temperature lies between 45° and 48° F (7° and 9° C). The population is 98 per cent German-speaking, with small Croat, Czech and Slovene-speaking minorities. About 90 per cent are Roman Catholics, over 6 per cent Protestants, with about 10,500 Jews. Flag: three horizontal bands—red, white and red. Capital: Vienna.

Recent History

Austria was annexed by Germany in 1938. After the Second World War the country was divided into four Zones occupied by forces of the USA, USSR, Britain and France. By the State Treaty of 1955 Austria regained independence as a neutral state. In 1960 Austria joined the European Free Trade Association and in 1961 applied for Associate Membership of the European Economic Community.

A period of over twenty years of coalition government came to an end in April 1966 with the formation of a cabinet composed of the People's Party only. Provincial elections in Lower Austria and Vorarlberg in the autumn of 1969 confirmed a general trend against the governing People's Party. Socialist representatives in the Bundesrat now have a majority of one, and can therefore block legislation if they wish. The Government has recently met with strong Socialist opposition in its plans to transfer ownership of the nationalized sector of industry, which accounts for 25 per cent of the industrial potential and 27 per cent of the export total, from Parliament to the chief administrative institution, the 'Oesterreichische Industrie-Verwaltungsgesellschaft'.

Government

Austria is a federal republic divided into nine provinces. There is a bi-cameral parliamentary system. The first chamber, the *Nationalrat* (National Council), is elected on a basis of proportional representation by universal adult suffrage. The second chamber, the *Bundesrat* (Federal Council), is composed of representatives of the Provincial Assemblies. Members of the *Nationalrat* are elected for four years. The President, elected for six years, is the Head of State.

Defence

In an amendment to her constitution, Austria in 1955 declared her permanent neutrality. The total strength of the armed forces is not allowed to exceed 55,000. National Service lasts for nine months, and as a rule about 50,000 men are conscripted each year. The Austrian air force maintains 90 aircraft, largely of Swedish manufacture.

Economic Affairs

Agriculture and forestry are leading industries. The crops include wheat, maize, barley, oats, sugar beet, potatoes and fruit. Wine and beer are produced in quantity. About 35 per cent of the land is forest, timber being ex-

ported as raw material and as paper and pulp. Iron and steel are important exports and heavy machinery, textiles and chemicals are manufactured. Austria possesses iron ore and oil deposits, brown coal, magnesite, lead and some copper. Hydro-electric power resources are being further developed and electricity is exported to neighbouring countries. Austria's principal markets are the German Federal Republic and Italy.

Vienna is the permanent seat of the United Nations Industrial Development Organization, and the International Atomic Energy Agency. Owing to its geographically central position and Austrian neutrality, the capital is an important centre for international conferences.

Tourism is a valuable source of income, winter and summer. The Danube is popular with excursionists and foreign tourists and is important commercially. Most river trade is with the German Federal Republic (about 5 million tons annually). A small but increasing traffic passes between Austria and Czechoslovakia, Hungary and Yugoslavia. Barges of up to 1,000 tons can be accommodated.

Transport

Austria has a highly developed system of public transport by road, rail, air and river. The Danube provides Austria with an artery particularly important for the transport of timber, steel and other raw materials. A passenger service is maintained on the Upper Danube and between Vienna and the Black Sea. There are six modern airports. Railways total 6,421 kilometres (3,990 miles); roads 31,000 kilometres (19,347 miles), and commercial waterways 320 kilometres (200 miles).

Social Welfare

Social Insurance in Austria dates back to the 1880s. Regulations introduced by the German regime in 1938 were maintained until the new Social Insurance Law of 1956. A comprehensive Social Welfare Scheme covering Industrial Accident Insurance, Old Age Pensions, Health Insurance etc. is compulsory for all employees and otherwise insured persons. There are also provisions for other groups such as unemployment insurance, children's allowances, maternity allowances, rent allowances, provision for war victims, etc.

Education

Since 1962 education has been free and compulsory between the ages of 6 and 15. The Federal Minister of Education (*Landesschulrat*) is the Federal Minister of Education. The system consists of four federal provinces and district school boards (*Berufsschulrat*) in local regions. The system consists of four categories of schools: schools of general education, technical and vocational schools, teacher training schools, and institutes of higher education. Private schools also exist, run mainly by churches and religious organizations.

Tourism

Austria's mountains, forests and valleys make it an ideal resort in both summer and winter. Celebrated beauty spots are the Salzkammergut Lake District, the Tyrol and Vorarlberg valleys and the Vienna woodlands. Vienna is a

ALBANIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Albania is bordered by Yugoslavia to the north and east, Greece to the south and the Adriatic Sea to the west. The maximum length of the country is 336.2 kilometres and its maximum breadth is 148.2 kilometres. Much of Albania is mountainous, particularly northern Albania where the mountains continue the Crna Gora chain of Montenegro, and in the east along the Macedonian border. Albania is one of the highest countries in Europe, having an average height of 700 metres above sea-level. Climate is Mediterranean throughout most of the country. The Adriatic and Ionian Seas play a moderating role in the country's climate, although frequent cyclones in the winter months make the weather unstable. The language is Albanian. Geg and Tosk are the two main dialects, Tosk now being the official standardized form of the Albanian language. Religion in Albania has been officially abolished but there are very small numbers of Roman Catholics in the north and Greek Orthodox in the south. There is virtually no formal practice of the previously predominant Muslim religion, although provision is made for those who wish to worship. The flag is red with a black two-headed eagle topped by a five-pointed star. The capital is Tirana.

Recent History

The Albanian Communist Party was founded in 1941. The leader of the Party, Enver Hoxha, led the Liberation Army against the Germans and the Italian occupation of Albania. During the war years Albania suffered severe losses—28,000 killed and 43,000 deported out of a population of 1.3 million. Independence was finally proclaimed in 1944, and in 1946 Albania became a People's Republic. Enver Hoxha has been in the seat of power since that date. In the immediate post-war years, Albania was largely a dependency of Yugoslavia, the two countries establishing a monetary and customs union. Yugoslavia's influence and aid was gradually replaced by that of the Soviet Union, and after the breach between Yugoslavia and the Soviet Union in 1949, Albania remained a firm ally of the latter under Stalin. Following the death of Stalin in 1953, Albania became alienated from the Soviet Union over Khrushchev's policy of rapprochement with Yugoslavia. Relations deteriorated until in 1961 diplomatic relations with the U.S.S.R. were broken off. The Soviet Union's place as Albania's main ally and benefactor was taken by the People's Republic of China. Albania virtually ceased to participate in the activities of CMEA in 1961 and in 1968 she withdrew from the Warsaw Pact.

Government

Albania is a People's Democracy with a one-party system of government. The supreme legislative organ is the People's Assembly, elected for a four-year term by all citizens over 18 years of age. The Assembly elects a Presidium which fulfils the functions of Head of State as a collective organ of leadership under the President of the Presidium. The Council of Ministers is appointed, and can be dismissed, by the People's Assembly. The Constitution explicitly recognizes the special position of the Albanian

Party of Labour which works closely with the Government and is the main policy making body. At its congresses the Party elects the Central Committee which, in turn, elects the Political Bureau.

The primary organs of local government are the District People's Councils. Tirana, the capital, is divided into ten districts. Elections to the District Councils take place every three years. There is suffrage to all over 18 years of age. Candidates are nominated by the Party of Labour's local organizations or the Democratic Front, which incorporates vocational and professional organizations, trade unions, women's organizations, youth clubs, and cultural associations. The Councils elect executive committees, a secretary and a Presidium. In cases of conflict in the People's Councils, disputes are referred to the People's Assembly or to government departments.

Defence

Defence in Albania is conducted under the auspices of the People's Army which was founded in 1943. Military service is compulsory and lasts for two years in the Army and for three years in the Air Force and the Navy. Latest figures for the total strength of the armed forces are 38,000, comprising Army 30,000, Navy 3,000, Air Force 5,000. Defence estimates for 1969 total 420 million leks. Paramilitary training is now compulsory for all schoolchildren and students, and paramilitary forces number 12,500, according to the latest available figures.

Reports from reliable sources indicate that a defence agreement was concluded between Albania and China, following the Soviet intervention in Czechoslovakia in 1968. This agreement would allow for the stationing of Chinese forces in Albanian territory, together with the establishment of missile and naval bases. Chinese submarines have already used Albanian ports.

Economic Affairs

Before liberation in 1944 Albania was an extremely backward country. Its semi-feudal social system was dominated by Italy to the extent that the economy was half-feudal, half-colonial. Before liberation 80 per cent of the population was illiterate, and 87 per cent of the people worked in agriculture. By 1965 Albania had been turned into a socialist agrarian-industrial country. The Albanian economy operates on the principles of the public ownership of the means of production, planned management of the national economy and a certain level of financial autonomy for the enterprises. Each individual enterprise operates under the auspices of a single state plan. The year 1951 saw the beginning of long-term planning, with the first Five-Year Plan (1951–55). During the third Five-Year Plan (1961–65) Albania was able to survive the economic blockade imposed on her by the U.S.S.R. Albania is now in the fourth year of the fourth Five-Year Plan (1966–70). These successive Five-Year Plans have modernized industry and reorganized agriculture on the socialist collective system (over 60 per cent of the Budget is devoted to investment in the economy). Industry now utilizes natural

THE CONSTITUTION

AUSTRIA is a democratic republic, having a president (*Bundespräsident*) elected directly by the people and a two-chamber government. The republic is organized on the federal system, comprising the provinces (*Länder*) of Burgenland, Carinthia, Lower Austria, Upper Austria, Salzburg, Styria, Tyrol, Vorarlberg and Vienna. There is universal suffrage for men and women over the age of 20.

The National Council (*Nationalrat*) consists of 165 members, elected by universal direct suffrage, according to a system of proportional representation. It functions for a period of four years.

The Federal Council (*Bundesrat*) represents the federal provinces. Vienna sends 12 members, Lower Austria 10, Styria 7, Upper Austria 6 and the other provinces 3 each, making 50 in all. They are elected by the provincial governments and function during the life of the provincial government which they represent.

For certain matters of special importance the two chambers meet together, this is known as a *Bundesversammlung*.

The President is the head of the State, and he holds office for six years. His powers include appointing ambassadors, conferring honours, etc. Although he is invested with special emergency powers he normally acts on the authority of the Government, and it is the Government which is responsible to the National Council for governmental policy.

The Government consists of the Chancellor, the Vice-Chancellor, and the other ministers, who may vary in number. The Chancellor is chosen by the President from the party with the strongest representation in the newly elected National Council, and the other ministers are then

chosen by the President on the advice of the Chancellor.

All new acts must be read and put to the vote in both houses. A new bill goes first to the National Council, where it usually has three readings, and secondly to the Federal Council, where it can be held up, but not vetoed.

The Constitution also provides for appeals by the Government to the electorate on specific points by way of a referendum.

The Provincial Diet (*Landtag*) exercises the same functions in each province as the National Council does in the State. The members of the *Landtag* elect a government (*Landesregierung*) consisting of a provincial governor (*Landeshauptmann*) and his councillors (*Landesräte*). They are responsible to the *Landtag*.

The spheres of legal and administrative competence of both national and Provincial governments are clearly defined. The constitution distinguishes four groups:

1. Law-making and administration are the responsibility of the State: e.g. foreign affairs, justice and finance.
2. Law-making is the responsibility of the State, administration is the responsibility of the provinces: e.g. elections, population matters, and road traffic.
3. The State lays down the rudiments of the law, the provinces make the law and administer it: e.g. charity, rights of agricultural workers, land reform.
4. Law-making and administration are the responsibility of the provinces in all matters not expressly assigned to the state: e.g. municipal affairs, building, theatres and cinemas.

ALBANIA—(THE CONSTITUTION, THE GOVERNMENT)

THE CONSTITUTION

THE Constitution of the People's Republic of Albania was adopted in March 1946 and amended by the People's Assembly on July 4th, 1950. By its terms Albania is a People's Republic, the supreme legislative organ being the People's Assembly which is elected for a term of four years by all citizens over 18 years of age, on the basis of one deputy to every 8,000 persons. The People's Assembly elects a Presidium, which consists of a President, three Vice-Presidents, a Secretary, and ten members; the President of the Presidium is President of the Albanian People's Republic. The Presidium convokes the People's Assembly

for sessions twice a year, and exercises the functions of the latter between sessions. Laws and amendments to the Constitution are made valid by a majority vote of the People's Assembly.

The Council of Ministers is, according to the Constitution, appointed and removed from office by the People's Assembly.

The country is divided into twenty-six regions for the purpose of local administration. The local organs of State power are the People's Councils, elected for a three-year term.

confiscated. In practice there is complete freedom of opinion and circulation in the Austrian Press subject to the restrictions of the 1922 Press Law.

In 1961 the Austrian Press Council (*Pressrat*) was founded. It consists of representatives of the publishers and journalists and its principal duties are to watch over the freedom of the Press, and to ascertain grievances of the Press. In 1969, 161 publications appeared in Austria of which 124 were weekly newspapers and 33 dailies. Daily circulation on weekdays amounted to 1,289,300 copies and average daily total of about 1,400,000 at weekends. The political parties each have a newspaper and independent papers tend to follow a political line. Although there is a strong provincial Press in Graz, Salzburg, and Innsbruck the country's Press is centred in Vienna. The three highest circulation dailies are the *Neuer Kurier* (the *Express* and the *Kronen-Zeitung* *Die Presse* (independent), the *Arbeiter Zeitung* (socialist) and the *Volksblatt* (People's Party) are the country's most respected dailies.

Education

Education in Belgium is compulsory from 6-14. A characteristic of Belgian education is the co-existence of two separate education systems: the *école officielle* is a state secular school and the *école libre* is a private denominational school receiving state subsidies. Under the School Pact of 1958 primary and secondary education were provided free and parents were given the right to choose the type of education for their children; in 1967 43 per cent of school-age children attended *écoles officielles* and 57 per cent attended *écoles libres*. Under the 1963 Language of Instruction Act teaching is given in the language of the region; in the Brussels district teaching is done in the mother language of the pupil.

Primary education is from 6-12, for children who do not continue with secondary education; a two-year course attached to the primary school is provided, but this is now generally being replaced by the lower secondary school.

Secondary education consists of general education *normale* (for the training of primary school teachers), technical and artistic (vocational). General education at secondary level is divided into (a) *humanités anciennes*, traditionally based on classical literature; the course is essentially literary though including some scientific education; (b) *humanités modernes* centred either on mathematics, science or economics. Both sectors are divided into two three-year cycles and pupils may change from one sector to the other during the first four years of their course.

University Education University entrance requirements are a minimum of marks at the end of the last year of secondary school plus a maturity examination. Courses are divided into a 2-3 year course of general preparation known as degree candidature followed by 2-3 years of specialization.

The National Study Fund provides grants where necessary and nearly 35 per cent of students are receiving scholarships. In 1967 educational expenditure amounted to 950 million dollars a year or 20.3 per cent of the annual budget.

Tourism

Ostend and other seaside towns attract many visitors. The forest-covered Ardennes is excellent hill-walking country. There are towns of rich historic and cultural interest such as Bruges, Ghent, and Antwerp.

THE PRESS

Austria's *Wiener Zeitung*, founded in 1703, is the oldest daily paper published in the world, and Austria's Press history dates back to 1615 when its first newspaper was published. During the nineteenth century the Press suffered repression under the absolute monarchy and this situation was not legally liberalized until the Press Law of 1922 which states that "The freedom of the Press is assured and subject only to the limitations defined in this law". During the years of German annexation the Press was to a large extent subordinated to the Nazi propaganda machine. After the Second World War the Allies published several newspapers including the original *Kurier*, and the Austrian Press rapidly recovered from the effects of a totalitarian administration.

Agitation within the Press against relatively heavy taxation and costs has been appeased to some extent by concessions in the 1969 Purchase Tax Law. Reform has

also been demanded in the Press Law with particular regard to *right of reply*. According to this section of law, any person or persons who feel themselves to have been subject to an incorrect statement in the Press can (and often do) demand to have a formal reply of equal volume and position published in the offending newspaper. This is considered by the majority of the Press as an obstacle to its freedom. Other objections have been raised on such points as the lack of constitutional guarantees for freedom of opinion and circulation, and the compulsory supply of copy to the Ministry of the Interior. The Austrian Press is still subject to *Nachzensur* (after-censorship) and a paper's registered *Verantwortlicher Redakteur* (Responsible Editor) is penally liable for material printed which contravenes the law on such points as libel or "corruption of minors". For many years no "Responsible Editor" has been imprisoned, although fines have been imposed and issues

THE CONSTITUTION

THE BELGIAN CONSTITUTION has been considerably modified by amendment since its origin in 1830. Belgium is a constitutional monarchy. The central legislature consists of a Chamber of Representatives and a Senate. The Chamber of Representatives consists of 212 members, who are elected for four years unless the Chamber is dissolved before that time has elapsed. Certain articles of the Constitution are at present (January 1970) under revision.

ELECTORAL SYSTEM

Members must be twenty-five years of age, and they are elected by secret ballot according to the system of Proportional Representation. Suffrage is universal for citizens of twenty-one years or over (A Bill giving all women electoral franchise was approved in March 1948). Up to 1894 only 1 per cent of the people had the right to vote. In that year manhood suffrage at the age of twenty-five was enacted and plural voting was established on grounds of income, marriage, and educational qualifications. In 1921 the age limit for the male vote was reduced to twenty-one. Since 1893 voting has been compulsory, and abstentions from voting have fallen to 6 per cent.

The Senate, or Second Chamber, is chosen in the following manner. It is composed of

- (1) Half as many members as the Chamber of Representatives, elected directly by the same electors
- (2) Members chosen by the Provincial Councillors, in the proportion of one for every 200,000 population.
- (3) Members co-opted by groups (1) and (2), up to half the number of group (2).

There are now 178 Senators.

All Senators must be over 40, with the exception of a small number of members of the Royal Family, who become Senators by right at the age of 18. Members are elected for four years.

THE CROWN

The King has the right to veto legislation, but he does not exercise it. His place in the Belgian Constitution is very similar to the position of the Crown in Great Britain. Though he is, according to the terms of the Constitution, supreme Head of the Executive, he in fact exercises his

control through the Cabinet, which is responsible for all acts of government to the Chamber of Representatives. Though the King, according to the Constitution, appoints his own ministers in practice, since they are responsible to the Chamber of Representatives and need its confidence, they are generally the choice of the Representatives. Similarly, the Royal initiative is in the hands of the ministry.

LEGISLATION

Legislation is introduced either by the Government or the members in the two Houses and as the party complexion of both Houses is generally almost the same, measures passed by the Chamber of Representatives are usually passed by the Senate. Each House elects its own President at the beginning of the session, who acts as an impartial

Nevertheless, according to the Constitution (Art. 65) certain treaties must be communicated to the Chamber only as soon as the "interest and safety of the State permit". Further the Government possesses an important power of dissolution which it uses a most unusual feature is that it may be applied to either House separately or to both together (Art. 71).

Revision of the Constitution is to be first settled by an ordinary majority vote of both Houses specifying the article to be amended. The Houses are then automatically dissolved. The new Chambers then determine the amendments to be made with the provision that in each House the presence of two-thirds of the members is necessary for a quorum, and a two-thirds majority of those voting is required.

LOCAL ADMINISTRATION

The system of local government conforms to the general European practice of being based on a combination of central officials as the executive agent and locally elected councillors as the deliberating body. The areas are the provinces and the communes, and the latter are empowered by Art. 108 of the Constitution to associate for the purposes of better government.

BELGIUM

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Belgium lies in north-west Europe bounded to the north by the Netherlands, to the east by Luxembourg and Germany, to the South by France, and to the west by the North Sea. The climate is temperate. Flemish, spoken in the North, and French, spoken in the South, are the official languages. The linguistic dividing line was fixed in July 1963 and runs approximately east-west. Brussels is situated in the Flemish part and has bilingual status. Approximately 55 per cent of the population are Flemish-speaking, 45 per cent French-speaking and some 100,000 speak German. The population is overwhelmingly Roman Catholic. The flag carries three vertical stripes—black, yellow and red. The capital is Brussels.

Recent History

Since the Second World War, Belgium has emerged as one of the leaders of international co-operation in Europe. It is a founder member of the Benelux Economic Union, of Western European Union, the Council of Europe, the Organization for Economic Co-operation and Development, the European Coal and Steel Community and the European Economic Community (the Common Market). As the headquarters of EEC and Nato, Brussels has become an important European capital. Belgium granted independence to her former colony, the Democratic Republic of Congo, in 1960 and the Trusteeship Territory of Ruanda-Urundi became independent in 1962 as the State of Rwanda and the Kingdom of Burundi.

The two year old coalition government of Paul Vanden Boeynants fell in February 1968 as a result of the language dispute between the French and Flemish speaking communities, which was focused in the University of Louvain. Following indecisive general elections in March, a new coalition was formed in June with the Socialist Party by the Christian Social Party leader Gaston Eyskens. The "Conférence Linguistique" was held in autumn 1969 but failed to settle the language dispute between the French and Flemish-speaking communities. The main problem facing the Government is the linguistic issue in Brussels and its surrounding bilingual boroughs.

Government

Legislative power is vested in the King, the Senate and the Chamber of Deputies. The Senate has three classes of members: directly elected, elected by Provincial Councils, and co-opted. Members of the Chamber of Deputies are elected directly by universal adult suffrage. The members of each house are elected for four years. Proportional representation is used. There are nine provinces.

Defence

Belgium is a member of NATO and maintains an army, navy and air force. The headquarters of SHAPE was transferred to Casteau in Belgium during 1967. Military

service lasts 12-15 months and the total strength of the armed forces is 99,000, comprising Army 75,000, Navy 4,000, Air Force 20,000. Defence estimates for 1969 totalled 26,041 million Belgian francs.

Economic Affairs

Because of its geographical position, Belgium is well situated for international trade and is one of the most successful importers and exporters in the world, maintaining a large merchant fleet. Over half Belgium's external trade is with the other members of the European Economic Community (the Common Market). Since 1921 Belgium and Luxembourg have formed an Economic Union (BLEU), and in 1960 the Benelux Treaty came into force. The country is the most densely populated in Europe and is mainly industrial. Industrial activity has concentrated in recent years in the increasingly populous Flemish areas of the North. Major exports are iron and steel products, machinery, chemical and pharmaceutical goods, textiles and glass. Coal is the only important mineral. Agriculture provides Belgium with about four-fifths of its food.

The Bank Rate underwent six increases between the end of 1968 and the end of 1969, rising from 3½ per cent to 7½ per cent. To avoid the risk of inflation, the introduction of the Added Value Tax imposed by the EEC, has been postponed for a year until January 1971.

Transport and Communications

The Société Nationale des Chemins de Fer Belges maintains 4,450 kilometres (2,787 miles) of main line railway. On the roads, buses and trams (Société Nationale des Chemins de Fer Vicinaux) are much used; and inland waterways are extensive. The modernised port of Antwerp (now the third biggest in the world) handles a large tonnage of inland and ocean traffic and specializes in general cargo and containers. SABENA is one of the oldest and largest airlines in the world. Belgium's merchant fleet comprised 96 ships, totalling 835,371 tons, in 1968.

Social Welfare

Social Welfare is administered by the National Office for Social Security. Contributions are paid by employers and employees towards family allowances, health insurance, unemployment and pensions. Most allowances and pensions are tied to the cost of living index. Workers and employees are entitled to 18 days holiday for every twelve month period of work. They also receive a "holiday bonus". They are also insured against accidents occurring on the work premises or on the way to and from work, though only bodily injuries are liable to such reparations. Family allowances are as follows: 617 francs for the first child, 1,040 francs for the second child and for the third and for each of the following 1,456 francs per month. Handicapped children under 25 receive a supplementary allowance.

THE PRESS

In pursuance of Article 18 of the Belgian Constitution "The Press is free, no form of censorship may ever be instituted, no cautionary deposit may be demanded from writers, publishers or printers. When the author is known and is resident in Belgium the publisher, printer or distributor may not be prosecuted."

This juridical freedom has determined the creation of newspapers and the variety of their political tendencies. It has also given them full responsibility in such matters as prices, advertisement tariffs, investment and management.

The Press legislation has its roots in the clauses of the Constitution which provide for the freedom of the Press (see Article 18 above), and for certain guarantees of procedure in case of violation of the laws governing the Press in Article 96. Many laws and decrees have been enacted in application of these principles, such as the law of October 16th, 1830 (Freedom of the Press), the decree of July 19th, 1831 (Competence and Procedure in matter of violation of the laws governing the Press), the decree of July 20th, 1831, modified by the law of April 16th, 1847 (Violation of the laws governing the Press).

There are 43 general information dailies, 29 of which are autonomous, the remainder depending largely or totally on the former (some are only, under a different title, regional editions of a larger paper).

Of the dailies, 27 are in French, 15 in Flemish and one is in German. Seven deal with economic and financial matters, and one is devoted to sport. A slight trend towards concentration showed itself in 1966 in the acquisition by *Le Soir* of *La Meuse* and *La Lanterne*, bringing *Le Soir*'s group to six daily papers totalling 530,500 copies. The only other significant group consists of five Catholic papers, with 310,000 total circulation, linked with *De Standaard*.

Most of the important newspapers are family concerns, and family interests predominate even when newspapers have multiple ownership. Examples of family ownership of major papers are as follows: *Le Soir* (Rossel), *Het Laatste Nieuws* (Hoste), *La Libre Belgique* (Jourdain), *La Dernière Heure* (Brébart), *De Standaard* and *De Gentenaar-Landuaacht* (Sap), *Het Belang van Limburg* (Theelen).

It should also be mentioned that *Le Peuple* and *De Volkskrant* are family papers.

Nearly all the Belgian dailies have political leanings and are divided between the three traditional parties: Social Christian Party, Belgian Socialist Party, Freedom and Progress Party. It is not, however, possible to establish a parallel between the supporters of the parties and the readership of the dailies. For example, the readers of the Socialist newspapers are far fewer than those who vote for that party, and though *Le Soir* claims its neutrality with regard to the parties, it nevertheless adopts a decided viewpoint in many cases, and has a "Tribune Libre" open each week to a spokesman of one of the three traditional parties.

Although there is no easy division of the daily papers

in Flemish: *Het Laatste Nieuws* (295,000), *De Standaard* (326,000), *Het Volk* (216,000), and *Gazet van Antwerpen* (195,000). The major weeklies include *Ons Land* (245,000), *Le Soir Illustré* (75,000), and *Le Patriote Illustré* (80,000), the latter two associated with the dailies *Le Soir* and *La Libre Belgique* respectively; and the cultural periodicals *Pourquoi Pas?* (110,000) and *Europe Magazine* (76,000). The popular women's periodical *Femmes d'Aujourd'hui* (1,250,000) has the distinction of considerable sales in France. Some periodicals are printed in French and in Flemish.

BULGARIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Bulgaria, in the eastern Balkans, is bounded to the north by Romania and to the east by the Black Sea. Turkey and Greece lie to the south and Yugoslavia to the west. The climate is one of fairly sharp contrasts between winter and summer. The language is Bulgarian. Most people adhere to the Bulgarian Orthodox Church and there is a substantial minority of Muslims. The flag carries three horizontal stripes of white, green and red with the white uppermost. The capital is Sofia.

Recent History

Bulgaria was declared a People's Republic in 1946, Dimitrov becoming Prime Minister in a government of the Fatherland Front. In 1949, Bulgaria became a founder-member of the Council for Mutual Economic Aid (CMEA) and in 1955 she joined the Warsaw Pact. After the death of Stalin the country entered into a more liberal period. Bulgaria was admitted to the United Nations in 1955. Following the expulsion from the Communist Party of the two previous Prime Ministers, Todor Zhivkov became Prime Minister in November 1962.

Government

Bulgaria is a People's Democracy modelled on the Soviet Union. The National Assembly is the supreme organ of state power. It is elected for a four-year term and meets twice yearly. It appoints the Presidium, initiates legislation and elects the Prime Minister. The Council of Ministers is the supreme executive organ and is responsible to the National Assembly or to the Presidium between sessions. The Communist Party is the main policy-making organ and plays a leading part in government. Between Party Congresses work is carried on by the Central Committee and the Political Bureau.

Defence

Bulgaria is a member of the Warsaw Pact. National Service is for two years in the Army and three years in the Navy and Air Force. Total armed forces strength is 154,000, comprising Army 125,000, Air Force 22,000 and Navy 7,000. Para-military forces number 15,000, including border troops. There is a People's Militia of 150,000. Defence estimates for 1969 total 272 million Lev's.

Economic Affairs

Bulgaria is a very fertile country and since the end of the Second World War her agriculture has been thoroughly reorganized on a large-scale co-operative and mechanized basis. Wheat, maize, beet and barley are the chief crops. Farm produce is being marketed in more than 60 countries and amongst Bulgaria's chief exports are fruit, vegetables, tomatoes and tobacco. Industry is publicly owned and has expanded rapidly in the last twenty years. Engineering, in particular, has been greatly developed, as have the chemical, fertilizer and metallurgical industries. Power output in 1967 amounted to 13,600 million kWh. Coal, iron ore, copper, lead and zinc are mined. Some oil is extracted on the Black Sea coast. Foreign trade is a state monopoly.

Transport and Communications

Inland transport is by rail, road and waterway. There are about 3,600 miles of railway track and 21,900 miles of roads. The Danube is the main waterway used by some 97 vessels with an average tonnage of 990 tons. External services link Black Sea ports to Russia, the Mediterranean and West Europe. TABSO, the state airline maintains services with East European capitals and other capitals in Europe and the Middle East.

Social Welfare

State social insurance is directed by the Department of Public Insurance and the Pensions Directorate under the Ministry of Labour and Social Welfare. State insurance contributions are compulsory for all workers irrespective of the nature of their work but contribution payments, rights and benefits are scaled according to the following three categories: workers and employees, labour co-operative farmers, private craftsmen and private farmers. Insurance contributions are determined by the Council of Ministers. Depending on the category of worker, contributions are either paid by the enterprises, employers, etc., who in turn levy the employees and workers, or they are paid by the workers individually.

Insured persons are paid money compensation during the time of sick leave, the amount of compensation depending on the duration of uninterrupted years of service. Every woman who is insured is entitled to full paid leave for so many days before and after childbirth—the amount of leave allowed depending on the number of children in the family already, and the number of years the woman has been insured. In 1967 the Bulgarian government increased the size of grants paid to mothers of large families. Disability and old age pensions are paid to those who have contributed to the insurance scheme. The amount of pension will vary according to the nature of work the disabled or retired person was formerly engaged in, his length of service and his age.

Since 1951 all medical services and treatment have been free for the whole population, and these are provided for by the state medical authorities. All medical treatment establishments and medical schools, training colleges and research institutes are controlled by the Ministry of Public Health. Departments of Public Health in the Regional People's Councils actually supervise medical work together with the Bulgarian Red Cross.

Education

The Bulgarian educational system follows the Soviet system more closely than the other Eastern European countries. Much importance has been attached to the development of education in Bulgaria, with the result that considerable progress has been made in recent years. A series of educational acts were passed between the years 1944 and 1950 and these provided for expansion in the educational field. In 1959 a law was passed for the "further development of education in the Bulgarian People's Republic".

In 1968, 378,770 children between the ages of three and

BULGARIA—(THE CONSTITUTION, THE GOVERNMENT)

and order. These councils report at least once a year to their electors on their activities.

JUSTICE

The judicial authorities apply the law. Justice is independent and subject only to the law. Lay judges (Assessors) also take part in the dispensation of justice. Judges of all ranks and assessors are elected except in special cases fixed by law. Supreme judicial control over every kind of court is exercised by the Supreme Court of the People's Republic, which is elected by the National Assembly for a term of five years.

The Chief Prosecutor, who is also elected by the National Assembly, is responsible to it alone for his punishment of crimes which are detrimental to the national and economic interests of the Republic or affect its independence.

THE RIGHTS AND DUTIES OF CITIZENS

All citizens are equal before the law. No privileges based on national origin, religion, sex or property are recognized. All preaching of racial, national or religious hatred is punishable by law.

Women have equal rights with men in all spheres in

Labour is recognized as the basic factor of public and

sions and medical treatment are guaranteed.

All citizens have the right to education, which is secular and democratic. Elementary education is free and compulsory. National minorities have the right to be educated in their own tongue, and to develop their national culture, although the study of Bulgarian is compulsory.

The Church is separate from the State. Citizens have freedom of religion and conscience. However, misuse of the Church and religion for political ends and the formation of religious organizations with a political basis is prohibited.

Citizens are guaranteed freedom of speech and of the Press, secrecy of correspondence, inviolability of person and dwellings, and the right of association and assembly except for fascist and certain other meetings.

Military service is compulsory for all male citizens.

BULGARIA—(INTRODUCTORY SURVEY, STATISTICAL SURVEY)

seven years attended non-compulsory crèches (*jasli*) or kindergartens (*detski gradini*). Education is compulsory for children between the ages of seven and fifteen years, when they attend the elementary eight-class school (*osnovno učilište*), and are taught both general and specialized subjects. The elementary eight-class school provides the first two stages of the "eleven-year school". Only 3,038 children (0.34 per cent) of those liable for compulsory education do not attend school. More than 95 per cent of all Bulgarian children continue with their education after the age of fifteen years, when education is no longer compulsory. There are three types of school in Bulgaria to which a student may progress after he has completed the basic school. The *gimnazia* provides a general education and completes the third stage of the "eleven-year school", the *technikum* is a vocational school offering a general curriculum together with a course leading to vocational qualifications in various branches of industry, agriculture, etc. The third type of secondary school is the *profesionalno tehničko učilište* (vocational technical school), which is equivalent to a trade or an apprentice school, and which provides a general curriculum together with practical work in factories and on farms. Each student may choose freely whichever secondary school he wishes to attend, and about 40 per cent choose the *technikum*, while 20 per cent choose the *profesionalno tehničko učilište*. Some 2,500 pupils attend special schools for art, ballet, foreign languages, etc.

Higher education in Bulgaria can be divided into two main categories, i.e. *poluvisši instituti*, which can best be described as teacher training colleges, and *visši učebni zavedenija*, or higher educational institutes, including universities. There are 16,000 students in *poluvisši instituti* including part-time students, while there are 85,270 stu-

dents in 26 higher institutes; these are all situated in Sofia except for four in Plovdiv, Russe, Svishtov and Varna.

Tourism

Black Sea resorts are very popular, visitors coming from Russia and East Europe. In 1962 the Government launched a campaign to attract tourists from the West and tourism, particularly from the United Kingdom, has increased with over a million visitors in 1965. As part of the 1967 International Year of Tourism, Bulgaria abolished visas for all foreign citizens visiting the country for 24 hours to two months and announced that Bulgaria would dispense with visas after 1967 on a basis of reciprocity. The tourist exchange rate is 4.8 Leva to £1 sterling.

BULGARIA—(THE CONSTITUTION)

THE CONSTITUTION

BULGARIA was formerly a monarchy, but on September 15th, 1946 King Simeon was deposed and Bulgaria was declared a Republic. On December 4th, 1947, a new Constitution was approved by the National Assembly. The following are its salient features:

Bulgaria is a People's Republic with a representative Government. All power derives from the people and belongs to the people, being exercised through freely elected representative organs and referenda.

All citizens of over 18 years of age, irrespective of sex, race, religion or social status, are eligible to vote and to be elected.

All representative organs of the State are elected by a general, equal, direct and secret ballot. Representatives are responsible to their electors and may be recalled.

SOCIAL-ECONOMIC ORGANIZATION

National property is the main basis of the country's economic development. The State can itself manage or concede to another the management of the means of production at its disposal.

All mineral and other underground natural resources, forests, waters, railway and air communications, posts, telegraphs, telephones, and radio broadcasting are State (national) property. All economic activity is directed by the State, and co-ordinated by a State Economic Plan.

Private property and its inheritance together with private enterprise in economy, are recognized and protected by law, but no one can exercise his right of ownership to the detriment of the public interest, and private property may be subject to compulsory restrictions or expropriation for State or public use, and against fair indemnity.

Foreign and home trade are directed and controlled by the State. The State aids and fosters co-operative associations.

The State can nationalize fully or in part certain branches of individual enterprise or industry, trade, transport and credit, and may reserve to itself the exclusive right to produce or trade in any goods which are of particular importance to national economy. Private monopoly agreements and associations such as Cartels and Trusts are prohibited.

The land belongs to those who till it. The law determines how much land private persons may own, and large landed estates are not permitted.

Co-operative farms are fostered and aided by the State and enjoy its special protection. The State may also organise State farms. Labour is the object of the State's care in every aspect, and is directly assisted by the general economic and social policy, cheap credits, tax systems and co-operative associations.

THE NATIONAL ASSEMBLY

The National Assembly is the supreme organ of State power, and the only legislative organ of the People's Republic. It is composed of elected representatives of the People's—one for every 30,000 inhabitants. It is elected for a term of four years, and is convened at least twice a year. Representatives may be recalled before their term of office has expired. The powers of the National Assembly are very far-reaching; it elects the Presidium of the

National Assembly, consisting of the President, two vice-presidents, fifteen members and a secretary; passes all laws; elects the Prime Minister; decides on the holding of referenda; votes on the general economic plan of the country and the budget; decides questions of war and peace; grants amnesties; elects the President of the Supreme Court and the Public Prosecutor; and can amend the Constitution by a two-thirds majority of the whole Assembly.

Legislative initiative belongs to the Government and to the People's Representatives, who can introduce Bills. Half the total number of representatives constitutes a quorum, and decisions are then taken by a simple majority.

THE PRESIDIUM

The Presidium is invested with the following powers: to represent the Republic in its international relations; to appoint ministers plenipotentiary; to appoint the ministers indicated by the Prime Minister; to decide the date of a general election; to convene and adjourn the National Assembly; to ratify international treaties made by the Government; to exercise the right of pardon; to exercise general control over the activities of the ministers, by requiring and receiving reports, and in case of disagreement by referring back for further consideration the orders of individual ministers or of the Council of Ministers, and to repeal all decisions and directives of the Council of Ministers which do not conform with the Constitution and the Laws.

THE GOVERNMENT

The Government (Council of Ministers) is the supreme executive administrative organ of the State. It is composed of the Prime Minister and Deputy Prime Ministers of the Council of Ministers, the Ministers, the Chairmen of the State Planning Commission and of the Committee for State Control, and the chairmen of various Committees at the Council of Ministers. The Government is responsible and gives account to the National Assembly, or to the Presidium when the Assembly is not in session. Persons who are not Representatives may be members of the Government. The Government controls the administration of the State and of its branches, is responsible for carrying through the general economic plan, and for securing public order and the observance of the laws. The Council of Ministers may take under its direct control certain branches of the administration by forming for the purpose commissions, committees, etc., and services directly subordinate to it. The members of the Government are jointly responsible for the general policy of the Government, and are individually responsible for their respective actions.

LOCAL GOVERNMENT

The territory of the Republic is divided for administrative purposes into Municipalities and Counties, which are governed by Municipal and County People's Councils, elected by the local population for a period of three years. Their function is to implement all economic, social and cultural undertakings of local significance in conformity with the laws of the country. They prepare the economic plan and budget of the Municipality and the County within the framework of the State Economic Plan and the State Budget, and direct its execution. They are responsible for the correct administration of State property and economic enterprises in their areas, and for the maintenance of law

THE CONSTITUTION

SUMMARY

The Constitution entered into force on August 16th, 1960, on which date Cyprus became an Independent Republic. In March, 1961 Cyprus was accepted as a member of the Commonwealth

ARTICLE I

The State of Cyprus shall be a Republic in which the Greek and Turkish Communities shall be equal and shall enjoy equal rights and duties.

ARTICLES 2-5

The Greek Community comprises all citizens of the Republic who are of Greek origin and whose mother tongue is Greek or who share the Greek cultural traditions or who are members of the Greek Orthodox Church.

The Turkish Community comprises all citizens of the Republic who are of Turkish origin and whose mother tongue is Turkish or who share the Turkish cultural traditions or who are Moslems.

Citizens of the Republic who do not come within the above provisions shall, within three months of the date of the coming into operation of this Constitution, opt to belong to either the Greek or the Turkish Community as individuals, but, if they belong to a religious group, shall opt as a religious group and upon such option they shall be deemed to be members of such Community.

The official languages of the Republic are Greek and Turkish.

The Republic shall have its own flag of neutral design and colour, chosen jointly by the President and the Vice-President of the Republic.

The Greek and the Turkish Communities shall have the right to celebrate respectively the Greek and the Turkish national holidays.

ARTICLES 6-35

Fundamental Rights and Liberties

ARTICLES 36-53

President and Vice-President

The President of the Republic as Head of the State represents the Republic in all its official functions, signs the credentials of diplomatic envoys and receives the credentials of foreign diplomatic envoys, signs the credentials of delegates for the negotiation of international treaties, conventions or other agreements, signs the letter relating to the transmission of the instruments of ratification of any international treaties, conventions or agreements, confers the honours of the Republic.

The Vice-President of the Republic as Vice-Head of the State has the right to be present at all official functions, at the presentation of the credentials of foreign diplomatic envoys, to recommend to the President the conferment of honours on members of the Turkish Community which recommendation the President shall accept unless there are grave reasons to the contrary. The honours so conferred will be presented to the recipient by the Vice-President if he so desires.

The election of the President and the Vice-President of the Republic shall be direct, by universal suffrage and

secret ballot, and shall, except in the case of a by-election, take place on the same day but separately.

The office of the President and of the Vice-President shall be incompatible with that of a Minister or of a Representative or of a member of a Communal Chamber or of a member of any municipal council including a Mayor or of a member of the armed or security forces of the Republic or with a public or municipal office.

The President and Vice-President of the Republic are invested by the House of Representatives.

The President and the Vice-President shall hold office for a period of five years.

The Executive power is ensured by the President and the Vice-President of the Republic.

The President and the Vice-President of the Republic in order to ensure the executive power shall have a Council of Ministers composed of seven Greek Ministers and three Turkish Ministers. The Ministers shall be designated respectively by the President and the Vice-President of the Republic who shall appoint them by an instrument signed by them both.

The decisions of the Council of Ministers shall be taken by an absolute majority and shall, unless the right of final veto or return is exercised by the President or the Vice-President of the Republic or both, be promulgated immediately by them.

The executive power exercised by the President and the Vice-President of the Republic conjointly consists of

- Determining the design and colour of the flag
- Creation or establishment of honours
- Appointment of the members of the Council of Ministers
- Promulgation by publication of the decisions of the Council of Ministers
- Promulgation by publication of any law or decision passed by the House of Representatives
- Appointments and termination of appointments as in Articles provided
- Institution of compulsory military service.
- Reduction or increase of the security forces
- Exercise of the prerogative of mercy in capital cases
- Remission, suspension and commutation of sentences
- Right of references to the Supreme Constitutional Court and publication of Court decisions

THE PRESS

The establishment and general running of newspapers and periodicals is defined in the Press law, consisting of Chapter 79 of the pre-independence Code of Law, later

and impart information and ideas without interference by any public authority and regardless of frontiers. This freedom is subject to legally specified conditions and restrictions in the interest of state security, public safety, order, public health and morals, the protection of the reputation and the rights of others and the preservation of the authority and impartiality of the judiciary.

Cyprus has a small but vigorous Press, catering for all political viewpoints in the twofold community, and constituting the most influential of the communications media. Most newspapers are owned by private individuals but *Patris* is owned by a limited company. Although several dailies have a clear political leaning, and *Haraugh* is affiliated to AKEL, the Progressive Party, none is directly owned by a political party.

Of the fourteen dailies, nine are in Greek, four in Turkish and one in English. This paper, the *Cyprus Mail*, appears each day, but all the Greek and some of the Turkish dailies do not publish a Monday edition, when most of the weekly papers appear.

Philelephtheros, *Agon* and *Makh* (linked with the weekly *Tharros*) tend to be pro government, while *Haraugh* (associated with the weekly *Nei Keri*) reflects the views of the extreme left, and *Patris* those of the political right. The moderate-liberal *Eleftheria*, a paper of some prestige, is politically independent, like the *Cyprus Mail*. *Bozkurt* and *Halkin Sesi* are the chief spokesmen for the Turkish community. *Eleftheria*, *Philelephtheros* and the *Cyprus Mail* are the dailies most respected for their serious news coverage. *Makh* and *Haraugh* are also very influential, as they are the most widely read, with circulations of over ten thousand. Though low by West European standards this figure is high in comparison with Middle Eastern circulation figures. Precise, reliable circulation figures are virtually unobtainable.

Among the most respected weekly newspapers are the moderate *Kypros* and *Alithia*, though *Tharros* and *Nei Keri* are very popular. There are also a number of trade union papers, headed by *Ergatis Vima*, the organ of the Pan-Cyprian Federation of Labour.

CYPRUS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Cyprus is an island in the eastern Mediterranean about 60 miles south of Turkey. It is the third largest Mediterranean island after Sicily and Sardinia. Climate is mild though snow falls in the mountainous south-west between December and March. About four-fifths of the people speak modern Greek and the remainder Turkish. The Greek-speaking community adhere to the Greek Orthodox Church while most of the Turks are Muslims. The flag is white with a map of Cyprus in gold in the centre garlanded by olive leaves. The capital is Nicosia.

Recent History

Cyprus was created a British Crown Colony in 1925. In 1955 Greek-Cypriot nationalists seeking independence and unification with Greece resisted British rule by force. The civil war ended in 1959 with the granting of independence. Unification with Greece and the Turkish-Cypriot demand for partition were both rejected. Britain remained in certain agreed areas to be used as military bases. Cyprus was admitted to the United Nations in 1960 and joined the Commonwealth in 1961. Serious fighting broke out between Greek and Turkish Cypriots in late 1963 and in April 1964 a United Nations Peace-Keeping force was set up and a UN Mediator appointed. As yet, no proposed solution has been acceptable to both Greek and Turkish communities.

In February 1968 President Makarios was re-elected by a large majority. Since the summer of 1968 there has been a renewal of normal social and commercial exchange between the two communities, and the United Nations force has been considerably reduced.

The fifteen Turkish members of the House of Representatives have not attended sessions since January 1964, and in their absence a number of measures have been passed which, without amending the Constitution, make temporary provisions for the administration of the country (see below, Constitution).

Government

According to the Constitution, legislative authority is vested in a House of Representatives elected by adult universal suffrage for a five-year term and consisting of 35 members from the Greek community and 15 from the Turkish community. The House exercises authority on all matters save those reserved for the Communal Chambers. These bodies, elected by both communities, deal with communal affairs such as religion, teaching and culture. Executive authority is vested in the President who is Greek-speaking and the Vice-President who is from the Turkish community. They are assisted by a Council of Ministers composed of seven Greek and three Turkish members.

Note: Turkish participation in government and legislation was withdrawn in January 1964. In March 1965 the Greek Communal Chamber was abolished and its functions taken over by the Ministry of Education. In June 1966, all Turkish judges resigned.

Defence

The National Guard has been increasingly modernized in training and equipment since its foundation in 1964. National Service is compulsory, the term of conscription has been increased from six months to two years, and all males between the ages of eighteen and fifty are liable. The Cyprus Police Force, which is armed, "is mainly employed for the maintenance of law and order, the preservation of peace and the prevention and detection of crime".

Economic Affairs

The economy is based mainly on agriculture. Principal crops are wheat, barley, vegetables and citrus fruits. Vines are cultivated and wine produced. Mining provides two-thirds of the island's exports. The most important minerals are cupreous and iron pyrites, asbestos, copper and gypsum. There is no heavy industry and manufactures are limited to food processing, textiles and woodworking. In 1966 a refinery was opened near Larnaca by a consortium of Shell, Mobil and B.P. Despite political and military troubles the country is relatively prosperous, with an estimated *per capita* income of £297 in 1968.

Transport and Communications

There are no railways in Cyprus. Towns and villages are linked by asphalted roads with frequent bus services. The three main ports are Famagusta, Limassol and Larnaca which provide cargo and passenger services to Greek and other Mediterranean ports. There is an international airport at Nicosia.

Social Welfare

Since the foundation of the Republic a comprehensive social insurance scheme covering every working male and female and their dependants has been established. It embraces protection against arbitrary and unjustified dismissal, industrial welfare, and tripartite co-operation in the formulation and implementation of labour policies and objectives. A second five-year plan for economic and social development was introduced in 1967. Benefits and pensions from the social insurance scheme cover unemployment, sickness, maternity, widows, orphans, old age and death.

Education

The educational system in Cyprus is centralized under the authority of the Ministry of Education. A six-year course of elementary education, starting usually at the age of six is compulsory for all children. There is a *Six Year Elementary School* in every community, supplemented in some areas by *Lower Mixed Schools* (infant) and *Eight Grade Schools*. About 75 per cent of all pupils progress after examination to the non-obligatory *Gymnasia* (secondary schools), which normally demand fees. Three years at a *Lower Secondary School* gives a general practical education, and a further three years of *Senior Secondary School* allows for specialization in classical, scientific, and commercial directions. There are also technical, vocational, and agricultural schools. A certain number of scholarships are

CZECHOSLOVAKIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Czechoslovak Socialist Republic lies in Central Europe between 48°-51° N latitude and 12°-23° E longitude. Its neighbours are Poland to the north, the German Democratic Republic to the north-west, the German Federal Republic in the west, Austria to the south-west, Hungary to the south-east and the U.S.S.R. in the extreme east. The state is composed of two main population groups, the Czechs (65.1 per cent of the total population) and the Slovaks (28.9 per cent). The climate is continental with warm summers and cold winters, average mean temperature 9°C (49°F). Czech and Slovak are the official languages. About 70 per cent of the people are Roman Catholics, 15 per cent Protestants and the remainder unaffiliated. The flag is divided horizontally red and white with a blue triangle superimposed. The capital is Prague.

Recent History

The 1946 post-war elections returned the Communists as the strongest single party and in 1948 they assumed full power. The country aligned itself with the Soviet-led East European bloc and joined the Council for Mutual Economic Assistance (CMEA) and the Warsaw Pact military alliance. Government followed a rigid Stalinist pattern until 1963 when a new Government under Josef Lenárt was formed. In January 1968 Alexander Dubček succeeded Antonín Novotný as Party Secretary and in April, following Mr. Novotný's resignation as Head of State, Oldřich Černík became Prime Minister. The policies of the new government expressed a spirit of independence and liberalisation and envisaged widespread reforms. On August 21st, 1968, Warsaw Pact forces occupied Prague and other major cities. The Soviet Government has since exerted heavy pressure on Czech leaders to suppress their reformist policies, and in April 1969 Alexander Dubček was replaced by Dr. Gustáv Husák as First Secretary of the Communist Party. Relations with the Soviet Union steadily strengthened throughout 1969. In January 1970 Oldřich Černík resigned from his post as Prime Minister, to be succeeded by the conservative Lubomír Štrougal.

Government

Czechoslovakia consists of the Slav nations, the Czechs and the Slovaks, united in one state and sharing equal rights.

The Head of State is the President, elected for a five-year term by the Federal Assembly, to whom he is accountable. On 1st January, 1969, Czechoslovakia became a federal state in which Czechs and Slovaks have equal representation. There is a federal government, elected for a four-year term by all over the age of 18, as well as separate Czech and Slovak governments. The administration of Slovakia is carried out from Bratislava while foreign affairs, defence and important economic questions are run from Prague.

Defence

Czechoslovakia is a member of the Eastern European Mutual Assistance Treaty, the "Warsaw Pact". Military service is compulsory and lasts for two years in the Army and three years in the Air Force. Service with the reserve lasts until the age of fifty years. The combined strength of

the Army and Air Force is 230,000 men, plus 35,000 paramilitary forces (including border troops). There is a People's Militia of up to 100,000. Defence estimates for 1969 total 13,400 million crowns. As a result of the invasion of 1968, Soviet forces have taken up permanent positions on the frontier with Federal Germany.

Economic Affairs

Agriculture has been collectivized and about 90 per cent of the land is in Agricultural Co-operatives, State Farms or Communal Enterprises.

Industry is state-owned. Until 1961 heavy industry received precedence under development plans, but under the Third Five-Year Plan, 1961-65, greater stress was laid on light industry. This Plan had to be abandoned due to economic difficulties, but elements were incorporated in a Seven-Year Plan, 1964-70, in 1966 this was superseded by the Fourth Five-Year Plan, 1966-70, which has aimed to strike a balance between industry and agriculture, power and chemical industries are to be developed, machinery building modernized and consumer services improved. Czechoslovakia is an important engineering nation with a considerable output of motor cars and motor cycles. Other important industries are glass, beer, ceramics and textiles. In 1967 the national income rose by 8 per cent, industrial production by 7.1 per cent over 1966, and agricultural production by 3.5 per cent. Figures for 1969 are not so promising, and indicate that the Czechoslovak economy is going through a difficult period. Industrial output rose by 3.4 per cent over 1968, and labour productivity rose only by 2.7 per cent. For the first half of 1969, total exports have shown an increase of 1 per cent.

In May 1968 Dr. Ota Šik, then Deputy Prime Minister, announced plans for radical changes in the nation's economy with the aim of making it competitive both at home and in Western markets. These plans included the complete decentralization of industry, the granting of full autonomy to individual state enterprises, and the acceptance of Western capital for joint industrial ventures. As a result of the invasion of 1968, however, these plans were shelved. In October 1969, in the first policy speech of the new government, Oldřich Černík indicated that there would be a return to strong central management of the economy. Economic plans were being made in October for the period up to 1975.

Transport and Communications

About 60 per cent of all freight traffic is carried by the railways which have a total length of 8,250 miles, 1,484 of which are electrified. Roads carry about 70 per cent of the passenger transport. The Elbe and Danube are navigable and Czechoslovakia's overseas trade passes through East German, Polish and Black Sea ports. Civil aviation is important and there are about 60 regular internal services.

Social Welfare

A single and universal system of social security was established in Czechoslovakia after the Second World War. In 1948 a law was passed by which all workers and employees, irrespective of the nature of their work, benefited equally from the new insurance scheme. In 1966 the general

Note: The following measures have been passed by the House of Representatives since January 1964, when the Turkish members withdrew:

1. The amalgamation of the High Court and the Supreme Constitutional Court.
2. The abolition of the Greek Communal Chamber and the creation of a Ministry of Education.
3. The unification of the Municipalities.
4. The unification of the Police and the Gendarmerie.
5. The creation of a military force by providing that persons between the ages of eighteen and fifty can be called upon to serve in the National Guard.
6. The extension of the term of office of the President and the House of Representatives by one year from July 1965; extended by a further year, July 1966; extended by a further year, July 1967.
7. New electoral provisions; abolition of separate Greek and Turkish rolls; abolition of post of Vice-President.

REVISED ELECTORAL SYSTEM, 1968

By a new law passed in the National Assembly new, larger electoral districts are to be established from which from four to eight deputies will be elected. Alternative candidates may also be put forward by the National Front, permitting a choice by the electorate. Those candidates who poll the most votes will become deputies, and the

remainder will be made alternate deputies, in all cases candidates must poll more than 50 per cent of the votes. The new post of alternate deputy will give deputies the Assembly.

THE PRESS

Although the development of the Czechoslovakian Press has been considerably affected by the events of 1968, its basic purpose is still that defined in the October 1966 Press Law (effective from January 1st, 1967) "to give as far as possible complete information . . . to advance the interest of socialist society . . . to promote the people's socialist awareness of the policy of the Communist Party as the leading force in society and state".

This law, which codified previous legislation on the rights and duties of journalists and publishers and established a new Central Administration for Publications under the Ministry of Education and Culture (later under the Ministry of Culture) expression and publishers and at the disposal.

tions". Hence, only political parties and such social institutions as trade unions, youth unions, cultural associations and rural co-operatives may own newspapers and periodicals. Private ownership is forbidden. Such a democratic press structure has not, however, precluded some control by the Ministry of the Interior or the Ministry of Culture. Nevertheless, for some years before 1968 freedom of publication in Czechoslovakia was unrivalled in the rest of Eastern Europe and, although only *The Times* and *Le Monde* of non-communist Western newspapers were allowed, Western books circulated in large editions.

The desires for greater freedom of expression were stimulated by cultural and literary magazines in the late 1950s and early 1960s, by the radical changes in economic policy, approved during 1964 and 1965, though not

implemented until 1967, and by the increasing demands of individual writers. Demands from writers and dramatists critical of government policy reportedly reached a peak in June 1967 at the 4th Congress of the Czechoslovakian Writers' Union, where a resolution in favour of the abolition of pre-publication censorship was passed. As a result, the Ministry of Culture assumed control of the Union's influential weekly, *Literární noviny*, which had become, it was said, "a platform for opposition political views", and the Union's structure was decentralized. The Union of Czechoslovak Journalists at its October conference dissociated itself from the writers and criticism of censorship.

However, after the resignation of Antonín Novotný as First Secretary of the Communist Party in January 1968, the opposition of editors began to make the system of censorship unworkable, and censorship was suspended on March 5th, when the Party Presidium announced the abolition of ideological management of the press by the Ministry of the Interior's Central Publication Office, and the derestriction of sales of foreign literature. Four days earlier the Writers' Union had been allowed to resume publication of its weekly under the new title, *Literární listy*.

Press censorship was officially abolished by the Czechoslovakian National Assembly on June 26th, although the actual list of some 8,000 unpublishable items was reduced to only just under 5,000. By this time almost all circulation figures had increased substantially, in the cases of papers like *Práce* and *Mladá fronta* doubling or trebling, and the shortage of newsprint and modern printing facilities became a serious problem.

CYPRUS—(TRANSPORT, TOURISM)

TRANSPORT

RAILWAYS

There are no railways in Cyprus.

ROADS

There are about 4,500 miles of roads, of which over 1,880 miles have been asphalted. Buses run from Nicosia to the main towns and most villages, and there are taxi services between the principal towns.

SHIPPING

Famagusta is the main port of the island and has a natural harbour; vessels of an overall length of 430 feet and a maximum draught of 22 feet can be accommodated alongside the quay in the inner harbour; ships with a maximum draught of 30 ft. can be accommodated in the outer harbour. There is open-roadstead accommodation at Larnaca and Limassol. The harbours of Paphos and Kyrenia offer good anchorage to small vessels and fishing craft. There is very little coastal shipping.

There are over fifty lines running cargo and passenger services to Cyprus at approximately weekly, bi-monthly and monthly intervals.

CIVIL AVIATION

The airport at Nicosia has recently been extended: the 8,000 ft. runway is suitable for all types of aircraft, including jets, and an extension to 10,700 ft. is planned; new terminal buildings costing £1.1 million (including £500,000 from a British Government grant) were opened by President Makarios in March 1968.

Cyprus Airways: Head Office: 16 Byron Avenue, P.O.B. 1903, Nicosia; f. 1946; Chair. G. ELIADES; Gen. Man. E. SAVVA; routes to Ankara, Istanbul, Tel-Aviv, Cairo,

Rhodes and Beirut; operates two Viscount 806; routes to Athens, Rome and London operated in association with B.E.A. by Trident 2E. Two Trident 2E are on order, one to be put in operation from November 1969 on routes to London, Frankfurt, Athens and the Middle East and the second from May 1970.

Cyprus is also served by the following foreign airlines: B.E.A., El Al, Interflug, K.L.M., Lufthansa, Malev, M.E.A., Olympic Airways, Sabena, Swissair, Syrian Arab Airlines, Türk Hava Yolları and United Arab Airlines.

CZECHOSLOVAKIA—(INTRODUCTORY SURVEY)

protection of health was provided for by law, with particular emphasis on the prevention of illness rather than treatment and cure. Medical care, treatment, medicines, etc. are free for the entire Czechoslovak population. The National Health Insurance Scheme is administered by the Revolutionary Trade Union Movement, which also supervises other aspects of social welfare such as protection of the individual at work, housing conditions and recreation schemes. Since 1956 sickness benefit has been paid to all those workers who are temporarily unable to work due to illness, injury, medical treatment, etc. Sickness benefit may be paid for a maximum period of two years after which time disablement pension applies. Social security is guaranteed for all through different schemes: for wage-earners, members of co-operative societies, members of agricultural co-operatives, pensioners and members of the armed forces. Benefits and rights are the same for all these groups. Great importance is attached today to maternity benefits and family allowances, which are paid according to the situation of the woman and family concerned. It is hoped that in the near future these allowances will be increased to help large families with low incomes. Plans are being made to help old people by increasing old-age pensions.

Education

Plans for the expansion of the Czechoslovak educational system were launched in 1960. Emphasis has since been laid on the lengthening of the basic school, expansion of vocational and technical education, and extra educational facilities for adults. Children between the ages of three and six years attend kindergarten (*mateřská škola*). This form of primary education has proved very popular in recent years and it is hoped that in the near future all children may be assured a place at kindergarten. Education is compulsory between the ages of six and fifteen years, when children attend the basic school (*základní devítiletá škola*). There are 10,942 basic schools with 2,052,526 pupils in attendance (1968–69). At first a general curriculum is provided, followed by more specialized subjects. Owing to lack of classroom space, the basic school suffers from overcrowding and many children in the larger towns and cities are forced to attend lessons in shifts.

The secondary school system in Czechoslovakia is similar to those of other countries in Eastern Europe. The vast majority of Czechoslovak children continue their education in some form or other after the compulsory basic school. The general secondary school (*střední všeobecně vzdělávací škola*), provides three-year courses in either mathematics and science, or languages and the social sciences. Vocational secondary schools (*střední odborná škola*), as their name suggests, provide a general education

together with vocational training. The apprentice school (*učňovská škola*) trains the student to enter a trade in industry, agriculture, etc., straight from school. Within the higher educational system there are 649 technical and teacher training colleges with 278,685 students, 35 higher institutes including 6 universities with 137,654 students. In 1959 a new type of school was set up, the *střední škola pro pracující*. This school is attended by workers and adults and in most cases is actually run by industrial plants for their employees. They are immensely popular and have attracted far greater numbers than was originally anticipated.

Tourism

Czechoslovakia has magnificent scenery, with winter sports facilities. Prague is the best known of the historic cities and there are famous castles and cathedrals, numerous resorts and 29 spas with natural mineral springs, notably Mariánské Lázně (Marienbad) and Karlovy Vary (Karlsbad). 4,165,957 tourists visited Czechoslovakia in 1968, including a considerable proportion from West European and overseas countries. There is a special tourist exchange rate of 38.74 koruna to £1 sterling.

Visas are required by nationals of all non-communist countries.

Sport

Two voluntary bodies, the Czechoslovak Union of Physical Training and the Czechoslovak Union for Physical Culture, plan the development of sport, conduct research and encourage physical training of all kinds. According to the latest available figures, there are about 7,842 sports clubs in Czechoslovakia, having a total of 1,752,460 members. The largest sections are football 367,704 members, track and field athletics with 60,397 members, handball 49,232 members, followed by basketball, ice-hockey, water sports and chess in order of popularity.

PUBLISHERS

In May 1949 legislation was passed making the publication, printing, illustration, and distribution of all books and music the prerogative of the State. These activities are now restricted to the Government, political parties, trade unions, and national and communal bodies. However churches and religious bodies are permitted to publish if the State will accept their work for printing. In 1968 two new publishing associations were established, the Czech Association of Publishers and Booksellers, and the Slovak Association of Publishers and Booksellers. These operate in Czech lands and in Slovakia respectively. Almost all publishing houses are members of their appropriate association. In 1968, 5,916 titles were published.

THE CONSTITUTION

(Proclaimed on July 11th, 1960; amended October 1968.)

The Czechoslovak Socialist Republic is a unitary State of two fraternal nations possessing equal rights, the Czechs and the Slovaks.

According to the Constitution, work in the interests of the community is a primary duty and the right to work a primary right of every citizen. All citizens have equal rights and equal duties without regard to nationality and race. Remuneration for work done is based on its quantity, quality and social importance. Men and women have equal status. All citizens have the right to health protection, education and leisure after work including paid holidays. Other rights include: freedom of expression, assembly, inviolability of the person, the home, mails, etc. Everyone has the right to profess any religious faith or to be without religious conviction.

The economic foundation of the State is the Socialist economic system which excludes every form of exploitation of man by man. The means of production are socially owned and the entire national economy is directed by plan. Socialist ownership includes both national property such as mineral wealth, the means of industrial production, banks, etc., and co-operative property. The land of members of agricultural co-operatives remains the personal property of the individual members, but is jointly farmed by the co-operative. Small private enterprises based on the labour of the owner himself and excluding exploitation of another's labour power are permitted. Personal ownership of consumer goods, family houses and savings derived from labour is inviolable. Inheritance of such personal property is guaranteed.

By the Constitutional Law on Federalization, passed by the National Assembly on October 27th, 1968, the Czechoslovak Socialist Republic became, on January 1st, 1969, a federal state of two nations of equal rights—the Czechs and the Slovaks. It is composed of two republics: the Czech Socialist Republic and the Slovak Socialist Republic. Each of them has its own government.

The supreme organ of state power in the Czechoslovak Socialist Republic is the Federal Assembly (Parliament) which elects the President of the Republic for a five-year term of office. The Federal Assembly consists of two chambers of equal rights: the House of the People and the House of Nations. The composition of the House of the People corresponds to the composition of the population of the Czechoslovak Socialist Republic and of its 200 deputies, 138 are Czechs and 62 Slovaks. The House of Nations has 150 deputies on parity basis: 75 are elected in the Czech Socialist Republic and 75 in the Slovak Socialist Republic.

The President, elected by the Federal Assembly, appoints the Federal Government. The Government is the supreme executive organ of State power in Czechoslovakia; it consists of a Prime Minister, his deputies, ministers and state secretaries. It is composed of seven ministries, seven federal committees and other bodies. Of these the Ministry of Foreign Affairs and the Ministry of National Defence are within the exclusive competence of the Federation, i.e. there are no corresponding portfolios in the governments of the republics. The second group of Federal Government organs are ministries and federal committees (the federal committees are composed equally of members from the Czech Socialist Republic and the Slovak Socialist Republic), sharing authority with organs of the two re-

publics, i.e. there are corresponding portfolios in the national governments.

Each of the republics has its own parliament: the Czech National Council and the Slovak National Council. They are elected for a four-year term of office. The Czech National Council has 200 deputies, the Slovak National Council 150 deputies. The Czech Government consists of a Prime Minister, 2 deputy Prime Ministers and 18 Ministers; the Slovak Government consists of a Prime Minister, 2 deputy Prime Ministers and 16 Ministers.

National committees are the organs of popular self-government in the regions, districts and localities. They rely on the active participation of the working people of their area and co-operate with other organizations of the people. They direct local economic and cultural development, ensure the protection of socialist ownership and the maintenance of socialist order in society, see to the implementation and observance of laws, etc. They take part in drafting and carrying out the State plan for the development of the national economy and draw up their own budgets which form a part of the State budget. Commissions elected by the national committees are charged with various aspects of public work and carry out their tasks with the aid of a large number of citizens who need not be elected members of the national committees.

All representative bodies are elected, and the right to elect is universal, equal and by secret ballot. Every citizen has the right to vote on reaching the age of 18, and is eligible for election on reaching the age of 21. Deputies must maintain constant contacts with their constituents, heed their suggestions and be accountable to them for their activity. A member of any representative body may be recalled by his constituents at any time.

The execution of justice is vested in elected and independent people's courts. Benches are composed of professional judges and of judges who carry out their function in addition to their regular employment. Both categories are equal in making decisions. Judges are independent in the discharge of their office and bound solely by the legal order of the socialist State. The supervision of the observance of the laws and other legal regulations by public bodies and by individual citizens rests with the Office of the Procurator. The Procurator-General is appointed and recalled by the President of the Republic and is accountable to the Federal Assembly.

The Czechoslovak Constitution does not restrict itself to laying down a system of state organs but also sets forth the principles by which the life of society is to be guided. It is not just a Constitution of the State but a constitution for the whole of society. In economic, political and cultural life, in questions of social security and many other spheres it emphasizes the participation of citizens in the administration of public affairs and even transfers a number of functions that have hitherto pertained to state organs to the working people and their voluntary organizations.

The guiding force in society and in the State is the Communist Party of Czechoslovakia, a voluntary militant alliance of the most active and politically conscious citizens. It is associated with the other political parties, the Trade Union Movement and other people's organizations in the National Front of Czechs and Slovaks.

DENMARK

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Denmark consists of the peninsula of Jutland, the islands of Zealand, Funen and Bornholm and about 400 smaller islands between the North Sea and the Baltic. Outlying possessions are Greenland, and the Faroe Islands in the North Atlantic. Denmark is low-lying and the climate is temperate with cold winters. The language is Danish. The Danish Lutheran Church is the established Church and there are small communities of Roman Catholics, Baptists and Jews. The flag carries a white cross on a red background. The capital is Copenhagen.

Recent History

In 1948 Home Rule was granted to the Faroe Islands. In 1953 Greenland became an integral part of the Danish Kingdom. In the same year the Constitution of Denmark was radically revised. The major provisions of the new Constitution were to allow female succession to the throne, abolition of the Upper House and changes in the Court of the Realm, definition of Ministerial responsibility and changes in the franchise, including provision for referendum.

Denmark is a founder member of NATO and in 1953 joined the Nordic Council. In 1961 she joined the European Free Trade Association. A minority government led by the Social Democrats held power from 1964-67. Following a General Election in January 1968, a new coalition government was formed led by Hilmar Baunsgaard (Social Radical).

Government

Denmark is a constitutional monarchy, legislative power being vested in the King in conjunction with the Folketing (Parliament). Executive power is exercised by the King through his ministers. The Folketing is unicameral, elected by and from Danish subjects of 21 and over. The Faroe Islands and Greenland are each represented by two members.

Defence

Denmark maintains an Army of 33,000 men, a Navy of 8,000 men and an Air Force of 10,000 men. The Army consists of field forces and a home guard which has a force of about 70,000 men at its disposal. The Navy has frigates, escort vessels, submarines, minelayers, minesweepers and fast patrol craft. The Air Force has fighters and fighter-bombers of American and British types. National Service lasts for 14-16 months. Denmark has been a member of NATO since 1949. Total defence expenditure for 1969 was about 2,500 million Kroner, 8.5 per cent of the national budget.

Economic Affairs

Danish agriculture is internationally competitive and is organised on a co-operative basis. Farmers and small-holders are grouped in co-operative societies which market the produce and conduct scientific research. The co-operatives are united in national federations. Butter, eggs and bacon are the main exports, for which the principal markets are the United Kingdom and the German Federal Republic. Major industries are shipbuilding, engineering, chemicals, brewing, fishing and food processing. Danish-

designed furniture, electronics, porcelain, textiles and metal goods are finding a widening foreign market. Denmark maintains a considerable merchant fleet. It is a member of the European Free Trade Association (EFTA) and the Nordic Council and in 1967 applied for membership of the European Economic Community (EEC).

Transport and Communications

There are about 2,200 miles of railways, half of them operated by the State and the rest by companies in which the State or public authorities have a financial interest. There is an extensive bus service using many bridges. Ferry services connect the principal islands and Jutland and there are services to Sweden, Norway and Germany. Danish ships, local and ocean-going, have a tonnage of over 3 million.

Social Welfare

Denmark was one of the first countries to introduce State social welfare schemes. Principal services cover unemployment, sickness, old age and disability and are financed largely by State subventions. Health insurance is compulsory for all citizens over 21.

Education

Education is compulsory and free at the primary stage between 7 and 14 years. Secondary education which offers a wide scope for transfer from one form of education to another, is also given free as, on the whole, is university and other higher education. There are three universities, a technical university and a network of Folk High Schools for adults, chiefly young farmers.

Tourism

Tourism is organised by the National Travel Association of Denmark. Receipts from tourism totalled \$233 million in 1968, and expenditure was \$227 million.

Visas are not required for nationals of the following countries: Algeria, Australia, Austria, Belgium, Canada, Cyprus, Finland, France, German Federal Republic, Greece, Iceland, Ireland, Italy, Jamaica, Japan, Kenya, Liechtenstein, Luxembourg, Malaysia, Mexico, Monaco, Morocco, The Netherlands, New Zealand, Norway, Pakistan, Portugal, San Marino, Sierra Leone, Singapore, South Africa, Spain, Sweden, Switzerland, Tanzania, Thailand, Trinidad and Tobago, Tunisia, Turkey, Uganda, United Kingdom and Dependencies, U.S.A., Yugoslavia, and all countries of South and Central America.

Sport

Fifteen per cent of the population take an active part in sports. Practically all sport is amateur. The national game is football, and rowing, swimming and sailing are popular. Other sports include tennis, the Danish game of hand-ball, shooting and fishing.

Public Holidays, 1970

January 1 (New Year's Day), March 26 (Maundy Thursday), March 27 (Good Friday), March 30 (Easter Monday), April 24 (Store Bededag), May 7 (Ascension Day), May 18 (Whit Monday), June 5 (Constitution Day), December 25, 26 (Christmas).

CZECHOSLOVAKIA—(THE PRESS)

Newspapers and periodicals (like radio and television), which had been influential in bringing about the resignation of President Novotný on March 22nd, were among the first targets of the occupying forces of the Warsaw Pact countries in August. However, the week following the August 21st invasion probably saw the peak of press freedom in Czechoslovakia since, with most editorial offices occupied by troops, papers were published in secret and therefore without any official controls. Special editions were often distributed free in the streets of Prague.

On August 27th Mr. Dubček announced temporary restrictions on the freedom of expression, and on September 3rd the new Government Press and Information Office published regulations limiting comment on the role of the occupying forces and on ideological questions. Censorship was officially restored on September 13th, 1968, when the National Assembly accepted government recommendations to re-impose pre-publication controls.

Throughout 1969 the Czechoslovak Government imposed restrictions on the Press—purging editorial boards, suspending and banning newspapers and periodicals. *Literární listy*, the journal of the Writers' Union which ceased publication after the occupation in 1968, and reappeared as *Listy* in October of that year, was officially banned in May 1969. *Reportér*, the weekly news magazine published by the Journalists' Union, which had played an influential role in political and cultural life and had suffered temporary suspension after the occupation, was also banned in May 1969. Three other papers, *Práce*, *Svět v Obrazech*, and *My* 69 were suspended for three months. *Smena na Nedeli*, published in Bratislava, was suspended for two months in July, and *Politika* was banned to be replaced by *Tvorba* with Jiří Hajek as editor. Later in the year three other papers were banned, *Doba* and *Filmové a Televizní* in September, and *Cervený Kvet* in October. Changes were made on the editorial boards of many papers including *Práce*, *Mladá Fronta*, *Rudé Právo*, and *Nova Svoboda* (Ostrava).

The Czechoslovak people far exceed other East European nations in their consumption per head of newspapers and magazines. There are twenty-eight daily papers, including nine in Prague and nine (one in Hungarian and the rest in Slovak) in Bratislava. About 500 weekly papers and magazines and an even greater number of less frequent periodicals are also published. In addition, farms and factories produce their own daily or weekly news-sheets, dealing mainly with local issues.

The most widely read and influential papers are the Prague dailies headed by *Rudé právo*. This paper, modelled on the Moscow *Pravda*, is the chief organ of the Czechoslovak Communist Party. It is eight pages long and receives an official allocation of newsprint. Produced both in Prague and Bratislava, it has a nation-wide circulation of 900,000 copies. Its sister paper, the Slovak C.P.'s *Pravda* (270,000), is the leading provincial daily. The Czech and the Slovak Trade Union organs are *Práce* and *Práca* in their respective cities. Two other important metropolitan dailies are *Lidová demokracie* and *Svobodné slovo*, produced respectively by the People's Party and the Socialist Party.

There are also many small circulation periodicals—often of very high quality—dealing with specialized subjects. One should also note several very popular and colourful women's magazines, such as *Vlasta* (650,000), and the satirical *Dikobraz*, famous for its political cartoons.

The Czechoslovak Union of Writers was re-formed during 1969 and has now been split into separate Czech and Slovak Unions. It is as yet undecided whether to retain the Union of Czechoslovak Writers as an umbrella organization. The Presidium of the Czech Journalists' Union resigned in September 1969, as a protest against

censorship of the Press. At the same time the Prague City Journalists' Association was dissolved—to be put in the hands of a thirty-man commission.

The national news agency, Československá Tisková Kancelář (Četeka), receives a state subsidy and is controlled by the Ministry of Information.

OUTLYING POSSESSIONS

THE FAROE ISLANDS

The Faroes are a group of islands in the Atlantic north-west of Scotland and constitute a self-governing community within the Danish State. There are 19 islands altogether, 18 of which are inhabited. The capital is

police matters. Local administration and legislation are carried out by a publicly elected body called the "Lagting", which has 29 members. The Islands elects two members to the Danish Folketing.

The economy of the islands depends chiefly on fishing and in March 1964 the islands' fishing limits were extended to 12 miles.

GREENLAND

Greenland is the largest island in the world, with a total area of 840,000 square miles and a population of about 44,000. Principal occupations are fishing, hunting, and sheep rearing.

All matters relating to the administration of Greenland come under the Ministry for Greenland, although there is a tendency towards autonomy and administration by Provincial Council (*Landsraad*), which is the highest

elected body in Greenland. Since 1967 its chairman has been democratically elected, and no law concerning Greenland can be passed by the Danish Parliament without the consultation of the Greenland Provincial Council. There are also a number of local councils, and some areas are administered by sheriffs. Under the 1953 Constitution, Greenland became part of the Danish Kingdom and has two seats in the Folketing.

THE PRESS

Denmark's long press history dates from the first newspaper published in 1666, but it was not until press freedom was introduced by law in 1849 that newspapers began to assume their present importance.

The freedom of the press is embodied in paragraph 77

Most newspapers and magazines are privately owned and published by joint concerns, co-operatives or limited liability companies. Ownership is usually restricted in number or confined to residents of the area in which the paper circulates.

No newspaper is directly owned by a political party. A private company, in which various trade unions own the shares, publishes the eight Social Democrat papers (the most important being *Aktuelt*), which are heavily subsidized by the unions.

The main concentration of papers is held by the *Berlingske Tidende* Group which owns *Berlingske Tidende*, *Berlingske Aftenavis*, *B.T.*, and the provincial *Jydske Tidende*, also three weekly magazines and a large printing works. In all, this family organization controls some 25 per cent of the total daily newspaper circulation.

Another company, *Politiken A/S*, owns several dailies, including *Politiken* and *Ekstra Bladet*, one weekly and a large publishing house. *De Bergske Blade* owns a group of six Liberal papers.

Other newspapers have a far more influential place in

THE CONSTITUTION

The main features of the 1953 Constitution are:

- (1) Changes in the succession law allowing a daughter to succeed to the throne in the absence of sons;
- (2) Abolition of the Upper House and the introduction of single-chamber government;
- (3) The enfranchisement of Greenland, which will in future send two members to Parliament; and
- (4) Clause 20, which enables Parliament to assign some of its rights to an international body in the interest of international co-operation.

The form of government is a limited (constitutional) monarchy. The legislative authority rests jointly with the Crown and Parliament. Executive power is vested in the Crown, and the administration of justice is exercised by the courts. The King can constitutionally "do no wrong". He exercises his authority through the Ministers appointed by him. The Ministers are responsible for the government of the country. The Constitution establishes the principle of Parliamentarism under which individual Ministers of the whole Cabinet must retire when defeated in Parliament by a vote of no confidence.

The King acts on behalf of the State in international affairs. Except with the consent of the Parliament, he

cannot, however, take any action which increases or reduces the area of the Realm or undertake any obligation, the fulfilment of which requires the co-operation of the Parliament or which is of major importance. Nor can the King, without the consent of the Parliament, terminate any international agreement which has been concluded with the consent of the Parliament.

Apart from defence against armed attack on the Realm or on Danish forces, the King cannot, without the consent of the Parliament, employ military force against any foreign power.

The Parliament is an assembly consisting of not more than 179 members, two of whom are elected in the Faroe Islands and two in Greenland. It is called the Folketing. Danish nationals, having attained 21 years of age, with permanent residence in Denmark, have the franchise and are eligible. The members of the Folketing are elected for four years. Election is by a system of proportional representation, with direct and secret ballot on lists in large constituencies. A bill adopted by the Folketing may be submitted to referendum, when such referendum is claimed by not less than one-third of the members of the Folketing and not later than three days after the adoption. The bill is void if rejected by a majority of the votes cast, representing not less than 30 per cent of all electors.

DENMARK—(POLITICAL PARTIES, JUDICIAL SYSTEM)

buted almost equally between the rural districts, the towns and built-up areas, so that it may claim to have adherents in all classes of the community. The main planks in the Party platform are free trade, a minimum of State interference, and the adoption, in matters of social expenditure, of a modern general social security system. Pres. of Party Organization Foreign Sec. POUL HARTLING; Chair. Parliamentary Group HENRY CHRISTENSEN; Sec.-Gen. of the Party KURT SORENSEN. Chief party organs: *Fyns Tidende*, *Vestkysten*, *Frederiksborg Amts Avis*, *Venstres Maanedssblad* (monthly), *Dansk Politik* (monthly).

Konservative Folkeparti (*Conservative Party*): Nyrops-gade 19, Copenhagen; founded in 1916, replacing the former Højreparti (the Right-Wing or old Conservative Party). Between 1870 and 1901 the old Conservative Party formed a number of cabinets, mainly under J. B. S. ESTRUP. The Party advocates free initiative and the maintenance of private property, but recognizes the right of the State to take action to keep the economic and social balance. From 1950-53 formed coalition government with the Moderate-Liberal Party, and together with Radical Liberal Party and Moderate-Liberal Party in 1968-. Chair. K. THESTRUP; Gen. Sec. KAI AAGE ØRNSKOV; Political Spokesman E. HAUNSTRUP CLEMMENSEN. Chief party organs: *Berlingske Tidende*, *Aarhus Stiftstidende*, *Fyens Stiftstidende*.

Socialistisk Folkeparti (*Socialist People's Party*): Folketinget, Christiansborg, Copenhagen; f. 1959, with Socialist aims, by AKSEL LARSEN, formerly Chairman of the Communist Party; 11 seats in Parliament; Chair. SIGURD ØMANN; Sec. KNUD STENBÆK. Chief party organ: *S.F. Bladet* (weekly).

Leading members in the Folketing: AKSEL LARSEN, MORTEN LANGE.

Radikale Venstre Parti (*The Radical Liberal Party*): Det radikale Venstres kontor, Christiansborg Slot, Copenhagen K; founded in 1905. Its chief adherents are the smallholders and certain intellectuals. It held office 1909-10, 1913-20, and has taken part in the coalition governments of 1929-40, 1940-43, May-Nov. 1945, May 1957-Sept. 1964, and Feb. 1968-. The main points in its programme are reduction of armaments, supporting peace, international co-operation and the United Nations, arbitration in conflicts between workers and employers, the establishment of smallholdings, social reform, and State control of trusts and monopolies. Advocates strengthening of private enterprise. Chair. BERNHARD BAUNSGAARD; Sec. S. BJØRN HANSEN; Chief party organs: *Politiken*, *Skive Folkeblad*, *Holbæk Amts Venstreblad*, *Roskilde Tidende*.

De Uafhængige (*Independent Party*): Christiansborg Slot, Copenhagen K; f. 1953; Chair. IVER POULSEN.

Danmarks Retsforbund: Ved Stranden 8, Copenhagen K; made its appearance in active politics about 1920. Its programme is closely allied to Henry George's teachings (single tax, free trade). Chair. IB CHRISTENSEN. Party organ: *Ret og Frihed* (monthly).

Danmarks Kommunistiske Parti (*Danish Communist Party*): Copenhagen K; Dr. Tvaergade 3; f. 1919. At the 1932 election it was for the first time represented in the Folketing, and in May 1945 for the first time in a (coalition) government. Leader KNUD JESPERSEN. Chief party organ: *Land og Folk*.

Left Socialist Party: f. 1967 as a result of a split from the Socialist People's Party. Collective leadership.

JUDICIAL SYSTEM

In Denmark the judiciary is independent of the Government. Judges are appointed by the Crown on the recommendation of the Minister of Justice and cannot be dismissed except by judicial sentence.

The judicial system in Denmark consists of three "Instances": (1) Supreme Court (a President and 14 judges); (2) two High Courts, "Landsretter", the Eastern for the islands, the Western for Jutland; (3) about 100 "lower courts" spread over the country. Appeal from the lower courts is to the High Court. Important cases, however, are commenced in the High Court, from which the Supreme Court is the court of appeal. There is a special Maritime and Commercial Court in Copenhagen, consisting of a President and Vice-President with legal training and a number of commercial and nautical assessors; and also a Labour Court, which deals with labour disputes.

An Ombudsman is appointed by Parliament, after each general election, and is concerned with defects in the laws or administrative provisions. He must render to Parliament an annual report.
